

Lesson 36: Fugacity and Fugacity Coefficients: Species in Solution

Read: Section 10.6, pp. 382-388

Problems: 10.21

Objectives:

1. Understand how to estimate liquid-phase fugacity and fugacity coefficients.
2. Be able to express the equilibrium condition for phase equilibrium in term of fugacity.
3. Understand how liquid phase activity coefficients relate to fugacity.

Notes:
