MEMORANDUM FOR Cadets**SUBJECT:** FOREWORD: Academic Program (Redbook), AY 2016-2017

1. Henry Ford once said, "You can't build a reputation on what you're going to do." If you are going to establish a reputation as a student, you must start doing it early. The first step in that process is designing an academic program that is best for you and challenges you to strive for excellence.

2. Developing a four-year academic program is a complex process that demands your close and early attention. We have taken a number of steps to assist you in that task. Help is available through Company Academic Counselors (CAC), Department Academic Counselors (DAC), and the Counseling Section in the Academic Affairs and Registrar Services, Office of the Dean. But the first and most important step is for you to understand the academic program at West Point and the opportunities it offers. I encourage you to read and use the Redbook which is designed to provide the information you will require to create a program that meets your needs and capabilities.

3. The Redbook includes a complete set of field tables for the majors and minors available to each class, as well as a listing of all courses, by department, offered in each academic year and term. You should use this volume as you would any reference document and refer to it whenever you have a question concerning a specific offering.

4. I wish you the best of luck during the upcoming academic year and continued success throughout your entire West Point experience.

CINDY R. JEBB, Ph.D.
Brigadier General, U.S. Army
Dean of the Academic Board

MEMORANDUM FOR Cadets, Staff, and Faculty**SUBJECT:** FOREWORD: Academic Program (Redbook), AY 2016-2017 – Update

1. This Redbook is a version that updates the AY16-17 Redbook (dtd 10 February 2016) with changes for the Class of 2019 and 2020 covering parts of the revised core curriculum and an updated Part 1 description of the Academic Program. Like previous Redbooks, this version also contains all other courses offered beginning in academic year 2017 and descriptions of the curriculum for the Classes of 2018, 2017 and 2016. It also contains the majors and minors for the Class of 2020 and previous classes back to 2001. This volume supersedes all other Redbooks. Used as a reference, this Redbook for academic year (AY) 2016-2017 will allow cadets to design their academic programs.
2. Parts 1 and 2 of the Redbook present information about the United States Military Academy's educational philosophy, graduation requirements, academic standards, core curriculum, and academic discipline descriptions. Part 3 presents a catalog of all the courses offered at the Military Academy.
3. Parts 4 and 5 provide different approaches to the majors and minors offered to each class. Throughout most parts of the Redbook are interconnecting links which allow you to move through and view various aspects and descriptions of the curriculum.
4. Revisions to the academic majors for the Class of 2020 and other changes since the last Redbook are listed, by department, in the enclosure following this memorandum.
5. Cadets in all classes should review their academic programs with their Company Academic Counselors (CAC) or Department Academic Counselors (DAC) as appropriate.
6. We welcome suggestions that will improve the Redbook. Forward suggestions, as well as corrections, to the Office of the Dean, ATTN: Academic Affairs and Registrar Services (AARS).

FOR THE DEAN OF THE ACADEMIC BOARD:

Enclosure: as

JEAN S. BLAIR
Vice Dean
United States Military Academy

Curricular Changes (Reviewed Engineering Sequences (3CES) – New/Changed Courses)

Department of Behavioral Sciences and Leadership

(Addendum to Annual Report for AY16-1)

- Add new course PL250 Neurocognitive Foundations of Behavior (2017-1), 3.0 credits

Department of Chemistry and Life Science

- CH375 Introduction to Biology – change title to Advanced Biology; expand laboratory program; increase credit hours from 3.5 to 4.0 (BS=4.0), effective term 2017-1

Department of Civil and Mechanical Engineering

- Mechanical Engineering 3CES – remove from the curriculum effective for the Class of 2019
- Civil Engineering 3CES – demonstrated support to the new APGs; rename as the Infrastructure Engineering 3CES effective for the Class of 2019

Department of Electrical Engineering and Computer Science

- Cyber Engineering 3CES – demonstrated support to the new APGs; change course numbering system to CY300/350/450 to replace IT300, IT350, CS482 which will be archived when the new course numbers become effective. Scope and all other pertinent data for the courses remains the same.
- Electrical Engineering 3CES – demonstrated support to the new APGs; some prerequisite modification due to changes in the math and science courses in the new curriculum
- IT305 Theory and Practice of Military IT Systems – change course designator and title to CY305 Cyber Foundations; update scope to modernize the language; change special requirements to “none” effective 2017-1
- IT355 Advanced Theory and Practice of Military IT Systems – change course designator and title to CY355 Cyber Foundations – Computing; update scope to modernize the language; target population to include CS and IT majors and Cyber Minors; update special requirements effective 2017-1

Department of Geography and Environmental Engineering

- Environmental Engineering 3CES – demonstrated support to the new APGs; some prerequisite modification due to changes in the math and science courses in the new curriculum

Department of English and Philosophy

- Add new course EN100 Foundational Writing (2017-1), 3.0 credits

Department of Geography and Environmental Engineering

- Environmental Engineering 3CES – demonstrated support to the new APGs; some prerequisite modification due to changes in the math and science courses in the new curriculum

Department of History

- Add new course HI464 The Visiting Professor Elective (2017-1), 3.0 credits

Department of History (continued)

- HI105 Advanced History of the United States – remove Special Requirements effective 2017-1
- HI155 Advanced History of the United States – remove Special Requirements effective 2017-1
- Add new course, HI108A Regional Studies in World History - Africa (2017-1), 3.0 credits
- Add new course, HI108E Regional Studies in World History - East Asia (2017-1), 3.0 credits
- Add new course, HI108L Regional Studies in Word History - Latin America (2017-1), 3.0 credits
- Add new course, HI108M Regional Studies in World History - Middle East (2017-1), 3.0 credits
- Add new course, HI108R Regional Studies in World History - Russia (2017-1), 3.0 credits
- Add new course, HI108U Regional Studies in World History - Europe (2017-1), 3.0 credits
- Add new course, HI158A Advanced Regional Studies in World History - Africa (2017-1), 3.0 credits
- Add new course, HI158E Advanced Regional Studies in World History - East Asia (2017-1), 3.0 credits
- Add new course, HI158L Advanced Regional Studies in Word History - Latin America (2017-1), 3.0 credits
- Add new course, HI158M Advanced Regional Studies in World History - Middle East (2017-1), 3.0 credits
- Add new course, HI158R Advanced Regional Studies in World History - Russia (2017-1), 3.0 credits
- Add new course, HI158U Advanced Regional Studies in World History - Europe (2017-1), 3.0 credits
- Archive HI108/158 effective 2017-1

Department of Law

- LW403 Constitutional and Military Law – decrease credit hours from 3.5 to 3.0, effective 2017-1

Department of Physics and Nuclear Engineering

- Nuclear Engineering 3CES – demonstrated support to the new APGs; updated requisites

Department of Social Sciences

- Add new course, SS458 Applied Topics in Grand Strategy (2017-1), 3.0 credits

Department of Systems Engineering

- Systems Engineering 3CES – demonstrated support to the new APGs

Department of Systems Engineering (continued)

- EM402 Engineering Management Design I - increase credit hours from 3.5 to 4.0 (ET=4.0) effective 2019-1 (*pending PEV review of ET credit hour content*)
- EM403 Engineering Management Design II - increase credit hours from 3.5 to 4.0 (ET=4.0) effective 2019-2 (*pending PEV review of ET credit hour content*)
- SE402 Systems Design and Management I - increase credit hours from 3.5 to 4.0 (ET=4.0) effective 2019-1 (*pending PEV review of ET credit hour content*)
- SE403 Systems Design and Management II - increase credit hours from 3.5 to 4.0 (ET=4.0) effective 2019-2 (*pending PEV review of ET credit hour content*)

PART I: THE ACADEMIC PROGRAM

PART I: THE ACADEMIC PROGRAM

Note: This is an interim version of Part 1 for GY2019. A final version will be published in January 2017.

USMA EDUCATIONAL PHILOSOPHY

USMA Mission: To educate, train, and inspire the Corps of Cadets so that each graduate is a commissioned leader of character committed to the values of Duty, Honor, Country; and prepared for a career of professional excellence and service to the Nation as an officer in the United States Army.

WPLDS: The West Point Leader Development System (WPLDS) is designed to achieve this mission and begins by defining the institution's leader development outcomes. Upon commissioning, West Point graduates will:

- Live honorably and build trust.
- Demonstrate intellectual, military, and physical competence.
- Develop, lead, and inspire.
- Think critically and creatively.
- Make sound and timely decisions.
- Communicate and interact effectively.
- Seek balance, be resilient, and demonstrate a strong and winning spirit.
- Pursue excellence and continue to grow.

While many good colleges have objectives similar to those of the Military Academy, the Academy's mission adds a dimension that makes West Point unique. It is the sole college in the nation whose only responsibility is to prepare every one of its students for professional service as a regular Army officer. The academic program, like the other aspects of the West Point environment, is designed to foster development in leadership, moral courage, and integrity essential to such service.

ACADEMIC PROGRAM GOALS

In support of WPLDS, the Academic Program has established the following overarching goal and seven Academic Program Goals to help guide the academic development of cadets.

The Overarching Academic Goal: Graduates integrate knowledge and skills from a variety of disciplines to anticipate and respond appropriately to opportunities and challenges in a changing world.

1. Communication: Graduates communicate effectively with all audiences.

- 1.1 Listen actively, read critically, and develop an informed understanding of the communications of others.
- 1.2 Speak and write using Standard American English.
- 1.3 Effectively convey meaningful information to diverse audiences using appropriate forms and media.
- 1.4 Communicate in a foreign language.
- 1.5 Use sound logic and relevant evidence to make convincing arguments.

2. Critical Thinking and Creativity: Graduates think critically and creatively.

- 2.1 Identify the essential aspects of a situation and ask relevant questions.
- 2.2 Integrate knowledge and skills from a variety of disciplines.
- 2.3 Make meaningful connections and distinctions among diverse experiences and concepts.
- 2.4 Reason both quantitatively and qualitatively.
- 2.5 Think innovatively and accept risk to pursue solutions in the face of ambiguity.
- 2.6 Value reflection and creativity; envision possibilities.

3. Lifelong Learning: Graduates demonstrate the capability and desire to pursue progressive and continued intellectual development.

- 3.1 Demonstrate the willingness and ability to learn independently.
- 3.2 Engage successfully in deliberate self-directed and collaborative learning experiences.
- 3.3 Pursue self-awareness and embrace the responsibility for personal intellectual development.
- 3.4 Pursue knowledge in areas of personal or professional interest.

4. Ethical Reasoning: Graduates recognize ethical issues and apply ethical perspectives and concepts in decision making.

- 4.1 Understand the intellectual foundations of ethical principles.
- 4.2 Recognize ethical components of problems and situations.
- 4.3 Examine and evaluate different ethical perspectives, principles, and concepts in context.
- 4.4 Apply ethical perspectives and concepts in solving complex problems, including those found in military settings.

5. Science, Technology, Engineering, and Mathematics: Graduates apply science, technology, engineering, and mathematics concepts and processes to solve complex problems.

- 5.1 Apply mathematics, science, and computing to model devices, systems, processes, or behaviors.
- 5.2 Apply the scientific method.
- 5.3 Collect and analyze data in support of decision making.
- 5.4 Apply an engineering design process to create effective and adaptable solutions.
- 5.5 Explain and apply Computing and Information Technology concepts and practices in the context of the Cyber Domain.

6. Humanities and Social Sciences: Graduates apply concepts from the humanities and social sciences to understand and analyze the human condition.

- 6.1 Understand, analyze, and know how to influence human behavior.
- 6.2 Analyze the history, diversity, complexity, and interaction of cultures.
- 6.3 Analyze political, legal, military, and economic influences on social systems.
- 6.4 Engage in and reflect on cross cultural experiences.
- 6.5 Integrate the methodologies of the humanities and social sciences in decision-making.

7. Disciplinary Depth: Graduates integrate and apply knowledge and methodological approaches gained through in-depth study of an academic discipline.

- 7.1 Apply disciplinary tools, methods of inquiry, and theoretical approaches.
- 7.2 Identify and explain representative questions and arguments of their chosen disciplines.
- 7.3 Recognize limits of a discipline as well as areas in which it contributes to intellectual inquiry and problem solving.
- 7.4 Synthesize knowledge and concepts from across their chosen disciplines.
- 7.5 Contribute disciplinary knowledge and skills as a part of a collaborative effort engaging challenges that span multiple disciplines.

ACCREDITATION

The United States Military Academy is accredited by the Middle States Commission on Higher Education, 3624 Market Street, Philadelphia, PA 19104. (267-284-5000) The Middle States Commission on Higher Education is an institutional accrediting agency recognized by the U.S. Secretary of Education and the Council for Higher Education Accreditation.

At the United States Military Academy programs in Chemical Engineering, Civil Engineering, Electrical Engineering, Engineering Management, Environmental Engineering, Mechanical Engineering, Systems Engineering, and Nuclear Engineering are accredited by the Engineering Accreditation Commission of ABET; programs in Computer Science and Information Technology are accredited by the Computing Accreditation Commission of ABET, <http://www.abet.org>.

The Geospatial Information Science Major is accredited by the US Geospatial Intelligence Foundation (USGIF) and the Chemistry Major has an American Chemical Society (ACS)-Certified Degree Program.

OVERVIEW OF THE ACADEMIC PROGRAM

The United States Military Academy's curriculum has two significant structural features. The first is a solid core of twenty-four courses that the Academy considers essential to the broad base of knowledge necessary for all graduates and a three-course core engineering sequence for those cadets who do not choose to major in engineering. This core curriculum, when combined with physical education and military science, constitutes the Military Academy's "professional major." The second structural feature is the opportunity to specialize and explore an area in depth through the selection of an academic major consisting of not less than thirteen required or elective courses.

The two charts below further highlight an overview of the academic program. The first chart presents the curriculum in

overall blocks of course requirements. The second chart presents the typical sequence of courses taken over eight semesters during a cadet's 47-month experience.

Fig 1: Overview of the Academic Program – Class of 2019 and beyond. Courses in blue are Math, Science and Engineering (MSE) courses. Courses in red are Humanities and Social Science (HSS) courses. Courses in black are the Officership course and courses affiliated with each academic major. Courses in green are credit bearing courses from the Military and Physical Programs. Integrative Threads will be further defined in the final version of Part 1-GY2019 in January 2017.

CORE CURRICULUM

The foundation of the academic program at USMA is 24 core courses and three courses in an engineering sequence for those cadets who do not choose a major in engineering. For most cadets the first year is a common academic experience including, in term 2, the selection of a major followed by the selection of a three-course engineering sequence in the Fall of Third Class year.

Within the core curriculum, there is a mathematics, science and engineering (MSE) sequence that is intended to provide each cadet with a fundamental knowledge of the experimental and analytic techniques of the basic sciences.

This sequence, called a thread, begins in Fourth Class year with two semesters of mathematics, one semester of chemistry, one semester of physical geography and one semester of calculus-based physics. Physical geography or physics may be delayed until Third Class year depending on faculty resources and cadet preferences. The MSE sequence continues in Third Class year with one semester of statistics and an additional science depth course that cadets select based on their major and their interests.

The core curriculum also includes an information technology/cyber sequence (IT/CYBER) designed to ensure that every academy graduate is comfortable with and capable of securely using computers and information technology in an Army that must fight and win in an overarching cyber domain. IT/CYBER skills are first developed through an introductory information technology/cyber course in the Fourth Class year and the integration of computer and cyber applications throughout the core curriculum and particularly in the IT/CYBER requirement in the Second or First Class year. The IT/CYBER requirement may be fulfilled with the core course, CY305, Cyber Foundations or through existing course coverage of cyber topics in particular majors (in this case, the cadet will be required to fulfill a Science, Technology, Engineering and Math (STEM) depth requirement with another STEM course – see listing of core courses below).

Additionally, the core curriculum includes a strong pre-professional sequence of social sciences, behavioral sciences, and humanities to develop an awareness of the people, government, and society that the commissioned officer will

serve. This sequence begins in Fourth Class year with two semesters of history, one semester of literature, and one semester of psychology. It continues in Third Class year with one semester each of political science, philosophy, and economics. Second Class year includes one semester of international relations, one semester of military history, and one semester of military leadership. The First Class year's contribution to this sequence of professional development is found in a one-semester course in constitutional and military law and one semester of a capstone course titled "Officership."

In Fourth Class year, cadets begin a four year integrated program aimed at producing a high level of competence in written and oral communication skills. English composition in the Fourth Class year is the foundation for our West Point Writing Program (WPWP) which focuses on writing and communication skills across the curriculum. WPWP course distribution requirements include courses in the following categories: First Year Composition (FYC – 1 course), Writing in the Core (WiC \geq 5 courses), Writing in the Major (WiM – 1 course) and Writing in the Profession (WiP – 2 courses).

Most cadets will begin their study of a foreign language in Third Class year. If a cadet expresses an interest, however, the sequence may be started in Fourth Class year. All cadets will take at least two semesters of one of the eight foreign languages offered. Course work will present perspectives from another culture, develop the ability to learn another language, provide an introductory level of proficiency in the language selected, and provide a firm foundation for further language study.

These features mean that the first two academic semesters are a common core experience for the majority of cadets, and most of the second two semesters are common as well. Individual alterations to the typical sequence can be made based on specific needs and capabilities. Cadets are encouraged to work closely with academic counselors when designing their academic programs.

Designed to provide educational breadth, the 24 core courses are listed below along with alternate sequences or courses.

Chemistry

CH101 General Chemistry I

Alternate course:

CH151 Advanced General Chemistry

Information Technology/Cyber

IT105 Introduction to Computing and Information Technology

Alternate course:

IT155 Advanced Placement Introduction to Computing and Information Technology

Economics

SS201 Economics: Principles and Problems

Alternate course:

SS251 Advanced Economics: Principles and Problems

English

EN101 Composition

EN100, Foundational Writing, may be required as an additional course

Foreign Language

Two courses required; sequence determined by the Department of Foreign Languages based on cadet preferences.

History

HI105 History of the United States

HI108X Regional Studies in World History

Alternate sequence:

HI155 Advanced History of the United States

HI158X Advanced Regional Studies in World History

International Relations

SS307 International Relations

Alternate course:

SS357 Advanced International Relations

Law

LW403 Constitutional and Military Law

Leadership

PL100 General Psychology for Leaders

PL300 Military Leadership

Alternate sequence:

PL150 Advanced General Psychology for Leaders

PL350 Advanced Military Leadership

Literature

EN102 Literature

Alternative course:

EN152 Advanced Literature

Mathematics

MA103 Mathematical Modeling and Introduction to Calculus

MA104 Calculus I

MA206 Probability & Statistics

Alternative sequence:

MA103 Mathematical Modeling and Introduction to Calculus

MA205 Calculus II

MA206 Probability & Statistics

Alternative sequence:

MA153 Mathematical Modeling and Introduction to Differential Equations

MA255 Advanced Multivariable Calculus

MA206 Probability & Statistics

MA100 Precalculus Mathematics - may be required as an additional course

Military History

HI302 History of the Military Art

Philosophy

PY201 Philosophy and Ethical Reasoning

Alternate course:

PY251 Advanced Philosophy and Ethical Reasoning

Physical Geography

EV203 Physical Geography

Physics

PH205 Physics I

Alternate course:

PH255 Advanced Physics I

Political Science

SS202 American Politics

Alternate course:

SS252 Advanced American Politics

Science Depth

Cadets choose one of the following courses based on their academic major and their interest:

CH102 General Chemistry II, or

CH275 Biology, or

PH206 Physics II

PH206 Physics II

Alternate courses:

CH375 Advanced Biology, or

PH256 Advanced Physics II

Stem Depth

Cadets choose one of the following courses based on their academic major and the need to satisfy the IT/CYBER requirement:

CY305 Cyber Foundations, or
MA205 Calculus II, or
CH102 General Chemistry II, or
CH275 Biology, or
PH206 Physics II

Alternate courses:

CY355 Cyber Foundations – Computing, or
CH375 Advanced Biology, or
PH256 Advanced Physics II

CORE ENGINEERING SEQUENCES

Cadets will seek counsel from their DACs in the beginning of their Third Class year to request a CES that complements their academic major and interests. The Registrar will fill CES enrollments based on cadet preferences and faculty availability.

CY - Cyber Engineering

CY300 Programming Fundamentals
CY350 Network Engineering and Management
CY450 Cyber Security Engineering

EE - Electrical Engineering

EE300 Fundamentals of Digital Logic
EE350 Basic Electrical Engineering
EE450 Military Electronic Systems

EV - Environmental Engineering

EV300 Environmental Science
EV350 Environmental Engineering Technologies
EV450 Environmental Engineering for Community Development

IN - Infrastructure Engineering

MC300 Fundamentals of Engineering Mechanics and Design
CE350 Infrastructure Engineering
CE450 Construction Management

NE - Nuclear Engineering

NE300 Fundamentals of Nuclear Engineering
NE350 Radiological Engineering Design
NE450 Nuclear Weapons and Weapons Effects

SE - Systems Engineering

SE300 Introduction to Systems Engineering
SE350 Systems Modeling and Design
SE450 Applied Systems Design and Decision Making

THE MAJOR

The United States Military Academy's curriculum requires cadets to complete at least one disciplinary depth component consisting of an academic major with a minimum of 13 courses. Part 4 of the Redbook describes each academic major in detail.

In general, an academic major at West Point consists of at least three components. The foundation of the major can be found in a study-in-depth component which consists of a minimum of nine courses that may be a mixture of required and elective courses. The second component of every major is a collection of three Complementary Support Courses (CSCs). The purpose of these courses is to provide cadets a broader understanding of their academic majors through disciplinary diversity and choice. The courses support the major by either building a foundation of knowledge otherwise absent from the Core Curriculum but required for a complete major or enriching the major by providing alternative viewpoints or modes of thought. The final component of each major is an integrative experience course or courses. The integrative experience is designed to synthesize knowledge and skills nurtured in the core and majors programs. Situated within the major, but drawing upon all goals, integrative experiences present cadets with professionally relevant situations that include political, social, economic, and technological issues and challenge cadets to anticipate and respond appropriately to opportunities and challenges in a changing world.

The listing of each academic major in Part 4 of the Redbook also includes entries for the select core requirements. Some academic majors may require certain courses to fulfill these requirements: Science Depth, STEM Depth, IT/Cyber, Core Engineering Sequence, and the West Point Writing Program Writing-in-the-Major course.

WHAT CONSTITUTES A COURSE

Although 'course' is a commonly-used word in curriculum descriptions, USMA has the following requirements for an educational experience to be termed a 'course.' Each course is different in many specific ways. In general, however, there are guidelines for any course of instruction which contribute to its being worthy of academic credit. The development of a course along the following lines is what is required for a course to be included for academic credit on a cadet's academic transcript.

Course objectives that require new learning experiences. Learning involves a change in capabilities or dispositions that can be attributed to experience. "Change" usually implies students acquiring a new capability or disposition: what they know (knowledge), how they use what they know (intellectual skills), how they think, what they can do (physical skills), or what they value (attitudes and values). Learning is not normally considered as maintenance of already acquired capabilities. A course of instruction then is the purposeful arrangement of experiences designed to facilitate intended change in students' capabilities or dispositions which we represent by course objectives.

A valid comprehensive method of evaluating student mastery of course objectives. Student evaluation is a critical component of the learning process and must be present in a course of instruction. We recognize that evaluation methods and the frequency of evaluation will vary as a function of course objectives, however, the evaluation method should assess students mastery of course objectives and should permit valid inferences about student learning.

If a course of instruction meets the preceding two guidelines, then the awarding of credit hours should be based on a calculation of planned time (40 hours of planned time associated with 1.0 credit hour). A 3.0 credit hour course usually

requires 40 instructor contact hours with two hours of preparation required for each hour in class: 40 lessons at 3hrs/lesson = 120 hours = 3.0 credit hours.

GRADING PHILOSOPHY AND GRADING POLICIES

As a critical and essential part of the educational philosophy, it is important to articulate explicitly the Dean's academic grading policies and philosophies.

Grading Philosophy

The foundation of our grading is a commitment to evaluate cadets based on their achievement of announced course objectives. Satisfactory performance on graded course requirements must therefore reflect satisfactory progress toward meeting course objectives. We will establish reasonable academic standards of achievement in advance of cadets taking a course and taking tests. Our goal is not to rank order cadets against each other based on any preconceived concept of an appropriate grade distribution (curving). Instead we challenge cadets to meet announced standards of performance and assign grades based on their success in doing so. The principal responsibility for academic performance rests with each individual cadet.

Policies

Instructors are responsible for providing sound instruction, measurement of cadet attainment, and a reasonable amount of additional assistance. Instructors shall strive to motivate and inspire cadets to achieve their full academic potential. Beyond these obligations, the responsibility for academic success or failure rests with each cadet.

Instructors will provide cadets with a statement of the objectives for each course. Cadets will be evaluated against these objectives. Departments will avoid evaluation and grading practices that encourage reliance on curving.

However compiled numerically, letter grades ranging from A to F will be the standard means of communicating academic achievement.

Instructors will promptly provide cadets an evaluation of each graded course requirement; the evaluation will be a letter grade or a numerical score easily convertible by the cadet to a letter grade.

GRADUATION REQUIREMENTS AND ACADEMIC STANDARDS

Regulations for the United States Military Academy state that cadets of the First Class who have been found by the Academic Board successfully to have completed the course of instruction including academic, military, and physical education; to have maintained the standards of conduct; and to possess the moral qualities, traits of character and leadership essential for a graduated cadet; shall receive a diploma signed by the Superintendent, the Commandant of Cadets, and the Dean of the Academic Board; and shall thereupon become a graduate of the United States Military Academy with a degree of Bachelor of Science.

ACADEMIC REQUIREMENTS

To satisfy the academic portion of these graduation requirements, a cadet must:

- Complete successfully or validate each course in the core curriculum, including the common core courses and a core engineering sequence
- Satisfy the requirements of at least one major
- Successfully complete 40 academic courses of at least 3.0 credit hours each. Validated and remedial courses cannot count towards this requirement and
- Achieve a 2.00 Cumulative Quality Point Average (CQPA) in the courses above. The CQPA is an index of cumulative performance in all academic, military science, and physical education courses. It generally corresponds to grade point average (GPA) or grade point ratio (GPR) in other colleges and universities.

As part of the West Point experience, a cadet is required to complete requirements and achieve minimum standards in three developmental programs within the USMA West Point Leader Development System (WPLDS). Within the WPLDS, the military program score (MPS), the physical program score (PPS), and the academic program score (APS) combine to form the cadet performance score (CPS). A complete explanation of the calculation of the CPS, which

ultimately determines a cadet's class rank, can be found at this link ([CPS Calculation](#)). The APS is based on performance in courses within the Academic Program and does not include military science and physical education courses. Cadets who are deficient in one or more of the three developmental programs for failure to maintain minimum program performance standards may be considered by the Academic Board for separation. Graduation requirements for all three programs — academic, military and physical — and institutional (non-program) requirements by class year are available through the following link: Graduation Class of [2019–2020](#)

ACADEMIC STANDARDS

The primary responsibility for attaining satisfactory academic performance rests with the individual cadet. Cadets must strive to achieve their highest level of academic excellence. To meet this responsibility, cadets have an obligation to know their academic status, manage their time, and establish priorities in such a manner as to accomplish this goal.

The performance of academic duties is a significant part of the process of preparing for the acceptance of the duties and responsibilities of Army officers. The standard for performance of academic duties is the same as that for the performance of officer duties--excellence and one's personal best.

Cadets must achieve a grade of D or better in all required academic (core and academic major), military science, and physical education courses. Grades of N/C (no credit) may be awarded temporarily, but cadets must resolve the circumstances that resulted in the N/C and be awarded a letter grade in order to receive credit for the course.

Examinations

Written Partial Review (WPR): This examination is designed to test knowledge of course material covering specified lessons. Each department will determine the material to be covered the time of the exam and the weight of the exam. Written Partial Reviews may be scheduled during normal class meetings or during Dean's Hour. Cadets who have more than one (more than two in the case of First or Second Class cadets) major graded requirements (WPR, themes, etc.) coming due on the same day may request permission to attend the examination on the alternate day. Responsibility for seeking relief rests with the cadet while the faculty role is one of cooperation in granting permission when reasonably feasible. Relief must be sought 48 hours in advance of the scheduled examination. All cadets may be required to take two examinations on Saturdays during the Dean's Hour.

Term End Examinations (TEE): These examinations, given at the end of the term, test cadets' knowledge of course material presented during that term. The Dean's office will schedule the TEE for each course and every cadet will take the TEE in accordance with the established schedule.

Grading

In general, the academic departments describe the relative weight of their graded course requirements in terms of marks (points). Graded course requirements include, but are not limited to, daily writs, WPR, themes, research papers, computer exercises, and TEE. Early in each course, each instructor should provide a list of the course requirements and their weights. Because there is no standard scale used by all departments for converting marks to grades, cadets should ascertain from their instructors during the first few lessons of each term how the various departments assign grades.

Cadets can view a report of their grades on-line at least four times during each term. The first three reports are interim or progress reports. They are provided after the sixth, tenth, and fifteenth weeks of the term. The fourth report reflects final grades, average for the term, and cumulative average. Copies of the report are available in the Academic Affairs and Registrar Services (AARS), Office of the Dean, during the summer. In accordance with the Privacy Act, cadets must give permission in writing for the Academy to send academic reports to parents or guardians. Reports will be mailed at the end of each term.

After TEE's have been graded, department heads assign final course grades using the A+ to F scale. These final course grades are assigned quality points in accordance with the following table:

Letter Grade	Quality Points	Letter Grade	Quality Points	Letter Grade	Quality Points
A+	4.33	B	3.00	C-	1.67
A	4.00	B-	2.67	D	1.00
A-	3.67	C+	2.33	F	0.00
B+	3.33	C	2.00		

Should a cadet resign or be separated during the term before the first TEE, his or her transcript for all courses will reflect a grade of W (Withdrawn) with no credit awarded. Once the TEE cycle begins, cadets will receive a grade in every course in which they are enrolled.

Minimum Quality Point Averages

In addition to passing each required course, cadets must achieve a minimum CQPA of 2.00 in order to graduate. In order to monitor progress in the Academic Program and to signal substandard achievement, the Academic Board has established performance standards based on APS term (APST) and APS cumulative (APSC). The following table presents the minimally acceptable standards based on APS. Cadets with averages below those stated will be considered deficient in the Academic Program and will be reported to the Academic Board at the end of each term.

MINIMALLY ACCEPTABLE APS:

CLASS YEAR	TERM	APST	APSC
Fourth	First Term	1.67	N/A
	Second Term	1.67	1.70
	STAP	N/A	1.70
Third	First Term	1.67	1.80
	Second Term	1.67	1.90
	STAP	N/A	1.90
Second	First Term	1.67	1.95
	Second Term	1.67	1.95
	STAP	N/A	1.95
First	First Term	1.67	2.00
	Second Term	1.67	2.00
	STAP	N/A	2.00

The APST is based on grades in all courses taken during a semester excluding Military Science and Physical Education. The APSC is based on grades in all courses previously taken at the Academy excluding Military Science and Physical Education except that grades in repeated courses replace prior grades of D and F.

ACADEMIC DEFICIENCIES AND PROBATION

Cadets who fall below the APSC levels shown in the table for the applicable semester will be reported deficient in the Academic Program to the Academic Board at term end. Cadets deficient in APSC may be considered by the Academic Board for separation for failure to attain minimum standards in the Academic Program.

Cadets deficient in APSC who are retained at the Academy will be placed on academic probation for the following term. Cadets whose APST is below 1.67 will also be placed on academic probation for the following term. Cadets are removed from academic probation at the end of the next term in which both their cumulative and term averages exceed the peg points in the table. Grades earned in the Summer Term Academic Program (STAP) may raise the APSC above the required peg point and remove a cadet from probation. In order to be removed from academic probation for term performance (APST failure), however, cadets must achieve better than in a full academic term (16 weeks).

A cadet placed on academic probation is subject to the following measures during the probationary period:

- Mandatory counseling by an assigned academic counselor within two weeks of the start of the current term. Performance reviews following the tenth and fifteenth week grade reports.
- Mandatory review of chain of command duties by the company tactical officer with a view toward reducing time requirements IAW Annex A, USMA Reg 1-1 (Administrative Scheduling Activities) and the Academy Schedule.
- Assessed room tours in lieu of area tours except in cases of Class 1 offenses.

- Subject to reduced privileges which are reviewed monthly relative to progress and adjustment.
- Limited to participation in one extracurricular activity or Corps Squad sport at a time. This will be reviewed monthly and follow the guidelines in the Academy Schedule.
- Ineligible to participate in events which involve the loss of academic time, either class or evening study period (e.g. away trip sections, spectator at home athletic contests, extracurricular activity events [Director of Cadet Activities (DCA) and religious trips], voluntary lectures or films, Cadet Public Relations Council (CPRC), conferences etc.), except for participation in the one extracurricular activity provided for above. Participation in a mandatory educational trip that is required for a course is permitted.
- Not authorized to use the following facilities during evening study period: day room, post movie, and Eisenhower Hall (except to attend mandatory lectures). Cadets on academic probation may purchase take-out food at Grant Hall. No stopping to socialize is authorized. Cadets are not authorized to consume beverages or food while they wait for their order.
- A cadet's privileges may be withdrawn by the company tactical officer upon the request of an instructor if both agree that this course of action is essential to improve the cadet's grades.

ACADEMIC ASSISTANCE

Each academic department offers important supplementary programs and assistance to give cadets specific guidance in academic matters. This guidance assists cadets in overcoming academic weaknesses and in exploiting academic strengths.

Additional Instruction (AI): Academic departments will provide AI on the day it is requested. It is the responsibility of each cadet to request additional instruction. Specific guidance on AI hours and procedures will be provided by each department.

Academic Counseling: The Academic Affairs and Registrar Services (AARS), Office of the Dean, coordinates the faculty based academic counseling programs available to each cadet. Within the Counseling Branch there are counselors available during normal working hours on a walk in basis. They can discuss elective choices, schedules, course changes and overloads and can affect any changes in a cadet's program. One volunteer faculty member serve as a Company Academic Counselor (CAC) for each company and can help cadets on most academic matters or make referrals to the proper authority in the Dean's Office or academic departments. In addition the CAC's have formal academic counseling responsibility for all cadets in each company who have not yet selected a major. Upon selection of a major, cadets are assigned to the Department Academic Counselors (DAC) of the appropriate academic department. Finally, within the cadet chain of command there are the Cadet Company Academic Officer and Sergeant who can advise on the grading system, company tutors, AI and other matters.

ACADEMIC SUPPORT PROGRAMS

The Mounger Writing Center: Located on the second floor of Jefferson Hall, the Mounger Writing Center provides writing assistance for any academic course through the use of experienced staff and faculty and Cadet Writing Fellows.

Center For Enhanced Performance (CEP): The CEP improves student performance and capacity for retention by educating and training cadets in performance enhancement techniques. These techniques can be gained by specialized training provided by the performance enhancement staff and the courses the Center offers each academic term.

- **Peak Performance Program:** This is offered to all cadets who wish to enhance their academic, athletic, and military performance through psychological and mental skills training. The goal is for the cadet to gain the ability to perform at full potential in any performance situation especially under pressure and stress. A variety of skills are taught to include relaxation, effective thinking, goal setting, focus and concentration, visualization and imagery, and team building. Individual sessions are scheduled with the cadet and a performance enhancement trainer. Sessions are tailored to meet the cadet's specific needs.
- **Student Success Course (RS101):** This credit-producing course is designed to improve cadet academic physical and leadership performance at USMA. Mastery of a variety of strategies leads to this goal. Strategies presented include effective thinking, goal setting, time management, textbook study system, concentration, test taking, visualization, memory, note taking and others. The LASSI, the Learning and Study Strategies Inventory, is the pre- and post-course assessment. The strategies mastered are implemented immediately into the cadet's present life at USMA and contribute to life-long learning. The course has five graded assignments and a final pass/no record grade determination.

- **Reading Efficiency (RS102):** This course develops flexible reading strategies. Increasing one's base reading rate while maintaining comprehension is accomplished through the use of computer programs, textbook reading and recreational reading. Various pacing techniques and supervised practice lead to the increase of both reading rate and comprehension but most of all to the development of a reader who has a variety of strategies to use depending upon the type of reading required.
- **First Year and Beyond (FYB) Program:** The FYB program is intended to assist select cadets who, based on their performance after 6-week grades in first-term academic courses, are having difficulty adapting to the rigors of the academic program. In addition to the immediate relief and assistance provided during the first term, FYB helps these cadets develop as self-directed learners by continuing to provide educational scaffolding as they move beyond their initial academic term. This scaffolding is deliberately reduced over the cadets' 47-month experience. Please see a CEP counselor to learn more about the FYB program.

ACADEMIC AWARDS AND RECOGNITION

Excellence in academic pursuits has long been the measure of an individual's self-discipline and self-growth.

Recognition of excellence has been the keystone of West Point's educational philosophy for over 200 years. The academic excellence of cadets is recognized throughout their four years at the Military Academy and is expressed in more than 100 awards. Just as such awards reflect an individual commitment to academic excellence in undergraduate study, they also reflect a strong foundation for graduate and post graduate work.

RECOGNITION

Distinguished Cadets: Recognition occurs in the privilege of wearing gold stars to reflect distinguished academic achievement. Cadets must earn a QPA of 3.67 or better either for the year or cumulatively. Additional criteria include, full academic load, no failures, N/C (except an N/C in physical education for medical reasons), or W in any course taken during the year.

Dean's List: Selected cadets are recognized for academic achievement on the Dean's List. Dean's List criteria is a TQPA of 3.00 or better considering all courses in the academic program taken during the semester including military science and physical education. Cadets who are under-loaded (take less than the minimum five academic courses) or receive a W, F, or N/C (except an N/C in physical education for medical reasons) in any course taken that term are ineligible for Dean's List recognition. The cadet's academic transcripts will contain the notation "Dean's List" for all those so designated.

Superintendent's Award: The Superintendent's Award is a prestigious award given to cadets who prove themselves to be outstanding simultaneously in all three programs (Academic, Military, and Physical). It is based on the Cadet Award Score (CAS) which is a combination of the three program scores (APS, MPS, and PPS) applying equal weight to each. It has two levels of recognition both of which are based on demonstrated performance: achievement and excellence. The insignia for the Superintendent's Award for Excellence is a gold star encircled by a gold wreath; it is presented to the top 5% of cadets in each class based on CAS.

The insignia for the Superintendent's Award for Achievement is a gold wreath; it is presented to the next 15% of the cadets in each class based on CAS. As with other individual awards, additional criteria apply.

Dean's Company Award: The Dean's Company Award recognizes academic achievement by company during the fall and spring terms. Performance in the academic program is determined by the company Academic Program Score (APS). The company with the highest APS in each regiment receives a gold streamer to be attached to the company guidon. A silver streamer is awarded to any company with a company APS of 3.0 or higher.

Thayer Honor Designation: The Thayer Honor designation is awarded to Cadets who are selected for and complete the requirements of the Thayer Honor Program (THP). The purpose of the THP is to provide the most academically gifted Cadets the opportunity to achieve their highest intellectual potential while contributing to the intellectual engagement and development of the United States Corps of Cadets. Cadets are briefed on the program by the THP Program Director and Office of the Dean during Cadet Basic Training. Cadets may apply for the program at the invitation of the THP Committee beginning in their first semester of their Fourth Class year. THP scholars are selected by the THP Committee based on their previous academic accomplishments and potential to perform scholarly work while at the Academy. The THP Committee is made up of representatives from each academic department and the Office of the Dean. In order to be awarded the Thayer Honor designation, Cadets must be selected for the program by the THP Committee maintain an APS of at least 3.5, an MPS and PPS of at least 3.0 (waiverable for one

semester); participate in core course cohorting and additional academic enrichment opportunities offered during the academic year; achieve honors designation in their major program (if offered) and perform undergraduate scholarship reviewed and accepted by the THP Committee.

GRADUATE SCHOOLING

ADMINISTRATIVE INFORMATION

Transcripts: Before transcripts will be released permission must be given in writing. Transcripts of academic records are available at Academic Affairs and Registrar Services (AARS), Office of the Dean. There is no charge for transcripts required in connection with official requirements, but a nominal charge will be made for all others.

Academic Evaluations: Upon request, faculty members will provide cadets with academic evaluations using USMA Form 3-230 which is available in the Office of the Dean. These forms permit the Office of the Dean with a cadet's authorization under the provisions of the Privacy Act to provide selected information to designated institutions, agencies, or individuals. In most cases, the Office of the Dean will use these and other information in the cadet file as a basis for an official assessment of graduate school potential. Cadets are encouraged to seek academic evaluation by instructors during the Second and First Class years.

Qualifying Examinations: Most graduate or professional schools require that prospective students report their score on a nationally recognized qualifying examination before acceptance is granted. Cadets are responsible for arranging to take any of the examinations which may be required for admission to a graduate or professional program.

GRADUATE SCHOOLING OPPORTUNITIES

Medical School: The Medical Program Advisory Committee (MPAC) is responsible for the evaluation of cadet applicants and selection of up to two percent of each graduating class to be recommended by the Academic Board to the Surgeon General to begin medical school in the fall after graduation from USMA. Cadets applying to medical school are screened by the MPAC during First Class year. Selection is based upon academic records, successful completion of the Medical College Admissions Test (MCAT), interviews, recommendations, and acceptance into an approved medical school. Those selected may attend either the Uniformed Services University of the Health Sciences or a civilian medical school. Those choosing a civilian medical school will receive a Health Professions Scholarship.

Law School: After two years of active duty, USMA graduates may apply to attend law school under the provisions of the Judge Advocate General's Fully Funded Legal Program. Selection for the program is contingent upon successful completion of the Law School Admissions Test, favorable consideration by the Judge Advocate General selection board, and acceptance into an approved law school.

Other Graduate School Opportunities: Other graduate school opportunities may be available to cadets in specific disciplines and branches. Please see the appropriate Department Academic Counselors and branch representatives to learn more.

SCHOLARSHIPS AND FELLOWSHIPS

Cadets are encouraged to compete for a number of nationally recognized graduate scholarships and fellowships. The USMA Graduate Scholarship Committee serves as the Dean's executive agent for the scholarship programs and fellowships for which selected cadets may compete. All academic departments have a representative on this Committee. The list of opportunities for cadets may vary from year to year, and includes programs that cadets begin immediately upon graduation, are deferred until later, or are opportunities that exist only after graduation.

In a typical year, cadets who are selected into the XH (Critical Thought) program may compete for the Rhodes Scholarship, Marshall Scholarship, Schwarzman Scholarship, Gates-Cambridge Scholarship, and Mitchell Scholarship. Cadets not in XH, but approved by the Scholarship Committee, may also compete for East-West Degree Fellowships, Yenching Scholarships, Rotary Global Grants, and Fulbright Scholarships. STEM students selected into the XE program may also compete for the Hertz Foundation Scholarship, Churchill Scholarships, and select STEM-specific programs. Additionally, cadets from underrepresented communities may also compete for GEM Fellowships in the fields of applied science and engineering. All of these programs begin after graduation.

Selected cadets may also compete for the Truman Scholarship and the National Science Foundation Graduate Fellowship, both of which are deferred until mid-career. Mid-career graduates may also compete for the George Olmstead Foundation Scholarship. The USMA Scholarship Committee maintains the current list of scholarship and fellowship opportunities.

VALIDATION AND ADVANCED COURSE ENROLLMENT

Advanced Placement test scores and previous high school or college academic records are reviewed by the academic departments to determine whether a cadet is eligible for validation of certain courses. Many academic departments use examinations and personal interviews, in addition to screening academic records, to assist in their evaluation.

When the process is completed, a cadet may be offered the opportunity to validate a course. The decision is entirely the cadet's to make; cadets should keep in mind, however, that they may have to replace the validated course with another course. The significant aspects of validation are that it is voluntary, and that, while it excuses a cadet from taking a course, it does not reduce graduation course requirements. Validated courses will be reflected without credit hours on the transcript. However, the credit hour content of validated courses, as published in the Academic Program, is recognized as contributing appropriate disciplinary content towards meeting programmatic rigor for accreditation purposes.

ACADEMIC COURSE LOADS

The minimum load that all cadets must carry under normal circumstances is five academic courses which are equal to or greater than 15 semester hours of credit. Cadets may elect to take six academic courses in the pursuit of certain academic majors. In addition, cadets will meet established requirements for physical education courses and military science core curriculum during a regular academic semester.

OVERLOADING

Cadets are considered overloading when they are carrying seven academic courses in a term. Overload courses offer the means of adapting an academic program to capitalize upon a cadet's abilities and to satisfy a particular interest. During the Third, Second and First Class years, cadets may wish to enroll in one overload course for each term.

Approval will depend upon demonstrated ability and motivation. Specifically, Dean's List recognition in the preceding term is required. Cadets with a Cumulative Quality Point Average (CQPA) of 2.30 or higher may overload in their First Class year. Only elective courses may be overloaded.

A cadet who enrolls in an overload course and finds it unsuited to his or her needs may request withdrawal from the overload course through the Academic Affairs and Registrar Services (AARS), Office of the Dean, any time after the first month of the term and up until the beginning of Term End Examinations (TEE). Cadets are required to designate which of their electives is the overload. No change in this designation will be permitted after the term begins. The Dean may remove a cadet from an overload course for poor performance in that course or in any other courses.

CHOOSING A MAJOR

Choosing an area of academic specialization deserves special mention. Without exaggeration, it is the most important academic decision a cadet will make at the Military Academy. Without exaggeration, it is the most important academic decision a cadet will make at the Military Academy. Much of the rationale for the presentation of core topics before the selection of a major is to ensure that cadets have the best information available upon which to make that decision.

Currently a major requires the commitment of a minimum of 13 courses. Once a cadet starts taking courses to support a major, it is very difficult and, in many cases, impossible to change to another major. Cadets are encouraged to seek guidance in arriving at this decision and to take the necessary time and effort to make that decision a good one.

Once a Fourth Class cadet designates a major, the cadet is passed from the company academic counselor to a counselor in the department that sponsors the chosen discipline. Departmental counselors then help the cadet plan the remaining six terms of his or her academic program, providing guidance on the sequencing of courses best designed to facilitate study of the discipline.

A minimum of 13 courses must be designated to fill the course requirements for the baseline area of academic specialization, arranged in semesters of five academic courses each. Cadets who choose an area requiring more than thirteen courses may need to complete additional academic courses (six or more) in future terms. The Military Academy provides opportunities to pursue Academic Individual Advanced Development (AIAD) during the summer which, under some circumstances, may be used to reduce a course load during the academic year to five courses per term.

Through validation, advanced placement, or overload, it is possible for a cadet to meet the requirements for more than a single major. Each cadet must officially pursue and gain credit for one major. Beyond that requirement a cadet is free to pursue and gain transcript credit for additional majors provided he or she meets the following guidelines:

- In pursuing two majors, a cadet must meet all curricular requirements including student learning outcomes for each major and double-count no more than seven total courses, with no more than four being study-in-depth courses, one of which may be the integrative experience.
- Department counselors in both fields must grant approval.
- The graduation transcript will reflect academic majors that have been satisfied.
- Cadets are warned that USMA will not guarantee the completion of additional majors, even though that cadet may have already completed courses towards that goal. Scheduling and resource constraints may prohibit the completion of additional majors.

ACADEMIC MINORS

USMA offers several academic minors which are fully described in Part 4 of this Redbook. Academic minors are not a graduation requirement but are available for those cadets who wish to pursue academic studies beyond a single academic major. The following guidelines apply to academic minors:

- The minors program is defined as a limited study-in-depth consisting of a minimum of five academic courses of 3.0 credit hours or higher.
- In pursuing a major and a minor, a cadet must meet all curricular requirements for both the major and the minor. Double-counting practices (counting one course to meet a course requirement in two different curricular components [e.g., two minors, a major and a minor, etc.]) are permitted, but, for any given cadet, at least three of those courses must be unique to the minor.
- Department counselors in both fields must grant approval.
- The graduation transcript will reflect academic majors and minors that have been satisfied.
- Cadets are warned that USMA will not guarantee the completion of minors, even though that cadet may have already completed courses towards that goal. Scheduling and resource constraints may prohibit the completion of minors.

PART I: THE ACADEMIC PROGRAM - CLASS GRADUATION REQUIREMENTS

OFFICE OF THE SUPERINTENDENT
UNITED STATES MILITARY ACADEMY
WEST POINT, NEW YORK 10996-5000

MADN

MEMORANDUM FOR SEE DISTRIBUTION

SUBJECT: Class of 2019 - 2020 Graduation Requirements

1. A cadet must successfully complete the course of instruction in the academic, military and physical programs and satisfy the institutional (non-program) requirements to meet baseline graduation requirements.
2. The Cumulative Quality Point Average (CQPA) minimum value cannot be waived. Only the Academic Board can recommend a waiver for any other graduation requirement listed in this document.
3. The following are the graduation requirements for the Classes of 2019-2020:
 - a. Institutional Requirements (non-program)
 - (1) Achieve a Cumulative Quality Point Average (CQPA) of 2.00 (non-waiverable).
 - (2) Successfully complete one of the following broadening experiences: a Military Individual Advanced Development (MIAD), a Physical Individual Advanced Development (PIAD) or an Academic Individual Advanced Development (AIAD).
 - (3) Meet the height/weight standards of Army Regulation 600-9.
 - (4) Meet the physical fitness standards in paragraph 1-24 of Army Regulation 350-1 and Appendix A of Army Training Circular 3-22.20. As of March 2010, all references to FM 21-20 in AR 350-1 are to be understood as references to TC 3-22.20.
 - (5) Complete a minimum of eight semesters as a full-time cadet, either at the Academy or as a part of an Academic Board sanctioned exchange program.
 - b. Academic Program.
 - (1) Successfully complete or validate each course in the core curriculum, including the common core courses and a core engineering sequence equivalent.
 - (2) Satisfy the requirements of at least one major.
 - (3) Successfully complete 40 academic courses of at least 3.0 credit hours each. Validated and remedial courses cannot count towards this requirement.
 - (4) Achieve an Academic Program Score Cumulative (APSC) of 2.00.
 - c. Military Program.

- (1) Successfully complete all required Military Science, Military Lab and Military Development course work.
 - (2) Successfully complete Cadet Basic Training (CBT) and Cadet Field Training (CFT).
 - (3) Successfully complete Cadet Leader Development Training (CLDT) or an Academic Board-approved CLDT constructive credit experience.
 - (4) Successfully complete a West Point detail as a chain of command member during Second or First Class summer.
 - (5) Successfully complete Cadet Troop Leader Training (CTLT) or an Academic Board approved CTLT experience.
 - (6) Achieve a Military Program Score Cumulative (MPSC) of 2.00 or greater.
- d. Physical Program.
- (1) Successfully complete all required Physical Education course work.
 - (2) Successfully complete the Indoor Obstacle Course Test (IOCT) during the Second or First Class year.
 - (3) Achieve a Physical Program Score Cumulative (PPSC) of 2.00.
 - (4) Participate in a competitive athletic activity at the Intercollegiate, Club, or Company Athletic level during each academic semester unless excused for medical or other approved reasons.
4. The Academic Board approved these graduation requirements on 5 August 2016.

PART I: THE ACADEMIC PROGRAM - CPS CALCULATION

1. Computing the CPS.

The CPS is computed in a way that provides a measure of a cadet's performance relative to his or her peers. This is meant to adjust for variations in grading systems within and among the three programs.

- a. The APSC, MPSC, and PPSC are standardized so they each have a mean of zero and standard deviation of one.

$$APS^* = \frac{APSC - APSC_{\text{Class Mean}}}{\sigma_{APSC}}$$

$$MPS^* = \frac{MPSC - MPSC_{\text{Class Mean}}}{\sigma_{MPSC}}$$

$$PPS^* = \frac{PPSC - PPSC_{\text{Class Mean}}}{\sigma_{PPSC}}$$

where σ_{APSC} , σ_{MPSC} , σ_{PPSC} are the standard deviations of the class's respective scores.

- b. Standardizing the APSC, MPSC, and PPSC ensures that all cadets are evaluated based on their performance relative to their class. It accounts for the deviation of their score from the class average (mean) score. It rewards those who are further above the mean and penalizes those who are further below the mean.
- c. Standardizing does affect determination of Honor Graduates ($CPS \geq 3.50$). This award is meant to be given to cadets based on their performance relative to their peers, not based on an absolute number. Normalizing ensures that only those cadets who truly performed significantly better than their peers become the honor graduates.
- d. The CPS is based on the weighted average of the cumulative program scores. The APSC contributes 55%, the MPSC contributes 30%, and the PPSC contributes 15%.

$$CPS^* = 0.55(APS^*) + 0.30(MPS^*) + 0.15(PPS^*)$$

- e. The weighted average of the standardized program scores, CPS^* , is a normally-distributed random variable with a mean equal to zero. To calculate a representative score on a 4.0 scale, CPS^* is standardized as follows (Z is the number of standard deviations above or below the class average):

$$Z = \frac{CPS^* - 0.0}{\sigma_{CPS^*}} = \frac{CPS^*}{\sigma_{CPS^*}}$$

f. Based on this result, the CPS is calculated to conform to a distribution with a mean of 2.8 and standard deviation of 0.40:

$$CPS = 0.40Z + 2.80$$

Using this mean and standard deviation ensures that 95% of cadets will have a CPS between 2.0 and 3.6 and 99.7% will be between 1.6 and 4.0. The top 4% of the class will have a $CPS \geq 3.5$ and be designated as *Honor Graduates*.

2. Examples.

To illustrate why the program scores must be standardized, consider the following examples. Suppose the following situation exists:

Program scores				
	Class Mean	Class Standard Deviation	Cadet A	Cadet B
APS	3.006	.513	3.006	3.326
MPS	3.017	.423	3.017	2.878
PPS	3.063	.340	3.063	3.454

a. **Example 1.** Cadet A is clearly average since his/her program scores are the same as the graduating class' program score averages. Without standardizing, Cadet A's CPS would be

$$CPS = .55(3.006) + .30(3.017) + .15(3.063) = 3.02$$

Cadet A's CPS should be the CPS class mean. In this case, it won't be because each program score has a different standard deviation. Without standardizing, the MPSC and PPSC scores were allowed to carry more weight than intended and allowed Cadet A to be considered above average. Cadet A's CPS after standardizing the program scores is:

$$CPS^* = .55(0.00) + .30(0.00) + .15(0.00) = 0.00$$

$$CPS = 0.40(0.00) + 2.8 = 2.8$$

In this case, Cadet A's CPS is the class average (mean).

- b. **Example 2.** Cadet B's CPS is computed as follows:

$$\begin{aligned}
 APS^* &= \frac{3.326 - 3.006}{.513} = 0.624 \\
 MPS^* &= \frac{2.878 - 3.017}{.423} = -0.329 \\
 PPS^* &= \frac{3.454 - 3.063}{.340} = 1.150 \\
 CPS^* &= 0.55(0.624) + 0.30(-0.329) + 0.15(1.150) = 0.417
 \end{aligned}$$

Using each cadet's CPS*, we can compute and verify that the class mean CPS* is zero and the standard deviation is 0.825. Cadet B's CPS* score is 0.417, which is clearly above average. Standardize CPS* and convert it to the 4.0 scale to find the CPS.

$$\begin{aligned}
 Z &= \frac{0.417}{0.825} \approx 0.506 \\
 CPS &= 0.40(0.506) + 2.80 = 3.002
 \end{aligned}$$

Cadet B is above average ($3.00 > 2.80$).

- c. **Example 3** (Are you really an Honor Graduate?). Suppose the following situation exists:

Program scores			
	Class Mean	Class Standard Deviation	Cadet C
APS	3.183	.597	4.000
MPS	3.218	.404	2.895
PPS	3.089	.280	2.873

Cadet C appears to be very bright. Does well academically, but performs below average in the physical and military programs. Determine Cadet C's CPS without standardizing the program scores.

$$CPS = .55(4.000) + .30(2.895) + .15(2.873) = 3.50$$

In this case, Cadet C did so well academically that he/she is considered an Honor Graduate. However, this cadet did not truly perform significantly better than his/her peers. The Graduate Outcome Goal requires cadets to excel in all three programs. Now, compute the actual CPS

$$\begin{aligned}
 APS^* &= \frac{4.000 - 3.183}{.597} = 1.369 \\
 MPS^* &= \frac{2.895 - 3.218}{.404} = -0.800 \\
 PPS^* &= \frac{2.873 - 3.089}{.340} = -0.635 \\
 CPS^* &= 0.55(1.369) + 0.30(-0.800) + 0.15(-0.635) = 0.418
 \end{aligned}$$

$$Z = \frac{0.418}{0.825} \approx 0.507$$
$$CPS = 0.40(0.507) + 2.80 = 3.00$$

Cadet C is above average ($3.00 > 2.80$), but not worthy of being an Honor Graduate.

PART II: DISCIPLINARY OFFERINGS

PART 2: DISCIPLINARY OFFERINGS

This section of the Academic Program (Redbook) presents descriptions of the academic disciplines and specific learning outcomes of all USMA academic majors and minors. A complete listing of the Military Academy's majors and minors appears in Part 4.

ACADEMIC DISCIPLINE DESCRIPTIONS

Chemical Engineering (CEN1)

Chemical engineering is perhaps the broadest and most diverse field in all of engineering. Any commercial process or product that uses or contains molecules probably involved a chemical engineer at some stage of development. This includes all materials used by the military, including such basic items as food, clothing, fuel, water, explosives, metals, polymers, ceramics, semiconductors, medicines, artificial organs, and prostheses, just to name a few. Chemical engineers design these materials at the molecular level, optimize the design for specific applications, and develop efficient methods for production, packaging, and distribution. Chemical engineers are also very concerned with the conversion between matter and energy, particularly since almost all chemical reactions require or produce energy. In terms of contemporary societal problems, chemical engineers are at the forefront of the effort to design new and more efficient fuels, and we are critical to efforts at environmental remediation, including waste recycling and remediation. Within the military, chemical engineers are uniquely qualified to address problems in fuel and water production and distribution, power generation, as well as detection, decontamination, and protection against chemical and biological agents.

Chemical Engineering Mission

The mission of the chemical engineering program is to prepare commissioned leaders of character who are proficient in applying chemical and engineering principles to solve problems in a complex operational environment.

Program Educational Objectives

During a career as commissioned officers in the United States Army and beyond, program graduates

- Demonstrate effective leadership and chemical engineering expertise.
- Contribute to the solution of infrastructure or operational problems in a complex operational environment.
- Succeed in graduate school or other advanced study programs.
- Advance their careers through clear and precise technical communication.

On completion of the chemical engineering program, our graduates will be able to:

Student Learning Outcome 1

- Apply knowledge of mathematics, science, and engineering.

Student Learning Outcome 2

- Design and conduct experiments, as well as analyze and interpret data.

Student Learning Outcome 3

- Design a system, component, or process to meet desired needs within economic, environmental, social, political, ethical, health and safety, manufacturing, and sustainability constraints.

Student Learning Outcome 4

- Function on multidisciplinary teams.

Student Learning Outcome 5

- Identify, formulate, and solve engineering problems.

Student Learning Outcome 6

- Understand professional and ethical responsibilities.

Student Learning Outcome 7

- Communicate effectively.

Student Learning Outcome 8

- Understand the impact of engineering solutions in a global economic, environmental, and societal context.

Student Learning Outcome 9

- Recognize the need and develop the skills required for life-long learning.

Student Learning Outcome 10

- Demonstrate knowledge of contemporary issues.

Student Learning Outcome 11

- Demonstrate an ability to use techniques, skills, and modern engineering tools necessary for engineering practice.

Student Learning Outcome 12

The program provides the graduate with a thorough grounding and working knowledge of the chemical sciences, including:

- General, organic, and physical chemistry.
- Material and energy balances on chemical processes, including safety and environmental factors.
- Thermodynamics of physical and chemical equilibria.
- Heat, mass, and momentum transfer.
- Chemical reaction engineering.
- Continuous and staged separation operations.
- Process dynamics and control.
- Modern experimental and computing techniques.
- Process design.

Chemistry (CHM1)

Chemistry is the branch of sciences that studies the composition, structure, properties, changes and interactions of matter. Every material thing - from the foods we eat, to the medicine we take, to the air we breathe - is a chemical or a mixture of chemicals. Therefore, it is truly the central science and underpins much of the efforts of scientists and engineers to improve life for humankind. Since chemistry is the molecular science, military applications of chemistry rely on the understanding of the structure and changes at the molecular level. These application areas can include the synthesis and development of advanced materials and explosives, solving environmental problems, creating innovative biotechnology solutions, and chemical or biological sensing.

The Chemistry Major includes all the courses recommended by the American Chemical Society and are designed to provide cadets with basic instruction with comparable emphasis on the areas of analytical chemistry, biochemistry, inorganic chemistry, organic chemistry and physical chemistry. Cadets are required to complete a core sequence. In addition, cadets must complete a three-course engineering sequence and may choose from any of the sequences offered. Ten courses are required to complete the major. Thus, the Chemistry Major requires a total of 40 courses to be taken or validated. Cadets choosing this program will complete an integrative experience (CH487 Advanced Chemistry Laboratory) that will examine the social, economic, political, and technological aspects of chemistry. The Chemistry Major with ACS Certification includes one elective course and two research courses (CH489 and CH490). The Chemistry Major with ACS Certification and Honors requires cadets to complete the course requirements for the CHM1A major while attaining a minimum APSC of 3.0 in the core curriculum and 3.5 in the major.

Graduates who complete a Chemistry Major will be able to:

Student Learning Outcome 1

- Use information resources to gather, organize, and understand scientific material.

Student Learning Outcome 2

- Design and execute experiments to address a problem or question.

Student Learning Outcome 3

- Analyze and assess scientific data gathered in the laboratory.

Student Learning Outcome 4

- Effectively and clearly communicate scientific information in written and oral form to a variety of audiences.

Student Learning Outcome 5

- Understand the applications of chemistry in the Army and society.

Student Learning Outcome 6

- Recognize the relationship between the properties of a substance, its molecular structure, and its reactivity.

Student Learning Outcome 7

- Understand and apply the physical concepts of chemistry.
-

Civil Engineering (CVN1)

Civil engineers are engaged in the planning, analysis, design, construction, and maintenance of a wide variety of structures and facilities, including buildings, bridges, highways, railroads, airports, dams, canals, ports, water and wastewater treatment systems, and storm water and sanitary sewer systems. The Civil Engineering program at USMA offers a Civil Engineering major accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org> that requires courses in basic mechanics, structural analysis, structural steel design, and reinforced concrete design as the foundation of the program. In addition, courses in infrastructure engineering, site civil engineering, geotechnical engineering, hydrology and hydraulic engineering, and construction management provide breadth to the program. The Civil Engineering major also includes a capstone design course, in which cadets develop a comprehensive design of a Civil Engineering system, including the functional layout, structure, foundation, and site considerations to include utilities, drainage and environmental concerns. Design is emphasized throughout the program, as is the use of the personal computer as a tool for analysis, design, and decision-making. The program includes an extensive offering of enrichment electives, as well as an Advanced Individual Study in Civil Engineering, for selected cadets wishing to pursue a particular subject in depth. The Civil Engineering program serves as excellent preparation for initial Army troop assignments in combat and construction engineering as well as later jobs in civil works and facilities engineering. The program additionally provides a sound basis for graduate schooling in Civil Engineering and related fields, and for registration as a professional engineer. Cadets who maintain good standing in the Civil Engineering major take the Fundamentals of Engineering (FE) exam during the spring semester of their First Class year. Passing the FE exam is the essential first step in becoming a registered professional engineer.

Graduates who major in Civil Engineering will achieve the following Civil Engineering Program Educational Objectives:

A few years after graduation, Civil Engineering Program graduates:

1. As Army leaders, solve complex, multi-disciplinary problems effectively, to include:
 - a. recognizing and fully defining the physical, technological, social, political, business and ethical aspects of a complex problem;
 - b. using a methodical process to solve the problem; demonstrating creativity in the formulation of alternative solutions;
 - c. using appropriate techniques and tools to enhance the problem-solving process;
 - d. working effectively on teams; and
 - e. developing high-quality solutions that consider all dimensions of the problem.
2. Provide appropriate Civil Engineering expertise to the Army, when called upon to do so.
3. Communicate effectively.
4. Continue to grow intellectually and professionally - as Army officers and as engineers.

To achieve these objectives, cadets will demonstrate the following Civil Engineering Student Outcomes:

At graduation, Civil Engineering Program graduates:

Student Learning Outcome 1

Design Civil Engineering components and systems.

Student Learning Outcome 2

Demonstrate creativity, in the context of engineering problem-solving.

Student Learning Outcome 3

Solve problems in the structural, construction management, hydraulic, and geotechnical discipline areas of Civil Engineering.

Student Learning Outcome 4

Solve problems in mathematics through differential equations, calculus-based physics, and general chemistry.

Student Learning Outcome 5

Design and conduct experiments, and analyze and interpret data.

Student Learning Outcome 6

Function effectively on multidisciplinary teams.

Student Learning Outcome 7

Describe the roles and responsibilities of Civil Engineers and analyze the issues they face in professional practice.

Student Learning Outcome 8

Use modern engineering tools to solve problems.

Student Learning Outcome 9

Write effectively.

Student Learning Outcome 10

Speak effectively.

Student Learning Outcome 11

Incorporate knowledge of contemporary issues into the solution of engineering problems.

Student Learning Outcome 12

Draw upon a broad education necessary to anticipate the impact of engineering solutions in a global and societal context.

Student Learning Outcome 13

Are prepared and motivated to pursue continued intellectual and professional growth—as Army officers and engineers.

Student Learning Outcome 14

Explain the basic concepts of management.

Student Learning Outcome 15

Explain the basic concepts of business and public policy.

Student Learning Outcome 16

Are leaders of character.

Computer Science (CSC1)

Computer scientists analyze, plan, design, and build computer systems. Within this broad area of computer system design, the computer science program at USMA provides cadets the opportunity to focus on the design of computer software components and the implementation software systems. The program provides a solid introduction to the general field of computer science, including computer theory, computer programming, algorithm analysis, data structures, software testing and development, computer organization, programming languages, operating systems, and the design of large software systems. According to your interests, you may pursue further study in artificial intelligence, computer graphics, computer networks, cyber security, and other topics. The opportunity to accomplish advanced individual study under the direction of a faculty member is available to those who are interested and qualified. Whether operating a remote sensor network from a fire base in Afghanistan, managing logistics from a Brigade Support Area in Kuwait, pattern matching events for intelligence purposes in Iraq, or simply understanding the computational feasibility of solving a complex problem, the Computer Science major prepares you to succeed as a leader in any branch of the Army and is a superb foundation for advanced civil schooling. The USMA Computer Science major is accredited by the Computing Accreditation Commission of ABET, <http://www.abet.org>.

The Program Educational Objectives (PEO) for Computer Science are that, five to seven years after graduation, cadets who major in Computer Science will have been successful Army officers who have:

- A. Initiated and completed tasks that identify aspects of a complex situation that can be enhanced by using computing technology.
- B. Applied computing knowledge and skills while using an engineering process individually or in diverse teams to develop computing technology applications.
- C. Used effective communication to explain new computing technology to war fighters in support of current and emerging Army war fighting doctrine.
- D. Grown professionally through self-study, continuing education and professional development.

To support these objectives, Computer Science graduates demonstrate the following student learning outcomes at the time of graduation:

Student Learning Outcome 1

An ability to apply mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the tradeoffs involved in design choices

Student Learning Outcome 2

An ability to analyze a problem, and identify and define the computing requirements appropriate to its solution

Student Learning Outcome 3

An ability to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs

Student Learning Outcome 4

An ability to function effectively on teams to accomplish a common goal

Student Learning Outcome 5

An understanding of professional, ethical, legal, security, social, political, and economic issues and responsibilities

Student Learning Outcome 6

An ability to communicate effectively with a range of audiences

Student Learning Outcome 7

An ability to analyze the local and global impact of computing on individuals, organizations, and society

Student Learning Outcome 8

Recognition of the need for and an ability to engage in continuing professional development

Student Learning Outcome 9

An ability to use current techniques, skills, and tools necessary for computing practice

Student Learning Outcome 10

An ability to apply design and development principles in the construction of software systems of varying complexity

Defense and Strategic Studies (DSS2)

The Defense & Strategic Studies (DSS) academic major will continue to reach the Academy's overarching goal through a multidisciplinary approach in its program structure and an interdisciplinary approach within its courses. The program will continue to draw upon military science, history, economics, political science, geography, leadership, information technology and law to understand the nature of war and the military instrument of national power.

DSS Major Student Learning Outcomes and Supporting Objectives**Student Learning Outcome 1**

Evaluate military strategic decision-making by applying appropriate theoretical, historical, policy and interdisciplinary knowledge.

- a. Cadets can develop a diverse and appropriate base of knowledge to effectively evaluate strategic choices, to include formal strategies and military systems, using a holistic approach.
- b. Cadets can consider the relationship between tactics, operations and strategy with an emphasis on the strategic effect of tactical action.

Student Learning Outcome 2

Cadets can frame complex, multifaceted strategic problems relating to the military component of national power and the potential use of force.

- a. Cadets can deconstruct the problem into its essential components and describe how they interrelate by effectively examining the political and military context.
- b. Cadets can reasonably identify relevant stakeholders, interests and policy objectives for state and non-state actors.
- c. Cadets can appropriately consider the influence that state and non-state actors' organizations, capabilities and systems have on the problem definition.

Student Learning Outcome 3

Cadets can apply theoretical frameworks, strategic planning models and critical thinking to construct viable and innovative ways to solve strategic problems.

- a. Cadets can identify and apply relevant theories and models to forming viable and innovative solutions.
- b. Cadets can translate well researched, reliable evidence into useful conclusions.

Student Learning Outcome 4

Cadets can Communicate and connect with a diverse range of audiences in order to frame and deliver an insightful strategic analyses.

- a. Cadets can formulate a clear, direct message that communicates the fundamental conclusion(s) up front.
 - b. Cadets can persuasively communicate the necessary evidence and reasoning by logically organizing the information or argument.
 - c. Cadets can effectively communicate through oral presentation by keeping the audience engaged with creativity, poise and competence.
 - d. Cadets can effectively communicate through writing by being precise, concise and clear.
-

Economics (ECN2)

The Economics major provides critical thinking skills applied to human behavior and answers the questions: "What is produced?; How is it produced?; and To whom is it allocated?" Mathematical models are used to develop and test optimal resource allocation mechanisms. These models also provide the necessary foundation to analyze policy regimes within individual markets as well as aggregate economies. These skills are directly applicable to decision makers in tactical command positions who must achieve desirable outcomes with personnel and equipment constraints as well as national strategic decision makers who face similar aggregate constraints. The Economics major also provides deep proficiency in quantitative methods, particularly nonlinear optimization, for more specialized areas such as Operations Research, Resource Management, and Strategist.

Economics Major Student Learning Outcomes**Student Learning Outcome 1**

Constrained Optimization: Cadets can derive the objective functions and resource constraints facing individuals, firms, and governments, and then solve the relevant optimization problems to describe and predict the behavior of economic agents.

Student Learning Outcome 2

Market Analysis: Using the outcomes derived from optimization, Cadets can explain how markets and the aggregate economy achieve equilibrium, and then predict how changes in the economic environment impact individual markets and the aggregate economy.

Student Learning Outcome 3

Market Efficiency: Cadets can apply economic models of individual, firm, and government behavior to evaluate whether equilibrium in a market achieves economic efficiency (the maximization of total surplus).

Student Learning Outcome 4

Marginal Analysis: Cadets can apply the concept of equalization at the margin to explain and evaluate individual, firm, and government behavior, as well as perform cost-benefit analyses of government policies.

Student Learning Outcome 5

Incentives: Cadets can explain the central role of incentives in shaping the behavior of economic agents and design incentive structures that promote efficient outcomes.

Student Learning Outcome 6

Strategic Decision Making: Cadets can model and evaluate economic environments in which the actions of economic agents are interdependent.

Student Learning Outcome 7

Risk and Uncertainty: Cadets can model and evaluate the impact of uncertain economic outcomes due to either random shocks or the strategic behavior of economic agents, and explain how differential aversion to risk across individuals, firms, and governments affects market outcomes.

Student Learning Outcome 8

Information: Cadets can model and evaluate the effects of costly, limited, and asymmetric information on economic decision making, and derive policies to mitigate the efficiency losses arising from imperfect and incomplete information.

Student Learning Outcome 9

Global Economic Linkages: Cadets can model economic interactions of individual consumers, investors, firms and governments in international goods, capital, and currency markets, and evaluate the efficiency costs of government policies that restrain economic exchange among nations.

Student Learning Outcome 10

Political Economy: Cadets can apply economic models to understand behaviors of agents in political and other "non-economic" settings, and use models drawn from allied social science fields (Political Science, Psychology, Sociology, and Geography) to derive richer explanations of the behavior of individuals, firms and organizations (including governments).

Student Learning Outcome 11

Government Intervention in Markets: Cadets can use economic models to evaluate the impact(s) of government regulations and policies on market outcomes, as well as design interventions that improve economic efficiency or minimize efficiency losses.

Student Learning Outcome 12

Macroeconomic Stabilization: Cadets can use economic models to explain and predict fluctuations in key macroeconomic variables, and design fiscal and monetary policies to dampen these fluctuations.

Student Learning Outcome 13

Economic Growth: Cadets can build models that explain and predict the determinants of economic growth in the long-run, evaluate the impact(s) of government policies on growth, and design policies to promote economic growth.

Student Learning Outcome 14

Empirical Methods: Cadets can: apply economic theory to identify testable hypotheses; collect the requisite data and use appropriate empirical methods to test hypotheses; develop empirical models that can identify the causal effect of an economic variable of interest on an outcome of interest; and interpret the findings from statistical and empirical analyses as well as explain their relevance to policy making.

Electrical Engineering (EEN1)

The impact of the electronics revolution on our daily lives may exceed that of the industrial revolution. The advent of the integrated circuit and the microprocessor have made possible phenomenal advances in such varied fields as medicine, communications, manufacturing, computation, education, energy conversion, and weapons systems. Electrical engineers are at the forefront of this revolution, using the principles of physics, mathematics and the engineering sciences to develop new and innovative applications of electronics. Regardless of branch, officers will surely be involved with electronic systems in military hardware. The courses in the electrical engineering curriculum are directly applicable to the Army you will lead. As a student of electrical engineering you will develop a mastery of the fundamental elements of circuit theory, electromagnetic fields and waves, electronics, digital computer logic and electromechanical energy conversion. You will then study in greater depth subjects selected from the areas of robotics, communications, opto-electronics, alternative energy and cyber engineering. The program emphasizes practical design, hands-on laboratory and computer experience, teamwork, and interdisciplinary projects. The program additionally provides a sound basis for graduate schooling in electrical engineering and related fields as well as fulfilling the disciplinary depth component of the USMA curriculum. The Electrical Engineering Program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

The Electrical Engineering Program objectives are that five to seven years after graduation cadets who major in Electrical Engineering will have been successful Army officers who have:

- Applied their engineering, management, and leadership skills in service of their country.
- Demonstrated intellectual growth through self-study, continuing education, and professional development in the Army.
- Provided technical leadership and disciplinary knowledge as Army officers with a broad understanding of the potential ethical and societal impacts of technology.
- Applied engineering methodology and creativity to Army problems while effectively communicating across mediums and cultures.

Expected Student Outcomes for graduating cadets in the Electrical Engineering major are to:-

Student Learning Outcome 1

Apply knowledge of mathematics, probability, statistics, physical science, engineering, and computer science to the solution of problems. [ABET Criterion 3 Outcome (a)]

Student Learning Outcome 2

Identify, formulate, and solve electrical engineering problems. [ABET Criterion 3 Outcome (e)]

Student Learning Outcome 3

Apply techniques, simulations, information and computing technology, and disciplinary knowledge in solving engineering problems. [ABET Criterion 3 Outcome (k)]

Student Learning Outcome 4

Design and conduct experiments to collect, analyze, and interpret data with modern engineering tools and techniques. [ABET Criterion 3 outcomes (b) and (k)]

Student Learning Outcome 5

Communicate solutions clearly, both orally and in writing. [ABET Criterion 3 Outcome (g)]

Student Learning Outcome 6

Work effectively in diverse teams. [ABET Criterion 3 Outcome (d)]

Student Learning Outcome 7

Apply professional and ethical considerations to engineering problems. [ABET Criterion 3 Outcome (f)]

Student Learning Outcome 8

Incorporate understanding and knowledge of societal, global and other contemporary issues in the development of engineering solutions that meet realistic constraints. [ABET Criterion 3 outcomes (c), (h) and (j)]

Student Learning Outcome 9

Demonstrate the ability to learn on their own. [ABET Criterion 3 Outcome (i)]

Engineering Management (ENM1)

Engineering Management majors study the engineering relationships among the management tasks of staffing, organizing, planning, financing, and the human element in production, research, engineering, and service organizations. By emphasizing leadership in a technical setting, the program builds on the traditional roles of the basic and applied sciences for engineering and technology management. Engineering managers must understand the interaction of organizational, technical, and behavioral variables in order to build a productive engineering team. Majors get a technical foundation in a specific engineering field of their choice: civil, mechanical, nuclear, electrical, environmental or general engineering. The program also provides a solid base of courses in personnel management, finance and accounting, engineering economy, production operations management, quantitative business analysis, project management, and computer modeling in order to prepare graduates to lead in a technical environment. The program culminates with a capstone design experience for a real client. The Engineering Management program at West Point is one of the top undergraduate programs in the nation and provides the academic foundations for a wide variety of activities important to Army officers of all branches. The Engineering Management Program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

Engineering Management Program Educational Objectives: The Engineering Management program seeks to prepare future Army officers for productive and rewarding careers in the engineering or related profession for service to the Nation. Five to seven years after graduation, cadets who majored in Engineering Management will have been successful Army officers who:

1. Successfully lead and participate as a member of multi-disciplinary teams in a diverse cultural environment.
2. Apply critical thinking to their engineering, management, and leadership skills to design solutions to complex problems.
3. Demonstrate intellectual growth and continuous self-improvement through selfstudy, continuing education, and professional development.
4. Demonstrate effective communicating skills across a variety of mediums and cultures.
5. Act responsibly by upholding strict ethical and moral standards and considering impacts of decisions on social, political, economic, and technological issues.

To achieve these objectives, cadets will demonstrate the following Engineering Management Student Outcomes at the time of graduation:

Student Learning Outcome 1

Lead and work effectively as a contributing member of multidisciplinary engineering teams.

Student Learning Outcome 2

Lead the design or re-engineer of a system, process, or organization within realistic environmental constraints such as cultural, historical, legal, moral/ethical, economic, environmental, organizational, emotional, social, political, and technological.

Student Learning Outcome 3

Use the techniques, skills, modern engineering tools and technology necessary for engineering management practice.

Student Learning Outcome 4

Use systems thinking and engineering management techniques to identify, define, solve, recommend and implement the solution to a client's problem.

Student Learning Outcome 5

Monitor, assess and manage the broad global and societal impacts of engineering management problems, solutions and management decisions throughout the system lifecycle.

Student Learning Outcome 6

Use stakeholder analysis to identify contemporary issues in engineering management.

Student Learning Outcome 7

Apply knowledge of mathematics, science, and engineering appropriate for Army officers and practicing engineering managers.

Student Learning Outcome 8

Design and conduct system experiments, including the ability to collect, analyze, and interpret system input and output data.

Student Learning Outcome 9

Accurately, clearly, and concisely report engineering findings, conclusions, and recommendations to clients and stakeholders to support decision making.

Student Learning Outcome 10

Demonstrate the skills necessary to support continued intellectual growth and learning for a career of professional excellence and service to the Nation as an officer in the United States Army.

Student Learning Outcome 11

Act professionally and ethically as a leader of character.

Engineering Psychology (EPS0)

Engineering Psychology is one of four majors available through the Department of Behavioral Sciences and Leadership. It bridges the disciplines of experimental psychology and engineering by providing cadets with a strong foundational knowledge of the psychology of human performance and how these principles of behavior can be used to engineer and evaluate more effective systems. In the Yearling and Cow years, Engineering Psychology majors enroll in courses designed to teach research and statistical skills, and a series of courses that teach them about the scientific foundation of human behavior. In their Firstie year, they learn to apply this knowledge in the design and evaluation of complex systems.

Engineering Psychology Major Student Learning Outcomes and Supporting Objectives

Student Learning Outcome 1

Apply knowledge of human performance to operational readiness and total system design.

- Objective 1: Relate principles of the human nervous and endocrine systems to human performance
- Objective 2: Analyze the characteristics of human perceptual processes in the design of complex systems and work environments
- Objective 3: Apply understanding of human cognitive structure to system design
- Objective 4: Illustrate the limitations of the human body and biomechanics on human performance

Student Learning Outcome 2

Design, conduct, and analyze research in human performance in person/system interaction.

- Objective 1: Apply descriptive and inferential statistics in analyzing data in research projects
- Objective 2: Synthesize scientific literature in deriving an experimental hypothesis
- Objective 3: Design appropriate research methods to answer a scientific question

Student Learning Outcome 3

Evaluate research in human performance and person/system interaction.

- Objective 1: Analyze the validity of research methods used in published studies
- Objective 2: Contrast different empirical approaches to a given human performance research question
- Objective 3: Synthesize different research findings into an structured new whole
- Objective 4: Analyze and existing system and design and alternative and more functional system

Student Learning Outcome 4

Report and defend scientific findings in oral and written format.

- Objective 1: Describe scientific data and theories orally and in writing
- Objective 2: Apply the American Psychological Association's style in preparing written research reports
- Objective 3: Infer extrapolations from research findings to related phenomenon

English Major (ENL1)

Cadets who major in English refine skills of analysis and creativity and enrich their imaginative capacities by studying the literary and artistic expressions of primarily Anglo-American and, to a lesser extent, global cultures. Exposed to a range of literary genres and modes of cultural expression, English majors graduate with a broader and deeper understanding of the history of ideas and of the ways in which imaginative literature has influenced human behavior and shaped cultural norms. By exploring the full spectrum of human behaviors and circumstances and by laying the groundwork for the cultivation of emotional intelligence and sympathetic imagination, the study of literature equips graduates to engage the world's intellectual, moral, and emotional complexities with insight and the potential for empathy. English majors refine their listening, speaking, reading, and writing skills in a variety of analytic and creative situations from the textual analysis of poetry and prose to the study of literary history to dramatic performance. The English major with Honors further challenges Cadets to compose a lengthy academic research project in close consultation with a member of the doctoral faculty. With an English major, a Cadet graduates from West Point with the capacity to analyze textual evidence, to account for cultural context and complexity, to communicate precisely, and to imagine creative solutions to difficult problems—attributes that, taken together, constitute excellent preparation for Army service in the twenty-first century and for life more broadly.

Student Learning Outcome 1

English majors will possess a body of knowledge specific to the study of literature.

Cadets will

- (1) Understand important conventions of literary scholarship, including critical vocabulary, terminology, and research methods.
- (2) Receive a strong foundation in Anglo-American literary history.
- (3) Be exposed to significant works of world literature and to global perspectives.

Student Learning Outcome 2

English majors will communicate effectively within the discipline, observing audience, vocabulary, conventions, and methodology.

Cadets will

- (1) Learn to recognize the difference between rational and emotional responses to texts.
- (2) Speak about literature and culture with depth, nuance, clarity, and precision.
- (3) Practice standard skills of literary scholarship, including close reading, analysis in context, and the application of various critical and theoretical lenses.
- (4) Write effective academic and creative texts that display an appropriate understanding of subject, audience, and purpose.
- (5) Write an extended literary research paper that incorporates secondary sources.

Student Learning Outcome 3

English majors will apply knowledge of literature within and across disciplinary boundaries

Cadets will

- (1) Gain a knowledge of literature's historical, social, cultural, and political contexts.
- (2) Gain an understanding of the influence of literary models and archetypes on human behavior, especially on the behavior of military professionals; and an awareness of the role of literature within the cultures of other countries and regions.
- (3) Draw meaningful connections between literature and other disciplines in discussion and writing.

Student Learning Outcome 4

English majors will demonstrate the capability and the desire to pursue continued intellectual development.

Cadets will

- (1) Value the continuing study of literature and other intellectual pursuits.
- (2) Be able to work independently and collaboratively in literary studies or other intellectual fields.

Student Learning Outcome 5

English majors will cultivate particular habits of mind exercised through literary study.

Cadets will

- (1) Acknowledge and reckon with ambiguity.
- (2) Cultivate patience and the faculty of deep attention.
- (3) Take intellectual and imaginative risks in creative projects.
- (4) Learn to approach problems with resilience, resourcefulness, and invention.

Environmental Engineering (EVE1)

The environmental engineering program is designed for those cadets who are interested in not only what environmental issues we face today, but how we clean-up our past environmental problems and prevent future ones. Environmental engineers use chemical, biological, and physical processes to engineer systems that address these issues. This discipline is evolving to face new challenges resulting from rapid growth in human population and technology. Environmental engineers work in multinational teams to develop methods to combat global climate

change; find alternative sources of energy; and to recover materials from discarded products. Our program provides you with an active learning experience designed to develop your knowledge of math, science, and engineering science and your ability to use this knowledge to be an active problem solver for complex environmental issues. This skill has been invaluable to our graduates in the Army as they work environmental projects in Iraq and Afghanistan and improve the welfare of their Soldiers. The Environmental Engineering Program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

The Program Educational Objectives of the Environmental Engineering Program identify what our graduates can accomplish within four to seven years after graduation.

Within four to seven years, environmental engineering graduates are expected to attain:

1. leadership responsibility involving
 - a. solving complex cross-disciplinary problems
 - b. managing resources
 - c. minimizing environmental impacts
 - d. executing projects within constraints
2. professional skills including
 - a. communicating pertinent information to stakeholders
 - b. building consensus when presented with diverse viewpoints
 - c. evaluating, mitigating and communicating risk
3. self-development through activities including
 - a. achieving professional licensure and certification
 - b. pursuing continuing education
 - c. seeking formal and informal enrichment experiences including community outreach
4. an internalized professional value set that guides you to
 - a. uphold Army values (Loyalty, Duty, Respect, Selfless Service, Honor, Integrity, Personal Courage)
 - b. analyze an environmental engineering challenge involving conflicting ethical and professional interests to determine an appropriate course of action

The Student Outcomes of the Environmental Engineering Program identify what our graduates can accomplish upon graduation.

Upon graduation, Environmental Engineering majors will demonstrate the following Environmental Engineering Student Outcomes:

Student Learning Outcome 1

an ability to apply knowledge of mathematics, science, and engineering

Student Learning Outcome 2

an ability to design and conduct experiments, as well as to analyze and interpret data

Student Learning Outcome 3

an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability

Student Learning Outcome 4

an ability to function on multidisciplinary teams

Student Learning Outcome 5

an ability to identify, formulate, and solve engineering problems

Student Learning Outcome 6

an understanding of professional and ethical responsibility

Student Learning Outcome 7

an ability to communicate effectively

Student Learning Outcome 8

the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context

Student Learning Outcome 9

a recognition of the need for, and an ability to engage in life-long learning

Student Learning Outcome 10

a knowledge of contemporary issues

Student Learning Outcome 11

an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

Environmental Science (ESC1)

Environmental science is a broad, integrative, science-based discipline which focuses on the interrelationships between people and the environment. Environmental scientists conduct investigations to analyze these interrelationships and to identify, abate, or eliminate human-caused pressures on the environment. The ultimate goal of these investigations is to create a sustainable balance between humans and the natural world that minimizes environmental degradation. This major develops expertise into the processes that sustain our environment by expanding upon the West Point core science education by adding studies in the natural sciences such as biology, ecology, geology, and meteorology, and in the integrative studies of environmental decision making and environmental security. This broad academic background is excellent preparation for challenges faced by a military leader who must balance resource and human requirements. The program seeks to (1) enhance your curiosity about natural processes and your ability to study such processes as a scientist and (2) deepen your knowledge of human influences on the environment and foster evaluation of our individual and collective responsibilities as environmental stewards.

The Environmental Science Student Learning Outcomes are designed to:

Student Learning Outcome 1

Enhance curiosity about natural processes and one's ability to study such processes as a scientist.

Student Learning Outcome 2

Deepen knowledge of human influences on the environment and foster evaluation of our individual and collective responsibilities as environmental stewards.

Student Learning Outcome 3

Develop one's ability to evaluate the connections between the environment and individual, national, and global security.

Student Learning Outcome 4

Improve one's facility with the tools of environmental science by developing proficiency in collecting and analyzing lab and field data, deducing patterns, and formulating the next step in an on-going study.

Student Learning Outcome 5

Provide a solid foundation in earth, air, water and life sciences and their interconnections.

Foreign Area Studies: Africa (FSI1)

This description and outcomes apply to all Foreign Area Studies Majors, not just Foreign Area Studies: Africa.

A Foreign Area Studies Major is offered to Cadets interested in pursuing an interdisciplinary study of Africa, East Asia, Eurasia, Europe, Latin America, or the Middle East. Cadets choosing one of these area programs will study the peoples, societies, languages, cultures, geography, history, foreign relations, politics, and economics of a particular region. Cadets will have the opportunity to study in depth the factors that frequently determine national objectives and influence the formulation of governmental policy.

Student Learning Outcome 1

Foreign Area Studies Majors will be proficient in their respective languages.
Cadets will be able to

- (1) Demonstrate foreign language proficiency in listening, speaking, reading, and writing.
- (2) Combine linguistic skills and critical thinking to perform research and conduct analysis.
- (3) Deliver research findings to diverse audiences.

Student Learning Outcome 2

Foreign Area Studies Majors will develop the cultural competence needed to interact effectively with members of the target community.

Cadets will be able to

- (1) Describe and explain crucial figures and events in the history of the target region.
- (2) Discuss significant recent cultural developments.
- (3) Analyze contemporary issues, guided by knowledge of the region's history.
- (4) Account for limitations in existing conceptual frameworks as applied to cultural studies.

Student Learning Outcome 3

Foreign Area Studies Majors will be knowledgeable of the regional dynamics of LX-speaking countries.

Cadets will be able to

- (1) Describe the target region's armed forces.
- (2) Analyze the impact of the physical and human geography on contemporary society.
- (3) Apply concepts of cross-cultural inquiry to evaluate regional change.
- (4) Identify and explain sources of intercultural conflicts.
- (5) Summarize US policies related to the LX-speaking region.

Student Learning Outcome 4

Foreign Area Studies Majors will be critical thinkers.

Cadets will be able to

- (1) Integrate acquired knowledge in area studies and foreign languages with other humanities and social sciences disciplines.
- (2) Transfer language proficiency and intercultural capabilities to the study of and engagement with other language communities.
- (3) Navigate successfully the challenges of living in another culture.

Foreign Language: Arabic (FLA1)

This description and outcomes apply to all foreign language majors and dual language majors, not just Foreign Language: Arabic

The ability to understand and speak a foreign language is a window into the thinking and values of another people. Cadets majoring in foreign languages develop operational proficiency in the foreign language and attain an informed understanding of the culture and regional dynamics of the country or countries where the language is used. These capabilities are invaluable assets to future officers in a globally committed US Army. Majors may focus on the study of a single language: Arabic, Chinese, French, German, Portuguese, Russian or Spanish; or they may pursue the Dual Foreign Language Major by combining studies of any two of the seven languages or Persian. Advanced level study in all languages includes courses in literature, civilization, military readings, and media.

Student Learning Outcome 1

Foreign Language Majors will be proficient in their respective languages.

Cadets will be able to

- (1) Comprehend and analyze language-based cultural products.
- (2) Read critically and analyze texts in the target language.
- (3) Communicate effectively using culturally appropriate forms in the target language.

Student Learning Outcome 2

Foreign Language Majors will develop the cultural competence needed to interact effectively with members of the target community.

Cadets will be able to

- (1) Describe and explain crucial figures and events in the history of the target region.
- (2) Discuss significant recent cultural developments.
- (3) Analyze contemporary issues, guided by knowledge of the region's history.
- (4) Account for limitations in existing conceptual frameworks as applied to cultural studies.

Student Learning Outcome 3

Foreign Language Majors will be knowledgeable of the regional dynamics of LX-speaking countries.

Cadets will be able to

- (1) Describe the target region's armed forces.
- (2) State attitudes and beliefs of the LX-speaking population about the culture/policies of the US.
- (3) Summarize US policies related to the LX-speaking region.
- (4) Identify and explain sources of intercultural conflicts.

Student Learning Outcome 4

Foreign Language Majors will be critical thinkers.

Cadets will be able to

- (1) Combine linguistic skills and critical thinking to perform research, conduct analysis, and deliver findings to diverse audiences.
- (2) Integrate acquired knowledge in foreign language studies with other humanities and social sciences disciplines.
- (3) Transfer language proficiency and intercultural capabilities to the study of and engagement with other language communities.
- (4) Recognize the inherent challenges of translation and literary analysis.
- (5) Navigate successfully the challenges of living in another culture.

Geography: Human (GEH0)

This description and outcomes apply to all Geography majors, not just Geography: Human.

Geography is the study of people, places, and the environment and is an ideal major for Cadets interested in the outdoors, global cultures, and the natural world. More specifically, Geographers examine spatial patterns, geographic processes, and natural and human landscapes. Geography is a broad, integrating discipline with methodologies and analytical foundations that span engineering, science, and the humanities. Majoring in geography requires persistent curiosity and inquiry into human-land-environment interactions including an examination of how natural systems function, how physical landscapes evolve, how human populations adapt, and how humans shape the environment. Three tracks allow Cadets to explore geography through the major subfields of the discipline: Human Geography, Physical Geography, or Human-Environment Interaction. The Human Geography track provides a social science perspective that enables Cadets to explore cultural diversity, population trends, and political, economic, and social systems from a global and regional perspective. The Physical Geography track falls within the natural sciences and allows Cadets to develop a greater depth of knowledge on the physical processes that shape the Earth. The Human-Environment Geography track emphasizes the interaction between humans and their environment by delineating the regional challenges inherent with environmental change and natural hazards, identifying anthropogenic pressures on natural resources and the role these resources play in economic wellbeing, and understanding the environments role in regional instability. The major integrates the use of geographic skills such as computer cartography, remote sensing, and geographic information systems. Geography is the ideal discipline for an Army officer in a changing world.

Graduates with a major in Geography should be able to:

Student Learning Outcome 1

Describe the development of geography and discuss the discipline's unique place within the social and natural sciences.

Student Learning Outcome 2

Explain how geography connects both physical and human geographic principles in order to understand the interactions between people and the natural environment.

Student Learning Outcome 3

Explain the fundamental concepts (place, space, scale, location, region, landscape) and theories that underlie modern thinking in geography.

Student Learning Outcome 4

Explain the basic physical geography processes that affect human patterns & systems on the earth's surface.

Student Learning Outcome 5

Demonstrate a basic competence in a technical skill of value to geographers, such as foreign language, research methodologies, or geospatial technologies.

Student Learning Outcome 6

Use geospatial information sciences to inform understanding of geographic issues.

Student Learning Outcome 7

Identify global cultural patterns and processes and summarize the regional geography of at least one world realm.

Student Learning Outcome 8

Synthesize and apply knowledge of geography to better understand real world issues, including, but not limited to, topics of concern to the Army.

Student Learning Outcome 9

Conduct basic geographic research, analyze the findings, and professionally communicate the results orally and in writing.

Geospatial Information Science (GIS1)

Fundamental to understanding our environment and the geography of the earth is our ability to locate, measure, and quantify geographic phenomena. The discipline of Geospatial Information Science is concerned with the measurement of the earth and all that is on it, natural and man-made. Cadets develop expertise in subjects ranging from traditional

methods of land surveying to satellite imaging and positioning systems. The Geospatial Information Science curriculum builds on a firm math science, and geography foundation with specialized courses in land surveying, cartography, photogrammetry, remote sensing, and geographic information systems. Both the civil and military sectors of our society are placing an ever-increasing reliance on the ability to build and query GIS to support a myriad of social/economic and engineering issues. The cadet at the USMA has a rare opportunity to pursue an integrated field of study that is commonly spread over several separate disciplines at other institutions. This major has applicability for the future military officer regardless of branch. Cadets majoring in GIS receive a 3Y (Space Activities) Skill Identifier on their official military record. Additionally, cadets who branch Engineers will qualify for the Geospatial Engineer Officer Identifier. Cadets majoring in GIS also qualify for the United States Geospatial Intelligence Foundations Geospatial Intelligence Certificate.

GIS Major Student Learning Outcomes and Supporting Objectives

Student Learning Outcome 1

Graduates will understand the fundamentals of geospatial data.

- Graduates will have an understanding of datums.
- Graduates will have an understanding of map projections.
- Graduates will have an understanding of map coordinate systems.

Student Learning Outcome 2

Graduates will be able to acquire geospatial data.

- Graduates will be able to plan a geospatial data collection or acquisition.
- Graduates will be familiar with the sources of geospatial data.
- Graduates will be able to collect geospatial data using traditional surveying techniques.
- Graduates will be able to collect geospatial data using GPS technologies.
- Graduates will be able to convert geospatial data to effectively meet project requirements.
- Graduates will be able to assess the quality of geospatial data.

Student Learning Outcome 3

Graduates will be able to effectively manage geospatial data.

- Graduates will be able to design a geospatial database that meets user requirements.
- Graduates will be able to build a geospatial database based upon design specifications.
- Graduates will be able to critically assess the utility of a geospatial database.
- Graduates will be able to modify the design and content of a geospatial database as necessary.

Student Learning Outcome 4

Graduates will be able to conduct geospatial analysis.

- Graduates will be able to generate digital elevation models.
- Graduates will be able to extract thematic data layers from remotely sensed imagery.
- Graduates will be able to conduct geospatial queries.
- Graduates will be able to take measurements of geospatial features.
- Graduates will be able to conduct basic geospatial analytical operations and methods.
- Graduates will be able to analyze geospatial surfaces.
- Graduates will be able to conduct basic network analysis.

Student Learning Outcome 5

Graduates will be able to effectively communicate with geospatial information.

- Graduates will understand and be able to use the principles of cartographic design.
- Graduates will be able to effectively employ geo-visualization techniques.
- Graduates will be able to communicate geospatial information in a non-graphic manner such as briefings and reports.

Student Learning Outcome 6

Graduates will understand the profession and responsibilities of the discipline.

- Graduates will have an understanding of legal, ethical, and security aspects of geospatial data and information.
- Graduates will be familiar with geospatial organizations with an emphasis on the Department of Defense and the U. S. Army.

History Major: International (HNT2)

This description and the outcomes apply to all history majors, not just History: International.

As Army officers, West Point graduates will perform a broad spectrum of missions vitally important to our nation's security and interests. They must be intellectually and professionally prepared to face these challenges in an uncertain and dangerous world inhabited by peoples of different languages, religions, and cultures. The Department of History contributes to cadets' intellectual and professional development by imparting historical knowledge, an appreciation of history, and critical thinking and communication skills.

Broad historical knowledge is central to developing informed citizens and soldiers. It helps cadets place their service as future Army officers in the context of U.S., Western, and world history. Additionally, it provides the cultural and historical literacy necessary for officers to serve effectively wherever in the world they may find themselves. This is particularly true in the case of counterinsurgency warfare, where victory depends on achieving legitimacy in the eyes of the indigenous population.

Officers with an appreciation of history recognize that every situation is historically unique. They understand that history is of value not in divining answers about the future but in asking the right questions. History is the means of putting human activities and ideas in context, avoiding false analogies, lending a sense of scope and scale, assessing moral implications, anticipating unintended consequences, and judging the feasibility and suitability of possible courses of action. Consulting history on these issues helps officers arrive at thoughtful, appropriate, and humane solutions to the problems they will face in their careers.

Officers who are critical thinkers challenge accepted wisdom in the search for truth and justice. They are open-minded and able to make independent and informed decisions. They reject simplistic answers that suggest the existence of a black-and-white world; rather, they accept the ambiguity associated with most human endeavors and seek the best solution rather than a single "correct" one. The study of history encourages critical thinking by requiring cadets to:

- formulate critical questions;
- conduct research by gathering and prioritizing information; analyze information within the broad context in which it appears; interpret and synthesize information;
- derive reasoned, evidence-based conclusions;
- assess and adjust their conclusions as conditions change or new information becomes available.

Finally, officers must be able to communicate effectively, both orally and in writing, to influence others. It is of no use to know and appreciate history and to be able to think critically if the officer is incapable of communicating his or her thoughts. The Department of History develops cadets' communication skills through frequent practice in and out of the classroom. Our principal evaluative concern is the content of the message, but we also devote great energy to enabling cadets to communicate with grammatical correctness, stylistic grace, and acceptable format. Cadets may pursue a major in one of three fields: American History, International History, or Military History. Each offers flexibility, permitting cadets to develop a foundation of historical perspective as well as pursue specialized studies in regional areas, languages, or other disciplines.

Student Learning Outcome 1

Communicate effectively in speaking and writing.

1. Demonstrate ability to read and understand information and arguments.
2. Demonstrate ability to understand and respond in verbal debate and discussion.
3. Convey ideas clearly, using conventions of format, structure, voice, tone, and level of formality appropriate to the rhetorical situation and audience in an organized way both orally and in writing.

Student Learning Outcome 2

Understand how individuals, organizations, cultures, and societies behaved and met challenges in the past.

1. Identify and analyze the development of different cultures and civilizations and understand the historical foundations of their ethical development.
2. Analyze the interactions of political, social, economic, ethical, military, and cultural components in the development of civilizations.
3. Analyze and evaluate the role of historical insight in informing the decisions of political and military leaders.

Student Learning Outcome 3

Understand the complexity and ambiguity of change over time. Evaluate complex evidence critically and establish appropriate links between cause and effect.

1. Use historical evidence to assess given situations both preceding and following historical change and describe the limits of that change, identify and analyze ethical components of historical events, identify conflicting points of view, analyze conflicting or ambiguous historical perspectives and evidence, establish causal relationships between facts, and identify points of tension.
2. Apply historical knowledge, critical thinking and research skills to inform their own professional decision-making.

Student Learning Outcome 4

Demonstrate critical thinking and research skills:

1. Engage in independent research.
2. Identify the essential aspects of historical situations and ask relevant questions.
3. Reflect on and evaluate evidence and sources, question assumptions, synthesize and draw informed conclusions on the basis of critical analysis.
4. Employ historical thinking and analysis to explain historical patterns, developments and events.
5. Analyze various approaches to historical research and different historical frameworks.

Information Technology (ITE1)

The Information Technology (IT) program builds on the USMA Academic Program Goal for Science, Technology, Engineering and Mathematics: "Graduates apply science, technology, engineering, and mathematics concepts and processes to solve complex problems." Information technologists play a critical role in the specification, design, acquisition, deployment, and management of information technologies for the Army and society. They address the development and evolution of IT infrastructure and systems in organizations. In the Army, information technologists design, install, and modify information systems and networks in tactical and strategic environments.

The Information Technology Major

The primary goal of the IT major is to teach cadets to systematically identify critical information requirements and then design, build, and test complex information systems from hardware and software components to meet individual client and Army organizational needs. The Information Technology program is accredited by the Computing Accreditation Commission (CAC) of the Accreditation Board for Engineering and Technology (ABET), <http://www.abet.org>.

The Information Technology Program objectives are that, five to seven years after graduation, cadets who major in Information Technology will have been successful Army officers who have:

- Identified and exploited opportunities to improve Army operations by applying best practices in information technology.
- Effectively communicated information technology to a range of audiences.
- Grown professionally through self-study, continuing education, and professional development.

The Information Technology Program enables students to attain, by the time of graduation:

Student Learning Outcome 1

An ability to apply knowledge of computing and mathematics appropriate to the discipline

Student Learning Outcome 2

An ability to analyze a problem, and identify and define the computing requirements appropriate to its solution

Student Learning Outcome 3

An ability to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs

Student Learning Outcome 4

An ability to function effectively on teams to accomplish a common goal

Student Learning Outcome 5

An understanding of professional, ethical, legal, security, social, political, and economic issues and responsibilities

Student Learning Outcome 6

An ability to communicate effectively with a range of audiences

Student Learning Outcome 7

An ability to analyze the local and global impact of computing on individuals, organizations, and society

Student Learning Outcome 8

Recognition of the need for and an ability to engage in continuing professional development

Student Learning Outcome 9

An ability to use current techniques, skills, and tools necessary for computing practice

Student Learning Outcome 10

An ability to use and apply current technical concepts and practices in the core information technologies of human computer interaction, information management, programming, networking, web systems and technologies

Student Learning Outcome 11

An ability to identify and analyze user needs and take them into account in the selection, creation, evaluation and administration of computer-based systems

Student Learning Outcome 12

An ability to effectively integrate IT-based solutions into the user environment

Student Learning Outcome 13

An understanding of best practices and standards and their application

Student Learning Outcome 14

An ability to assist in the creation of an effective project plan

Interdisciplinary Science - Astronautics Track (ISA0)

This description and outcomes apply to all tracks of the Interdisciplinary Science major, not just Interdisciplinary Science - Astronautics Track.

The program in Interdisciplinary Science consists of study selected from the disciplines of physics, chemistry, life sciences, and astronautics. This major offers cadets an opportunity to acquire a comprehensive grasp of their physical environment and, more importantly, an understanding of human thought in seeking out successful methods of increasing our insight and knowledge. This area of inquiry will enable cadets to analyze and understand future developments in our society as they relate to such critical issues as medical and health science research, the energy crisis, the nuclear power controversy, the space program, and the development of sophisticated weapon systems. The program provides cadets with a sound basis for graduate study not only in basic sciences but also in applied sciences, engineering, medicine or life science. Additionally, the program prepares cadets for entry into the majority of the technically oriented officer career branches and several of the functional areas.

Interdisciplinary Science Major Student Learning Outcomes**Student Learning Outcome 1**

Cadets can apply disciplinary tools, methods of inquiry, and theoretical approaches from multiple scientific disciplines to model natural systems, solve problems, and apply solutions to hypothetical and real world situations.

Student Learning Outcome 2

Cadets can apply interdisciplinary scientific principles to formulate and test hypotheses in an experimental setting.

Student Learning Outcome 3

Cadets can complete academic assignments and perform research using accepted ethical and scientific standards

Student Learning Outcome 4

Cadets can communicate logical solutions to scientific and technical problems in oral or written form that is easily comprehended by superiors, peers and subordinates.

Student Learning Outcome 5

Cadets are prepared for graduate education in technical disciplines.

Kinesiology (KIN1)

Kinesiology is the scientific study of human movement and is generally divided into the physiological, psychological, and mechanical aspects of movement. The physiological aspects of kinesiology encompass the study of the short-term responses and long-term adaptations of organisms and systems to the challenge of exercise, physical activity, or movement. From a neuromuscular perspective, kinesiology relates to how humans learn and control movements. The psychological aspects of kinesiology relate to the effects of human behavior on physical activity levels and performance. The mechanical aspects of kinesiology encompass the biodynamics of human movements as they relate to exercise and human performance.

Kinesiology is a broad, interdisciplinary field of study that includes diverse specialties such as exercise physiology, biomechanics, nutrition, exercise psychology, and motor control. Areas of inquiry range in scope from the study of the molecular response of cells to the response and adaptation of the whole body. The kinesiology major encompasses a wide spectrum of performance-related issues involving muscular and cardiovascular physiology, energy balance, exercise adherence, skill acquisition, and fitness testing and prescription.

Upon completion, students will be able to:

Student Learning Outcome 1

Identify the anatomical structures that help determine physical competency and human movement

Student Learning Outcome 2

Describe the principles of human physical development and adaptation

Student Learning Outcome 3

Describe the musculoskeletal principles of work capacity

Student Learning Outcome 4

Identify the principles of the mechanics of human movement

Student Learning Outcome 5

Describe the principles of exercise psychology and their application to fitness

Student Learning Outcome 6

Apply the principles of fitness assessment and exercise prescription

Student Learning Outcome 7

Describe the nutritional concepts supporting the energy demands of physical training

Law and Legal Studies (LLS2)

Law is the study of the means of maintaining social order, balancing individual interests against the interest of society, resolving disputes, and addressing social concerns. The study of law sharpens analytical and problem-solving abilities while developing an appreciation of law as a basic foundation of society. A Law and Legal Studies major will equip cadets with the means to understand conflicting issues, to analyze problems, and then to choose the most appropriate solution. The legal system major is not intended to train lawyers. Rather, it will prepare cadets for success in command or in any other position in which effective analytical, problem solving, and communications skills are essential. From this understanding cadets can expand their breadth of experience and gain insight into current social problems or future challenges. A Legal System major will enhance the ability to think critically, conduct research, and persuasively express oneself orally and in writing. Law provides an excellent preparation for subsequent graduate study in public policy and administration, politics, government, business management, and international relations.

Law and Legal Studies Major Student Learning Outcomes and Supporting Objectives**Student Learning Outcome 1**

Cadets understand how individuals and organizations use and react to law in the pursuit of social, political, and economic goals

a. Cadets will learn how to read and understand primary sources of American, foreign, and international law, including constitutions, codes, statutes, cases, regulations, and treaties.

b. Cadets will learn to analyze critically legal commentaries, including news reports, editorials, commentaries, documents, and law review articles.

Student Learning Outcome 2

Cadets communicate in correct and appropriate legal language when writing and speaking to evince clear and critical thinking.

a. Cadets will develop the oral and written skills to communicate concisely, persuasively, and logically to support or oppose a given decision or course of action.

b. Cadets will learn to apply legal texts and principles when analyzing specific problems and cases in order to reach legally and logically supportable conclusions and decisions.

Student Learning Outcome 3

Cadets identify the relationship between legal, ethical, and moral issues, and apply the law properly in decision-making. Cadets will be able to distinguish between the ethical, moral, policy, and legal components of social, political, and economic issues.

Student Learning Outcome 4

Cadets know how law affects and reflects diverse groups within American society to shape behavior, achievement, and ideas.

Cadets will acquire a basic understanding of the substantive and procedural rules of law that underpin the American Legal System.

Student Learning Outcome 5

Cadets know how law is understood and applied in diverse global societies and cultures. Cadets will understand and internalize the values inherent in the principle of the rule of law as it is applied, or not applied, in a variety of cultures and circumstances.

Student Learning Outcome 6

Cadets think and act logically and creatively when acting within the framework and constraints of legal requirements. Students will acquire the legal knowledge and tools to function effectively as a military professional at all levels.

Life Science (LSC1)

The life sciences are a branch of the sciences that study the structure and processes of living organisms. Advances in molecular biology and biotechnology are providing significant improvements in the quality of our lives even as they alter the fundamental way we view life itself. Genetic engineering, recombinant DNA research, medical treatment, ecology, and emerging diseases are just a few of today's research areas under the life sciences heading. The Life Science Major includes courses that give cadets a basic understanding of biology and chemistry along with their application to Army needs. The major focuses on broader understanding of biology and biotechnology. In addition to the core course requirements and three-course engineering sequence (any of the sequences offered) cadets will complete an integrative experience (CH4 79 Methods and Applications of Biotechnology). This course examines the social, economic, political, ethical, and technological aspects of biotechnology. The Life Science Major includes all the courses needed for cadets pursuing the Medical School Option as well as other post-graduate choices.

Applications of the life sciences involve all facets of our lives and are very important to our careers as military officers. A better understanding of biotechnology will allow us to use biosensors to detect weapons of bioterrorism. Biomolecular engineering will make possible the use of cells to manufacture novel biomaterials with specific properties and functions. Biotechnology and biomedical engineering will improve the medical treatment of battlefield casualties. The most important "system" in the future Army will continue to be the human soldier. Because the soldier is a biological system, biotechnology offers unique potential for enhancing the performance of this most complex, critical, and costly of the Army's systems.

Graduates who complete a Life Science Major will be able to:

Student Learning Outcome 1

Understand and apply the Scientific Method.

Student Learning Outcome 2

Gather, analyze, organize, and present scientific information.

Student Learning Outcome 3

Understand the basic principles of life science and chemistry, and their applications to the Army and Society.

Student Learning Outcome 4

Understand and apply basic instrumental methods of biological and chemical analysis.

Student Learning Outcome 5

Recognize the structure and understand the functions of biomolecules.

Student Learning Outcome 6

Know the structures and functions of eukaryotic and prokaryotic cells.

Student Learning Outcome 7

Understand the principles of bioenergetics and metabolism.

Student Learning Outcome 8

Understand the structure-function relationships at all levels of organization of living organisms.

Student Learning Outcome 9

Understand evolutionary biology and its importance.

Student Learning Outcome 10

Understand ecology (organization, diversity, and interdependence of living organisms).

Management (MNG0)

Management is one of four majors available through the Department of Behavioral Sciences and Leadership. Management is arguably one of the most applicable majors for future Army officers. Graduates gain specialized skills and knowledge related to managing both human and physical resources, making them uniquely prepared to understand and ultimately lead people. The Management Major in the D/BS&L equips young officers with the skills necessary to manage and lead in today's complex Army. Our majors are designed to provide students with the ability

to understand, analyze, and improve any organization. The skills student develop are extremely important for Army officers as well as future community leaders. Depending on their focus, Management Majors study traditional business topics such as accounting, finance, human resource management, marketing, production & operations, information systems, strategy, operations research, systems engineering and other aspects of management.

The Management major provides cadets a choice of three concentrations:

The Business Management concentration is focused on applying knowledge of management to improve the development, performance, and well-being of individuals (Soldiers) and their organizations. Management emphasizes forecasting, planning and control, allocating resources, the appraisal of competition, and implementation strategies.

The Social Enterprise Management concentration is focused on applying skills and tools to manage and improve organizations effectively. This concentration examines organizational management efforts through a Social Enterprise lens, so that cadets gain mastery in their understanding of the science of managing in this challenging context. Additionally, cadets will learn how to influence organizational member behavior to optimize performance. It explores both interpersonal and group behavior and how these dynamics influence an organization's structure, performance and mission accomplishment.

The Public Administration Concentration is focused on providing skills and insights that are useful to future Army Officers. Specifically, the concentration combines elements of economic and political analysis in order to understand the interactions between market and political processes (political economy) and the positive and normative aspects of government activity (public policy and management).

Management Major Student Learning Outcomes and Supporting Objectives:

Student Learning Outcome 1

Technological Application: Graduates understand and apply information technology concepts to acquire, manage, communicate and defend information, solve problems and adapt to technological change.

- a. Students demonstrate the ability to effectively use information technology to solve management problems and make effective management decisions.
- b. Students are required to demonstrate proficiency in application programs such as Microsoft Office.

Student Learning Outcome 2

Cultural and Social Awareness: Graduates draw from culture and history to understand human behavior, achievement and ideas in a global context.

- a. Students will demonstrate an ability to evaluate the global market potential for products as well as the most appropriate entry strategy for those products.
- b. Students will demonstrate an understanding of cultural differences among various regions in the global business community and an ability to apply this understanding to management problems.

Student Learning Outcome 3

Graduates understand patterns of human behavior, particularly how individuals, organizations and societies pursue social, political and economic goals.

- a. Students will demonstrate the ability to understand and apply theories of individual and group behavior.
- b. Students will complete coursework in psychology, economics and leadership prior to/concurrent with beginning coursework in management.
- c. Students will have adopted a set of effective individual, group and organizational leadership skills and abilities and be able to demonstrate self-awareness of their own leadership style.

Student Learning Outcome 4

Scientific Inquiry and Critical Thinking: Graduates understand the full range of management concepts and are capable of applying change management, human resource management, marketing, leadership, financial, accounting, production management and strategic modes of thought to management problems.

- a. Students will satisfactorily complete courses in introduction to management, human resources management, marketing, finance, accounting, international management, leadership of org change and strategic management.
- b. Students will be able to create and implement effective strategies for leading or managing change.
- c. Students will complete a capstone project in the strategic management course that demonstrates their ability to integrate management knowledge across fields.
- d. Students will leverage concentration specific knowledge to develop management skills aimed at successfully managing in either the business management, social enterprise, or public admin arenas.

Student Learning Outcome 5

Communication: Graduates listen, read, speak and write effectively.

- a. Students will demonstrate the ability to summarize complex lectures.
- b. Students demonstrate the ability to summarize and discuss complex readings in the management literature.
- c. Students demonstrate effective speaking skills and are capable of producing a professional quality presentation using style, vocabulary and organization that is appropriate to the audience.
- d. Students develop effective writing skills necessary to produce clear, comprehensive and persuasive analysis.

Student Learning Outcome 6

Moral and Ethical Reasoning: Graduates recognize moral issues and apply ethical considerations in decision making.

- a. Students will be able to recognize and analyze ethical problems, work through the ethical decision-making process and defend a solution.
- b. Students will identify the activities/issues in leadership that may present ethical challenges and will articulate the consequences associated with unethical behavior.

Student Learning Outcome 7

Team Dynamics: Graduates demonstrate the ability to manage teams effectively.

- a. Students will work on team projects and evaluate other team members' work in the majority of required courses in the management major.
- b. Students develop and implement leader actions and integrate management functions that maximize group/team effectiveness and organizational outcomes.
- c. Students use their understanding of group processes to make themselves and members of their teams more cooperative and productive.

Student Learning Outcome 8

Contribution: Graduates understand how the management major contributes to their effectiveness as Army officers.

- a. Student projects and discussions connect course material to their role as an Army Officer.
- b. Student AIADs and trip sections experiences are linked to their role as an Army Officer through discussion and summary papers.
- c. Lesson objectives are linked to the management of military organizations.

Mathematical Sciences (MSC1)

The mathematical sciences embody those areas of mathematics which have strong interdependence with other disciplines. Their purpose is to clarify concepts and describe scientific phenomena through symbolic language and the rules for its use. Its scope spans the total breadth of knowledge that is capable of being quantified. The full process of the mathematical sciences has expanded from their historical ties with the physical sciences to now include areas such as: the biological, sociological, behavioral, and computer sciences; operations research; and all engineering fields. The Department of Mathematical Sciences offers abundant opportunities for study in a broad range of mathematical subjects. Courses such as differential equations, algebra, mathematical modeling, analysis, numerical computation, statistics, and linear optimization provide a sound mathematical foundation in the science and engineering fields. In addition, follow-on courses such as algebra, analysis, combinatorics, and advanced individual study provide both depth in understanding the foundations of mathematical theory, as well as opportunity for study and research in a selected subject. Whenever possible, the use of technology is emphasized to extend the knowledge required for the consideration of realistic and challenging problems found in today's world. Cadets who major in Mathematical Sciences are required to take a seven-course core mathematics sequence, a statistics elective, an integrative experience course designed to explore real world problems pulled from many disciplines, and two additional mathematics electives for a total of eleven courses in the major. Mathematical Sciences majors are also required to take a three-course engineering sequence of their choice. Cadets will take MA205 - Calculus II as their STEM Depth choice in the core curriculum unless it is validated. Further, cadets will take a three-course Complementary Support sequence that provides breadth to their mathematical understanding (one of the three courses must be IT305 - Theory and Practice of Military IT Systems). Thus, Mathematical Sciences majors will take 41 courses while successfully completing their major and core curriculum requirements. The Mathematical Sciences with Honors major requires two semesters of directed research under senior faculty advisement that replaces the one semester research requirement, and culminates in a written thesis and presentation during the second semester. In order to receive the Mathematical Science with Honors Major, cadets will need to attain an APSC of at least 3.0 in the core curriculum and an APSC of at least 3.5 in the major curriculum.

Graduates who complete a Mathematical Sciences major will be able to:

Student Learning Outcome 1

Demonstrate competence in modeling physical, informational, and social phenomena by

- a. Identifying and articulating assumptions, metrics and constraints

- b. Applying appropriate solutions techniques
- c. Interpreting results within the appropriate context

Student Learning Outcome 2

Argue and inquire soundly and rigorously; become independent questioners and learners

Student Learning Outcome 3

Achieve mathematical proficiency in breadth and depth

- a. Understand and apply theorems and algorithms
- b. Understand and apply analytical methods
- c. Understand and apply numerical methods
- d. Understand and apply graphical methods
- e. Understand discrete and continuous structures and processes

Student Learning Outcome 4

Communicate mathematics, both orally and in writing

Student Learning Outcome 5

Use technology to model, visualize, and solve complex problems

Student Learning Outcome 6

Develop attitudes - habits of mind

- a. Creative and curious
- b. Experimental disposition
- c. Critical thinking and reasoning
- d. Commitment to life-long learning

Student Learning Outcome 7

Understand the role of mathematical sciences (in our world) by analyzing applied problems through disciplinary, multidisciplinary, and interdisciplinary approaches

Mechanical Engineering (MEN1)

Mechanical Engineering is one of the broadest and most diverse of the engineering fields. It deals with devices and systems for energy conversion, for material transport and for control of motion and forces. A sampling of the topics addressed by the discipline include air, ground, and sea vehicles; power plants; control systems; machinery; machine tools; conventional and nuclear-powered power production facilities; biomedical devices; space vehicles; pollution control; new energy sources; energy conversion; transportation systems; and, military weapons systems. These modern weapons systems are used as vehicles of instruction in many of the courses, making mechanical engineering particularly appropriate for those considering service in most branches of the Army as well as specialties such as engineers, aviation, research and development, project management and logistics. The Department of Civil and Mechanical Engineering offers a major in Mechanical Engineering that is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>. All cadets experience the same core mechanical engineering program and choose three electives for depth of study. The goal of the Mechanical Engineering program is to provide high quality instruction in a positive learning environment leading to a degree recognized as being among the best in the nation. The Mechanical Engineering program stresses engineering fundamentals so that graduates are well equipped to understand complex technical problems in a rapidly changing, technology-intensive Army. Once completed, the graduate is well-prepared to excel as an officer and an engineer. The practice-oriented degree is strengthened by the complete integration of design and laboratory experience throughout the curriculum.

To meet this goal, the Program Educational Objectives of the Mechanical Engineering program are:

Within four to seven years after graduation, mechanical engineering majors are expected to attain:

1. multiple positions of responsibility in which they:
 - a. lead people.
 - b. manage resources.
 - c. solve complex problems.
 - d. communicate information.
 - e. influence decisions.
 - f. uphold the Army values (Loyalty, Duty, Respect, Selfless Service, Honor, Integrity, and Personal Courage).
2. self-development through formal and informal learning opportunities.

3. experience in providing engineering expertise to the Army when called upon to do so.
4. sustained employment and/or further education in a technical/professional field.

To achieve these Program Educational Objectives, cadets who qualify for graduation with a mechanical engineering major from USMA will demonstrate the following Mechanical Engineering Student Outcomes:

Student Learning Outcome 1

an ability to apply knowledge of mathematics, science, and engineering

Student Learning Outcome 2

an ability to design and conduct experiments, as well as to analyze and interpret data

Student Learning Outcome 3

an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability

Student Learning Outcome 4

an ability to function on multidisciplinary teams

Student Learning Outcome 5

an ability to identify, formulate, and solve engineering problems

Student Learning Outcome 6

an understanding of professional and ethical responsibility

Student Learning Outcome 7

an ability to communicate effectively

Student Learning Outcome 8

the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context

Student Learning Outcome 9

a recognition of the need for, and an ability to engage in life-long learning

Student Learning Outcome 10

a knowledge of contemporary issues

Student Learning Outcome 11

an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

Nuclear Engineering (NEN1)

Nuclear engineering makes practical use of the energy that is released by the atomic nucleus. Applications extend into the fields of electric power, medicine, nuclear weapons, and nuclear weapons effects. At USMA the vehicle for learning the concepts of the field is the commercial nuclear power plant. The approach is interdisciplinary; it draws widely upon mathematics, physics, and mechanics, with special emphasis on applied physics and the thermal-hydraulic aspects of mechanical engineering. The management of engineering is also addressed through decision analysis and economic analysis. The Nuclear Engineering major is designed to provide depth of knowledge in the application of nuclear energy to include power production, radiation health physics, nuclear weapons, and weapons effects. The major is taught through multiple departments and includes interdisciplinary electives from physics, mathematics, mechanical engineering, civil engineering, electrical engineering, and nuclear engineering. The Nuclear Engineering student will gain a broad background for further study in graduate school and Army assignments requiring expertise in mechanical engineering, applied radiation physics, nuclear weapons and weapons effects, or any of a variety of related topics. The Nuclear Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

The Nuclear Engineering Program Educational Objectives are broad statements that describe what graduates are expected to attain within a few years after graduation. Program educational objectives are based on the needs of the Nuclear Engineering Program's constituencies.

- As Army leaders, graduates solve complex, multi-disciplinary problems for the Army and the Nation.

- Graduates demonstrate the necessary leadership and teamwork skills to work in multi-disciplinary team environments.
- Graduates are prepared to provide appropriate nuclear and radiological engineering expertise to the Army.
- Graduates communicate effectively, orally and in writing.
- Graduates continue to grow intellectually and professionally -- as Army officers and as engineers.

To achieve these Program Educational Objectives, cadets must attain or possess at graduation:

Student Learning Outcome 1

an ability to apply knowledge of mathematics, science, and engineering

Student Learning Outcome 2

an ability to design and conduct experiments, as well as to analyze and interpret data

Student Learning Outcome 3

an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability

Student Learning Outcome 4

an ability to function on multi-disciplinary teams

Student Learning Outcome 5

an ability to identify, formulate, and solve engineering problems

Student Learning Outcome 6

an understanding of professional and ethical responsibility

Student Learning Outcome 7

an ability to communicate effectively

Student Learning Outcome 8

the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context

Student Learning Outcome 9

a recognition of the need for, and an ability to engage in life-long learning

Student Learning Outcome 10

a knowledge of contemporary issues

Student Learning Outcome 11

an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Operations Research (ORE1)

Operations Research (OR) is a specific approach to decision making with a focus on how best to design and operate systems, usually under conditions requiring the allocation of scarce resources. However, whether one means the term to be a professional designation, a label for a body of methods, or an approach to problem solving, OR is inextricably linked to the direction and management of large systems for people, machines, materials, and money in government, industry, business, and defense. Since its inception during WWII, the interdisciplinary field of OR has set itself apart as an applied mathematical science and engineering discipline with a diverse range of applications. Because of the increased demand for OR analysis within the Army, the OR specialty (FA49) continues to enjoy steady growth in membership, and is associated with superb educational and promotion opportunities throughout an officer's military career. West Point remains the single largest source of FA49 officers for the Army. Graduates of the OR program at USMA are well prepared to tackle some of the Army's most challenging problems and to pursue graduate study in support of the FA49 career field. Cadets who major in Operations Research are required to take a six-course core sequence, a simulation elective, and three additional discipline electives for a total of ten courses in the major. Operations Research majors are also required to take a three-course Systems Engineering sequence in order to create the necessary integration between the Math and Systems Engineering departments. Cadets will take MA205 - Calculus II as their STEM Depth choice in the core curriculum unless it is validated. Cadets will take a three-course Complementary Support Course sequence that provides breadth to their analytical understanding while incorporating an integrative experience through a year-long capstone project designed to explore real world problems from multiple disciplines. Further, IT305 - Theory and Practice of Military IT Systems is required for Operations Research majors as a Complementary Support Course (CSC). Thus, Operations Research majors will take 40 courses while successfully

completing their major and core curriculum requirements. The Operations Research with Honors major requires a two-course sequence that requires two semesters of directed research under senior faculty advisement and culminates in a written thesis and presentation during the second semester. In order to receive the Operations Research with Honors Major, cadets will need to attain an APSC of at least 3.0 in the core curriculum and an APSC of at least 3.5 in the major curriculum.

Graduates who complete an Operations Research major will be able to:

Student Learning Outcome 1

Demonstrate competence in modeling physical, informational, and social phenomena by:

- a. Identifying and articulating assumptions, metrics, and constraints
- b. Applying appropriate solution techniques
- c. Interpreting results within the appropriate context

Student Learning Outcome 2

Argue and inquire soundly and rigorously; become independent questioners and learners

Student Learning Outcome 3

Achieve proficiency in Operations Research - in breadth and depth:

- a. Understand and apply probabilistic and statistical models and methods
- b. Understand and apply simulation methods
- c. Understand and apply optimization methods

Student Learning Outcome 4

Communicate effectively - orally and in writing

Student Learning Outcome 5

Use technology to model, visualize, and solve complex problems

Student Learning Outcome 6

Develop attitudes - habits of mind

- a. Creative and curious
- b. Experimental disposition
- c. Critical thinking and reasoning
- d. Commitment to life-long learning

Student Learning Outcome 7

Understand the role of operations research in interdisciplinary problem solving

Philosophy Major (PYL1)

The scope of Philosophy is much wider than the areas of Ethics and Just War theory studied in PY201. Besides Ethics, Philosophy investigates the very nature of human knowledge; the relationship between mind and matter; and fundamental principles of the kind that underlie religion, science, and politics. The study of Philosophy also has a significant cultural dimension. It challenges us to understand attitudes, beliefs and arguments from societies more or less remote from our own: the Greek and Roman world; the classical age of Asian thought; 17th-century European thought in its adjustment to modern science; and American contributions to our understanding of philosophical method. Doing Philosophy is a superior example of Critical Thinking at work, thanks to the high value it places in all its courses on systematic investigation, conceptual analysis, and cogent reasoning. West Point's Philosophy major is designed to ensure breadth and to encourage depth. It also provides opportunities to pursue further study in the ethics of war. The intellectual skills and experience that DEP's Philosophy major fosters are beneficial to the Army. The future officer in whom these skills take root will be an asset to any branch.

Cadets who major in Philosophy will be able to: analyze and construct philosophical arguments; show competency in logic and other core areas of philosophy; be familiar with major historical areas, figures, and problems of philosophy; understand philosophical ideas within their historical and cultural contexts; think and write in a rigorous and precise manner; use their critical thinking skills to provide original or innovative approaches to philosophical problems; apply philosophical methods in a variety of contexts at the personal and social levels; apply philosophical methods across disciplinary boundaries to a broad range of issues in the modern world.

Student Learning Outcome 1

Philosophy majors will be able to analyze and construct philosophical arguments, advancing reasoned solutions for problems.

Student Learning Outcome 2

Philosophy majors will have the ability to understand philosophical ideas within their historical and cultural contexts.

Student Learning Outcome 3

Philosophy majors will be able to apply philosophical methods within the discipline and across disciplinary boundaries to issues and problems that individuals, communities, or governments face in the modern world.

Student Learning Outcome 4

Philosophy majors will be familiar with major historical areas, figures, and problems of philosophy.

Student Learning Outcome 5

Philosophy majors will demonstrate the ability to think and write in a logically rigorous and conceptually precise manner about complex philosophical issues.

Student Learning Outcome 6

Philosophy majors will demonstrate competency in logic and other core areas of philosophy.

Student Learning Outcome 7

Philosophy majors will develop the disposition to apply philosophical methods in a variety of contexts at the personal, interpersonal, and social levels.

Student Learning Outcome 8

Philosophy majors will use their critical thinking skills to provide original or innovative approaches to philosophical problems.

Physics (PHY1)

Our modern lives have been overwhelmingly affected by the discoveries of physics in the twentieth century, for it is through physics that we have come to understand the fundamentals of nuclear energy, semiconductors, lasers, fiber optics, the interaction of radiation with matter, and even the workings of the universe. It is through this basic understanding that applied scientists and engineers have developed and assembled the myriad technical devices that are so much a part of modern life. The program in physics integrates all these phases of modern technology to develop a fundamental knowledge that can support a variety of technical interests and activities in future years. The major is designed to provide the Cadet a solid foundation in the essential pillars of theoretical physics-classical mechanics, electrodynamics, statistical physics, and quantum mechanics. Additionally, a strong experimental component emphasizes the skills necessary to design and build experimental apparatus and applies these skills to modern physics, lasers and optics. Opportunities are available to perform research at Army and national laboratories during the summer.

Physics Major Student Learning Outcomes and Supporting Objectives

Student Learning Outcome 1

Cadets can apply the laws of physics to formulate mathematical models of physical systems, solve the resulting equations, and apply the solutions to hypothetical and real-world problems.

- a. Cadets can use advanced mathematical methods to solve physics problems.
- b. Cadets can identify situations in which relativistic effects are important and apply special relativity to solve mechanics problems.
- c. Cadets can apply Newtonian and Lagrangian mechanics to solve problems in classical physics.
- d. Cadets can solve problems involving electro- and magnetostatics.
- e. Cadets can solve problems involving electrodynamics in vacuum and in homogeneous linear media.
- f. Cadets can identify phenomena and solve problems involving thermodynamics and quantum statistical mechanics.
- g. Cadets can identify situations in which quantum mechanics is necessary and solve problems involving non-relativistic quantum mechanics.

Student Learning Outcome 2

Cadets can apply the laws of physics to formulate and test hypotheses in an experimental setting.

- a. Cadets can plan and perform experiments.
- b. Cadets can analyze experimental data.

Student Learning Outcome 3

Cadets can complete academic assignments and perform research using accepted ethical and scientific standards.

- a. Cadets provide sufficient citations and notes to clearly distinguish the Cadet's work from the work of others.
- b. Cadets avoid using or obscuring fallacious reasoning in the presentation of solutions to technical problems.
- c. Cadets are aware of acceptable scientific standards and the professional and/or personal consequences of not following them.

Student Learning Outcome 4

Cadets can communicate logical solutions to scientific and technical problems to superiors, peers, and subordinates.

- a. Cadets can prepare written submissions, posters, laboratory reports, and oral briefings using the style, format, organization, and procedures common to standard scientific presentations.
- b. Cadets can use sound mathematical reasoning, appropriate computational techniques, and statistical methods to explore, represent, and communicate solutions to problems.
- c. Cadets use precise and accepted scientific language in all technical communications.
- d. Cadets read and understand the content of general scientific publications such as Scientific American and Physics Today. They are able to follow citations to obtain background information on the material in the articles and summarize orally and in writing the strengths and weaknesses of the arguments presented in such publications to non-technical audiences.

Student Learning Outcome 5

Cadets are prepared for graduate education in physics, engineering or related fields.

- a. Cadets demonstrate proficiency across the range of skills and knowledge expected of entering graduate students in reputable physics programs.
- b. USMA graduates gain admission to graduate programs in technical fields at leading colleges and universities.
- c. USMA graduates successfully earn advanced degrees from leading colleges and universities.

Political Science: American Politics (PAP2)

The American Politics program provides students with the ability to explain political outcomes. The program traces the founding and evolution of our American political institutions, emphasizing how philosophical principles influenced the structure and behavior of the nation's governing apparatus. Students receive instruction in political science methods, enabling them to identify and critique methodological approaches to answering political science questions and select an appropriate method of answering their own research questions. Cadets are afforded an opportunity to study contemporary topics in public policy in depth and explain outcomes based on the actions of formal and informal political actors. The American Politics program emphasizes the role of the US military in society, its constitutional roles and responsibilities, and the shifting tenor of civil-military relations across time and levels of policy implementation. Cadets explore the military profession in the context of American political society.

American Politics Student Learning Outcomes and Supporting Objectives:

Student Learning Outcome 1

Analyze the constitutional origins and historical development of formal institutions (Legislative, Executive, Judicial branches, bureaucracy) and informal actors (media, political parties, interest groups) in American politics.

- a) Identify the fundamental principles of the U.S. Constitution that influence relevant decisions - such as power, conflict, civil rights, and civil liberties - within the American political system.
- b) Examine the political behavior of individuals, actors, and institutions within American politics and the policymaking process.
- c) Understand the behavioralist, historical institutionalist, and rational choice schools of thought in American politics.

Student Learning Outcome 2

Summarize the origins and development of the American political tradition, distinguishing how the historical and philosophical roots of the Republic inform and explain contemporary American politics.

- a) Demonstrate critical understanding of the ancient and modern foundations of Western political thought.
- b) Contrast the Western tradition with a non-Western tradition of political thought.
- c) Identify the tension between liberty and security.

Student Learning Outcome 3

Understand the methods by which political scientists research, critically analyze, and explain American politics.

- a) Distinguish research questions appropriate to political science.
- b) Critically evaluate scholarly research based on the merits of research design.
- c) Apply the scientific method using qualitative, quantitative, or experimental methods.
- d) Demonstrate the ability to communicate ideas and provide critical evaluation clearly and effectively.
- e) Demonstrate an appreciation for intellectual pluralism by applying more than one theoretical perspective to a particular phenomenon and assessing the relative value of alternative explanations.

Student Learning Outcome 4

Understand U.S. civil-military relations by emphasizing the roles, responsibilities, and culture of the military profession.

- a) Describe the roles and responsibilities of the military, both as a profession and as a bureaucratic entity, as established in the U.S. Constitution.
- b) Discuss the major theories of modern U.S. civil-military relations.
- c) Understand the challenges officers face in civil-military relations at the strategic (agenda-setting), operational (formulation and legitimization), and tactical (implementation) levels.

Student Learning Outcome 5

Understand the U.S. policy-making process.

- a) Compare the strengths and limitations of the different theoretical frameworks - normative and empirical, qualitative and quantitative - in evaluating the domestic policymaking process.

- b) Understand short-term and long-term policy strategies, and the means actors, institutions, and subsystems use to achieve them.
- c) Describe the influences of formal and informal actors on the development and implementation of U.S. foreign policy.
- d) Explain the theoretical foundations, American principles, and values that influence U.S. foreign policy.

Political Science: Comparative Politics (PCP2)

Cadets pursuing the study of Comparative Politics have the opportunity to examine and analyze the conduct of politics in diverse settings, ranging from Latin America, Europe, the Middle East, Asia, and Africa, as well as the United States. Students consider sources of stability or instability in political regimes, and examine the conditions that promote democratic or authoritarian rule. The primary interests in Comparative Politics are political culture, political institutions, social structure, economics, and interstate relationships. Not only do students examine state regimes and policies, but they also explore the meanings and sources of change that may spring from the ballot box or the barrel of a rifle.

Comparative Politics Major Student Learning Outcomes and Supporting Objectives

Comparative Politics graduates are able to:

Student Learning Outcome 1

Develop the ability to critically analyze diverse political systems through the use of theory and concepts.

- a) Evaluate the impact of Regime Model concepts (including command, consent, interests, rights, political culture, social and economic structure, political institutions, and external variables) on a state's regime type and stability.
- b) Understand and critique theories regarding the relationship between economics and regime type.
- c) Understand how to formulate a hypothesis that examines a specific element of the state-societal relationship.

Student Learning Outcome 2

Learn and apply comparative methods to analyze the stability of political regimes and the efficacy of their institutions.

- a) Understand the various methods social scientists use to compare regimes.
- b) Understand the value of institutional comparisons across time, and of Western and non-Western comparisons.
- c) Identify appropriate research question comparing two or more countries.

Student Learning Outcome 3

Understand and apply alternative perspectives when seeking to describe, explain, or predict developments in the state-societal relationship.

- a) Understand theories and ideas that explain conditions for democratization.
- b) Explain how external developmental aid and assistance impacts the internal dynamics of a regime.
- c) Understand the differences between empirical and normative perspectives on questions of regime type.
- d) Understand the importance of societal and political norms, and explain regime decisions from a non-U.S. perspective.

Student Learning Outcome 4

Apply comparative political concepts and social scientific methods to the study of a specific country, region or thematic interest.

- a) Understand the social, political, and economic variables that shape the political institutions, values and interests of a particular country or region.
- b) Analyze the distribution of power and patterns of political interaction to determine the unique aspects of the security situation within a region.
- c) Understand the theories and issues relevant to explaining nationalism, democratization, pre- and post-conflict stability, and conflict resolution. Appreciate the importance of cultural anthropology in each of these processes.

Student Learning Outcome 5

Integrate the study of theory and policy to analyze a country's internal structure and how that structure impacts its security policy. Conduct this analysis from the viewpoint of the state and from a non-U.S. perspective.

- a) Recognize individual and group biases through the study of non-Western countries and their cultures.
- b) Analyze the relationship between security and defense planning in non-Western states.
- c) Understand foreign perspectives on issues related to state security.

Political Science: International Relations (PIR2)

Students majoring in International Relations (IR) study issues of conflict and cooperation in the international system. This involves examination of domestic influences on state behavior, the foreign relations of states, characteristics of the international system, and the role of non-state actors. Central concerns in IR include power, strategy, war, international cooperation, trade, and economic development. International Relations majors think critically about complex political issues, they will learn how to test hypotheses using reliable methods and evidence, evaluate the moral dimension of issues in international relations, appreciate the problem of uncertainty and its significance, and see important events and issues from multiple perspectives. As a social science, IR is organized around alternative theoretical schools of thought that seek to explain international phenomena and that can provide policy makers with

the tools necessary to anticipate future developments in the international system and create policies that advance state goals. The ability to understand, anticipate and shape the complex dynamics of the international system is of direct relevance to U.S. Army officers, whose careers will be defined by the problems and opportunities that emerge within this system.

Student Learning Outcome 1

Graduates understand and are able to employ alternative theoretical approaches in order to describe, explain, or predict events or developments in international relations.

Supporting Objectives:

- a. Articulate the foundational assumptions, central concepts, logical claims, and dominant criticisms of the realist, liberal, and constructivist schools of thought in international relations.
- b. Use international relations theory and concepts to describe, explain, or predict an event or development in international affairs.
- c. Demonstrate an appreciation for intellectual pluralism by applying more than one theoretical perspective to a particular phenomenon and assessing the relative value of alternative explanations.
- d. Understand the prescriptive, policy-relevant implications of international relations theories and concepts.

Student Learning Outcome 2

Graduates are familiar with the variety of actors in international affairs and appreciate their incentives as well as the roles that they play in shaping international events and developments.

Supporting Objectives:

- a. Understand the role of the international system in shaping the incentives and behavior of actors in international affairs.
- b. Understand the possible domestic sources of foreign policy behavior.
- c. Understand the roles non-state actors may play in international affairs.
- d. Understand the ancient and modern foundations of Western political thought.

Student Learning Outcome 3

Graduates understand the key elements of social science research as the basis of a rigorous approach to developing and evaluating alternative explanations for international relations phenomena.

Supporting Objectives:

- a. Can apply standards of causal logic and evidence from the social sciences to critically examine the written work of others.
- b. Can apply the basic writing conventions of the social sciences, with an emphasis on sound structure, logical argumentation, and proper use of valid evidence in their own written work.
- c. Understand the differences between and potential value of empirical and normative approaches to important questions of political life.

Student Learning Outcome 4

Graduates obtain in-depth understanding of a particular region or international relations issue.

Supporting Objectives:

- a. Apply international relations theories, political science concepts, and the standards of social science research and writing to the study of specific regional or thematic issues.
- b. Refine intellectual interests and develop a commitment to lifelong learning through exploration of thematic and regional issues.

Student Learning Outcome 5

Graduates appreciate the relevance and value of international relations theories and concepts to issues of central concern to Army officers and national security professionals.

Supporting Objectives:

- a. Apply international relations theories and political science concepts to analyze and assess current international events and developments relevant to U.S. national security.
- b. Integrate the study of theory and policy through analysis of the international, domestic, organizational, and technological influences on U.S. national security policy.

Psychology (PSY1)

Psychology is one of four majors available through the Department of Behavioral Sciences and Leadership. Psychology is arguably one of the most applicable majors for future Army officers. Graduates gain specialized skills and knowledge related to understanding human behavior, making them uniquely prepared to understand and ultimately lead people. The study of psychology investigates human behavior, cognition, and emotion by analyzing the complex interactions between environmental, social, cultural, and biological influences. Opportunities are available during the summer to apply the lessons learned in the classroom in a variety of settings.

The Psychology major provides cadets a choice of two tracks:

- The Applied General Psychology track is focused on applying knowledge of psychology to improve the development, performance, and well-being of individuals (soldiers).
- The Organizational Psychology and Leadership track is focused on applying knowledge of psychology to select and

develop leaders, and improve the effectiveness of groups, teams, and organizations.

Psychology Major Student Learning Outcomes and Supporting Objectives:

Student Learning Outcome 1

Graduates demonstrate fundamental knowledge and comprehension of the major concepts, theoretical perspectives, historical trends, and empirical findings; and demonstrate the ability to apply their knowledge to address behavioral issues.

- a. Describe key concepts, principles, and overarching themes in psychology.
- b. Demonstrate a working knowledge of psychology's content domains.
- c. In the Applied General Psychology Track, the emphasis is on applying knowledge of individual and social psychology to address issues relevant to the development, performance, and well-being of people (soldiers).
- d. In the Organizational Psychology and Leadership Track, the emphasis is on applying knowledge of human behavior in organizations to: a) select and develop leaders/leadership, and b) enhance organizational effectiveness.

Student Learning Outcome 2

Graduates demonstrate scientific reasoning and problem solving skills, including effective research methods.

- a. Graduates demonstrate psychology information literacy; and use scientific reasoning to design and conduct basic psychological research, interpret data, and draw appropriate conclusions about psychological phenomena.
- b. Graduates engage in innovative and integrative thinking and problem solving.
- c. Graduates incorporate sociocultural factors in scientific inquiry.
- d. In the AGP Track, the emphasis is on critical thinking in the application of psychological research; and on conducting empirical research studying issues pertinent to the development, performance, and wellbeing of people.
- e. In the OPL Track, the emphasis is on critical thinking in the application of research and other writings pertinent to human behavior in organizations; and on conducting empirical research studying issues pertinent to leadership and organizational effectiveness.

Student Learning Outcome 3

Graduates demonstrate ethically and socially responsible behaviors for professional and personal settings in a landscape that involves increasing diversity.

- a. Graduates apply ethical standards to evaluate psychological science and practice.
- b. Graduates build and enhance interpersonal relationships
- c. Graduates embrace values consistent with the professional military ethic, which contribute to positive outcomes in work settings and in building a society responsive to multicultural and global concerns.

Student Learning Outcome 4

Graduates demonstrate competent written, oral, and interpersonal communication skills.

- a. Graduates demonstrate effective writing and presentation skills for different purposes (e.g., they can produce a research study; and present information to a professional audience or decision maker).
- b. Graduates interact effectively with others for different purposes (e.g. they demonstrate relevant skills such as counseling, coaching, and/or negotiations).

Student Learning Outcome 5

Graduates apply psychology-specific content and skills, effective self-reflection, project-management skills, teamwork skills, and career preparation.

- a. Graduates apply psychological content and skills to career goals.
- b. Graduates exhibit self-efficacy and self-regulation.
- c. Graduates effectively manage individual and team projects and professional requirements.
- d. Graduates are inspired to life-long learning in disciplines pertinent to psychology and leadership.

Sociology Major (SOC1)

Sociology is one of four majors available through the Department of Behavioral Sciences and Leadership. Sociology is arguably one of the most applicable majors for future Army officers. Graduates gain specialized skills and knowledge related to understanding human behavior, making them uniquely prepared to understand and ultimately lead people. The study of sociology investigates human behavior, cognition, group dynamics, and social institutions by analyzing the complex interactions between environmental, social, and cultural influences.

Sociology Major Student Learning Outcomes and Supporting Objectives:

Student Learning Outcome 1

(COMMUNICATION): Graduates listen, read, write, and speak effectively.

(a) Objective 1.1 (Speaking/Oral): Express ideas in a clear and coherent manner in oral presentations in group settings.

(b) Objective 1.2 (Written): Express ideas in a clear and coherent manner in written correspondence.

(1) 1.2a: Be able to write a clear, grammatical, well-organized report of the findings from sociological data analysis.

(2) 1.2b: Write a clear and concise sociological analysis account of a social event, topic, issue, or problem.

(c) Objective 1.3 (Listening): Be able to read or listen to professional-level sociological reports with sufficient understanding to summarize and provide an accurate overview.

(d) Objective 1.4 (Reading): Be able to comprehend, analyze, evaluate, and apply scholarly research reports and literature.

Student Learning Outcome 2

(INNOVATIVE): Graduates are creative and critical thinkers. They can frame a problem from multiple perspectives; identify underlying assumptions; understand central concepts relevant to the situation; use evidence to make well-reasoned decisions; understand the consequences of their decisions and actions; and communicate their decisions clearly.

(a) Objective 2.1: Creative thinking

(1) 2.1a: Be able to identify the structure of an argument presented in written form (conclusion, assumptions, premises, supporting evidence, and weaknesses).

(2) 2.1b: Be able to identify the basic fallacies in reasoning such as appeal to ignorance, the gambler's fallacy, hasty generalization, false dilemma, slippery slope, ad hominem arguments, the straw man fallacy, and other fallacies and flaws in reasoning.

(b) Objective 2.2: Define a Problem

Student Learning Outcome 3

(CROSS-CULTURAL COMPETENCE): Graduates are both cross-culturally and interculturally competent. They understand patterns of human behavior and can use this knowledge to analyze and understand situations where people and groups from different cultures are in contact, and consequently find effective solutions to the problems they will face as officers.

(a) Objective 3.1: Knowledge of one's own and other cultures

(1) 3.1a: Recognize and discuss the impact of inequality, race, ethnicity, gender, sexual orientation, and other social factors and structures on different groups in society.

(2) 3.1b: Discuss the social factors (including institutional factors) that create and perpetuate inequality.

(3) 3.1c: Describe the social processes that create and perpetuate prejudice and discrimination, including ethnocentrism and xenophobia

(4) 3.1d: Be able to understand, analyze, and interact effectively in foreign cultures.

Student Learning Outcome 4

(ADAPTABLE): Graduates are adaptable and mentally agile. They anticipate and respond effectively to the problems they will face as Army officers by willingly engaging in new environments even in the face of considerable ambiguity in a changing and dynamic world.

(a) Objective 4.1: Problem Solving

(1) 4.1a: quantitative and qualitative data

(2) 4.1b: policies and programs

(3) 4.1c: solve problems

(b) Objective 4.2: Transfer of knowledge

(1) 4.2a: Identify ethical issues

(2) 4.2b: Understand professional codes of ethics

(3) 4.2c: Identify studies

(4) 4.2d: Define theory and describe its role in sociology.

(c) Objective 4.3: Analytical reasoning

(1) 4.3a: Understand how to collect and analyze data

(2) 4.3b: Understand how to identify and communicate limitations

(3) 4.3c: Use databases

(4) 4.3d: Use digital resources

Student Learning Outcome 5

(EMPOWERED) Graduates are self-directed (empowered). They demonstrate the capability and desire to pursue progressive and lifelong intellectual development. They are aware of their own abilities and limitations, and are independent learners with the competence and confidence to try new activities and engage new ideas.

(a) Objective 5.1: Intellectual development and improvement

(1) 5.1a: describe and apply the sociological perspective and imagination.

(2) 5.1b: Develop citizenship skills.

(b) Objective 5.2: Self-awareness

(1) 5.2a: Explain how structural, cultural, and group factors influence interactions and the development of the self.

(2) 5.2b: social interaction and the self

(3) 5.2c: "personal troubles" and "public issues."

(4) 5.2d: individual and group processes

(c) Objective 5.3: Independent Learning

(d) Objective 5.4: Confidence

Systems and Decision Sciences (SDS0)

The Systems and Decision Sciences (SDS) discipline is concerned with system design, management, and decision analysis of tangible and abstract systems in accordance with performance requirements, budget, and schedules. The program combines elements of traditional engineering, systems engineering, finance, decision analysis, and organizational management courses. Cadets will learn the methods, processes, and tools (MPTs) needed to understand and conduct meaningful decision analysis in support of complex systems. These large systems require an interdisciplinary approach rooted in technical, management, and leadership skills. Industry and domain based concentrations are available, to include Project Management, Logistics Management, Personnel Management, Defense Systems, Financial Systems, Cyber Security, Management Science, International Affairs, and Mathematical Modeling. Systems and Decision Sciences graduates are ready to lead multidisciplinary teams, perform systems thinking, and understand the MPTs needed to model complex, ill-defined, and interdisciplinary problems characterized by global, political, social, military, economic, and technological challenges. A culminating real-world, year-long capstone is required to employ the MPTs associated with complex systems and address issues, such as stakeholder analysis, analytical methods, project and cost management, and the political, social, and environmental, etc., realities of working on large, ill-defined, interdisciplinary problems. This major will produce graduates with technical, high-level business and management skills, and engineering depth to prepare them for future academic and professional opportunities in a society increasingly dominated by technological change.

Each graduate will be able to:

Student Learning Outcome 1

Use systems and decision science methods, processes, and tools (MPTs) to solve diverse problems in engineering and non-engineering domains, while considering moral and ethical standards specific to the locale.

Student Learning Outcome 2

Employ systems thinking to identify, scope, understand, analyze problems, and specify the needs of multiple stakeholders.

Student Learning Outcome 3

Develop innovative system solutions based upon sound decision science techniques and clearly articulate the results to all stakeholders.

Student Learning Outcome 4

Perform systems decision-making that considers qualitative and quantitative aspects of the problem.

Student Learning Outcome 5

Accurately, clearly, concisely, and persuasively report findings, conclusions, and recommendations to the stakeholders in a multicultural context.

Student Learning Outcome 6

Lead interdisciplinary teams to implement effective and efficient solutions by melding traditional and non-traditional engineering domains.

Student Learning Outcome 7

Demonstrate the skills and interest for intellectual growth and learning for a career of professional excellence and service to the nation as an officer in the United States Army.

Systems Engineering (SEN1)

Systems Engineers innovatively solve large, complex problems in a technologically advanced environment by engineering solutions which provide significant value to clients and their organizations. Systems Engineers also lead interdisciplinary teams of engineers and others in the development and implementation of technical solutions to complex issues facing organizations. Systems Engineering majors learn to think systematically, engineer systematically, and approach decisions systematically. The Systems Engineering Program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

Thinking systematically involves understanding the entire environment in which the system operates and includes the needs, wants and desires of all the stakeholders of the system. Engineering systematically involves identifying and understanding the required system functions, developing alternative system solutions, and applying the basic modeling and simulation tools required to analyze the system from an engineering perspective. Approaching decisions systematically involves leading and participating in multi-disciplinary teams to innovate and implement visionary

solutions to these complex problems.

The recent rapid growth and success of systems engineering can be attributed to advances in technology and the transition of society to a highly networked, globally-oriented information age which results in a dramatic increase in the complexity of problems. These problems require systems thinking and a holistic approach to problem solving that is at the heart of the systems engineering discipline. It is the challenge of systems engineers to harness and direct technology toward solving problems most often related to processes and operations. Ultimately, the study and application of systems engineering principles involve innovation and the creative application of analytical models to facilitate sound decision making.

Systems Engineering Program Educational Objectives: Within 5-7 years of graduation each graduate of the Systems Engineering Program will have:

- Effectively led interdisciplinary teams to solve complex problems while continuing intellectual growth and fostering an organizational ethos that promotes the professional, moral, ethical, and respectful treatment of all.
- Analyzed, designed, implemented, and maintained systems throughout their lifecycles.
- Approached problems holistically while recognizing each system as a whole, with its fit and relationship with the environment being primary concerns.
- Convincingly communicated engineering analysis and recommended solutions to leaders to enable sound decision-making in the presence of uncertain, biased, or confounding influences.

Systems Engineering Student Outcomes: To achieve these objectives, cadets will demonstrate the following Systems Engineering Student Outcomes at the time of graduation:

Student Learning Outcome 1

An ability to apply knowledge of mathematics, science, and engineering

Student Learning Outcome 2

An ability to design and conduct experiments, as well as to analyze and interpret data

Student Learning Outcome 3

An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability

Student Learning Outcome 4

An ability to function on multidisciplinary teams

Student Learning Outcome 5

An ability to communicate effectively

Student Learning Outcome 6

An ability to identify, formulate, and solve engineering problems

Student Learning Outcome 7

An understanding of professional and ethical responsibility

Student Learning Outcome 8

The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context

Student Learning Outcome 9

A recognition of the need for, and an ability to engage in life-long learning

Student Learning Outcome 10

A knowledge of contemporary issues

PART III: COURSE DESCRIPTIONS

Brigade Tactical Dept

17 Courses

MD100	CADET BASIC TRAINING	0.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2014-0	Offerings:
New Cadets negotiate a demanding training regimen in soldiering and cadetship. The New Cadet makes the transition into the Corps of Cadets and learns the standards of behavior and values consistent with the mission of the United States Military Academy. The New Cadet is evaluated by the cadet chain of command and summer Tactical Officer during each of two details and receives a grade for MD100, which is a numerically weighted average of the submitted grades.		2018-0 2019-0 2020-0
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
MD101	4TH CLASS MILITARY PERF I	0.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2014-1	Offerings:
Fourth Class cadets learn to be a follower and to support the chain of command and to develop understanding of and commitment to the duty concept. Fourth Class cadets serve as members of a squad in their assigned companies. The Fourth Class cadet's primary task is to strive for individual excellence in academic, military, and physical activities while developing teamwork among their classmates. The Fourth Class cadet is evaluated by the cadet chain of command and company Tactical Officer and receives a grade for MD101, which is a numerically weighted average of the submitted grades.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
MD102	4TH CLASS MILITARY PERF II	0.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2014-2	Offerings:
Fourth Class cadets learn to be a follower and to support the chain of command and to develop understanding of and commitment to the duty concept. Fourth Class cadets serve as members of a squad in their assigned companies. The Fourth Class cadet's primary task is to strive for increased individual excellence in academic, military, and physical activities while optimizing the teamwork among their classmates. The Fourth Class cadet is evaluated by the cadet chain of command and company Tactical Officer and receives a grade for MD102, which is a numerically weighted average of the submitted grades.		2018-2 2019-2 2020-2
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
MD200	CADET FIELD TRAINING	0.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2014-0	Offerings:
Third Class cadets participate in a demanding training program which further develops proficiency in Pre-Commissioning Tasks and exposes the Third Class cadet to tactical tasks that require teamwork. Various training situations provide opportunities for Third Class cadets to serve as leaders where they are observed by the cadet chain of command and officers. The Third Class cadet is evaluated by the cadet chain of command and summer Tactical Officer during each of two details and receives a grade for MD200, which is a numerically weighted average of the submitted grades.		2018-0 2019-0 2020-0
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
MD200D	CADET FIELD TRAINING	0.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2016-0	Offerings:

Third Class cadets participate in a demanding training program which further develops proficiency in Pre-Commissioning Tasks and exposes the Third Class cadet to tactical tasks that require teamwork. Various training situations provide opportunities for Third Class cadets to serve as leaders where they are observed by the cadet chain of command and officers. The Third Class cadet is evaluated by the cadet chain of command and summer Tactical Officer during each of two details and receives a grade for MD200, which is a numerically weighted average of the submitted grades. THIS VERSION OF THE COURSE IS FOR USING A COURSE WEIGHT OF 2% WHEN CALCULATING MPS IN TERM 2016-0 ONLY. WILL NOT APPEAR ON TRANSCRIPT.

Lessons: 0 @ 0 min (0.000 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: None

MD201	3RD CLASS MILITARY PERF I	0.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	----------------------------------	--

Scope: 2008-1

Offerings:

Third Class cadets serve as team leaders. They learn to lead others by exercising responsibility for the professional development of one or two subordinates, while serving as a member of a larger military unit. Drawing on recent experiences as Fourth Class cadets, Third Class cadets offer expertise and counsel which facilitates the transition process and development of cadet privates. The Third Class cadet is evaluated by the cadet chain of command and company Tactical Officers and receives a grade for MD201, which is a numerically weighted average of the submitted grades.

2018-1 2018-2 2019-1
2019-2 2020-1 2020-2

MD300	WEST POINT DETAIL CHAIN OF CMD	0.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------------	--

Scope: 2014-0

Offerings:

First and Second Class cadets will serve as members of the cadet Chain of Command for a West Point Leader Detail. First Class cadets, as Senior NCOs or officers, learn the basic duties and responsibilities of a commissioned officer by leading in a cadet summer training assignment. They set the example for all subordinates by establishing and attaining sound goals, maintaining standards of behavior, and demonstrating values within the organization. They develop subordinates in such a fashion as to foster teamwork, cohesion, and the desire to excel in all areas of endeavor. Second Class cadets serve as cadet noncommissioned officers. This affords them the opportunity to learn and experience the roles and functions of non-commissioned officers in military units while training and leading their subordinates in both individual and collective training. First and Second Class cadets are evaluated by the cadet chain of command and company Tactical Officer and receive a grade for MD300, which is a numerically weighted average of the submitted grades.

2018-0 2019-0 2020-0

Special Requirements: None

MD301	2ND CLASS MILITARY PERF I	0.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	----------------------------------	--

Scope: 2008-1

Offerings:

Second Class cadets serve in cadet NCO leadership and staff positions in the Corps of Cadets. Second Class cadets lead through subordinate leaders; that is, they lead small military units in which they exercise responsibility for other members through their influence upon subordinate leaders. The Second Class cadet is evaluated by the cadet chain of command and company Tactical Officer and receives a grade for MD301, which is a numerically weighted average of the submitted grades.

MD302	2ND CLASS MILITARY PERF II	0.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2008-2	Offerings:
Second Class cadets serve in cadet NCO leadership and staff positions in the Corps of Cadets. Second Class cadets lead through subordinate leaders; they lead small military units in which they exercise responsibility for other members through their influence upon subordinate leaders. The Second Class cadet is evaluated by the cadet chain of command and company Tactical Officer and receives a grade for MD302, which is a numerically weighted average of the submitted grades.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
MD400	CDT TRP LEADERSHIP TNG (CTLT)	0.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2014-0	Offerings:
First and second class cadets learn the basic duties and responsibilities of a commissioned and noncommissioned officer by leading in an active Army unit during CTLT. CTLT provides first and second class cadets with a realistic leadership environment to observe, while performing duties normally given newly assigned second lieutenants in the active Army. In CTLT, the cadet is evaluated by the officer chain of command in his/her unit and receives a MD400 grade of Pass/Fail.		2018-0 2019-0 2020-0
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
MD401	1ST CLASS MILITARY PERF I	0.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2014-1	Offerings:
First Class cadets serve in First Sergeant, Command Sergeant Major or officer leadership positions from platoon through brigade level and learn to lead through their personal influence upon both a chain of command and staff. They learn that success as a leader is based on the performance of the unit and demonstrate their capacity to exercise personal self-discipline in the absence of close supervision. The First Class cadet is evaluated by the cadet chain of command and company Tactical Officer and receives a grade for MD401, which is a numerically weighted average of the submitted grades.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
MD402	1ST CLASS MILITARY PERF II	0.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2014-2	Offerings:
First Class cadets serve in First Sergeant, Command Sergeant Major or officer leadership positions from platoon through brigade level and learn to lead through their personal influence upon both a chain of command and staff. They learn that success as a leader is based on the performance of the unit. They demonstrate their capacity to exercise personal self-discipline in the absence of close supervision. The First Class cadet is evaluated by the cadet chain of command and company Tactical Officer and receives a grade for MD402, which is a numerically weighted average of the submitted grades.		2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
MD403	CBT/CFT CADRE	0.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2014-1	Offerings:

MD403 is for First Class cadets who fail MD402 and are therefore placed in a conditioned status at the end of their First Class year. First Class cadets enrolled in MD403 will serve two consecutive details in either Cadet Basic Training or Cadet Field Training. The requirements outlined for MD300 apply to MD403; evaluation is conducted in the same fashion. The grades from each detail are each equally weighted and combined to derive an overall MD403 grade.		2018-1 2019-0 2019-1 2020-0 2020-1
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
MD404	1ST CL MILITARY PERF-DEC GR	0.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2008-1	Offerings:
MD404 is offered to cadets who remain at the Academy beyond eight semesters and have participated in all previous military development courses. Cadet officers in MD404 will receive a grade based on performance and requirements specified in MD402. Evaluation is conducted in the same fashion as in MD402.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
MD410	CADET LEADER DEVELOPMENT TNG	0.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2010-0	Offerings:
Cadet Leadership Development Training (CLDT) trains, mentors, and assesses basic leadership skills focusing on Troop Leading Procedures (TLPs), communication, and tactical decision-making in order to develop competent and confident small unit leaders capable of operating in an uncertain and rapidly changing environment. In a series of tactical scenarios that mirror the Common Operational Environment (COE), cadets experience a minimum of two assessed leadership positions that provide the First Class cadet with a common experience to further enhance his/her leadership ability to solve tactical problems. Trainer Teams coach, teach, mentor, and assess a cadet's leadership ability and provide formal and constructive feedback in the form of AAR's and written assessments. Success is measured by the cadet's demonstrated ability to improve through the course of evaluations, and understand the areas requiring improvement and sustainment to successfully perform as a leader.		2018-0 2019-0 2020-0
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
PME2	PROFESSIONAL MILITARY ETHIC ED	0.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2009-1	Offerings:
The purpose of Professional Military Ethic Education (PME2) is to provide cadet instruction that reinforces current academy programs to assist in developing the self-concept of Officership, the ethos of the American Military Profession and attributes outlined by the CLDS Character Development Domains. This is presently the only unifying course of instruction identical for each of the members of the Corps of Cadets that occurs throughout the 47 month experience. The course is intended to reinforce important points of education covered in the other program areas and for discovery on unique topics geared toward developing leaders with the attributes consistent with the CLDS outcome goals that are not addressed elsewhere at the Academy. The program curriculum is organized along the lines of three areas of fundamental importance to developing leaders of character; Army Values (Realization of the moral and ethical requirements of Officership), Officership (Realization of what is required to serve as an American Commissioned Officer) and Leadership (Application of our values and learned attributes to enable graduates to create a great command climate). THIS COURSE IS NEEDED TO ADMINISTOR THE PURCHASE OF BOOKS. THERE ARE NO ENROLLMENTS.		2019-1 2020-1
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min

Center for Enhanced Performance

5 Courses

RS100	STUDENT SUCCESS COURSE, PREP	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2009-1	Offerings:
<p>This course is designed to improve cadet academic performance and mental agility. Mastery of a variety of these strategies leads to development of a more self-regulated leader of character. Strategies presented include: help seeking (AI, Library, tutors), organization and time management, class preparation (text study system), test preparation, overcoming nerves, learned optimism and importance of attitude. The strategies mastered are implemented immediately into the cadets' present life at USMA and contribute to life-long learning. The course has no graded assignments. A final pass/fail grade determination is recorded on the cadet transcript.</p>		2018-1 2019-1 2020-1
Lessons:	10 @ 55 min (0.000 Att/wk)	Labs: 0 @ 0 min

RS101I	STUDENT SUCCESS COURSE	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2015-1	Offerings:
<p>This course is designed to improve cadet academic, physical, and leadership performance at USMA. Mastery of a variety of strategies leads to this goal. Strategies presented include: effective thinking, goal setting, time management, textbook study system, concentration, test taking, visualization, memory, note taking, stress management, and others. The strategies mastered are implemented immediately into the cadets' present life at USMA and contribute to life-long learning. The course has graded assignments, a complete student success plan and a course portfolio. A final pass/no-credit grade determination is recorded on the cadet transcript. This course is for scheduling purposes only, and will be merged into RS101 before the first graded event. It is intended for international students only</p>		2018-1
Lessons:	20 @ 55 min (0.000 Att/wk)	Labs: 0 @ 0 min
Special Requirements:	none	
RS102	READING EFFICIENCY	0.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	1985-1	Offerings:
<p>This course develops flexible reading strategies. Increasing one's base reading rate while maintaining comprehension is accomplished through the use of computer programs, textbook reading, and recreational reading. Various pacing techniques and supervised practice lead to the increase of both reading rate and comprehension, but most of all to the development of a reader who has a variety of strategies to use depending upon the type of reading required.</p>		2018-1 2019-1 2020-1

Special Requirements:	None	
RS103	INFO LITERACY & CRIT THINKING	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2003-1	Offerings:

This course is designed to improve cadet information literacy and critical thinking performance at USMA. Mastery of a variety of strategies leads to this goal. Strategies presented include: effective thinking, goal setting, time management, understanding of the research process, academic/library research skills, evaluation of information sources, critical reading and reasoning. The strategies mastered are implemented immediately into the cadets' present life at USMA and contribute to life-long learning. The course has no graded assignments. A final pass/no-credit grade determination is recorded on the cadet transcript.

56 Courses

MG379	LEADING TEAMS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2012-1	Offerings:
This course is designed to improve cadets' understanding of human behavior in small group/team settings. Course content includes structural characteristics of teams such as size, status, roles and norms in addition to the effects of task and environment. Cadets then use their understanding of these constructs to analyze team phenomena such as cohesion, performance, decision making, problem solving and conflict resolution. We also devote a number of lessons to current issues such as electronic and virtual groups, high performance work teams and shared leadership in a team environment. The course is particularly relevant to professional development in that cadets gain a comprehensive understanding of the dynamics of small group and team interaction. This allows them to develop and implement creative leader actions that will maximize unit/team effectiveness.		2018-1 2019-1 2020-1
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min

Disqualifier(s):	PL379	
MG380	MARKETING	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2011-2	Offerings:
The objective of this course is to introduce students to the concepts, analyses, and activities that comprise marketing management, and to provide practice in assessing and solving marketing problems through the use of case studies and real world projects in both the military and civilian realms. Topics include competitive analysis, marketing strategy, customer behavior, segmentation and targeting, market research, pricing and promotion. Graded requirements include a combination of WPRs, written projects and student led discussions. This course is required for cadets pursuing the Management major"		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
MG381	INTRODUCTION TO MANAGEMENT	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2010-1	Offerings:
This course serves a dual purpose. It is an introduction to the concept of management as well as an introduction to the multidisciplinary nature of the management field of study. This course focuses on the managerial activities that organizational leaders use to effectively and efficiently direct the resources of organizations. As a result, the course is structured around the primary concepts of planning and decision-making, organizing, leading and controlling. In addition, cadets will examine the concepts of ethical and global management as they learn to analyze operating environments, assess organizational capabilities and develop feasible courses of action.		2018-1 2019-1 2020-1
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	One individual paper (2-3 pages) and individual presentation (10-15 minutes). One group paper (15 pages) and group presentation (30 minutes) based on integration and synthesis of course material through a managerial assessment of an organization.	
MG382	HUMAN RESOURCE MANAGEMENT	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2008-1	Offerings:

This course begins with the premise that people are a firm's most important resource; and that the management of this critical resource ultimately determines the success or failure of the organization. The course examines the behavioral science principles used to foster the creation of effective work environments -- environments specifically designed to elicit motivation, commitment, productivity and satisfaction. The course gives special attention to how human resource management (HRM) practices can give a firm a Competitive Advantage by using High Performance Work Systems, tending to Stakeholders' needs (customers, employees, stockholders, and the community) and through strategic Globalization. By analyzing HRM practices in terms of these three critical organizational outcomes, students learn how to apply HRM concepts to positively influence the success of the organization.

Lessons: 40 @ 55 min (2.500 Att/wk)

Labs: 0 @ 0 min

Special Requirements:

PL381 includes a semester-long project which focuses on sustaining and/or improving a real-world firm by applying the course material to a situation.

2018-1 2018-2 2019-1
2019-2 2020-1 2020-2

MG390

NEGOTIATION FOR LEADERS

3.0 Credit Hours
(BS=0.0,ET=0.0,MA=0.0)

Scope:

2007-1

Offerings:

This course immerses cadets in fundamental-level Negotiations and Bargaining theory and application. The course progresses from dual-party, single-issue, distributive scenarios to multi-party/multi-issue/integrative scenarios. Cadets learn and practice systematic ways to devise an effective strategy prior to entering a negotiation and then actually apply bargaining tools and tactics during the Negotiation in order to accomplish their individual and organizational goals. Cadets learn concepts and frameworks that help them analyze and understand human behavior so that they have a perspective from all parties involved in a negotiation. Examinations are behavioral and written. Emphasis is placed on applying the behavioral principles learned to real-world issues and their impacts on functioning as future Army officers.

MG395

FUNDAMENTALS OF ACCOUNTING

3.0 Credit Hours
(BS=0.0,ET=0.0,MA=0.0)

Scope:

2009-2

Offerings:

The purpose of MG395 is to provide and integrate the analytical tools learned in this and other courses in a management setting. Specifically, this course will provide the fundamentals of understanding, developing, and analyzing financial statements (income statement, statement of retained earnings, balance sheet, and statement of cash flows), using accounting ratio analysis, analyzing inventory, understanding costing systems and budgeting. By applying the various accounting techniques in a managerial setting, cadets will be better prepared to quantitatively support their managerial decisions. This course is required for cadets pursuing the Management major.

MG410

MANAGERIAL FINANCE

3.0 Credit Hours
(BS=0.0,ET=0.0,MA=0.0)

Scope:

2011-1

Offerings:

The purpose of MG410 is to provide Management Majors with the basic principles of managerial finance, and then to apply these principles in the context of managerial decision-making. Specifically, this course will cover: the fundamentals of the time value of money; the meaning and measurement of risk and return; valuation techniques for stocks and bonds; and standard techniques for financial analysis, to include capital budgeting, discounted cash flow valuation, and weighted average cost of capital. Cadets will leave this course with a solid understanding of how financial managers at the corporate level balance risk and return, and thus manage everyday financial decision-making. This course is required for all management majors.

MG420	OPERATIONS MANAGEMENT	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2010-1	Offerings:
The purpose of MG420 is to provide cadets with the tools to deal with the quantitative aspects of design and analysis of operations management. Emphasis is on identification, analysis, and solution of production problems using applied quantitative techniques using the case study technique. In addition to case studies, simulations reinforce the problem-solving techniques necessary for today's successful managers. Specific methods and techniques taught and applied are operations strategy, product design and selection, supply chain management, total quality management, forecasting, capacity planning, facility location, facility layout, work system design, inventory management, material requirements planning, and scheduling. This course is required for cadets pursuing the Management major.		2018-1 2019-1 2020-1

Special Requirements:	None	
MG421	STRATEGIC MANAGEMENT	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2010-2	Offerings:
This capstone course for management majors emphasizes the integration of concepts and principles found in all previous management courses as they relate to the strategic management of public, private and military organizations. This course focuses on all aspects of the strategic management process to include: the identification of opportunities and threats in a competitive environment, the development of organizational core competencies and the strategic alternatives available to organizations as they seek to achieve their goals in a highly dynamic operating environment filled with complexity, uncertainty and risk. MG 421 uses the case study method that requires comprehensive, in-depth analysis of realistic management situations.		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	One individual paper (2-3 pages) and individual presentation (10-15 minutes) on a current strategic management issue. Small teams conduct semester long capstone project. Results are reported in written and oral format.	
Prerequisite(s):	MG420	
MG472	INTERNATIONAL MANAGEMENT	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2013-2	Offerings:
This course examines the individual, group and organizational level influences on human behavior in the international arena. Cadets will gain an understanding of these influences and use the insights gained to formulate leader actions to effectively motivate and manage in a global environment. The course emphasizes the practical application of management theories and research findings in the international situations that cadets encounter in their personal lives and in the field Army with an increasing emphasis on the global environment. Course content includes foundations of individual behavior, diversity, motivation, decision making, rewards, feedback and power and influence in an international setting. We will also examine organizational influences on ethical behavior in the global arena with an emphasis on creating ethical climates in the organizations we belong to.		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min

Corequisite(s):	PL300	
Disqualifier(s):	PL472	
PL100	GENERAL PSYCHOLOGY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	1979-1	Offerings:
This course develops the ability to apply current psychological principles. Psychology is a broad and expanding discipline and the introductory course is necessarily a survey. The focus of the course is the development of an awareness and understanding of one's own behavior and the behavior of others. Emphasis is placed on applying the behavioral principles learned to the cadets' current lives and their functioning as future officers.		2018-4
Lessons: 39 @ 55 min (2.500 Att/wk)	Labs: 1 @ 55 min	
Special Requirements:	None	

PL100	GENERAL PSYCHOLOGY FOR LEADERS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2016-1	Offerings:
<p>Psychology as a discipline is both a natural and social science that involves the study of the brain, mind, and behavior. General Psychology for Leaders is a course that involves a multidisciplinary study of the human dimension, behavioral sciences, and leadership development. The course examines the cognitive, physical, and social components of the human dimension using the scientific method to promote reflection, development, ethical reasoning, and critical and creative thinking. The learning outcome is that each cadet will be more ethical and effective leader because of a scientific understanding of human behavior. Emphasis is placed on applying the behavioral principals learned to the cadets' current lives and their functioning as future officers. The two course goals are that cadets apply the scientific method to investigate causes or correlates of human behavior, and that they use this scientific understanding of human behavior to explain, predict, and change behavior to become an effective leader of character.</p>		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons:	39 @ 55 min (2.500 Att/wk)	Labs: 1 @ 55 min
Special Requirements:	None	
PL150	ADV GEN PSYCHOLOGY FOR LEADERS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2016-1	Offerings:
<p>Psychology as a discipline is both a natural and social science that involves the study of the brain, mind, and behavior. Advanced General Psychology for Leaders is a course that involves an advanced multidisciplinary study of the human dimension, behavioral sciences, and leadership development. The course examines the cognitive, physical, and social components of the human dimension using the scientific method to promote reflection, development, ethical reasoning, and critical and creative thinking. The learning outcome is that each cadet will be a more ethical and effective leader because of a scientific understanding of human behavior. With even more leader development application than PL100, emphasis is placed on applying the behavioral principles learned to the cadets' current lives and their functioning as future officers. The two course goals are that cadets apply the scientific method to investigate causes or correlates of human behavior, and that they use this scientific understanding of human behavior to explain, predict, and change behavior to become an effective leader of character. This course goes beyond PL100 (General Psychology for Leaders) in that students are asked to apply material at a higher level via reading and incorporating significant peer-reviewed research to address real-world Army issues. Students must also communicate their understanding of psychology and how it informs their roles as leaders of character via formal and informal presentations.</p>		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2

PL250	NEUROCOG FNDTNS OF BEHAVIOR	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2017-1	Offerings:
<p>This is a course in Cognitive Neuroscience that examines the relationship between brain and cognition through the use of methods from various research fields such as psychology and neuroscience. This course is intended to give the student a strong basic knowledge of the field of cognitive neuroscience. In the course, we will present the key methods in the field and discuss their contribution to understanding the neural basis of cognition. An overview of the latest theories and findings in various topics associated with cognition, including perception, attention, memory, language, and executive functions, will be covered. The goal is to understand how complex mental processes such as attention, memory, language, emotion, and high-level thought are enabled by the functioning of the brain.</p>		2018-1 2019-1 2020-1
Lessons:	40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min
Special Requirements:	Two short analysis papers and team projects.	
Prerequisite(s):	PL100 -Or- PL150	
PL300	MILITARY LEADERSHIP	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2006-1	Offerings:

This course is a multidisciplinary study of leadership in an organizational context which focuses on the integration of theory and practice. The cadet studies the leader's direct influence on individual motivation and group processes through the application of leadership theories, skills, and attributes. The cadet also learns how to influence subordinates indirectly through organizational systems and procedures, organizational culture, and ethical climate. Cadets apply the knowledge gained in the classroom to their experiences as cadet leaders in the Corps of Cadets. In addition, the course helps each cadet develop usable leadership products in the form of a reflective leadership notebook, which helps the cadet define and inform his or her own personal approach to leading. The cadet will also develop a detailed and theoretically sound leadership philosophy, as well as comprehensive leader plans which have direct application to their roles as leaders in the Corps of Cadets and as future Army officers.

PL300	MILITARY LEADERSHIP	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	----------------------------	--

Scope: 2018-1

Offerings:

PL300 (Military Leadership) is a multidisciplinary study of leadership in organizations. Cadets gain a pragmatic understanding of the behavioral, organizational, and sociological sciences, and apply that knowledge to become better leaders, develop better leaders, and make their organizations more effective. The course surveys a carefully selected set of the most relevant and useful ideas, concepts, theories and knowledge from these sciences. A representative list of topics explored includes: leader and leadership development, character and its development, perceptions and biases, decision making, motivation, power and influence, multiple leadership theories, counseling, negotiations, team dynamics, cohesion and group development, conflict management, organizational justice, organizational culture, organizational change, socialization, and leadership in extremis. In addition to applying knowledge of these topics, cadets develop a leadership portfolio which helps refine and inform their personal approach to leading. The portfolio includes a 'Journey Line' reflection paper, an individual developmental plan, and a theoretically sound leadership philosophy. PL300 is designed to maximize direct application for cadets in their roles as leaders in the Corps of Cadets and as future Army officers.

PL360	PSYCH ELITE PERFORMANCE	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--------------------------------	--

Scope: 2004-2

Offerings:

<p>This course focuses on the psychological theories and applied techniques that enhance elite performance. In every performance endeavor, human beings have consistently exceeded our wildest expectations. While this has been significantly affected by the technological advances physical training, an equally, if not more significant part of these advances has been the systematic approach to psychological skills training. This approach makes performance enhancement a reality to all who are seeking to perform to their full potential, regardless of the arena in which they perform. This course reviews the current theories that underlie performance enhancement training techniques and relates them to all areas of elite level performance (academic, physical, athletic, and specific areas of military training.) Topics include the development and maintenance of self-confidence, goal setting, attention and concentration, energy management, cognitive and somatic coping strategies, visualization, leadership, and team cohesion. Students will not only understand the theoretical bases underlying these topics, but apply them, through a series of individual projects, a semester-long group research project, and weekly individual instruction, to personal areas of importance.</p> <p>Lessons: 40 @ 55 min (2.500 Att/wk) Labs: 0 @ 0 min</p> <p>Special Requirements: None</p> <p>Prerequisite(s): PL100 -Or- PL150</p>		2018-2 2019-2 2020-2
PL361	RESEARCH METHODS I	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2004-1	Offerings:
<p>This course provides cadets with detailed practical knowledge and skills in the scientific analysis of human behavior. The course content begins with a review of the terms and philosophy of the scientific method as well as basic research concepts. Several research designs, primarily non-experimental methods, provide cadets with a better understanding of research techniques and how they affect the results of a study. Basic methods of data analysis, to include descriptive and inferential statistics, will be covered. Groups of cadets will conduct research projects on a topic of their choice using naturalistic observation.</p> <p>Lessons: 40 @ 55 min (2.500 Att/wk) Labs: 0 @ 0 min</p> <p>Special Requirements: Several design and statistics assignments, several writing assignments and two group oral presentations related to the semester-long group research project.</p> <p>Prerequisite(s): PL100 -Or- PL150</p>		2018-1 2019-1 2020-1
PL363	QUALITATIVE RESEARCH METHODS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2017-1	Offerings:
<p>Qualitative Research Methods facilitates discussion, awareness, and understanding of social research methodology. In this course we seek to understand the basics of social research with a specific focus on qualitative social research methods. This objective is met via discussions and applications and demonstrating the capacity to social problem solve through viable social research?specifically the development, design, and application of four modest analysis papers and culminating in a written methods intensive research proposal and oral presentation. Methods covered include ethnography, interviewing, content analysis, (un)obtrusive measures, visual analysis, and ethics.</p> <p>Lessons: 40 @ 55 min (0.000 Att/wk) Labs: 0 @ 0 min</p> <p>Special Requirements: Some data gathering fieldwork required.</p> <p>Prerequisite(s): PL100 -Or- PL150</p>		2018-1 2019-1 2020-1
PL371	INTRODUCTORY SOCIOLOGY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2004-1	Offerings:
<p>Sociology is the scientific study of society and the interactions among humans. The goal of Introductory Sociology is to provide a survey of the field of sociology and educate and inspire cadets to examine contemporary situations that involve social interaction and use sociological concepts, theories, and research to explain what is taking place, identify social threads and patterns across the situations, and determine the personal as well as the social significance of their analysis. Sociology demands that the student transcend the taken-for-granted, subjective world view and develop a sociological imagination by revealing the linkages and relationships among social facts and connect public issues to self awareness. PL371 is a survey course with the identification of common threads across social situations, and determining the self and social significance of facts. The teaching and learning strategy involves reading, writing, discussions, presentations, and other active-learning, hands and heads-on projects.</p>		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2

Prerequisite(s):	PL100 -Or- PL150	
PL372	SOCIOLOGY OF THE FAMILY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2012-2	Offerings:
This course focuses on contemporary American families, with special emphasis on military families. It approaches the study of marriages and families from a scientific perspective, based on scholarship and research. Cadets will learn about the actual state of marriages and families in the United States, and particularly within the military population. This course uses the sociological perspective to analyze issues, as well as several other academic disciplines, such as psychology, anthropology, biology, physiology, and economics to provide additional information. Cadets will examine past and present forces that contribute to changes in the nature of marriage and families in the United States. They will explore the nature of relationships between the family and other major social institutions. They will also evaluate contemporary issues, policies, and research related to marriages and families in order to determine the social significance of these situations.		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	A major course paper analyzing either personal family expectations or a specific contemporary family issue.	
Prerequisite(s):	PL100 -Or- PL150	
PL373	LIFE CYCLE & HUMAN DEVEL	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2004-1	Offerings:
This course focuses on individual development and the forces that influence our development from birth to old age. Cadets will study the various facts, theories, issues, and topics that constitute the field of human development. Cadets will explore human development from various theoretical perspectives. In addition, cadets will discuss such topics as cognitive and moral development, how our self-concept and sense of identity form, and the influence of family and the world around us on development. Special attention will be given to the developmental impact of college.		2018-1 2019-1 2020-1
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	One analysis paper (6-8 pages); one research paper (10-12 pages) and one group presentation.	
Prerequisite(s):	PL100 -Or- PL150	
PL376	PERSONALITY & AB PSYCH	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2004-2	Offerings:
Building upon the elementary concepts of personality from PL100, this course examines in detail various theoretical frameworks used to study personality and abnormal behavior. The course focuses on four theoretical perspectives: the psychoanalytic, learning, phenomenological, and dispositional perspectives. After examining how the various theoretical perspectives can be used to explain personality, the course applies these perspectives to an understanding of abnormal behavior. Thus, the course focuses on developing the cadets' understanding of "normal" personality development and how and why deviant behavior may result.		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Cadets will complete a case-study analysis of a real or fictional person of the cadet's choice (10-15 pages) and one oral presentation.	
Prerequisite(s):	PL100 -Or- PL150	
PL377	SOCIAL INEQUALITY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2004-1	Offerings:

Cadets are introduced to several theoretical perspectives intended to explain the structure of social stratification in the United States. The course examines the state of social inequality in the United States, with a focus on social class, integration, mobility, and equality of opportunity. Cadets explore individual and structural perspectives of social inequality. Cadets evaluate social issues, policies, and programs intended to influence social inequality. Throughout the course, cadets discuss the relevance of class, race, ethnicity, and gender on social opportunity and inequality.

PL150

PL383	EXPERIMENTAL SOCIAL PSYCHOLOGY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------------	--

Scope: 2008-1

Offerings:

This course surveys the field of contemporary social psychology. Cadets examine the impact of social structure and group membership on social behavior, while focusing on intrapsychic processes such as attribution, cognition, and learning that underlie social behavior. The course is intended to enable cadets to more effectively analyze and explain human behavior in a given situation. Specific topics include the self, attitudes and attitude change, sex and gender, conformity, obedience, compliance, deviance, helping behavior, aggression, attraction and romance, groups and intergroup relations, and collective behavior. The classroom experience is heavily discussion-oriented in order to maximize the application of social psychological concepts, theories, and perspectives to daily life.

PL384	SOCIOLOGICAL THEORY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	----------------------------	--

Scope: 2004-2

Offerings:

Sociological theory is a set of interrelated ideas that allow for the systemization of knowledge of the social world, the explanation of that world, and predictions about the future of the world. In some ways, all of us are amateur theorists, interpreting the meanings of the events and encounters that shape the world and ourselves. In PL384 cadets will learn in-depth how theories can help make sense of our times and to choose courses of action to realize our collective and individual dreams. In this course, theory is brought down-to-earth, to show how a sociological imagination (in other words, a theoretical consciousness that embraces self-awareness) is valuable to self and society. Questions like "Are families disintegrating?" "Why are some people discriminated against?" "What accounts for the crime rate?" "Are religion and economics compatible?" "Why is the sexual division of labor so persistent?" "Are wars inevitable?" can be addressed. Theories are thus tentative answers to the questions that preoccupy us as members of families, professions, communities, nations and, increasingly, as global citizens.

2018-2 2019-2 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: None

Prerequisite(s): PL371

PL386	EXPERIMENTAL PSYCHOLOGY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--------------------------------	--

Scope: 1984-2

Offerings:

This course provides cadets with detailed practical knowledge and skills in the experimental analysis of behavior and human performance. Particular emphasis is placed on design of laboratory and field experiments, laboratory automation and instrumented data acquisition, computer data analysis, and on the distinction between laboratory research, field test and evaluation. The course includes practical exercises in several content areas of experimental and engineering psychology. These topics are evaluated by laboratory reports.

2018-1 2019-1 2020-1

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: Two lab reports (1000-1500 words), and one course project (2500 words).

Prerequisite(s): PL100
-Or-
PL150

Corequisite(s): MA376

PL387	FOUNDATIONS OF COUNSELING	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	----------------------------------	--

Scope: 2004-1

Offerings:

This course introduces cadets to the fundamentals of counseling. It focuses on the practical applications of counseling theories, principles, and techniques. Using the vehicles of videotaping and audiotaping, the course emphasizes personal, performance, career, and disciplinary counseling to help prepare cadets for leadership roles both as a cadet and an officer. The course covers the counseling process and the dynamics of interpersonal relationships within that process. Counseling skills include: basic and advanced communication skills, goal setting, intervention strategies, assertiveness, crisis intervention, and multiculturalism. Examinations are behavioral and written.

2018-1 2018-2 2019-1
2019-2 2020-1 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: None

Prerequisite(s): PL100
-Or-
PL150

PL390	BIOLOGICAL PSYCHOLOGY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	------------------------------	--

Scope: 1983-1

Offerings:

This course introduces the cadet to the physiological and anatomical structures and processes that underlie human behavior with emphasis on human performance. The course examines the structure of the nervous and endocrine systems, the mechanisms of seeing and hearing, movement, stress and arousal, learning, memory, biological causes of abnormal behavior, sleep, language, and the effects on performance of damage to neural structures. Cadets are introduced to the scientific examination of real-world bio-psychological problems in laboratory assignments in examining tissue, brains and eyes to provide three-dimensional realism to classroom instruction. This course provides the basis for competence in later engineering psychology electives. Biological Psychology is the "hardware" introduction to engineering psychology.

2018-1 2019-1 2020-1

Lessons: 36 @ 55 min (2.500 Att/wk) **Labs:** 4 @ 110 min

Special Requirements: One laboratory report (1200 words). One scientific critique (1200 words).

PL391	SENSATION/PERCEPTN/PSYCPHYS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	------------------------------------	--

Scope: 1983-2

Offerings:

This course covers the acquisition and analysis of information by the human nervous system from examination of the physical properties of light and sound, the functioning of the visual, auditory systems and the kinesthetic processes, and the theoretical background of contemporary perceptual research. The following general topics are covered: psychophysical methods, including measurement, scaling and signal detection theory; physiology of the visual, auditory and kinesthetic systems; recognition of color and brightness, pitch and loudness, patterns, features, and the role of visual channels; visual detection and tracking; the role of kinesthesia in military applications; and research methodology in perception. Laboratory assignments stress the application of data acquisition systems on research and the construction of strictly defined experimental methods in this area of research.

2018-2 2019-2 2020-2

Lessons: 38 @ 55 min (2.500 Att/wk) **Labs:** 2 @ 110 min

Special Requirements: Two application projects requiring laboratory reports (1200 words each).

Prerequisite(s): MA376 PL386 PL390

PL392	COGNITIVE PSYCHOLOGY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-----------------------------	--

Scope: 1984-1

Offerings:

This course addresses the processes of human information gathering, learning and memory using an information processing model. The course deals with cognitive theory and application, including stage models of processing and memory, machine models and artificial intelligence, and research methodology in these areas. Emphasis is placed on practical military applications in such areas as pattern recognition and detection, text processing, visual search and associated problems. Laboratory experiences stress development of experimental paradigms in this area of investigation and the use of test instrumentation, and computer software models to investigate cognitive processing.

2018-2 2019-2 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements:	Team term project, two laboratory reports (1000 words), and oral presentation.	
Prerequisite(s):	PL100 -Or- PL150	
PL393	CRIMINOLOGY-CRIM JUST SYSTM	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2004-1	Offerings:
Criminology is the scientific study of the making of laws, the breaking of laws, and the reaction to the breaking of laws. When a crime appears to have been committed and authorities have been notified, the criminal justice system is set in motion. The criminal justice system is the societal response to crime and includes three major activities – law enforcement, the judicial process, and corrections. The course provides an overview of (a) the theories offered to explain crime and delinquent behavior (b) the criminal justice system which responds to those behaviors, and (c) the relationships between the varied explanations of criminal behavior and society's criminal justice responses to those behaviors. The focus of the course is primarily on the United States, but there is some attention devoted to an international view of crime and criminal justice.		2018-1 2019-1 2020-1
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Cadets select, write, and report on a topic in criminology.	
Prerequisite(s):	PL100 -Or- PL150	
PL394	ANTHROPOMETRICS & BIOMECHANICS	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2013-2	Offerings:
Virtually every activity in which humans engage involves interacting with our environment. Much of that interaction requires physical movement. Creating a safe workplace requires an understanding of the forces we apply to objects in our environment and how those forces can be measured and modified by better design. Anthropometrics is the study of human measurement. Biometrics is the study of forces on our muscular and skeletal system. The goal of this course is to teach cadets the fundamentals of anthropometrics and biomechanics so that they will be able to modify work environments of injury. The course will emphasize work performed in military settings.		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
Prerequisite(s):	PL100 -Or- PL150	
PL396	SNA FOR PUBLIC POLICY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2015-2	Offerings:
PL396 is an interdisciplinary course where students learn to apply network strategies to real policy issues, and assess the utility of these models to society. The course enables students to confront complexity in modeling, solving, analyzing, and understanding large dynamic systems and networks. The course is designed with three sections. The first portion of the course covers basic network analytic methods and concepts. Students get hands-on experience with network software tools. In the second section, high-level concepts and modeling principles are covered. In the third sections, four major policy issues are covered - health care, natural resources, cyber/information, and education. Cadets research a government policy and re-define the problem in network terminology and relational data. Evaluating and recommending public policy is a complex social, political, scientific process with many competing issues and challenges. As final projects, students select their own topics, and are asked to critique and provide resolution of issues around education, health care, transportation, information technology, and public utilities from network perspectives.		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Book or article review on network science approach to studying public policy work in a group to produce a poster for presentation at Projects Day.	
Prerequisite(s):	MA205 PL100 -Or- MA153 PL100	
PL398	LEADERSHIP THEORY & DEVEL	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)

Scope:	1982-2	Offerings:
This course focuses on the "cutting edge" concepts and theories of leadership and leader development that are designed to help cadets better understand the leadership process to enhance leadership effectiveness and organizational performance across multiple levels of analysis. The course addresses leadership from not only the focal leader perspective, but also from the organizational, strategic and combat leadership viewpoints. The course will examine the historical evolution of leadership theory, and emphasizes scientific research and the empirical supports for existing leadership theories, and current thinking on the effective development of leaders. Additionally, cadets will study some of the emerging leadership perspectives that have been proposed to be relevant for effective leadership in the volatile, ambiguous, uncertain and chaotic world of the 21st century.		2018-1 2018-2 2019-2 2020-2
Lessons:	40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min
Special Requirements:	Book review and analysis on a noted military leader. Significant inquiry into current leader development theory in relationship to the leader development program at USMA: written reports and oral presentations communicate the results.	
Prerequisite(s):	PL300 -Or- PL350	
PL399	BEH SCI & LEADERSHIP PRACTICUM	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2006-4	Offerings:
The Department of Behavioral Sciences and Leadership's Academic Individual Advanced Development (AIAD) program is designed to give cadets practical experience in their field of study and to reflect on their experiences by completing specified academic requirements. Recent AIADs have involved internships with the American Psychological Association; studies of psychological support to NATO operations in France and stress in military operations in Norway; as well as other topics in CONUS, China, Germany, and Australia. Scope, depth and material covered will meet the requirement of a 3-credit hour course in the department. Grades are determined based on preparatory briefings and essays, a journal of daily activities or Weblog with instructors, the quality of the work performed during the internship, student evaluation of the experience and a final paper, briefing, or exam that incorporates their experience with a topic from their field of study, due upon return.		No Course Offerings
Lessons:	0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min
Special Requirements:	None	
PL399A	BEH SCI & LEADERSHIP PRACTICUM	2.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2007-4	Offerings:
The Department of Behavioral Sciences and Leadership's Academic Individual Advanced Development (AIAD) program is designed to give cadets practical experience in their field of study and to reflect on their experiences by completing specified academic requirements. Recent AIADs have involved internships with the American Psychological Association; studies of psychological support to NATO operations in France and stress in military operations in Norway; as well as other topics at West Point, elsewhere in the continental United States, or overseas. Scope, depth and material covered will meet the requirement of a two-credit hour course in the department. Grades are determined based on preparatory briefings and essays, a journal of daily activities or Weblog with instructors, the quality of the work performed during the internship, student evaluation of the experience and a final paper, briefing, or exam that incorporates their experience with a topic from their field of study, due upon return.		2018-7
Lessons:	0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min
Special Requirements:	None	
PL462	EXPERIMENTAL APP IN PSYCHOLOGY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2011-1	Offerings:
This seminar-based course focuses on the advanced study of topics in psychology. It provides cadets an opportunity for reading and analysis in depth in a topic area of interest and relevance to the study of psychology and its applications. The course employs a seminar approach in which cadets present their own analyses of the discussion topics to the group. By the end of this course, cadets will be able to conduct and evaluate research in the behavioral sciences. This course continues the themes of PL361 (Research Methods I) and introduces cadets to more varied experimental and non-experimental designs and more complex statistical analyses. Groups of cadets will conduct a research project using an experimental method in an area of their choice. Cadets who complete this course will be competent consumers of behavioral sciences research and will be equipped to use the scientific method to investigate and solve many of the problems they will face as military leaders.		2018-1 2018-2 2019-2 2020-2
Lessons:	40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min

Special Requirements:	Review and analysis of topic within psychology; topics will vary depending on instructor expertise and relevance to contemporary issues. Assignments (papers and oral presentations) will culminate to course paper summarizing research project investigating	
Prerequisite(s):	PL361	
PL470	TOPICS-BEHAVIOR SCI/LDRSHIP	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	1999-1	Offerings:
This course explores an advanced topic in Behavioral Sciences and Leadership. Specific subject matter will vary with the expertise of the senior faculty member conducting the course.		2018-1 2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	As specified by the professor.	
Prerequisite(s):	PL100 -Or- PL150	
PL471	LEADERSHIP IN COMBAT	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2004-1	Offerings:
PL 471 examines leadership in combat at the tactical level from an interdisciplinary perspective. It first seeks to provide a theoretical foundation for understanding human dimensions of combat, and then explores some of the factors that influence the leadership of soldiers in combat through a collection of readings, film, and first-hand discussions with combat veterans. Cadets examine four case studies and conduct a comparative analysis of two combat leaders.		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	As specified by professor.	
PL472	CROSS-CULTURAL ORG'L BEHAVIOR	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2010-2	Offerings:
This course examines the individual, group and organizational level influences on human behavior in the international arena. Cadets will gain an understanding of these influences and use the insights gained to formulate leader actions to effectively motivate and manage in a global environment. The course emphasizes the practical application of management theories and research findings in the international situations that cadets encounter in their personal lives and in the field Army with an increasing emphasis on the global environment. Course content includes foundations of individual behavior, diversity, motivation, decision making, rewards, feedback and power and influence in an international setting. We will also examine organizational influences on ethical behavior in the global arena with an emphasis on creating ethical climates in the organizations we belong to.		No Course Offerings
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
Corequisite(s):	PL300	
PL475	HUMAN-COMPUTER INTERACTION	3.0 Credit Hours (BS=0.0,ET=1.0,MA=0.0)
Scope:	2013-1	Offerings:
Computer use in the world today is at an all-time high. Consequently, the need for user-friendly computers is crucial. Somewhat ironically, human capacity for memory has often been explained using the computer metaphor, while the computer designer often attempts to instill human-like qualities into their computer designs. This course focuses on the interface between the human and computer. Initial focus is placed on understanding the theoretical foundations of human processes. The course then examines how these processes interact with computer usage. Students will learn design principles that enhance compatibility with computer systems.		2018-1 2019-1 2020-1
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
Prerequisite(s):	PL392	

PL476	EDUCATIONAL PSYCHOLOGY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	1979-2	Offerings:
In this course, cadets will develop their instructional skills and formulate a conceptual basis for their instructional practices as army officers. The course is oriented toward the study of psychological theories of learning and application of these theories to the design, delivery, and evaluation of adult education and training. The course is subdivided into major areas of study. Learning theory focuses on the study of the learning process with balanced treatment given to behavioristic and cognitive perspectives. Instructional design emphasizes a systems approach to planning and decision making in learning situations.		No Course Offerings
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Course practicum in which cadets design, deliver, and evaluate a learning experience. The practicum involves submission of a written design plan and evaluation (15-20 pages) and the delivery of instruction (55 minutes).	
PL479	LEADING ORGNZS THRU CHANGE	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2011-1	Offerings:
The environments in which organizations operate are characterized by unprecedented change fueled by rapidly emerging technologies, information overload, changing values, lifestyles and attitudes, and social and civil problems of great magnitude. Effective leaders either must be proactive toward change or be its captive. The purpose of this course is to examine change from an organizational perspective through a complex and diverse mix of theories, concepts, and information. Course concepts are drawn from the disciplines of behavioral science, business, management, and military doctrine. Cadets have the opportunity to analyze the successes, the failures, and the multiple dilemmas of modern organizations in both the private and public sectors in order to better understand the causes, implications, and potential leader actions and strategies associated with organizational change.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Cadets prepare an individual research report examining an actual large-scale change within the context of a modern organization.	
PL482	ARMED FORCES AND SOCIETY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2013-2	Offerings:
The intersection of armed forces and society involves the examination of two domains: the intersection of any armed force and the larger societal context and the focused study of the military as a unique social institution with a set of demands placed on the people making up the institution. Our principal focus is sociological as we use sociological theories, concepts, and research to study the military and society and culture both in the United States and abroad. PL482 is a capstone course that requires cadets to apply their sociological knowledge at the intersection of the armed forces and society. The course expects cadets to read, write, and discuss military and society issues in-depth and practically apply their knowledge to solve real world problems. Cadets integrate the knowledge gleaned from the course into a coherent and focused research project addressing some aspect of the human dimension of the armed forces and society.		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Research paper that applies course concepts to analysis of the current military. This paper is written in stages throughout the semester.	
Prerequisite(s):	PL300 -Or- PL350	
PL485	HUMAN FACTORS ENGINEERING	3.0 Credit Hours (BS=0.5,ET=1.5,MA=0.0)
Scope:	2013-1	Offerings:
This course surveys the theories and methods of human factors engineering (ergonomics). Human factors engineering is concerned with the application of technology and the design of equipment for human use. This course emphasizes the cognitive dimension of human factors engineering. The focus is on understanding the capabilities and limitations of humans as they interact with equipment and facilities. This course lays the foundations for the systematic application of information about humans to the design of equipment and workspace environments.		2018-1 2019-1 2020-1
Lessons: 36 @ 55 min (2.500 Att/wk)	Labs: 4 @ 55 min	
Special Requirements:	Term project--research report and oral presentation. Students will perform an in-depth analysis of an existing human-machine system. Results will be reported in written and oral formats.	

Prerequisite(s):	PL386	
PL488B	COLLOQUIUM-BSL-PSYCHOLOGY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	1984-1	Offerings:
The colloquium focuses on advanced study of behavioral science topics and issues using small group discussions of important books and articles of both traditional and contemporary topics in psychology, sociology, organizational leadership, and engineering psychology. It is a reading and discussion course. Subcourse topics are not fixed and are subject to annual revision.		2018-2 2019-2 2020-2
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Two to four critical essays and oral presentations based on readings.	
PL488C	COLLOQUIUM-BSL-LEADERSHIP	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	1984-1	Offerings:
The colloquium focuses on advanced study of behavioral science topics and issues using small group discussions of important books and articles of both traditional and contemporary topics in psychology, sociology, organizational leadership, and engineering psychology. It is a reading and discussion course. Subcourse topics are not fixed and are subject to annual revision.		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Two to four critical essays and oral presentations based on readings.	
PL488D	COLLOQUIUM-BSL-SOCIOLOGY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	1984-1	Offerings:
The colloquium focuses on advanced study of behavioral science topics and issues using small group discussions of important books and articles of both traditional and contemporary topics in psychology, sociology, organizational leadership, and engineering psychology. It is a reading and discussion course. Subcourse topics are not fixed and are subject to annual revision.		2018-2 2019-2 2020-2
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Two to four critical essays and oral presentations based on readings.	
Prerequisite(s):	PL371	
PL488E	COLLOQUIUM-BSL-ENGIN PSYCH	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	1998-2	Offerings:
The colloquium focuses on advanced study of behavioral science topics and issues using small group discussions of important books and articles of both traditional and contemporary topics in psychology, sociology, organizational leadership, and engineering psychology. It is a reading and discussion course. Subcourse topics are not fixed and are subject to annual revision.		2018-2 2019-2 2020-2
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Two to four critical essays and oral presentations based on readings.	
Prerequisite(s):	PL485	
PL490	ENGINEERING PSYCHOLOGY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	1993-2	Offerings:
This course integrates the material previously covered in the Human Factors curriculum, especially PL485, Human Factors Engineering. It uses the theoretical bases and practical applications of Human Factors Engineering in the treatment of design problems. Emphasis in this course is on the design of systems to fit human capabilities. Course project is a design project of a contemporary applied problem.		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	

Special Requirements: Term project--team design projects applying selected engineering psychology concepts to a contemporary problem.

Prerequisite(s): PL485

PL497	SEMINAR IN BEHAVIORAL SCI	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	----------------------------------	--

Scope: 1998-1

Offerings:

Cadets develop individual research themes from contemporary behavioral science topics. They are then grouped under a seminar leader for study, discussion, and preparation of their research reports, culminating in a presentation before the seminar group. Cadets will be expected to master both the significant work within the topics of choice and the body of criticisms of the works and to propose a study to advance the body of knowledge.

2018-1 2019-1 2020-1

Lessons: 0 @ 0 min (0.000 Att/wk)

Labs: 0 @ 0 min

Special Requirements: Literature review and research proposal; oral defense of proposal.

PL498	ADV STUDY-BEHAVIOR SCI	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-------------------------------	--

Scope: 2003-2

Offerings:

This course allows selected cadets to design an advanced study project under the guidance of a member of the BSL faculty. The advanced study, designed with the guidance of the faculty advisor, can be a thesis, research program, or service learning project. Depending on the nature of the project, cadets will work individually or in small groups. Cadets may conduct work in such areas as Leadership, Engineering Psychology, Sociology, or Psychology.

2018-2 2019-2 2020-2

Lessons: 0 @ 0 min (0.000 Att/wk)

Labs: 0 @ 0 min

Special Requirements: Written research report with an oral defense.

Prerequisite(s): PL100 PL361
-Or-
PL150 PL361

PL499	LEADERS IN ACTION	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--------------------------	--

Scope: 2005-2

Offerings:

This course is designed to enhance cadets' leadership performance through the application of essential leadership skills in challenging, on-going, real-world projects, and scenario-driven leadership laboratory exercises. The course uses a series of "concept study > actions > reflections" (CAR) cycles to focus students on the enhancing (and hindering) factors that typically surface when an individual has responsibility for executing a project and must "do" leadership. Cadets move through a CAR cycle in three related stages. First, cadets consider specific concepts, theories and models of leadership covered in prior courses. Then, using a pool of projects resourced by the faculty expressly for this course, cadets wrestle with real-world leadership projects (such as leading an organizational unit through an unexpected change), keeping these issues and insights in mind. Finally, both during and after the project, cadets engage in self-reflection exercises (e.g., journals) and meet with faculty mentors, to help process and make sense of their leadership experience on both a personal and conceptual level.

2018-2 2019-2 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk)

Labs: 0 @ 0 min

Special Requirements: Course-long research projects and written and oral reports.

Prerequisite(s): PL398

Department of Chemistry & Life Science

48 Courses

CH101	GENERAL CHEMISTRY I	4.0 Credit Hours (BS=4.0,ET=0.0,MA=0.0)
Scope:	2016-1	Offerings:
<p>This course provides a solid background in chemistry principles and applications. It includes a study of the nature of matter, its atomic and molecular structure, and associated energies. Fundamental concepts, principles, theories, and laws of chemistry are emphasized. Stoichiometry, states of matter, solutions, foundational thermodynamics, acid-base and redox reactions are addressed. The course also provides the student with an introduction to materials chemistry, environmental chemistry, and military chemistry. An extensive laboratory program is integrated within the course and is designed to develop an appreciation of classical and modern investigative techniques and to reinforce fundamental concepts introduced in the classroom.</p>		2018-1 2018-2 2018-3 2019-1 2019-2 2019-3 2020-1 2020-2 2020-3
Lessons: 33 @ 80 min (2.500 Att/wk)	Labs: 7 @ 120 min	
Special Requirements:	None	
Disqualifier(s):	CH151	
CH101X	GENERAL CHEMISTRY I	3.5 Credit Hours (BS=3.5,ET=0.0,MA=0.0)
Scope:	2013-1	Offerings:
<p>USED FOR SCHEDULING PURPOSES ONLY. This course provides a solid background in chemistry principles and applications. It includes a study of the nature of matter, its atomic and molecular structure, and the associated energies involved. Fundamental concepts, principles, theories, and laws of chemistry are stressed. Stoichiometry, states of matter, solutions, kinetics, thermodynamics, acid-base and redox equilibria, electro-, organic, and nuclear chemistry are stressed. The course also provides the student with a strong foundation in materials chemistry, the chemistry of life, environmental chemistry, and military chemistry. A laboratory program is integrated within the course and is designed to develop an appreciation of classical and modern investigative techniques and to illustrate fundamental concepts.</p>		No Course Offerings

CH275	BIOLOGY	4.0 Credit Hours (BS=4.0,ET=0.0,MA=0.0)
Scope:	2017-1	Offerings:
This course provides a broad understanding of biological principles, applications and the relevance of biological science to the military and society. This course consists of an examination of the unity and diversity of life. The course utilizes a reductionist approach to biological study by beginning with an introduction to life at the cellular level and preceding through Mendelian Genetics, central dogma, DNA technologies, and Darwinian evolution. The course culminates in the application of basic biological principles to human structure and function. Emphasis is placed on course material that is relevant to current environmental issues and disease particularly as these areas apply to military operations. A laboratory program is integrated within the course and is designed to enhance understanding of classical and modern investigative techniques and to illustrate fundamental concepts.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2

CH290	INTRODUCTION TO RESEARCH	1.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2012-1	Offerings:
Introduces the methods of research in chemistry, chemical engineering, or life science that includes use of the research literature and instruction in intermediate experimental and theoretical procedures and techniques specific to the cadet's program of study. Under the direct supervision of faculty.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	LESSONS and LABS: Established by consultation between the cadet and his/her faculty advisor. Cadets are expected to perform an average of 2 hours of work per week towards completion of the project.	
CH362	MASS & ENERGY BALANCES	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
Scope:	2014-2	Offerings:
Introduction to mass and energy balances in single phase and multiphase, nonreactive and reactive systems. Course topics include an introduction to engineering calculations and process variables, use of computers in solving chemical engineering problems, fundamentals of material balances in single-phase and multi-phase systems, energy balances on nonreactive and reactive processes, applications of combined material and energy balances, introduction to chemical engineering unit operations, and a general introduction to the field of chemical engineering.		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 7 @ 120 min	
Special Requirements:	None	
Prerequisite(s):	CH102 -Or- CH152	
CH363	SEPARATION PROCESSES	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)

Scope:	2010-1	Offerings:
This course covers methods for the physical separation of chemicals. Topics include dew point and bubble point calculations, adiabatic flash, distillation, chromatography, liquid-liquid and gas-liquid absorption. Students are taught the significance of staging of unit operations. Heavy emphasis is placed on theory of operation, numerical methods of solution, and simulation.		2018-1 2019-1 2020-1
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 7 @ 120 min	
Special Requirements:	None	
Prerequisite(s):	CH362	
CH364	CHEMICAL REACTION ENGINEERING	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
Scope:	2012-2	Offerings:
This course studies the effects of chemical reaction kinetics on systems of engineering significance. It introduces selection and operation of commercial chemical reactors, emphasizing chemical kinetics and transport phenomena. It studies currently practiced engineering techniques associated with each of these reactors. Topics covered in this course include ideal reactors including batch, CSTR and PFR, isothermal and nonisothermal. Other topics may include catalytic reactors, bioreactors, reactors, transient and steady state design, pressure drop in reactors, recycle, stability, and numerical methods.		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 7 @ 120 min	
Special Requirements:	None	
Prerequisite(s):	CH362	
CH365	CHEMICAL ENG THERMODYNAMICS	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2016-1	Offerings:
This course covers the body of thermodynamic knowledge necessary for understanding modern chemical process simulation. Students learn the theory behind the thermodynamic methods used in the software. The course includes calculus- and numerical-based thermodynamics approaches for determining the properties of substances, solutions, and multiphase mixtures. Topics include equations of state, pure component properties, transport properties, properties of mixtures, fugacity, excess properties, activity coefficients, and phase equilibria. The problems in the course emphasize engineering applications. Topics covered in class are related to real systems through the use of chemical process simulators.		2018-1 2019-1 2020-1
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
Prerequisite(s):	CH363 CH364 MA366 MC312	
CH367	INTRO / AUTOMATIC PROC CONTROL	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2019-2	Offerings:
This course covers the principles necessary to understand the automatic control of chemical processes. Students learn the current mathematical models and mechanical details of various control elements, including sensors, transmitters, actuators, and controllers. Application of mathematical models will be covered with dynamic modeling techniques as well as real-time training using process simulators. The course will also cover tuning of controllers as well as safe response to process upsets. A capstone project will involve dynamic modelling of an integrated process control system. ET pending approval by ABET-PEV		2019-2 2020-2
Lessons: 40 @ 55 min (3.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
Prerequisite(s):	EE301 -Or- MA366	
CH371	INTRO TO ANALYTICAL CHEM	3.5 Credit Hours (BS=2.0,ET=1.5,MA=0.0)
Scope:	2009-1	Offerings:

The course teaches the fundamental concepts of analytical chemistry. Topics include acid-base equilibria, redox potentials, compleximetric titrimetry, separations, electrochemistry, and absorption spectroscopy. The course provides an overview of modern analytical techniques being used in various fields. The course emphasizes the development of rigorous laboratory techniques and introduces the cadet to computer based data acquisition. Cadet laboratory work is evaluated in terms of the student's ability to accurately determine the identity and quantity of an unknown sample.

2018-2 2019-2 2020-2

Lessons: 30 @ 55 min (3.000 Att/wk) **Labs:** 17 @ 120 min

Special Requirements: None

CH152

CH375 ADVANCED BIOLOGY

4.0 Credit Hours
(BS=4.0,ET=0.0,MA=0.0)

Scope: 2017-1

Offerings:

This course focuses on the evolution, diversity, structure, and processes of living organisms. The curriculum starts with a description of the structure and function of cells and their metabolism. These topics are used to explain DNA replication, transcription, translation and gene expression. In turn these concepts serve as a foundation of knowledge examining natural selection, population genetics, biodiversity, and ecology. Emphasis is placed on related course material to current environmental issues and disease, particularly as these areas apply to military operations.

2018-1 2018-2 2019-1
2019-2 2020-1 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 8 @ 120 min

Corequisite(s): CH102

CH381 INTRO TO ORGANIC CHEMISTRY

3.5 Credit Hours
(BS=1.5,ET=2.0,MA=0.0)

Scope: 1992-1

Offerings:

This one semester course is an introduction to the concepts and material in organic chemistry designed for non-chemistry concentrators. It examines the relationship between chemical structure and the physical and chemical properties of molecules. Functional group reactivity, reaction mechanisms and instrumental methods of structural analysis are also studied. Topics are chosen from the two semester course that are important to environmental and chemical engineering students who are not required to take two semesters of organic chemistry.

No Course Offerings

Lessons: 35 @ 80 min (3.000 Att/wk) **Labs:** 12 @ 120 min

Prerequisite(s): CH102
-Or-
CH152

Disqualifier(s): CH383

CH383 ORGANIC CHEMISTRY I

3.5 Credit Hours
(BS=3.5,ET=0.0,MA=0.0)

Scope: 2010-1

Offerings:

Organic chemistry I is an introduction to the relationship between chemical structure and the physical and chemical properties of molecules. A qualitative description of structure and bonding is presented. The relationships between free energy changes and equilibria, and between activation energy and rate of reaction are developed. Stereochemistry and isomerism are explored. The concept of the mechanism of reaction is presented and the relationships between mechanism, the least energy path, stable intermediates and transition states are exemplified by the reactions of the alkanes, alkenes, alkyl halides, and alcohols. The use of instrumental methods of structural analysis is also introduced.

2018-1 2019-1 2020-1

Lessons: 35 @ 80 min (3.000 Att/wk) **Labs:** 12 @ 120 min

Disqualifier(s): CH381

CH384	ORGANIC CHEMISTRY II	3.5 Credit Hours (BS=3.5,ET=0.0,MA=0.0)
Scope:	2010-2	Offerings:
The reactions of the important functional groups are explored: conjugated alkenes; aldehydes; ketones; carboxylic acids; and amines. The concept of aromaticity is explored and its mechanistic implications are developed. Selected topics in carbohydrate and lipid chemistry are also studied. Functional group interconversions and synthetic strategy are presented. The laboratory capstone synthesis introduces cadets to multi-step synthetic sequences.		2018-2 2019-2 2020-2
Lessons: 35 @ 80 min (3.000 Att/wk)	Labs: 12 @ 120 min

Prerequisite(s):	CH383	
CH385	INTRODUCTION TO CELL BIOLOGY	3.5 Credit Hours (BS=3.5,ET=0.0,MA=0.0)
Scope:	2011-1	Offerings:
The course will cover the structure and function of prokaryotic and eukaryotic cells. The course will present a detailed discussion on the molecular biology of DNA replication, transcription, translation, the control of gene expression, cell-to-cell signaling, and the cytoskeleton. Emphasis will be placed on research methods and techniques that have lead to our understanding of how the cell works.		2018-1 2019-1 2020-1
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 7 @ 120 min	
Special Requirements:	None	
Prerequisite(s):	CH375	
CH387	HUMAN PHYSIOLOGY	3.5 Credit Hours (BS=3.5,ET=0.0,MA=0.0)
Scope:	2015-2	Offerings:
This course consists of an in-depth study of human physiology and the interrelationships between major organs and systems of the body. This course will concentrate on homeostatic reflex mechanisms of the human body. Major topics covered include endocrinology, neural physiology, muscles, cardiovascular physiology, respiratory physiology, renal physiology, digestion, immunology, and reproductive physiology. The laboratory program reinforces the foundational principles of thermoregulation, muscle, cardiac, respiratory, neural, sensory and renal physiology and introduces cadets to basic laboratory measurements and diagnostics for each of those subjects. CH388	GENETICS	3.0 Credit Hours (BS=3.0,ET=0.0,MA=0.0)
Scope:	2013-1	Offerings:

Genetics is the science of heredity. It is concerned with the physical and chemical properties an organism's genome, how the genome is transmitted from one generation to the next, and how genes are expressed in the development and function of an organism. Heredity is the process by which all living things produce offspring like themselves. This capacity for self-reproduction involves the transmission from parent to offspring of genetic information. This course is intended to develop an understanding the basic principles of genetics and to develop an ability to apply these principles to solve problems involving heredity. These genetic principles are built on a foundational understanding of DNA structure and replication, as well as basic cellular processes such as transcription and translation. Students will learn basic Mendelian genetics and progress to more complex genetic problems. These principles will be applied in the laboratory through the completion of a Mendelian genetics project.

2018-2 2019-1 2019-2
2020-2

Lessons: 36 @ 55 min (2.500 Att/wk) **Labs:** 4 @ 55 min

Special Requirements: All cadets will complete a Mendelian Project.

Corequisite(s): CH375

CH389	ADVANCED LAB PROJECTS I	1.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--------------------------------	--

Scope:	2012-1	Offerings:
---------------	--------	-------------------

The development of usable protocols, procedures, or laboratory experiments to advance current research projects directed by a member of the faculty. Individual cadets must gain the consent of the faculty member and present project title and scope of proposed effort for Program Director approval.	2018-1 2018-2 2019-1 2019-2 2020-1 2020-2

CH400	CHEM ENG PROFESSIONAL PRACTICE	1.5 Credit Hours (BS=0.0,ET=1.5,MA=0.0)
Scope:	2016-2	Offerings:
The course will meet once per week and will cover topics such as ethics, continuing education, and global and social issues within chemical engineering. Special emphasis will be placed on preparation for the Fundamentals of Engineering Exam using practice problems and graded practice exams. The course also covers professional plant engineering using plant simulators and mock exercises to teach proper troubleshooting and response techniques.		2018-2 2019-2 2020-2
Lessons: 20 @ 55 min (1.250 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
Prerequisite(s):	CH365 CH459 CH485	
CH402	CHEM ENG PROCESS DESIGN	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
Scope:	2016-2	Offerings:
This course provides a capstone experience that brings together material from previous courses to examine contemporary problems in chemical engineering process design. The course provides instruction in the conceptual design of processes to achieve design goals, as well as the economic optimization of the process. The course emphasizes the use of computer simulations, theory of unit operations, process control, safety, environmental and economic factors. The effect of changes in design on the process economics will be investigated. Written and oral design reports for the capstone design project are required.		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (3.000 Att/wk)	Labs: 7 @ 120 min	
Special Requirements:	The completion of significant out-of-class design problems requiring the equivalent of 2.5 credit hour of student effort. Compensatory time is provided to complete the design requirement.	
Prerequisite(s):	CH365 CH459 CH485	
CH457	MICROBIOLOGY	3.5 Credit Hours (BS=3.5,ET=0.0,MA=0.0)
Scope:	2013-1	Offerings:
This course introduces the diversity of microorganisms in all three domains of life. The course covers prokaryotic cell structure and function, growth, genetics, and metabolism. The course will survey five major groups of microorganisms: eubacteria, archaea, protozoa, fungi and viruses including ecology, their role in human disease and their applications in medicine, industry and warfare. Cadets have the opportunity to explore both a viral and a bacterial disease in-depth and present their findings in a briefing and a paper. The 18-hour laboratory program focuses on practical applications of concepts covered in class, with a particular emphasis on the eubacteria. The lab program culminates with a hands-on laboratory examination.		2018-1 2019-1 2020-1
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 7 @ 120 min	
Special Requirements:	None	
Prerequisite(s):	CH375	

CH459	CHEM ENGR LABORATORY	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
Scope:	2011-1	Offerings:
This course provides laboratory experience in selected chemical engineering unit operations, such as gas absorption, evaporation, distillation, liquid-liquid extraction, cooling tower, heat exchanger, and chemical reactors. Process control and process safety are emphasized in laboratory and classroom instruction. Written and oral reports required.		
Lessons: 7 @ 120 min (3.000 Att/wk)	Labs: 40 @ 120 min	
Special Requirements:	None	
Prerequisite(s):	CH362 CH363 CH364	
CH460	HUMAN ANATOMY	3.5 Credit Hours (BS=3.5,ET=0.0,MA=0.0)
Scope:	2013-2	Offerings:
This course is designed to provide cadets with a detailed study of the anatomical structure of the human body. Body structure will be studied by organ systems and will involve a balance between gross anatomical study and histology. Form-function relationships will be emphasized. The laboratory study will involve working with human skeletal collections and virtual dissection of cadavers and preserved specimens. The 14-hour laboratory program focuses on structural identification (naming) of human and mammalian anatomy and various imaging modalities (e.g., radiographs, CT scans), and computer programs. Cadets that successfully complete this course will have a good understanding of human body structure, construction, and function.

CH471	POLYMER CHEMISTRY	3.5 Credit Hours (BS=3.5,ET=0.0,MA=0.0)
Scope:	2016-2	Offerings:
This course is an introduction to modern polymer chemistry. It provides an introduction to macromolecules and their properties. It covers polymerization methods, copolymerization, the morphology of polymers, and the testing and characterization of polymer products. The course also introduces polymer additives, natural and biomedical polymers and modern polymer applications, emphasizing the military uses of polymer products.		
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 7 @ 120 min	
Special Requirements:	None	
Prerequisite(s):	CH102 -Or- CH152	
CH472	INORGANIC CHEMISTRY	3.5 Credit Hours (BS=3.5,ET=0.0,MA=0.0)
Scope:	2013-1	Offerings:
This course features an in-depth study of main group and transition elements and their compounds, with emphasis on chemical bonding and both atomic and molecular structures. The fundamentals of quantum chemistry to include the valence bond and molecular orbital theories as applied to inorganic chemistry are studied. An introduction to symmetry/group theory, coordination chemistry/crystal field theory, chemistry in aqueous and nonaqueous solutions, and organometallic compounds are also included in the course. Chemical principles and spectroscopic techniques will also be emphasized. Journal articles from the chemical literature are used to supplement the text with topics of current interest.		
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 7 @ 120 min	
Special Requirements:	None	

Prerequisite(s):

-Or-
CH384 CH481

CH473	BIOCHEMISTRY	3.5 Credit Hours (BS=3.5,ET=0.0,MA=0.0)
--------------	---------------------	--

Scope: 2013-1

Offerings:

This course is an introduction to biochemical systems and concentrates on studying them from the molecular approach. Three themes are emphasized: 1) Structure - Function relationships, 2) Metabolism, and 3) Regulation of the systems and processes studied. The fundamental goals of the course are to provide students the basic knowledge of biochemistry and to give them a framework for analyzing problems and questions in life science studies. Additional emphasis is placed on familiarizing students with the experimental techniques used in biochemistry and their application to current issues of interest.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 7 @ 120 min

Special Requirements: None

Corequisite(s): CH384

CH474	INSTRU METHODS OF ANALYSIS	3.5 Credit Hours (BS=3.5,ET=0.0,MA=0.0)
--------------	-----------------------------------	--

Scope: 2013-1

Offerings:

A laboratory course designed to develop proficiency in the selection and use of modern instrumental methods of chemical analysis. Topics include atomic spectroscopy, molecular absorption and fluorescence spectroscopy, infrared and Raman spectroscopy, nuclear magnetic resonance and mass spectrometry, and chromatography. The laboratory program includes a Capstone experimental procedure and methodology design component. Cadet laboratory work is evaluated in terms of the student's ability to determine the proper instrumental methodology to analyze a chemical sample.

Lessons: 32 @ 55 min (2.500 Att/wk) **Labs:** 15 @ 120 min

Special Requirements: One project report on a selected research topic.

Prerequisite(s):
CH371 PH204
-Or-
CH371 PH254

CH371 PH256

Corequisite(s): CH384

CH479	METHODS & APPS OF BIOTECH	3.5 Credit Hours (BS=3.5,ET=0.0,MA=0.0)
--------------	--------------------------------------	--

Scope: 2013-2

Offerings:

This course is intended to reinforce topics learned in other life science courses by studying laboratory and practical applications of biotechnology. Laboratories will concentrate on biotechnology methods including purification, separation, and identification of DNA, RNA and protein. Other biotechnology techniques that will be studied include recombinant DNA techniques, PCR, and DNA sequencing. Classroom lessons will include discussions of assigned readings on the modern applications of biotechnology.

Lessons: 23 @ 55 min (2.500 Att/wk) **Labs:** 24 @ 120 min

Special Requirements: None

Prerequisite(s): CH388 CH457

CH481	PHYSICAL CHEMISTRY I	3.5 Credit Hours (BS=3.5,ET=0.0,MA=0.0)
--------------	-----------------------------	--

Scope: 2010-1

Offerings:

The major areas of study in this course are chemical thermodynamics with a special focus on chemical equilibrium, and chemical kinetics, introduction to intermolecular interactions. Some of the specific topics covered include properties of real gases, the kinetic theory of gases, the laws of thermodynamics as related to chemical systems, diffusion as a description of mass transport, rates of chemical reactions, and molecular reaction dynamics. The laboratory program illustrates the fundamental topics covered through precision measurements, utilizing modern instrumental and computational methods.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 7 @ 120 min

Special Requirements: None

Corequisite(s): CH383

CH482	PHYSICAL CHEMISTRY II	3.5 Credit Hours (BS=3.5,ET=0.0,MA=0.0)
--------------	------------------------------	--

Scope: 2010-2

Offerings:

This course builds on the concepts covered in CH481 through a study of the quantum mechanics of atoms and molecules, their interaction with radiation, and statistical thermodynamics. Some of the specific topics covered include the electronic structure of atoms and molecules, molecular geometry, molecular symmetry, several types of spectroscopy used for identification and monitoring of the local molecular environment, and the details of molecular motion. Various levels of theory are used to obtain increasingly more accurate descriptions of atomic and molecular systems with user-friendly software tools. Statistical thermodynamics enables understanding about the connection between the microscopic details in quantum mechanics and the macroscopic observations made in the laboratory. The laboratory program illustrates the fundamental topics through use of modern instrumental and computational methods.

2018-2 2019-2 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 7 @ 120 min

Special Requirements: None

Prerequisite(s):
-Or-
CH481

CH485	HEAT AND MASS TRANSFER	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
--------------	-------------------------------	--

Scope: 2014-1

Offerings:

This course includes the study of the mechanisms of energy and mass transport, with special emphasis on applications in engineering systems. Coverage includes Fourier's Law of Heat Conduction, and Fick's Law of Diffusion, the development of shell energy and species balances, and the use of these equations to solve for temperature and concentration profiles in chemical engineering systems. An important emphasis in the course is the use of transport equations to understand species diffusion, convection, and chemical reaction in equipment design.

Lessons: 44 @ 55 min (3.000 Att/wk) **Labs:** 3 @ 120 min

Special Requirements: None

Prerequisite(s): MA366 MC312

CH487	ADVANCED CHEMISTRY LABORATORY	3.0 Credit Hours (BS=3.0,ET=0.0,MA=0.0)
--------------	--------------------------------------	--

Scope: 2016-2

Offerings:

In this laboratory course cadets will further develop their knowledge and understanding of organic and inorganic syntheses, quantitative and qualitative instrumental analysis, and applications of physical chemistry principles to molecular structure and kinetics. They will carry out experiments based on current needs and applications of the Army. Cadets and faculty will also discuss current research and present their work.

2018-2 2019-2 2020-2

Lessons: 5 @ 55 min (2.500 Att/wk) **Labs:** 35 @ 120 min

Special Requirements: Library research and written reports are required. All cadets will complete an integrative experience group project that will investigate the social, political and economical implications of chemistry.

Prerequisite(s): CH474

CH489	INDIVIDUAL RESEARCH I	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	------------------------------	--

Scope: 2013-1

Offerings:

This undergraduate research course is designed to significantly advance the cadet's knowledge and comprehension of science and/or engineering by answering a real world scientific question. Course work includes defining a problem, understanding related issues, designing an experimental approach, analyzing data, and drawing conclusions. By applying the scientific method to attempt to solve an actual problem, cadets will expand their critical thinking and intellectual capability. Cadets are supervised by a faculty advisor with expertise in the chosen research area. Cadets conduct research individually but may be part of a larger group working on a project with a broad scope. The minimum requirement for moving onto CH490 is a defined problem and hypothesis, a background in related research, and an experimental design. The Head of the Department will approve cadet projects. Lessons and labs will be established through consultation between cadet and advisor. Requirements include both written and oral progress reports.

Lessons: 0 @ 0 min (0.000 Att/wk)

Labs: 0 @ 0 min

Special Requirements:

LESSONS and LABS: Established by consultation between the cadet and his/her faculty advisor. Cadets are expected to perform an average of 7.5 hours of work per week towards completion of the project.

Prerequisite(s):

CH102
-Or-
CH152

CH490

INDIVIDUAL RESEARCH II

3.0 Credit Hours
(BS=0.0,ET=0.0,MA=0.0)

Scope:

2013-1

Offerings:

With the same outcome goal as CH489 of significantly advancing the cadet's knowledge and comprehension of science and engineering into answering a real world scientific question, this course typically involves experimentation, data analysis, data evaluation, and publishing results. Cadets are supervised by a faculty advisor with expertise in the chosen research area. Cadets conduct research individually but may be part of a larger group working on a project with a broad scope. This course could conclude in a poster presentation, publication and/or a conference presentation as the undergraduate researcher contributes to the larger scientific community. Requirements include both a written final report and an oral presentation.

2018-1 2018-2 2019-1
2019-2 2020-1 2020-2

Lessons: 0 @ 0 min (0.000 Att/wk)

Labs: 0 @ 0 min

Special Requirements:

LESSONS and LABS: Established by consultation between the cadet and his/her faculty advisor. Cadets are expected to perform an average of 7.5 hours of work per week towards completion of the project.

Prerequisite(s):

CH489

CH491

ADVANCED INDIVIDUAL STUDY I

3.0 Credit Hours
(BS=0.0,ET=0.0,MA=0.0)

Scope:

2012-1

Offerings:

This undergraduate research course is structured similarly to both CH489 and CH490. In this course, a cadet may continue on an established research problem or begin a new line of investigation. The minimum requirement for moving onto CH491 is a defined problem and hypothesis, a background in related research, and an experimental design. Requirements include both written and oral progress reports. Written recommendation from Department Head must be presented to ORD and approved by the Dean of the Academic Board as this course constitutes a third semester of independent study.

CH490

CH492

ADVANCED INDIVIDUAL STUDY II

3.0 Credit Hours
(BS=0.0,ET=0.0,MA=0.0)

Scope:

2012-1

Offerings:

The Advanced Individual Study provides cadets the unique opportunity to complete a carefully defined question or problem researched over the course of the previous 1.5 to 2 years. Based in research, this problem may be critical, experimental, applied, or creative in nature, and represents an effort to make an original contribution to the field. The Research Thesis is a culmination of a research effort that goes beyond normal requirements of the major and represents the cadet's best work in their discipline. Each thesis must demonstrate clear critical thinking, a mastery of disciplinary material, clarity in communication of complex ideas, and professionalism in production. Cadets must complete a written thesis and present an oral thesis defense to the faculty and staff. Additionally cadets having completed a year of research on one topic would be able to explore another researcher topic altogether. Written recommendation from Department Head must be presented to ORD and approved by the Dean of the Academic Board.

Prerequisite(s): CH490

CH499	TOPICS IN CHEM/LS/CHMENG W/LAB	3.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------------	--

Scope: 2010-7

Offerings:

This course provides in-depth study of a special topic in chemistry, chemical engineering and life science not offered elsewhere in the USMA curriculum. Course content will be based on the special expertise of the Visiting Professor, Rotating PhD, or a senior faculty member. This course may also be offered as an AIAD course at USMA. This course will contain significant lab content to justify 3.5 credit hours.

CE350	INFRASTRUCTURE ENGINEERING	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	-----------------------------------	--

Scope:	2011-1	Offerings:
---------------	--------	-------------------

This course identifies, analyzes, and assesses built infrastructure which is the foundation for modern society. The complex and interconnected nature of infrastructures is investigated and demands on critical components are calculated. Students explore the non-technical factors necessary for the functioning of infrastructure including supplies, trained personnel, and cross-sector dependencies. The course provides a basis for understanding the complexity and cost of maintaining, rebuilding and developing infrastructure. Major blocks of instruction include water and wastewater, power, transportation, solid waste, communications systems, and public administration. Several in-class scenarios are provided to synthesize the connectivity between the major items of infrastructure. Finally, as infrastructure is one of the six variables in the joint operating environment, the knowledge gained is employed to analyze infrastructure in the context of combat operations.

CE371	SOIL MECHANICS/FNDTN ENGNRG	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
--------------	------------------------------------	--

Scope:	2006-2	Offerings:
---------------	--------	-------------------

Soil Mechanics is the study of soil properties which govern the use of soil as a construction or foundation material. The course is devoted to describing soils, analyzing soil stresses, determining consolidation settlement, designing earth embankments, determining earth pressures, and designing foundations based upon applicable engineering principles and recognition of the fundamental concepts of soil behavior. During laboratory periods the student will examine soil properties and extract necessary parameters for design.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 7 @ 120 min

Special Requirements:	Design problems and a laboratory summary report; compensatory time provided. One day-long field trip.
Corequisite(s):	CE364 -Or- MC364

CE380	HYDROLOGY/HYDRAULIC DESIGN	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
--------------	-----------------------------------	--

Scope:	2009-2	Offerings:
---------------	--------	-------------------

This course studies both hydrology, which is the study of occurrence, movement and distribution of rainfall, and hydraulic design, which is the application of fluid mechanics and other science an engineering disciplines in the design of structures and development of water resources. Hydrologic principles are applied to model and analyze the distribution and movement of rainfall in a watershed. Hydraulic principles are applied to analyze and design flow through systems of reservoirs, channels and culverts. The course makes extensive use of computer simulation models used in engineering practice.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 8 @ 120 min

CE390	CIVIL ENGINEERING SITE DESIGN	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
--------------	--------------------------------------	--

Scope:	2013-1	Offerings:
This course provides cadets the necessary background to select and develop sites for civil engineering structures as well as review the work of others. Proper site selection and engineering have a significant impact on the economics of a project and long-term utility of the constructed facility. Specifically, the course covers the skills of determining site layout and access, establishing site contour and drainage, installation of utilities, elementary surveying, creation of digital models using computer modeling software, and the development of environmental impact statements. In the theater of operations, this background is critical to the success of missions related to construction of roads, runways, base-camps and other engineered military works.		2019-1 2020-1

CE399	CIVIL ENG PRAC-FIELD ENG	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2014-7	Offerings:
This course provides cadets with an opportunity to learn and practice the field aspects of civil engineering. Topics include plane surveying, introduction to construction materials, wood frame building construction, heavy equipment operations, concrete placement and finishing, roadway construction, steel fabrication, reinforced concrete construction, bridge construction, power production, and environmental systems. Cadets perform actual construction projects as part of course requirements. LESSONS and LABS: 12 lessons of varying length, scheduled across three weeks of full-day instruction during the summer.		2018-7 2019-7 2020-7
Lessons:	12 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min

CE400	CIVIL ENGR PROF PRACTICE	1.0 Credit Hours (BS=0.0,ET=1.0,MA=0.0)
Scope:	2009-2	Offerings:
This seminar consists of 13 class attendances during the spring semester and includes all First Class cadets in the Civil Engineering major. The course focuses on issues related to the professional practice of civil engineering, and is intended to augment and enrich the cadets' CE492 Capstone design experience. Topics include professional roles and responsibilities, professional registration, continuing education, engineering ethics, procurement of work, competitive bidding, quality-based selection processes, and construction management. Cadets are also introduced to the design and construction processes used by the U.S. Army Corps of Engineers. The seminar will include presentations by guest lecturers on topics of current interest in the field of civil engineering. Guest lecturers will be primarily civil engineering practitioners, providing the students an opportunity to interact with professionals in their major field of interest.		2018-2
Lessons:	13 @ 55 min (1.000 Att/wk)	Labs: 0 @ 0 min
Special Requirements:	One essay requirement usually on an ethics topic.	
Corequisite(s):	CE492	
CE401	CIV ENG PROF PRAC AND APP	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2019-2	Offerings:
The course covers three primary topics: Fundamentals of Engineering (FE) Exam Preparation, Professional Engineering Topics, and remaining material to cover the West Point IT/Cyber Academic Goal. Taking and passing the FE Exam is one of the required steps to becoming a licensed professional engineer and is consistent with the APG of Lifelong Learning. The professional engineering topics include professional roles and responsibilities, professional registration, continuing education, engineering ethics, procurement of work, competitive bidding, quality-based selection processes, and construction management. The seminar will include presentations by guest lecturers on topics of current interest in the field of Civil Engineering. Guest lecturers will be primarily Civil Engineering practitioners, providing the students an opportunity to interact with professionals in their major field of interest. Cadets complete a major reflective essay as well as several journal entries, in support of the West Point Writing Goal. Lastly, the course will cover material to meet the		2019-2 2020-2

IT/Cyber Academic Goal requirements as necessary. (CONDITIONAL APPROVAL in AY16 - Full Review in AY18)

Lessons: 40 @ 55 min (0.000 Att/wk) **Labs:** 0 @ 0 min

Corequisite(s): CE494

CE403	STRUCTURAL ANALYSIS	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	----------------------------	--

Scope: 2017-2

Offerings:

This course addresses the analysis of basic structural forms such as beams, trusses, and frames, which are found in bridges and buildings. Classical deflection techniques such as direct integration and virtual work; and indeterminate analysis techniques such as the force method and displacement method (specifically direct stiffness) are used to determine forces and deflections in elastic structures. Structural analysis computer programs are introduced and directly applied in the solution of graded analysis.

CE404	DSN STEEL AND WOOD STRUCTURES	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	--------------------------------------	--

Scope: 2013-1

Offerings:

This course teaches the engineering thought process through the design of steel structures. The course synthesizes the fundamentals of statics, mechanics of materials, and structural analysis and applies them to the design of structural members, with emphasis on satisfying real-world needs. Topics include an introduction to the design of structural systems, design of steel tension and compression members, design of beams and beam-columns, and an introduction to connection design. All design is performed in accordance with codes and specifications used in current engineering practice. A comprehensive design problem requires development of a design methodology, consideration of alternative solutions, and design of an optimal steel structure to meet stated functional requirements. Seven lessons of the course introduce students to the design of wood tension members, compression members and beams.

2018-1 2018-2 2019-1
2019-2 2020-1 2020-2

Lessons: 33 @ 55 min (2.500 Att/wk) **Labs:** 7 @ 120 min

Special Requirements: Problem sets and a semester-long design project; one compensatory lesson provided for the final submission.

Prerequisite(s): CE403
-Or-
CE453

CE450	CONSTRUCTION MANAGEMENT	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	--------------------------------	--

Scope: 2011-2

Offerings:

This course focuses on the implementation portion of the design process. The management of construction is covered to include scope of work, rough order-of-magnitude estimating, scheduling, planning, progress reporting, resource constraining, and quality control. The roles of the contractor, owner, and designer are explained.

2018-1 2018-2 2019-1
2019-2 2020-1 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: One design project requiring a formal oral and written presentation; compensatory time provided.

Prerequisite(s): CE350 MC300

CE472	ADV SOIL MECHNCS/FNDTN ENGRNG	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	--------------------------------------	--

Scope: 2007-1

Offerings:

Students will extend what they learned in Soil Mechanics and Foundation Engineering and design advanced foundations in this course. Topics covered are: slope stability, field testing, field instrumentation, designing braced excavations, designing piles and drilled shafts, designing flexible walls, designing earth retaining structures, and designing earth structures using geosynthetics.

2018-1 2019-1 2020-1

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements:	None	
Prerequisite(s):	CE371	
CE483	DSN CONC AND MASON STRUCTURES	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
Scope:	2013-1	Offerings:
The course introduces the materials and mechanical properties of concrete and masonry, and the design of reinforced concrete and masonry structures. Mix design and strength testing labs develop the concept of proportioning constituents for quality concrete and provide a background in techniques of material testing, quality control, and sound construction practices. The study of reinforced concrete and masonry includes analysis and design of simple structures, resulting in an appreciation for the strength and serviceability of these structures. Current codes and standards are used to guide the practical design of beams, slabs, columns, footings, walls and lintels.		2018-1 2019-1 2020-1
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 8 @ 120 min	
Special Requirements:	One field trip.	
Prerequisite(s):	CE403	
CE489	ADV IND STUDY CIVIL ENGRING	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	1984-1	Offerings:
The cadet, on an individual or small group basis, pursues advanced study of a research or design topic in civil engineering. The scope of the course is tailored to the needs of the project and desires of the cadet, in consultation with the Faculty Advisor. The cadet is required to define and analyze the problem, study the fundamentals involved, organize an approach, determine a procedure, perform research and/or achieve a solution, submit a written report, and give a formal briefing.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	As determined by faculty advisor. Many CE489 projects will have a significant laboratory requirement.	
CE489A	ADV IND STUDY CIVIL ENGRING	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	1984-1	Offerings:
The cadet, on an individual or small group basis, pursues advanced study of a research or design topic in civil engineering. The scope of the course is tailored to the needs of the project and desires of the cadet, in consultation with the Faculty Advisor. The cadet is required to define and analyze the problem, study the fundamentals involved, organize an approach, determine a procedure, perform research and/or achieve a solution, submit a written report, and give a formal briefing.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	As determined by faculty advisor. Many CE489A projects will have a significant laboratory requirement.	
Corequisite(s):	CE489	
CE490	TOPICS IN CIVIL ENGINEERING	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	1997-2	Offerings:
This course provides in-depth study of a special topic in engineering mechanics or in structural, geotechnical, environmental, water resources, construction, or transportation engineering not offered elsewhere in the USMA curriculum. The course is intended to broaden the cadet's exposure to the civil engineering discipline. Course content will be based on the special expertise of the visiting professor or a senior civil engineering faculty member.		2018-1 2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	TBD.	
CE490A	TOPICS IN CIVIL ENGINEERING	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2012-2	Offerings:

This course provides in-depth study of a special topic in engineering mechanics or in structural, geotechnical, environmental, water resources, construction, or transportation engineering not offered elsewhere in the USMA curriculum. The course is intended to broaden the cadet's exposure to the civil engineering discipline. Course content will be based on the special expertise of the visiting professor or a senior civil engineering faculty member.

Lessons: 40 @ 55 min (0.000 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: TBD

Prerequisite(s): CE490

CE491	ADV STRUCTURAL ANALYSIS	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	--------------------------------	--

Scope: 2017-2

Offerings:

This course builds upon the material covered in CE403/453 to develop a better understanding of structural behavior. Two-dimensional analysis of trusses and frames is reviewed and extended into 3D. Matrix analysis methods, including an introduction to continuum finite elements are developed as the basis for modern computer-based structural analysis. An introduction to nonlinear analysis is presented. Coursework involves extensive use of the computer as an analytical tool. Students use state-of-the-art structural engineering analysis and design software.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: Graded homework is assigned to reinforce concepts covered in class.

Prerequisite(s): CE403

CE492	DESIGN OF CE SYSTEMS	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	-----------------------------	--

Scope: 2012-2

Offerings:

This course provides an opportunity for cadets to apply and synthesize their knowledge of structural engineering, geotechnical engineering, hydrology, hydraulic engineering, construction management and engineering economics in an open-ended, realistic, semester-long, capstone design experience. Working in teams, cadets develop functional requirements for a proposed project then perform the civil engineering designs for this facility. Execution of the design requires extensive use of computer-based analysis and design tools. The products of this effort include a comprehensive design report including drawings, a model of the facility, and a briefing to the client. The integrated design experience is augmented by formal classroom instruction in civil engineering systems design and advanced topics in civil engineering component design. This course constitutes the integrative experience for cadets majoring in civil engineering and civil engineering studies.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: One comprehensive semester-long design problem requiring four submissions and an oral presentation. Compensatory time provided for each submission.

Prerequisite(s): CE404 CE483
-Or-
CE454 CE483

Corequisite(s): CE371 CE380

CE493	CIV ENG CAPSTONE DESIGN I	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
--------------	----------------------------------	--

Scope: 2019-1

Offerings:

CE493 is the first of two courses in the integrative Civil Engineering capstone design experience that prepares cadets for engineering practice. The course is a culminating experience based on the knowledge and skills acquired throughout the program; and incorporates appropriate engineering standards and multiple social, political, economic, and technical design constraints. The course projects require design in more than one civil engineering context; i.e., structural engineering, construction management, hydraulic and hydrologic engineering, geotechnical engineering, materials engineering, and civil site and infrastructure engineering. Cadets are required to conduct iterative analysis and design of solutions to challenging, ill-defined and open-ended problems. Cadets are required to utilize state-of-art engineering software and applications in their projects, which contributes to the West Point IT/Cyber Goal. Every project includes significant written requirements with established faculty mentor assessments and feedback, which contributes the West Point Writing Goal. Cadets begin their capstone assignments early in the course and continue their projects with CE494. (CONDITIONAL APPROVAL in AY16 - Full Review in AY18)

Lessons: 40 @ 120 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: None

Prerequisite(s): CE371 CE380 CE403

Corequisite(s):	CE404 CE483	
CE494	CIV ENG CAPSTONE DESIGN II	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
Scope:	2019-2	Offerings:
CE494 is the second of two courses in the integrative Civil Engineering capstone design experience that prepares cadets for engineering practice. Projects are continued from CE493 and continue to build upon the program's coursework. Iterative analysis and design reach a culminating state where project reports and presentations are provided to real-world customers or similar conditions. The course environment and requirements will continue to contribute to the West Point Academic Goals; i.e. IT/Cyber and Writing. (CONDITIONAL APPROVAL in AY16 - Full Review in AY18)		2019-2 2020-2
Lessons: 40 @ 120 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
Prerequisite(s):	CE493	
CE495	TRANSPORTATION ENGINEERING	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2011-2	Offerings:
This course provides cadets with a solid introduction to the principles of transportation engineering with a focus on highway engineering and traffic analysis. The material learned will provide the basic skill set that will allow students to solve transportation problems that are likely to appear in professional practice (civilian and military), on the Fundamentals of Engineering exam (FE), and on the Principles and Practice of Engineering exam (PE).		2018-2 2019-1 2020-1
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	One in-class design exercise.	
Prerequisite(s):	CE371 CE380	
MC300	FUND OF ENGR MECH AND DESIGN	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2017-1	Offerings:
The engineering design process and the method of design are introduced. Principles of equilibrium are used to analyze forces on statically determinate rigid bodies and structures to include trusses and frames. The behavior of deformable bodies under axial, flexural, and torsional loading is examined. The concepts of stress, strain, and material properties are introduced and are used to relate external forces applied to a body to the resulting internal forces and deformations so that performance can be evaluated. Practical applications involving the design and adequacy of mechanical and structural elements under various loading conditions are emphasized.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 34 @ 55 min (2.500 Att/wk)	Labs: 6 @ 120 min	
Special Requirements:	None	
Corequisite(s):	PH205 -Or- PH255 -Or- PH201	
MC302	STATICS & DYNAMICS	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2013-2	Offerings:
Statics & Dynamics examines the effect of forces acting on particles and rigid bodies. Vector mechanics is used extensively. The first part of the course, Statics, addresses the topics of equilibrium in two and three dimensions, to include distributed loads, trusses, frames, friction, and cables. The second part, Dynamics, begins with the study of kinematics, including translating and rotating reference frames and coriolis acceleration. The final block of the course deals with two dimensional kinetics methods of force-acceleration, work-energy, and impulse-momentum.		No Course Offerings
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Homework problems are assigned	

Prerequisite(s):	MA205 -Or- MA255
Corequisite(s):	PH202 -Or- PH252
Disqualifier(s):	CE302

MC306	DYNAMICS	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	-----------------	--

Scope:	2012-1	Offerings:
Dynamics examines the motion of particles, systems of particles, and rigid bodies under the influence of forces. It focuses on the use of Newton's Second Law, in three major, progressive blocks of instruction?from scalar, then vector, treatments of rectilinear and curvilinear motion of single particles; through vector motion of systems of particles; to general three-dimensional motion of rigid bodies. The course also provides brief introductions to energy methods: work-energy and impulse-momentum.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: Homework problems are assigned.

MC311	THERMAL-FLUID SYSTEMS I	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
--------------	--------------------------------	--

Scope:	2015-2	Offerings:
Thermal-Fluid Systems I is an integrated study of fundamental topics in thermodynamics and fluid mechanics. The course introduces conservation principles for mass, energy, and linear momentum as well as the 2nd Law of Thermodynamics. Principles are applied to incompressible flow in pipes and turbomachinery, power generation systems, refrigeration cycles, and total air-conditioning focusing on the control volume approach. Laboratory exercises are integrated into classroom work. This course includes completion of a comprehensive, out-of-class design problem. This design problem provides the opportunity for students to apply engineering science and the engineering design process to a hands-on project.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2

MC312	THERMAL-FLUID SYSTEMS II	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2012-1	Offerings:
MC 312 Thermal-Fluid Systems II continues the integrated study of fundamental topics in thermodynamics and fluid mechanics. The course applies conservation principles for mass, energy, and linear momentum as well as the 2nd Law of Thermodynamics. Principles are applied to an automotive system to examine engine performance (Otto and Diesel Cycles) and to high performance aircraft to examine the Brayton Cycle, compressible flow, external flow, lift, and drag. Laboratory exercises are integrated into classroom work. Design problems provide the opportunity for students to apply engineering science to the design of thermal-fluid systems.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2

Disqualifier(s):	ME312	
MC364	MECHANICS OF MATERIALS	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
Scope:	2012-1	Offerings:
This course studies the behavior of a variety of materials under normal, shear, torsional, bending and combined loads. The concepts of stress, strain, creep, corrosion, fatigue and material properties are explored. The course examines observed behavior in light of the relationships between the microscopic structure and macroscopic properties of materials used in engineering applications. The loading, geometry, functional environment and material properties of machine or structural parts are used to relate the forces applied to a body to the resulting internal forces and deformations so that performance can be evaluated. Practical applications involving the design and adequacy of mechanical and structural elements under various loading and environmental conditions are emphasized.		2018-2 2019-2 2020-2
Lessons: 34 @ 55 min (2.500 Att/wk)	Labs: 6 @ 120 min	
Special Requirements:	Several out of class design problems are given.

Disqualifier(s):	CE364	
MC380	ENGINEERING MATERIALS	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
Scope:	2012-1	Offerings:
Course explores the relationship between the microscopic structure and macroscopic properties of materials used in engineering applications. The origin of mechanical and physical properties is studied. Emphasized is an understanding of the fundamental aspects of atomic and microstructural concepts for proper materials selection and enhancement of engineering properties. Materials under study are metals, ceramics, polymers, composites, nano-sized/structured materials, biomaterials, smart materials, and semi- and super-conductors. Laboratory exercises are incorporated throughout the course to provide practical experience in making decisions concerning material composition and processing in order to optimize engineering properties. Experiences from the field are detailed to demonstrate application of concepts.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 42 @ 55 min (2.500 Att/wk)	Labs: 5 @ 120 min	

Special Requirements:	The completion of an out-of-class design problem requiring the equivalent of 0.5 credit hours of student effort.
Prerequisite(s):	CH102 MC364 -Or- CH152 MC364 -Or- CE364 CH102 -Or- CE364 CH152
Disqualifier(s):	ME380

MC478	STRUCTURAL MECHANICS	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	-----------------------------	--

Scope:	2013-1	Offerings:
The course extends the coverage of Mechanics of Materials to the analysis of structural elements found in civil and mechanical engineering applications. Topics include stress/strain transformation, Mohr's circle, Generalized Hooke's Law, failure theory, fatigue and fracture mechanics and the basic theory of elasticity in three dimensions. Also covered in varying depth are numerical methods and experimental methods as they apply to structural mechanics. Students investigate the combined effects of axial, torsion, flexural, and shear loads on members with complex geometries and cross sections. Coverage includes the generalized flexure theory and the concept of a shear center, torsion of non-circular cross-sections, and thick-walled cylinders.		2018-1 2019-1 2020-1
Lessons: 37 @ 55 min (2.500 Att/wk)	Labs: 3 @ 55 min

MC486	VIBRATION ENGINEERING	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	------------------------------	--

Scope:	2013-2	Offerings:
In this course students develop a foundation in the analysis and design of free and forced single and multi-degree of freedom systems. Applications include modeling, damping, resonance, force transmissibility, vibration absorbers, matrix formulation and modal analysis. Emphasis is placed on vibrations examples from several engineering fields. Out-of-class design problems provide students with the opportunity to apply principles taught in the classroom to realistic problems encountered by practicing engineers. In-class demonstrations supplement the theory development.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 39 @ 55 min (2.500 Att/wk)	Labs: 1 @ 55 min	
Special Requirements:	Two out-of-class design problems. Compensatory time given.	
Prerequisite(s):	MA364 MC306 -Or- MA365 MC306	
Corequisite(s):	MC364	
Disqualifier(s):	ME486	

ME189	INTRO IND STUDY IN ME	1.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	------------------------------	--

Scope:	2017-2	Offerings:
The cadet pursues study of a topic in mechanical engineering on an individual or small group basis, independent of a formal classroom setting. The scope of the selected project is tailored to the interests of the cadet based on resources and in consultation with a faculty advisor. To develop research skills, the cadet is integral in all phases of project completion by defining objectives, studying fundamentals and background material, outlining the approach, conducting analysis, and communicating results.		2018-1
Lessons: 13 @ 55 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Enrollment by permission of Mechanical Engineering Program Director. Appropriate ET credit will be determined by the Mechanical Engineering Program Director on a case by case basis. Other requirements as determined by the Faculty Advisor.	

ME201	INTRO TO MECH ENGINEERING	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2018-1	Offerings:
This course introduces product design as an iterative decision making process. It also introduces project planning and team dynamics, technical communications, and using computing tools including structured programming and 2-D/3-D visualization and analysis to aid the design process. Cadets solve a series of progressively more challenging problems by applying the design process while addressing social, political, economic and technical issues.		2018-1 2019-1 2020-1
Lessons: 32 @ 55 min (2.500 Att/wk)	Labs: 8 @ 55 min	
Special Requirements:	None	
Corequisite(s):	PH205 -Or- PH255	
ME289	INDIVIDUAL STUDY IN ME	2.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2017-2	Offerings:
The cadet pursues study of a topic in mechanical engineering on an individual or small group basis, independent of a formal classroom setting. The scope of the selected project is tailored to the interests of the cadet based on resources and in consultation with a faculty advisor. To develop research skills, the cadet is integral in all phases of project completion by defining objectives, studying fundamentals and background material, outlining the approach, conducting analysis, and communicating results.		2018-1
Lessons: 27 @ 55 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Enrollment by permission of Mechanical Engineering Program Director. Appropriate ET credit will be determined by the Mechanical Engineering Program Director on a case by case basis. Other requirements as determined by the Faculty Advisor.	
ME301	THERMODYNAMICS	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
Scope:	2004-1	Offerings:
Thermodynamics concerns the study of energy. In this course, the student will gain a basic engineering knowledge of energy applications and limitations. This course provides the groundwork for subsequent studies in engineering sciences and an appreciation of numerous problems associated with energy. Emphasis is placed on practical application to power generation, thermal and air pollution, refrigeration, air conditioning, automotive and aircraft engines, and combustion. Laboratory exercises are integrated into classroom work. This course includes completion of a comprehensive, out-of-class design problem. This design problem provides the opportunity to apply the principles of thermodynamics which are taught in the classroom to a realistic problem encountered by practicing engineers.		No Course Offerings
Lessons: 41 @ 55 min (3.000 Att/wk)	Labs: 6 @ 120 min	
Special Requirements:	The completion of an out-of-class design problem requiring the equivalent of 0.5 credit hour of student effort. Compensatory time is provided to complete the design requirement.

ME350	INTRO THERMAL SYS W/ ARMY APPL	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2005-2	Offerings:

This course is presented within the framework of a common model for the engineering design process. This model serves as a conceptual framework for study in the engineering thermal sciences. This course concerns the study of mediums and energy. The basic conservation laws are developed. The student will gain a basic engineering knowledge of thermal science applications in the Army. Emphasis is placed on practical applications of internal combustion and gas turbine engines and fluid flow. Laboratory exercises are integrated into classroom work.

ME362	FLUID MECHANICS	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
--------------	------------------------	--

Scope: 2004-1

Offerings:

Fluid Mechanics is the study of the behavior of liquids and gases under all conditions of rest and motion. The basic conservation laws are developed and applied to problems encountered in stream and pipe flow, modeling, low speed aerodynamics, forces on submerged surfaces, turbomachinery, and flow measurement. The course emphasizes physical concepts as well as mathematics and is augmented by laboratory work and a wide variety of training aids. This course provides the foundation for further study in aerodynamics, energy systems engineering, automotive engineering, civil engineering, and environmental engineering.

ME370	COMPUTER AIDED DESIGN	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	------------------------------	--

Scope: 2009-1

Offerings:

Explores the use of computer methods as an aid to solving engineering problems. Computer techniques are studied in a variety of engineering contexts. Topics include 3D solid modeling, engineering analysis, engineering computer programming, and graphical presentation of information. Students learn to apply a variety of engineering-related programs or routines. Students write, document, and use programs of their own in design scenarios. Considerable emphasis is placed on use of the computer as a tool in the engineering design process.

Scope: 2018-2

Offerings:

Explores the use of computer methods as an aid to solving engineering problems. Computer techniques are studied in a variety of engineering contexts. Topics include 3D solid modeling, engineering analysis, engineering computer programming, and graphical presentation of information. Students learn to apply a variety of engineering-related programs or routines. Students write, document, and use programs of their own in design scenarios. Considerable emphasis is placed on use of the computer as a tool in the engineering design process.

2018-2 2019-1 2019-2
2020-1 2020-2

Lessons: 27 @ 55 min (2.500 Att/wk) **Labs:** 13 @ 120 min

MA255 ME201

ME387	INTRO APPLIED AERODYNAMICS	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	-----------------------------------	--

Scope: 2015-2

Offerings:

The fundamental laws of fluid mechanics are used to develop the characteristic forces and moments generated by the flow about aerodynamic bodies. Lift, drag, and aerodynamic moments are studied for airfoils (2-D) and finite wings (3-D) in the subsonic and supersonic flow regimes. Theoretical concepts are demonstrated in laboratory sessions that include low-speed wind tunnel testing and actual flight in the Department of Civil and Mechanical Engineering's fixed-wing aircraft.

2018-2 2019-2 2020-2

Lessons: 38 @ 55 min (2.500 Att/wk) **Labs:** 2 @ 120 min

MC312

ME388	HELICOPTER AERONAUTICS	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	-------------------------------	--

Scope: 2016-2

Offerings:

The aerodynamics of helicopter flight is analyzed for hover, translating, and partial power flight. Theory and experimental results are used to predict aircraft performance. The course analyzes the dynamic response of the rotor system and the performance aspects of the vehicle as a whole. This is followed by a design workshop, during which cadets complete the initial sizing of a helicopter to meet specific mission requirements. The course includes one flight lab in a helicopter, a laboratory examining rotor power and thrust utilizing a whirl stand apparatus, and one field trip to a commercial helicopter company.

2018-2 2019-2 2020-2

Lessons: 38 @ 55 min (2.500 Att/wk) **Labs:** 2 @ 120 min

Special Requirements: Graded design workshop, whirl-stand laboratory, and flight laboratory briefing.

Prerequisite(s): MC300 MC312 ME370

ME389	INTRO TO ADV STUDY IN MECH ENG	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------------	--

Scope: 2014-1

Offerings:

The cadet pursues advanced study of a topic in mechanical engineering on an individual or small group basis, independent of a formal classroom setting. Similar to graduate level research, the scope of the selected project is tailored to the interests of the cadet based on resources and in consultation with a faculty advisor. To develop research skills, the cadet is integral in all phases of project completion by defining objectives, studying fundamentals and background material, outlining the approach, conducting analysis, and communicating results.

2018-1 2018-2 2019-1
2019-2 2020-1 2020-2

Lessons: 40 @ 55 min (0.000 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: Enrollment by permission of Mechanical Engineering Program Director. Appropriate ET credit will be determined by the Mechanical Engineering Program Director on a case by case basis. Other requirements as determined by Faculty Advisor.

ME389A	INTRO TO ADV STUDY IN MECH ENG	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
---------------	---------------------------------------	--

Scope: 2014-1

Offerings:

The cadet pursues advanced study of a topic in mechanical engineering on an individual or small group basis, independent of a formal classroom setting. Corequisite(s): ME389

ME400	MECHANICAL ENGINEERING SEMINAR	2.0 Credit Hours (BS=0.0,ET=2.0,MA=0.0)
--------------	---------------------------------------	--

Scope: 2013-2 **Offerings:**

This seminar consists of a series of guest speakers and preparatory lessons for the Fundamentals of Engineering Examination. It will include all First Class cadets majoring in mechanical engineering. Guest Speaker topics will address the concerns of professional mechanical engineers such as engineering ethics, continuing education, engineering economy, social and safety considerations, and professional registration. Project management techniques will be introduced in this seminar as well as presentations by guest lecturers on topics of current interest in the field of mechanical engineering. Guest lecturers will be primarily mechanical engineering practitioners, providing the students an opportunity to interact with professionals in their major field of interest.

Lessons: 26 @ 55 min (1.000 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: None

ME403	MANUFACTURING/MACHINE COMP DSN	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
--------------	---------------------------------------	--

Scope: 2009-2 **Offerings:**

This course is an introduction to mechanical manufacturing machines and machine component design. The first portion of the class is devoted to safe, hands-on experience with manufacturing machines and equipment. Cadets will have an opportunity to work on civil and mechanical manufacturing machines that are common in machine, woodworking, and sheet metal shops such as a mill, lathe, grinder, belt sander, drill press, and bandsaw. The course progresses to fundamental engineering science applied to machine components. These topics include load, stress, and strain analyses, impact, fatigue, and surface damage. The course progresses to the study of machine component design to include mechanical components such as fasteners, springs, bearings, gears, and shafts. Welding techniques and welding equipment are introduced. The course culminates in a team-oriented process, design, and manufacture of a mechanical engineering product using the techniques, tools, machines, and equipment that were developed and taught throughout the course.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 7 @ 110 min

Special Requirements: One comprehensive design and manufacturing project.

Prerequisite(s): CE300 CE364
-Or-
MC300 MC364

ME404	MECHANICAL ENGINEERING DESIGN	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
--------------	--------------------------------------	--

Scope: 2014-1 **Offerings:**

This course introduces mechanical engineering design as an iterative decision making process. It also introduces engineering economics and ethics. One engineering design problem reinforces the design process instruction and culminates in a student competition. Cadets begin an integrative capstone design experience that applies the Mechanical Engineering Design Process to a real-world engineering problem addressing social, political, economic, and technical issues. Students begin capstone assignments early in the course and continue their projects with ME496.

Lessons: 15 @ 55 min (2.500 Att/wk) **Labs:** 25 @ 55 min

Special Requirements: None

Prerequisite(s): ME403

ME450	ME DESIGN OF ARMY SYSTEMS	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	----------------------------------	--

Scope:	2009-1	Offerings:
This course presents mechanical engineering design as an iterative decision making process. A wide variety of mathematics, science, and engineering fundamentals are applied to the synthesis, analysis, and evaluation of mechanical components. The culminating design project provides an opportunity to experience design and to consider reliability, economics, and the judicious use of resources. A paper design and design and build projects reinforce the design process instruction. The course culminates in a student competition.		No Course Offerings
Lessons:	38 @ 55 min (2.500 Att/wk)	Labs: 2 @ 55 min
Special Requirements:	Design projects as assigned; compensatory time provided.	
Prerequisite(s):	ME350 -Or- ME311 -Or- MC311	
ME472	ENERGY CONVERSION SYSTEMS	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2015-2	Offerings:
Fundamental concepts are extended to the engineering analysis of coal, oil and natural gas fossil fuel systems to assess the dominant sources of energy and technologies in the electric power, transportation, industrial, and residential and commercial energy sectors. Renewable and alternative energy resources including solar, wind, biomass, hydro, geothermal, nuclear and ocean energy are assessed, along with analysis of conventional and emerging technologies to harness them. National and global energy issues are discussed with technical, economical, environmental, societal and geopolitical considerations and in the context of Army energy needs.		2018-2 2019-2 2020-2
Lessons:	40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min
Special Requirements:	None.	
Prerequisite(s):	MC311	
ME480	HEAT TRANSFER	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
Scope:	2016-1	Offerings:
The three modes of heat transfer, conduction, convection, and radiation, are studied in detail and applications are made to various engineering systems. The principles of conduction and convection are used to study the mechanisms of heat transfer during boiling, condensation and the design of heat exchangers.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons:	46 @ 55 min (3.000 Att/wk)	Labs: 1 @ 55 min
Special Requirements:	None	
Prerequisite(s):	MA364 MC311 -Or- MA365 MC311	
ME481	AIRCRAFT PERFOR/STAT STBLTY	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2011-1	Offerings:
The course applies the principles developed in applied aerodynamics to develop the equations of motion for a rigid aircraft in steady state level flight, maneuvering flight, and during takeoff and landing. These equations are analyzed to determine such performance characteristics as maximum range, endurance, turning rate, climb rate, etc. Piston-prop, turbo-prop, and jet aircraft are considered. The equations of motion are then analyzed to develop static stability criteria and investigate steady state control characteristics. Two flight laboratories in the departments fixed-wing airplanes provide an opportunity to obtain performance data and analyze the steady state stability and control of an actual aircraft.		2018-1 2019-1 2020-1
Lessons:	38 @ 55 min (2.500 Att/wk)	Labs: 2 @ 120 min
Special Requirements:	Two flight laboratory reports, glider design and test.

MC311 ME387

ME483	AERONAUTICAL SYSTEMS DESIGN	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
Scope:	2005-2	Offerings:
Using the aeronautical fundamentals learned in the prerequisite courses, cadet design groups apply the design process to develop and build an aeronautical systems design project. The following design areas are addressed: weight estimation, aerodynamic surfaces, stability and trim, component layout, drive trains, structural analysis, and miscellaneous subsystems. The semester-long course project is completed in phases, culminating in a final report and oral presentation. This course provides an integrative experience in support of the overarching academic program goal, and is often interdisciplinary in nature.		No Course Offerings
Lessons: 3 @ 55 min (2.500 Att/wk)	Labs: 44 @ 110 min	
Special Requirements:	Cadets spend extensive time in project development laboratories fabricating and refining their products under the supervision of laboratory technicians during Z-hour (mutually agreed upon meeting period).	
Prerequisite(s):	ME402 ME481	
ME489	ADV STUDY IN MECH ENGRNG	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)

ME492	PWR TRAINS & VEH DYNAMICS	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	--------------------------------------	--

Scope:	2010-1	Offerings:
---------------	--------	-------------------

An introductory course in ground vehicle theory with emphasis on analysis, testing, and evaluation of automotive power trains and dynamic systems to understand the underlying principles affecting vehicle design. Clutches, transmissions (manual and automatic), differentials, wheels and tires, as well as braking, steering and suspension systems are studied in detail to include their effect on vehicular or other system performance. High speed, tracked vehicle application of the above systems is also covered. Theory is verified with hands on experience in the laboratory. Component design problems are interspersed throughout the course.

2018-1 2019-1 2020-1

Lessons: 36 @ 55 min (2.500 Att/wk) **Labs:** 4 @ 120 min

--------------	---------------------------------	--

Scope:	2009-2	Offerings:
---------------	--------	-------------------

This course provides experience in the integration of math, science, and engineering principles into a comprehensive engineering design project. Open-ended, client-based design problems emphasize a multidisciplinary approach to total system design providing multiple paths to a number of feasible and acceptable solutions which meet the stated performance requirements. Design teams are required to develop product specifications, generate alternatives, make practical engineering approximations, perform appropriate analysis to support the technical feasibility of the design, and make decisions leading to an optimal system design. System integration, human factors engineering, computer-aided design, maintainability, and fabrication techniques are addressed. This course provides an integrative experience in support of the overarching academic program goal, and is often interdisciplinary in nature.

2018-2 2019-2 2020-2

Lessons: 3 @ 55 min (3.000 Att/wk)**Labs:** 44 @ 110 min**Special Requirements:**

Prerequisite(s):

ME404

XE475**MECHATRONICS****3.5 Credit Hours**
(BS=0.0,ET=3.5,MA=0.0)**Scope:**

2013-1

Offerings:

XE 475 is a comprehensive introductory course in the field of mechatronics. Mechatronics is the crossroads in engineering where mechanical engineering, electrical engineering, computer science, and controls engineering meet to create new and exciting real-world systems. Knowledge of mechanical and electrical components, controls theory, and design are integrated to solve actual physical design applications.

2018-1 2019-1 2020-1

Lessons: 42 @ 55 min (2.500 Att/wk)**Labs:** 5 @ 120 min**Special Requirements:**

The completion of an out-of-class project requiring the equivalent of 0.5 credit hour of student effort.

Corequisite(s):

XE472

XE490**SUSTAINABILITY ENGINEERING****3.0 Credit Hours**
(BS=0.0,ET=3.0,MA=0.0)**Scope:**

2019-2

Offerings:

This course provides in-depth study of sustainable building design, particularly as it relates to Civil Engineering topics. The course is intended to broaden the Cadet's exposure to the Civil Engineering discipline. This course focuses on the quantitative evaluation of design techniques and technologies meant to reduce the energy demand of small buildings. Although the focus is on residential homes, the techniques and technologies learned are applicable to buildings of all sizes. By focusing on the familiar elements of a residential home, students develop invaluable intuitions that will enable them to understand the very same elements in commercial and industrial buildings. What is a "net zero energy" building? What technologies are currently available for use? How much energy can be saved? How much investment in efficiency is justified given the cost? Students answer these questions and more as they investigate how science and engineering can be applied to achieve sustainability. (CONDITIONAL APPROVAL in AY16 - Full Review in AY18)

2019-2 2020-2

Lessons: 40 @ 55 min (0.000 Att/wk)**Labs:** 0 @ 0 min**Special Requirements:**

XE495**TOPICS: ADVANCED TECHNOLOGY****3.0 Credit Hours**
(BS=0.0,ET=0.0,MA=0.0)**Scope:**

2013-2

Offerings:

This course is taught by the Class of 1950 Chair of Advanced Technology, a visiting scholar with a distinguished record of academic and professional achievement in the field of engineering, science and technology. The seminars focus on topical issues that either reflect the Chair's area of expertise or are conducted by an expert in the field. Students will apply mathematics, science, and engineering fundamentals to evaluate equipment, processes, and concepts being used in the Army. The course has a final design briefing that is an integrative experience. Admission into course is with permission of Department Head.

2018-2 2019-2 2020-2

Lessons: 20 @ 110 min (1.250 Att/wk)**Labs:** 0 @ 0 min**Special Requirements:**

89 Courses

CS301	FUND OF COMPUTER SCIENCE	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2017-1	Offerings:
This is the first course for cadets enrolled in the computer science major. This course presents a thought-provoking introduction to the key concepts throughout the field. Cadets develop their understanding of programming (to include modular design) and problem-solving skills begun in IT 105, then launch their computer science studies by focusing on software, data organization, and other topics. Exercises in the design and implementation of software systems are required.		No Course Offerings
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Design projects; Compensatory time given.

CS380	COMPUTER ORGANIZATION	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2017-1	Offerings:
This course provides an introduction to computer organization and architecture. Emphasis is placed on understanding the implications of computer hardware, the operating system, and compilation system, on the performance and security of written code. Students learn basic C programming and the IA32 assembly language. Topics covered include basic computer organization, reverse engineering, buffer overflow, pipelining, the memory hierarchy, code optimization, and process creation. Students also gain exposure to topics in concurrency and parallel computing through the POSIX API. In addition to theory, students gain practical real-world experience using tools for profiling and debugging, including Valgrind and GDB. By the end of this programming intensive course, students will understand how the fundamental principles of computer organization impact their ability to write efficient code.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2

CS384	DATA STRUCTURES	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	1998-1	Offerings:
This course is designed to build on the cadet's basic programming knowledge. Major emphasis is placed on object-based design, programming methodology, algorithms and algorithm analysis, data structures, and abstract data types as tools for the analysis, design, and implementation of software modules to meet specified requirements. Cadets will learn and employ several well-known algorithms and data structures. Techniques of searching, sorting, recursion, and hashing will be examined. Data structures such as sets, heaps, linked lists, stacks, queues, and trees will be covered. A block-structured programming language reflecting comprehensive support for good software engineering principles will be the foundation of application-oriented exercises. Cadets will design software solutions by employing problem decomposition and selecting the appropriate algorithms and abstract data types.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2

CS393	DATABASE SYSTEMS	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	-------------------------	--

Scope:	2015-1	Offerings:
---------------	--------	-------------------

This course addresses the analysis, design and implementation of relational database applications. The structured query language (SQL) is covered in depth along with standard problem domain and data modeling techniques. Implementation techniques and considerations are discussed and practiced extensively. Key concepts include analysis and design using a standardized notation such as the unified modeling language (UML), data model to logical schema conversion techniques, normalization, client-server architectures and web-based access to database systems (e.g. XML). Additional advanced topics covered include system security, transaction processing, data recovery techniques, and maintaining state for mobile devices. Design projects focus on implementing the key course concepts using state-of-the-art multi-user database software.

Lessons: 35 @ 55 min (2.500 Att/wk) **Labs:** 5 @ 55 min

CS394	DISTRIB APPLICATION ENGRNG	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-----------------------------------	--

Scope:	2015-1	Offerings:
---------------	--------	-------------------

Building on the foundations of algorithm implementation, data structures, data representation, and object oriented programming this course focuses on the principles of designing, implementing, and testing a modern distributed application. Cadets study the construction and interaction of user interface, network, web server, database, and other components to produce an integrated working secure system. Cadets will learn new tools and skills working as a team to analyze, design, and implement a system that solves a given problem. This is one of the courses that a Computer Science major can choose from a list of elective courses and the focus is on data structure concepts and object oriented programming.

CS400	COMPUTER SCIENCE SEMINAR	2.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2013-1	Offerings:
<p>This seminar will meet once or twice a week and will include all First Class cadets majoring in computer science. The seminar's instruction consists of relevant reading assignments, class discussions based on readings and case studies, and numerous distinguished guest speakers. Content will address the concerns of computing professionals as well as recent Department of Defense initiatives and new developments in the discipline. Students will develop the ability to identify, explain, and interpret local and global (professional, ethical, social, security, legal, economic, political) impacts of computing on individuals, organizations, and society. They will also be able to outline and defend the values and responsibilities of a member of the computing profession and to summarize avenues through which they can continue to grow professionally.</p>		2018-2

Corequisite(s):	CS401	
CS400	PROFESSIONAL CONSIDERATIONS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2019-2	Offerings:
<p>This course addresses the concerns of professional computer scientists, primarily focusing on non-technical considerations and the development of communication skills. Coursework includes a heavy emphasis on iterative written and oral presentation assignments, based on relevant reading assignments, class discussions, case studies, and distinguished guest speakers. Content will address recent Department of Defense initiatives and new developments in the computing discipline. Students will develop the ability to identify, explain, and interpret local and global (professional, ethical, social, security, legal, economic, political) impacts of computing on individuals, organizations, and society. They will also be able to defend the values and responsibilities of a member of the computing profession and to summarize avenues through which they can continue to grow professionally. CONDITIONAL - FULL PROPOSAL AY 2018</p>		2019-2 2020-2

CS401	SOFTWARE SYSTEMS DESIGN I	3.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2005-1	Offerings:
<p>This course is the first in the senior-level sequence dealing with software systems. It provides cadets with an integrative engineering design and implementation experience as they pursue a solution to a complex, real-life problem. Conceptual material stresses requirements definition and problem solving strategies applied to the design and implementation of software systems. Hierarchical abstractions, modeling, and user interface issues are examined and integrated with a study of the software life cycle, requirements specification, and verification and validation issues. Cadets also learn and employ additional advanced computing techniques that prepare them for the more complex portions of project implementations during CS402. Potential topic areas to be covered may include distributed computation, software quality measurement, or portable application interfaces.</p>		2018-1
Lessons: 40 @ 55 min (3.000 Att/wk)	Labs: 7 @ 120 min	
Special Requirements:	Individual and team projects; compensatory time provided.	
Prerequisite(s):	CS403	
CS403	SOFTWARE TESTING & DEVELOPMENT	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2017-2	Offerings:
<p>This course builds on the fundamental programming skills from prerequisite courses to explore advanced concepts used in modern object oriented software design to create software that is robust, reusable, and extensible in varying problem domains. Cadets gain confidence in their abilities to model, implement, and test solutions to demanding programming problems.</p>		No Course Offerings

CS473	COMPUTER GRAPHICS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--------------------------	--

Scope: 2004-2

Offerings:

This course concerns computer programs that draw two- and three-dimensional objects on computer output devices and receive input from users through graphical input devices. Cadets implement interactive programs through a commonly available graphical application programmers' interface (API). They learn about graphical hardware devices and the elegant algorithms that underlie the API, including elementary computational geometry, continuous time physical simulation, homogeneous transformations, parametric forms, clipping, shading, color, and surface rendering. These concepts are all illustrated with examples of military data visualization including two-dimensional maps and three-dimensional battle simulation and terrain visualization.

2018-2 2019-2 2020-2

CS474	FUNDAMENTALS-COMPUTER THEORY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-------------------------------------	--

Scope: 2015-2

Offerings:

Grounds the cadet in the essentials of theory of computation: formal languages, automata, and computability theory. Frames computation in the context of the Chomsky hierarchy, the polynomial and exponential time hierarchies, and the decidability hierarchy. Explores fundamental limits on computation: what problems can never be solved, what problems can be solved but are intractable, and the class NP of problems that are thought to be intractable, but for which no proof of intractability exists to date.

2018-2 2019-2 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Corequisite(s): CS385

CS478	PROGRAMMING LANGUAGES	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	------------------------------	--

Scope: 2006-1

Offerings:

Concepts of high-level programming language design are explored in detail. Cadets will examine the fundamental issues of programming language design and use this knowledge as a framework for comparison of different high-level languages. Cadets will study concepts from some or all of the imperative, functional, object-oriented, concurrent, and logic programming language paradigms.

Lessons: 33 @ 55 min (2.500 Att/wk) **Labs:** 7 @ 55 min

Special Requirements: None

Prerequisite(s): CS403

CS478	PROGRAMMING LANGUAGES	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	------------------------------	--

Scope: 2018-1

Offerings:

Concepts of high-level programming language design are explored in detail. Cadets will examine the fundamental issues of programming language design and use this knowledge as a framework for comparison of different high-level languages. Cadets will study concepts from some or all of the imperative, functional, object-oriented, concurrent, and logic programming language paradigms.

Special Requirements: None

Prerequisite(s): CS384

CS481	OPERATING SYSTEMS	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	--------------------------	--

Scope: 2017-1

Offerings:

The operating system controls the computer itself and provides a useful interface for users and application programs. The operating system controls all the computer resources: processors, main storage, secondary storage, I/O devices, and files. It determines which programs will be in memory at any given time and the order in which programs will run. The operating system should resolve conflicts between processes, attempt to optimize the performance of the computer, allow the computer to communicate with other computers, and maintain a record of actions performed as it goes about its system tasks. This course investigates the basic design issues encountered in order to produce an operating system that can address the above problems in an efficient manner. These concepts are reinforced by a series of programming projects that include both design and implementation.

Lessons: 37 @ 55 min (2.500 Att/wk) **Labs:** 3 @ 55 min

Special Requirements: Programming projects; compensatory time given.

Prerequisite(s): CS380 CS403

CS482	CYBER SECURITY ENGINEERING	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	-----------------------------------	--

Scope: 2016-1

Offerings:

The focus for this course is to design, build and test secure networked computer systems. Topics covered include operating system and network security, secure network architecture, and offensive and defensive information operations. Practical exercises that give students hands-on experience with current network security tools and techniques complement a series of laboratory exercises that have small groups of cadets secure their own small network. In a culminating exercise, cadets design, build and test defensive measures to protect a production network from intrusions.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

CS483	DIGITAL FORENSICS	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	--------------------------	--

Scope:	2017-2	Offerings:
---------------	--------	-------------------

Digital Forensics will explore the evidence left behind when malicious activity occurs on an information system. The material in this course will build on your knowledge of Operating Systems, file formats, file system structure, computer architecture, and networking. The course begins with an overview of these areas, then examines how to find and extract digital evidence. During the course, you will be challenged with three projects (subjects to be chosen by you) and in class challenges that will allow you to demonstrate your understanding of the material.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: None

Prerequisite(s): CS380 CS481

CS484	COMPUTER NETWORKS	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	--------------------------	--

Scope:	2015-2	Offerings:
---------------	--------	-------------------

This course provides cadets with an introduction to computer networks by breaking the subject into comprehensible parts and building a survey of the state of the art. The goal of the course is to provide each cadet with basic concepts necessary to understand the design and operation of computer networks. Taking a layered approach, it examines the internet with an emphasis on the TCP/IP protocol suite. Additionally, basic principles including multiplexing, switching, flow control, and error control are covered. Internetworking and its application to both local and wide area networks are also investigated. The course offers an understanding of the current status and future directions of technology and how technology relates to standards.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: None

Prerequisite(s): CS384
-Or-
IT350

CS485	SPEC TOPICS IN COMPUTER SCI	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	------------------------------------	--

Scope:	2003-2	Offerings:
---------------	--------	-------------------

This course provides in-depth study of a special topic in computer science not offered elsewhere in the USMA curriculum. Course content will be based on the special expertise of the visiting professor or a senior computer science faculty member.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: To be determined by the program director.

CS486	ARTIFICIAL INTELLIGENCE	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--------------------------------	--

Scope:	2004-1	Offerings:
---------------	--------	-------------------

The course provides an introduction to the field of Artificial Intelligence (AI). Cadets will develop an appreciation for the domain of AI and an understanding of the current interest and research in the field. The historical ideas and techniques of AI and the resulting set of concepts will be covered. Classic programs will be covered as well as underlying theory. Topics include a history of computer problem solving, heuristic search techniques, knowledge representation, knowledge engineering, predicate calculus, and expert and/or rule based systems. Advanced topics that may be covered include intelligent agents, genetic algorithms, neural networks, fuzzy logic, robotics, vision, natural language processing, learning, and the programming languages of AI. The course will emphasize the practical application of artificial intelligence to industry and business as well as DoD.

Lessons: 32 @ 55 min (2.500 Att/wk) **Labs:** 8 @ 55 min

Special Requirements: Term project/paper; compensatory time given.

Prerequisite(s): CS384 EE360
-Or-
CS384 EE300

CS488	LANG-BASED SIMULATION MODELING	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------------	--

Scope: 2010-1

Offerings:

This course applies nearly all previous study of computer science to a specific problem domain essential to the Army - simulation technology. Cadets will learn the fundamental principles of event-based simulation, language-based representation of simulation models, and how models are implemented efficiently. Finally, they will learn how simulations are assessed and validated to determine their usefulness. A series of progressive implementation projects put learned concepts into practice.

2019-2 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

CS489	ADV IND STUDY COMPUTER SCI	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-----------------------------------	--

Scope: 1990-1

Offerings:

The detailed syllabus of this elective will be tailored to the specific project and to qualifications of the cadet. The research or study program will be proposed by the cadet or selected from those proposed by the department. The cadet will formalize a proposal, design a viable research plan, and conduct research under the guidance and supervision of a faculty advisor. The Head of the Department will approve cadet projects. Lessons and labs established by consultation between cadet and advisor.

CS490	COMPUTR SCI SUMMER RESEARCH	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	------------------------------------	--

Scope: 1990-4

Offerings:

This course is designed to familiarize the cadet with advanced techniques for independent research in computer science. No Course Offerings
The course will normally require research, development, and implementation of a novel idea or concept. An oral presentation and a written project report will be completed under the supervision of a USMA faculty member who serves as project advisor. The course requires three full weeks of study, completed in conjunction with the Academic Individual Advanced Development program. Scope, depth, and material covered will meet the requirements of a three-credit course in computer science.

Lessons: 0 @ 0 min (0.000 Att/wk)

Labs: 0 @ 0 min

CY300	PROGRAMMING FUNDAMENTALS	3.0 Credit Hours (BS=0.0,ET=2.5,MA=0.0)
--------------	---------------------------------	--

Scope: 2018-1

Offerings:

This is the foundational programming course for IT majors and the first course for the cyber engineering sequence. Cadets learn fundamental computing concepts that will allow them to design, build and test small to medium programs using a high-level programming language. Key concepts include applying appropriate aspects of a structured problem solving process, applying a standardized design notation such as the Unified Modeling Language (UML) to communicate their design, and iteratively testing their program.

CY305	CYBER FOUNDATIONS	3.0 Credit Hours (BS=0.0,ET=1.5,MA=0.0)
--------------	--------------------------	--

Scope: 2017-1

Offerings:

This course builds on the foundations of Information Technology (IT) acquired during the first two years of cadet experiences to ensure graduates have the capacity and confidence to employ information technology--hardware, software, and networks--to empower people and organizations to acquire, manage, communicate and defend information, solve problems, and adapt to change. It provides a deeper understanding of sensor and communications technologies; computer processing, storage, and networks; cyberspace operations, planning and management; interaction of IT components; IT-enabled decision making; and the evolving legal and ethical framework surrounding use of IT and operating in the cyber domain. Information Assurance issues are addressed throughout the course. Cadets complete projects throughout the course using specified information systems to meet given requirements.

CY350	NETWORK ENGR & MGT	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	-------------------------------	--

Scope: 2018-1

Offerings:

This course addresses the analysis, design, building, and testing of modern computer networks. Network implementation techniques and considerations are discussed and practiced extensively. Key concepts include analysis and design using standardized network models, protocols and practices such as the Open Systems Interconnect (OSI) network model, subnetting, static/dynamic routing, switching, and access control. Practical skills implementing network designs are also reinforced through a number of hands-on laboratory exercises using commodity network hardware.

CY355	CYBER FOUNDATIONS - COMPUTING	3.0 Credit Hours (BS=0.5,ET=1.5,MA=0.0)
--------------	--------------------------------------	--

Scope: 2017-1

Offerings:

Provides a more in-depth study of computing for cadets who have demonstrated ability beyond the level of CY305. The course covers material presented in CY305 at an accelerated pace to provide cadets additional opportunities for application and hands-on experience with cyber principles and concepts such as encryption and machine learning, with less emphasis on networking.

EE300	FUNDAMENTALS OF DIGITAL LOGIC	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	--------------------------------------	--

Scope: 2011-1

Offerings:

This is a course for non-electrical engineering majors that covers the analysis, design, simulation, and construction of digital logic circuits and systems. The material in this course provides the necessary tools to design digital hardware circuits such as clocks and security devices, as well as computer hardware. The course begins with the study of binary and hexadecimal number systems, Boolean algebra, and their application to the design of combinational logic circuits. The first half of the course focuses on combinational logic designs. The second half of the course emphasizes sequential logic circuits like memory systems, counters, and shift registers. Laboratory work reinforces the course material by requiring cadets to design and implement basic digital circuits. Throughout the course, the focus is on how the various digital hardware devices are used to perform the internal operations of a computer.

EE301	FUNDAMENTALS OF ELEC ENGIN	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
--------------	-----------------------------------	--

Scope: 2017-1

Offerings:

This introductory course in electrical engineering for the non-electrical engineering major provides a foundation in basic circuit theory and analysis, power in circuits and electric power systems, analog and digital electronics, and information technology systems. Lectures, laboratory work, practical applications, and classroom demonstrations emphasize and illustrate the fundamental theories and concepts presented in the course. Engineering design is reflected in laboratory work and minor design problems.

EE302	INTRO ELECTRICAL ENGIN	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
--------------	-------------------------------	--

Scope: 2009-1

Offerings:

This first course in electrical engineering provides a solid introduction to electric circuit theory. Fundamental principles and network theorems are developed using DC resistive circuits. The complete responses of RC, RL, and RLC circuits are obtained using classical and Laplace-transform techniques to solve the related differential equations. Electrical system transfer functions, time-domain and frequency-domain relationships, stability, frequency response, steady-state AC analysis, and power are also studied. Laboratory work, practical applications, and classroom demonstrations emphasize and illustrate the fundamentals presented in the course.

EE360	DIGITAL LOGIC W/ EMBEDDED SYS	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
--------------	--------------------------------------	--

Scope: 2014-1

Offerings:

This course covers the analysis, design, simulation, and construction of digital logic circuits and embedded systems. The material in this course provides the necessary tools to design digital hardware circuits based on design techniques such as Karnaugh maps and Finite State Machines. The course begins with the study of binary and hexadecimal number systems, Boolean algebra, and their application to the design of combinational logic circuits. The first half of the course focuses on designs using medium-scale integration (MSI) circuits and Field Programmable Gate Arrays (FPGAs) to implement combinational logic functions. The second half of the course emphasizes sequential logic circuits. Laboratory work in this half of the course focuses on using very high speed integrated circuit hardware description language (VHDL) to simulate digital systems and to program those systems in hardware. As a final project, cadet teams design, build, and test a digital logic system.

2018-1 2018-2 2019-1
2019-2 2020-1 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 7 @ 120 min

Special Requirements: A two-part design project (0.5 design credits).

EE362	INTRODUCTION TO ELECTRONICS	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
--------------	------------------------------------	--

Scope: 2014-1

Offerings:

This course continues cadet education in electrical engineering through the study of basic electronic devices and circuits. It begins with an introduction to semiconductor physics. It then covers the operation of the pn-junction diode and the metal-oxide semiconductor field-effect transistor (MOSFET) in DC, large-signal, and small-signal regimes. The course emphasizes single-stage amplifier design. The course concludes with an introduction to bipolar junction transistors (BJT) and the design, analysis, simulation, building, and testing of a two-stage audio amplifier. Six laboratory exercises and computer-aided design and analysis using modern circuit simulation software supplement the lectures with practical circuit analysis, design, construction and testing.

2018-1 2019-1 2020-1

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 7 @ 120 min

Special Requirements: All cadets design, build and test a multistage audio amplifier (0.5 design credits).

Prerequisite(s): EE302
-Or-
EE301

EE375	COMPUTER ARCHITECTURE W/MICRO	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	--------------------------------------	--

Scope: 2017-1

Offerings:

This course provides an introduction to computer organization and design. It builds on digital logic theory and devices to develop more complex systems. Graded assignments emphasize understanding and applying the basics of computer system organization, design, and operation. Students analyze contemporary computer organization by examining the operation of a program at the register level. Students learn, simulate, and program a modern processor. Assembly language programming provides system function control that bridges the gap between hardware and software. C programming demonstrates a high-level language greatly utilized in computing. The course introduces topics including RISC architectures, arithmetic processing, input/output, memory design, and parallel computing.

2018-1 2018-2 2019-1
2019-2 2020-1 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: Projects using Assembly Language and C.

Prerequisite(s): EE360

EE377	ELECTRICAL POWER ENGNRNG	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	---------------------------------	--

Scope: 2012-2

Offerings:

This course provides a study of the fundamentals in two areas of electric power engineering: electromechanical energy conversion and electric power systems. Steady-state behavior in single-phase and balanced three-phase power circuits is emphasized. The concept of per unit analysis is introduced and used throughout the course. Transformers, AC & DC machines, transmission lines, power systems, power electronic devices, and renewable energy sources are studied. Laboratory exercises demonstrate the electrical, mechanical, and physical characteristics of several of the systems studied. The cadet will apply analysis, design, build, and/or test techniques to a power related project.

2018-1 2018-2 2019-1
2019-2 2020-1 2020-2

Lessons: 36 @ 55 min (2.500 Att/wk) **Labs:** 4 @ 120 min

Special Requirements: Computer-aided analysis of a small power system is included.

Prerequisite(s): EE302

EE301

EE381	SIGNALS AND SYSTEMS	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
--------------	----------------------------	--

Scope: 2012-1

Offerings:

This course provides a general study of linear system theory and signal representation techniques as preparation for continued study in communications, control, and electronic systems. Topics include the resolution of continuous time signals and discrete time sequences into their images as frequency functions using Fourier series and transforms. The study includes singularity functions, convolution, convergence properties, and transform properties. The Laplace transform and its inverse provide a method for determining the system function for systems described by differential equations, while the z-transform and its inverse provide a method of analysis for difference equations. The course includes a brief study of communication system principles to include sampling and a study of analog and digital (both finite and infinite impulse response) filter design. Laboratory exercises in the course consist of learning the engineering software program MATLAB and its use in generating and processing signals. In addition to exposing students to the engineering software program MATLAB, laboratory periods provide opportunities for instructor-assisted problem solving.

EE383	ELECTROMAGN FIELDS & WAVES	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
--------------	---------------------------------------	--

Scope: 2012-2

Offerings:

This course is an introduction to electromagnetic fields, which are the foundation of electrical engineering. The course begins with transmission line analysis using circuit models and reviews the mathematical tools (vector algebra and calculus) that are used to describe electromagnetic phenomena. Maxwell's equations are solved to describe time-harmonic fields under various boundary conditions and at interfaces between dissimilar media. Additional topics include the applications of electromagnetic field theory to transmission lines, antennas and waveguides, and the role of electromagnetics in science, technology and society. Laboratory periods provide opportunities for instructor-assisted problem solving. Additionally, Cadets complete a computer project on finding the numerical solutions to Maxwell's equations.

EE401	ELECTRONIC SYSTEM DESIGN I	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
--------------	-----------------------------------	---

Scope:	2005-1	Offerings:
---------------	--------	-------------------

This course is part of a two-semester team design experience in electrical engineering that integrates math, science, and engineering into a comprehensive system. The system design encompasses both analog and digital electronics, and may also include sub-systems. Projects are open-ended and must result in a product that performs within pre-determined or negotiated constraints. The system design problem draws from a variety of science and engineering experiences within the curriculum and requires significant cadet creativity and decision-making. Acceptable solutions must address technological, social, political, economic, and ethical considerations. Classroom instruction addresses design methodologies and common system components. Course requirements include periodic in-progress reviews, written and oral reports.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 7 @ 120 min

Special Requirements: A senior design project is required in this course.

Prerequisite(s): EE362

Corequisite(s): EE462

EE450	MILITARY ELECTRONIC SYSTEMS	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2012-1	Offerings:
This is the capstone course of a three course series of courses designed to introduce non-electrical engineering majors to the fundamentals of electrical engineering. These key concepts are then used to interface various sensors and actuators with a simple microprocessor using experiments that demonstrate some basic applications of a simple robot. Finally, cadets design a robot to autonomously navigate a simple maze that simulates some practical military robotics applications.		2018-1 2019-1
Lessons: 35 @ 55 min (2.500 Att/wk)	Labs: 5 @ 120 min

EE462	ELECTRONIC DESIGN	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
Scope:	2014-2	Offerings:
This course focuses on the design, simulation, building, and testing of a wide variety of application-oriented circuits based upon the bipolar junction transistor (BJT) and operational amplifier (OPAMP). Applications of the BJT include current sources, active loads, differential amplifiers, and power amplifiers. OPAMP applications include active filters, oscillators, and comparators. Themes common to both the BJT and OPAMP include frequency response and feedback. The classroom material is supplemented with six labs, computer-aided simulations using modern circuit simulation software, and a comprehensive design project.		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 7 @ 120 min	
Special Requirements:	A major design project requires cadets to design, build, and test an electrical system.	
Prerequisite(s):	EE360 EE362	
EE477	DIGITAL COMMUNICATIONS SYSTEMS	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)

Scope:	2014-2	Offerings:
<p>This course examines modern digital communications networks, with particular emphasis on wired networks at the physical layer and the TCP/IP network model above the physical layer. The study of digital communications systems includes waveform sampling, time multiplexing, line coding, digital modulation, and clock recovery techniques. Time and frequency domain analysis are the basis for study of bandwidth considerations, filtering, and channel and communication system modeling. Network topology, traffic representation, and link capacity assignment schemes are analyzed. Cost and time delay optimization for centralized and distributed networks are investigated. Queuing theory is presented with application to buffer modeling, buffer design considerations, and throughput constraints. Basic network design algorithms and flow control schemes are also covered. A communications system project brings these concepts to reality.</p>		2018-2 2019-2 2020-2
Lessons:	37 @ 55 min (2.500 Att/wk)	Labs: 3 @ 120 min

EE480	OPTICAL FIBER COMMUNICATIONS	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2017-1	Offerings:
<p>The study of fiber optics provides insight into the enabling technology of the global Internet and modern day telecommunications. This course develops understanding of the devices and key components that comprise a fiber based optical communications system. Students will develop an understanding of the fundamental properties of optical fibers and the principal components required to exploit this medium. Topical coverage of the fiber medium includes modal fields, attenuation, and dispersion for both single mode and multimode fibers. Several device types will be studied to include transmitters, receivers, multiplexers, amplifiers, specialty optical fibers, and selected state-of-the-art components. Software tools and measurement equipment will be used to characterize fiber and device properties. The course culminates with students designing, building, and characterizing a fiber optic communications link.</p>		2018-1 2019-1 2020-1
Lessons:	32 @ 55 min (2.500 Att/wk)	Labs: 8 @ 120 min
Special Requirements:	None	
Prerequisite(s):	EE383	
EE482	WIRELESS COMM SYS ENGINEERING	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2014-2	Offerings:
<p>This course provides an introduction to wireless systems engineering with applications to voice and data networks. Description of well known systems such as cell phones, pagers, and wireless LAN's is presented along with the design considerations for deployment of wireless networks. Wireless radio channel modeling along with common impairments such as multipath fading are introduced and modulation techniques well suited to the wireless applications are presented. Receivers for the various modulation schemes are analyzed in terms of performance and the trade-offs offered by source and channel coding are presented. Multiple access techniques used in wireless applications are introduced and the design of networks described. The course concludes with an analysis and description of deployed systems along with their standards and services provided.</p>		2018-2 2019-2 2020-2
Lessons:	38 @ 55 min (2.500 Att/wk)	Labs: 2 @ 110 min

EE483	PHOTONICS ENGINEERING	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2005-1	Offerings:
<p>This course is an introduction to optoelectronic devices and systems. It begins with a review of the fundamental electromagnetic field theory, quantum mechanics, and solid state electronics that characterize optoelectronic device behavior. The course then addresses essential concepts from geometrical and physical (wave) optics. Building upon these fundamental principles, the course addresses the operating principles and design considerations of photoemitters (lasers and LED's), photodetectors, optical waveguides and signal modulators. Finally, the cadet incorporates the individual devices in the design, building and testing of a fiber optic data link.</p>		2018-2 2019-2 2020-2

EE485	SPEC TOPICS IN EE	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	--------------------------	--

Scope: 2011-1

Offerings:

This course provides an in-depth study of special topics in electrical engineering not offered elsewhere in the USMA curriculum. Course content will be based on expertise of a senior electrical engineering faculty member or a Visiting Professor.

2019-1 2020-1

Lessons: 36 @ 55 min (2.500 Att/wk) **Labs:** 4 @ 120 min

Special Requirements: To be determined by the senior faculty member or visiting professor.

EE486	SOLID STATE ELECTRONICS	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	--------------------------------	--

Scope: 2011-2

Offerings:

The course covers device physics, operating principles and applications of diodes, bipolar junction transistors, and field effect transistors (FET). It begins with basic properties of crystalline solids, energy diagrams, and thermal physics. P-N junction diodes are the first semiconducting device explored with further study into MOS capacitor and MOSFET based digital circuits. The course normally covers layout of complementary metal oxide semiconductor (CMOS) gates on an integrated circuit chip. Throughout the course, a number of modern electronic devices are introduced including digital memories, charge coupled devices, solar cells, photodiodes, and light emitting diodes. The laboratories are focused on integrated circuit design and layout, device characterization, and simulation using computer aided design (CAD) tools.

2018-2 2019-2 2020-2

Lessons: 35 @ 55 min (2.500 Att/wk) **Labs:** 5 @ 120 min

Special Requirements: Layout and fabrication of an integrated circuit chip.

Prerequisite(s): EE362

EE487	EMBEDDED SYSTEMS DEVELOPMENT	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	-------------------------------------	--

Scope: 2014-2

Offerings:

This course teaches students how to employ microcontrollers in the design of an embedded system. Cadets are introduced to the C programming language, which is the foundation for programming embedded systems. Students conduct a detailed study of common microcontroller peripheral devices with emphasis on their application to real-time control design. Cadets practice top-down design of both hardware and software components of moderately complex digital systems throughout the semester. Cadets are exposed to addressing, serial and parallel input and output, timing, interrupts, A-to-D and D-to-A conversion. Additionally, real-time operating systems will be introduced through the use of programmable devices and soft-processors. The cadets will learn the basics of implementing an operating system on an embedded device and linking peripherals to the processor via the operating system.

EE489	ADV IND STUDY IN ELECT ENGR	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	------------------------------------	--

Scope: 1974-1

Offerings:

Course requirements will be tailored to the needs and qualifications of the individual cadet. The course will normally involve a project requiring research, experimentation, and the submission of a report under the guidance of a departmental advisor. Alternatively, study may take the form of a tutorial course covering material not available in the regular elective course offerings.

This course provides an introduction to the principles and practices of computing and information technology. The course presents foundational program design and construction techniques, with consideration given to principles of software engineering. Problem solving using computing devices as tools is a central theme throughout the course as students employ various design methodologies. Students utilize an integrated development environment and contemporary application software. Emphasis is placed on critical thinking, creativity, and learning how to learn. Students are introduced to legal, ethical, professional, and security issues and the challenges, opportunities, and attributes of the cyber domain.

IT305	THEORY & PRAC OF MIL IT SYS	3.0 Credit Hours (BS=0.5,ET=1.5,MA=0.0)
Scope:	2017-1	Offerings:

This course builds on the foundations of Information Technology (IT) acquired during the first two years of cadet experiences. It covers problem solving utilizing the digitization process, networking, databases, information systems, information assurance, and the evolving legal and ethical framework surrounding use of IT. Students study several aspects of military and commercial IT infrastructures, as well as the IT concepts and techniques that will facilitate their success as a military officer and inspire life-long learning in the IT domain. Concepts are reinforced through numerous in-class exercises and labs as well as team projects.

Scope:	2008-2	Offerings:
---------------	--------	-------------------

This course provides a practical introduction to user interface development and usability engineering of interactive applications. The disciplines of Human-Computer Interaction (HCI) and Software Engineering guide these endeavors, but our focus here is more applied than theoretical. Major emphasis is on the principles and techniques for human-centered design and implementation of graphical user interfaces (GUIs) within a software development lifecycle. Cadets will extend their knowledge of programming in a high-level language by learning how to use an interface builder to create a fully functional GUI. Cadets will learn and practice human-centered problem analysis techniques and usability testing methodologies to ensure that their interfaces are usable. A hypothetico-deducto approach to design is emphasized throughout their development efforts. Fundamentals taught in this course will prepare cadets for more advanced software development, development of physical devices, or a deeper theoretical look at HCI topics.

IT384	NETWORK SYSTEM PROG	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	----------------------------	--

Scope: 2012-2

Offerings:

This course applies fundamental programming skills to automate interactions with a computer, a local operating system, or the Internet and so use and manage resources and services. Examples of the resources and services that the programming in this course will address include file systems, web servers, mail servers, database servers, image and audio files, compressed and encrypted files and files used in common office environments (documents, presentations, spreadsheets).

IT392	NETWORK SERVICES MGT	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	-----------------------------	--

Scope: 2012-2

Offerings:

Cadets study network services in terms of design, implementation, maintenance and security of computer servers. The learning process in this course builds on IT382 and assumes a functional network with basic connectivity. This course first covers the design and selection of hardware and software to provide network services based on identified user requirements. Cadets then learn to support the Army Enterprise through the implementation and maintenance of network services, including naming, addressing, resource management, voice over IP, and web services. Security is a pervasive theme throughout the course. While this course focuses on the practical aspect of network services, it also gives cadets a foundational understanding of the theories behind those services.

IT394	DISTRIB APPLICATION DEVELOPMNT	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------------	--

Scope: 2015-2

Offerings:

Building on the foundations of algorithm implementation, data representation, web development, and basic networking, this course focuses on the principles of constructing a modern distributed application. Cadets study the principles, construction, and interaction of user interface, network, web server, and database components to produce an effective distributed application. Cadets will learn new tools and skills working as a team to analyze, design, and implement a system that solves a given problem.

IT400	IT SEMINAR	2.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-------------------	--

Scope: 2013-1

Offerings:

This seminar will meet once or twice a week and will include all First Class cadets majoring in information technology. The seminar's instruction consists of relevant reading assignments, class discussions based on readings and case studies, and numerous distinguished guest speakers. Content will address the concerns of IT professionals as well as recent Department of Defense initiatives and new developments in the discipline. Students will develop the ability to identify, explain, and interpret local and global (professional, ethical, social, security, legal, economic, political) impacts of IT on individuals, organizations, and society. They will also be able to outline and defend the values and responsibilities of a member of the IT profession and to summarize avenues through which they can continue to grow professionally.

2018-2

Lessons: 27 @ 55 min (1.700 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: None

Corequisite(s): IT401

IT400	IT PROFESSIONAL CONSIDERATIONS	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	---------------------------------------	--

Scope: 2019-2

Offerings:

This course addresses the concerns of information technology professionals, primarily focusing on non-technical considerations and the development of communication skills. Coursework includes a heavy emphasis on iterative written and oral presentation assignments, based on relevant reading assignments, class discussions, case studies, and distinguished guest speakers. Content will address recent Department of Defense initiatives and new developments in the computing discipline. Students will develop the ability to identify, explain, and interpret local and global (professional, ethical, social, security, legal, economic, political) impacts of computing on individuals, organizations and society. They will also be able to defend the values and responsibilities of a member of the computing profession and to summarize avenues through which they can continue to grow professionally. (CONDITIONAL APPROVAL AY16 - Full Proposal AY18)

IT401	IT SYSTEM DESIGN	3.5 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	-------------------------	--

Scope: 2013-1

Offerings:

This course is the first in the senior-level integrative capstone experience. Its purpose is to prepare cadets for a coherent system integration experience. Conceptual material stresses requirements elicitation including aspects of the social, political, economic and ethical dimensions, project planning, and integration of information technologies to meet the needs of the user organization.

2018-1

Lessons: 40 @ 55 min (3.000 Att/wk) **Labs:** 7 @ 120 min

Special Requirements: IT major with First Class Standing.

IT460	CYBER POLICY, STRATEGY & OPNS	3.0 Credit Hours (BS=0.0,ET=1.5,MA=0.0)
Scope:	2017-1	Offerings:
<p>This course addresses the entire spectrum of information warfare from the political, legal, and ethical aspects to the technology and techniques of cyber attack. The Political Science and Computer Science faculty jointly teach this course. The course covers how digitization has changed the world and the national security environment of the United States. Students also learn how attack and defense are conducted in cyberspace through classroom discussion and hands-on exercises in the IWAR Laboratory. The course culminates with a group project in which cadets are given a real scenario and possible U.S. objectives and then develop and brief an information operation plan.</p>		2018-1 2019-1 2020-1

XE383	ELECTROMAGNETIC WAVES	3.0 Credit Hours (BS=3.0,ET=0.0,MA=0.0)
Scope:	2018-2	Offerings:
This course is an introduction to electromagnetic waves, which are the foundation of electrical engineering and applied physics. The course begins with transmission line analysis using circuit models and reviews the mathematical tools (vector algebra and calculus) that are used to describe electromagnetic phenomena. Maxwell's equations are solved to describe time-harmonic fields under various boundary conditions and at interfaces between dissimilar media. Additional topics include the applications of electromagnetic wave theory to transmission lines, antennas and waveguides, as well as the role of electromagnetics in science, technology and society. Laboratory exercises are conducted to experimentally characterize transmission lines and antennas, and to provide instructor-assisted problem solving sessions. Additionally, Cadets complete a computer project on finding the numerical solutions to Maxwell's equations.		2018-2 2019-2 2020-2

XE401	INTEGRATIVE SYSTEM DESIGN I	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
Scope:	2019-1	Offerings:
This course is the first part of a two-semester team-based capstone design experience in electrical engineering, computer science and information technology. It provides an integrative experience, presenting each cadet team with a professionally relevant, open-ended situation including professional, ethical, social, security, legal, economic, and political dimensions, where an engineering approach has strong potential to produce benefits. Under the guidance of a faculty advisor for each project team, cadets develop client-focused products, applying the principles of design and implementation to effect an optimal outcome for the circumstances presented to the team by creating a product or service that meets requirements and constraints negotiated with the client. (CONDITIONALLY APPROVED in AY16 - FULL PROPOSAL AY18)		2019-1 2020-1
Lessons: 40 @ 110 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	A senior design project is required in this course.	
Prerequisite(s):	CS403 -Or- EE362 -Or- IT394	
XE402	INTEGRATIVE SYSTEM DESIGN	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
Scope:	2013-1	Offerings:

This course is team-based capstone design experience in electrical engineering, computer science and information technology. It provides an integrative experience, presenting each cadet team with a professionally relevant, open-ended situation including professional, ethical, social, security, legal, economic, and political dimensions, where an engineering approach has strong potential to produce benefits. Under the guidance of a faculty advisor for each project team, cadets develop client-focused products, applying the principles of design and implementation to effect an optimal outcome for the circumstances presented to the team by creating a product or service that meets requirements and constraints negotiated with the client.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 8 @ 120 min

Special Requirements: Prerequisite for this course is First Class standing in an academic major offered by the Department of Electrical Engineering and Computer Science.

XE402	INTEGRATIVE SYSTEM DESIGN II	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
--------------	-------------------------------------	--

Scope:	2019-2	Offerings:
---------------	--------	-------------------

This course is team-based capstone design experience in electrical engineering, computer science and information technology. It provides an integrative experience, presenting each cadet team with a professionally relevant, open-ended situation including professional, ethical, social, security, legal, economic, and political dimensions, where an engineering approach has strong potential to produce benefits. XE442	ALTERNATIVE ENERGY ENGINEERING	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	---------------------------------------	--

Scope:	2015-1	Offerings:
---------------	--------	-------------------

This course provides a study of the fundamentals of alternative energy generation, storage, integration and efficient use. Solar power (both solar thermal and photovoltaic), wind power, hydro power, fuel cells and other sources of energy are covered. Focus is placed on energy conversion, modeling alternative energy sources, and integration of these sources into the power grid. The technical, economic, and political challenges associated with these alternative energies is covered in depth.

EE302

XE472	DYNAMIC MODELING AND CONTROL	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	-------------------------------------	--

Scope:	2011-1	Offerings:
---------------	--------	-------------------

This course covers dynamic modeling and control of linear systems. The course provides an overview of classical control theory as the foundation for control applications in electrical, mechanical, and aeronautical systems. Topics here include system modeling using Laplace transform, frequency domain, and state variable methods. Mathematical models are developed for electrical, mechanical, aeronautical, chemical and other physical control systems. Control systems analysis and design techniques are studied within the context of how each system is physically controlled in practice. Laboratory exercises include feedback design and system identification. Computer design exercises include dynamic modeling and control of various engineering systems.

Lessons: 36 @ 55 min (2.500 Att/wk) **Labs:** 4 @ 120 min

Special Requirements: Computer interactive exercises.

XE492	DISRUPTIVE INNOVATIONS	3.0 Credit Hours (BS=0.5,ET=2.5,MA=0.0)
--------------	-------------------------------	--

Scope:	2013-1	Offerings:
<p>The course begins by developing the background understanding of what disruptive technology is and a historical context about successes and failures of social, cultural, and religious acceptance of technological innovation. To develop this framework, students read several texts underlying the innovator's dilemma, how scientific revolutions are structured, and cultural distinctions found between the sciences and humanities. For each class meeting, students read current scientific and technical literature and come prepared to discuss current events related to technological innovation. Each student researches potential disruptive technologies and prepares a compelling argument of why the specific technologies are disruptive so they can defend their choice and rationale. Cadets also interact with national level innovators throughout academia, industry, and government.</p>		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons:	40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min
Special Requirements:	None	
XE497	CRITICAL SCIENTIFIC REASONING	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2013-1	Offerings:
<p>The purpose of XE497, Critical Scientific Reasoning, is to improve the students' ability to analyze complex problems in a variety of applied physical science applications using mathematical, scientific, and engineering principles and clearly articulate their analysis and results verbally and in writing. The process of pursuing this goal will make cadets better officers, scholars, and citizens. Several methods will be applied to assist in the pursuit of these goals. Fundamental scientific laws, principles, and theorems and their application to scientific and engineering problem solving will be reviewed. Breadth across a variety of scientific and engineering disciplines will be achieved by studying and discussing current research activities from a variety of fields as well as examining the limitations to scientific advancement in each field. The course will draw from several disciplines including Biology, Chemistry, Civil Engineering, Computing Sciences, Electrical Engineering, Mathematical Science, Mechanical Engineering and Physics. In order to take advantage of the diverse skills of the USMA faculty and selected experts from outside USMA, some classes will be led by guest instructors, each of whom will recommend readings in support of his or her topic.</p>		No Course Offerings
Lessons:	40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min
Special Requirements:	Department Head approval to enroll. Open only to First Class cadets.	

Department of English and Philosophy

92 Courses

EN100	FOUNDATIONAL WRITING	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2017-1	Offerings:
This foundational course will provide cadets with the basic critical reading and writing skills necessary to enter EN101. EN100 aims to develop an awareness of substance, organization, style, and correctness through close, critical reading and by focusing on sentence- and paragraph- level composition. Through daily writing, exercises, and one-on-one conferences, cadets will develop the clear, logical, and grammatically correct writing that will enable them to succeed in EN101.		2018-1 2019-1 2020-1
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
EN101	COMPOSITION	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2016-1	Offerings:
This course aims to develop clear, logical, and grammatically correct expression in written discourse. Augmented by one-on-one writing conferences, daily writing and revision reinforce instruction in the writing process. Organization, substance, style, and correctness in written communication are major concerns of the course, but the course improves other modes of discourse through a process-oriented approach to composition.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min

Special Requirements:	None	
EN102	LITERATURE	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2016-2	Offerings:
As an introduction to the study of literature, EN102 provides Cadets the opportunity to refine the skills of oral and written communication practiced in EN101 and to develop certain foundational capacities essential to undergraduate learning and to professional development: critical thinking, close reading, empathy, intellectual agility, emotional intelligence, and creativity. By studying the most challenging and complex employment of language in its most difficult forms, Cadets confront ambiguity and hone their interpretive skills through the judicious interpretation of evidence. Rigorous immersion in literature enables Cadets to increase their command of the English language and to deepen their appreciation for the power and beauty of literary expression. By engaging with major literary genres Cadets cultivate awareness of the central importance of literature to their own culture and to the cultures of various regions and nations across the globe. In their encounter with diverse perspectives Cadets acquire insight into the human condition and begin to grapple with the ethical issues that are the focus of study in PY201.		2018-1 2018-2 2018-3 2019-1 2019-2 2019-3 2020-1 2020-2 2020-3
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
Prerequisite(s):	EN101 -Or- EN151	
EN151	ADVANCED COMPOSITION	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)

Scope:	2018-1	Offerings:
<p>This advanced course, into which the Department of English and Philosophy places select cadets, further develops the skills of accomplished writers. This course demands a rigorous and disciplined approach to writing through intensive study and research. It also demands attention to the nuances and persuasiveness of language itself. The course challenges cadets to push their writing beyond basic, first-year academic prose through an emphasis on advanced figures of speech and thought, through a deliberate attention to style, and through an in-depth approach to reading and research. This course expects cadets to think critically and to discover and articulate new ideas and original arguments through persuasive, polished, and mature writing. Finally, this course instills habits of mind that will that will serve cadets throughout their academic and military careers. Because this is an advanced version of EN101, cadets will be placed in EN151 individually, based on the results of a placement exam given in the summer prior to enrollment and by approval of the Head of the Department of English and Philosophy.</p>		2018-1 2019-1 2020-1
Lessons:	40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min
Special Requirements:	Cadets who have credit for EN101 are disqualified from taking EN151.	
Disqualifier(s):	EN101	
EN152	ADVANCED LITERATURE	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2016-1	Offerings:
<p>This course is an advanced version of EN102 for Cadets who validate EN101. The course revolves around the innovative interpretation of literary texts, though it simultaneously acquaints Cadets with strategies for grounding these interpretations in concrete textual evidence and logical inferences. EN152 promotes close, deliberate reading of literary works, and presents a comprehensive overview of the terms and tenets of literary studies. Due to the fact that students enrolled in EN152 will have placed out of EN101, the course places less emphasis on learning the steps in the writing process and more emphasis on how writing, as a process, allows for the further development of one's critical thinking and analytical skills. Finally, EN152 explores the power of literature to promote ethical awareness, cultivate empathy, and emphasize a shared sense of humanity.</p>		No Course Offerings
Lessons:	40 @ 55 min (0.000 Att/wk)	Labs: 0 @ 0 min
Special Requirements:	None	
EN300	LITERARY METHODOLOGIES	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2018-1	Offerings:
<p>This course provides cadets the methodological tools required to analyze and evaluate primary and secondary sources. Through the study of representative primary sources ranging from the ancient to the postmodern, cadets will learn the critical vocabularies and theoretical contexts necessary for the meaningful study of literature. Attention to the nature and history of literary genres, the historical development of literary criticism, and a variety of theoretical approaches to literature will provide cadets with the foundational knowledge required of an English major.</p>		2018-1 2018-2 2019-1 2020-1 2021-1
Lessons:	40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min

Disqualifier(s):	EN333	
EN302	ADVANCED COMP THROUGH CULTURE	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2014-1	Offerings:
<p>This interdisciplinary writing course refines basic composition skills, develops sophisticated techniques of written expression, and establishes a critical editorial sense with respect to the cadet's own composition and the writing of others. It also serves as a vehicle for the development of cross-cultural competency and understanding as students learn productive ways to negotiate cultural differences, interpret unfamiliar cultural expressions, and to contextualize new cultural knowledge within an expanding comprehension of globalization. Exemplary readings, representative of a specified cultural destination, give focus to writing assignments, while revision and student-teacher conferences emphasize the writing process and the constitutive elements of substance, organization, style, correctness, and the conventions of written academic assignments, including documentation standards.</p>		2018-1

Scope:	2018-1	Offerings: 2018-1 2020-1
This course will focus primarily on the development of the Western literary canon from antiquity to the Early Modern period. Cadets may read from the works of Greek and Roman authors such as Homer, Sophocles, Thucydides, Cicero, Virgil, Ovid, from Medieval authors such as St. Thomas Aquinas, Sir Thomas Malory, Geoffrey Chaucer, and from Early Modern authors such as John Donne, George Herbert, Ben Johnson, and Miguel de Cervantes. Cadets will explore a variety of genres including, but not limited to, epic poetry, histories, drama, and lyric poetry. This course may take its focus from a central theme or idea and trace that theme or idea in the course texts.

EN321	AMERICAN LITERATURE I	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)

Scope:	2018-1	Offerings:
The course will focus on the development of American literature from early contact to the Civil War. Students will read from works by such authors as the Puritans, Jefferson, Lincoln, the Transcendentalists, Dickinson, Whitman, and Melville, as well as literature outside of the New England canon: for example, works by Native Americans, French and Spanish colonizers, and African captives. All works will be considered in the context of cultural and intellectual history. We will consider a broad range of genres and modes of writing, including (but not limited to) colonial theory, ethnography, autobiography, fiction, essays, and poetry. A central concern of the course will be the question of what constitutes American literature.		2018-1 2020-1
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	A few essays of moderate length.	
Corequisite(s):	PY201	
Disqualifier(s):	EN343	
EN322	AMERICAN LITERATURE II	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2018-2	Offerings:
This course will examine both traditional and nontraditional writings from the Civil War to the present. We will examine post-Civil War literature and the myriad, often contradictory desires--economic, aesthetic, sexual, spiritual, and intellectual--to which it gives expression. The course will provide a framework within which students may examine the literature in an historical context. As does American Literature I, the course stresses the diversity of experience and poetics that characterizes American literature. In addition, students will trace the evolution of important literary movements and philosophical influences, as well as the metamorphosis of certain genres over time.		2018-2 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min

Disqualifier(s):	EN348	
EN331	BRITISH LITERATURE I	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2019-1	Offerings:
This course is an introduction to the study of British literature, ranging from the Anglo-Saxon period through the eighteenth century. Cadets will encounter representative masterworks from the Old English, Medieval, Renaissance, and Neoclassical periods, exploring in the process the development of literary forms, the culture of the British Isles, and the English language itself. Possible areas of emphasis include narrative and lyric poetry from all these periods, drama from the Middle Ages and Renaissance, the periodical essay from the Neoclassical period, and the emergence of the novel as a distinct form of literature in the eighteenth century.		2019-1 2021-1
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min

Disqualifier(s):	EN341	
EN332	BRITISH LITERATURE II	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2019-2	Offerings:
This course continues the survey initiated in British Literature I by considering major authors and works of the nineteenth and twentieth centuries. Through representative but necessarily selective readings, cadets will trace the development of British literature from the Romantic Period into the Victorian Age and then to the present day. Possible areas of emphasis include poetry of the English Romantics; Victorian poetry and prose, to include the novel; and poetry, short fiction, and drama from the twentieth century. Study will emphasize the relation of the works considered to the cultural history of Great Britain and the British Empire and will attend as well to the wider influence of the British tradition.		2019-2 2021-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	A few essays of moderate length.

Disqualifier(s):	EN346	
EN333	LITERARY METHODOLOGIES	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2016-1	Offerings:
This course provides cadets the methodological tools required to analyze and evaluate primary and secondary sources. Through the study of representative primary sources ranging from the ancient to the postmodern, cadets will learn the critical vocabularies and theoretical contexts necessary for the meaningful study of literature. Attention to the nature and history of literary genres, the historical development of literary criticism, and a variety of theoretical approaches to literature will provide cadets with the foundational knowledge required of an English major. EN340	CONTEMPORARY LITERATURE	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2019-1	Offerings:
This course examines literature of the later 20th and the 21st centuries. In addition, it may explore the implications of contemporary information technologies for traditional literary forms, the role of globalization in literary production and reception, or the relation of literature to pressing current issues such as persistent violent conflict, immigration, and climate change. Possible genres and modes of writing include (but are not limited to) short fiction, the novel, poetry, graphic narrative, and electronic literature. A central concern of the course will be the question of what constitutes literature in the contemporary period, a time marked by developing and often differing trends.		2019-1 2021-1

EN351	WORLD LITERATURE	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2017-1	Offerings:
<p>This course enhances cadets' cultural awareness and refines their disciplinary knowledge and interpretive skills by introducing them to major literary texts from around the globe. As an advanced exercise in comparative study and synthesis, World Literature builds on core courses such as EN302 and foreign language offerings. The prose and poetry of a variety of periods and a range of countries provide contexts for and contrasts to the Anglo-American tradition. In a given semester typical texts could include epics and tragedies of Ancient Greece and Rome, Russian novels, works of medieval Islamic literature, haiku of Japan, Continental European novels of the nineteenth century, or postmodern fiction of South America. This course familiarizes students not only with important literary forms and genres but also with cultural and historical contexts for many of the most pressing issues in our volatile world.</p>		2019-1 2021-1

EN371	SINGLE-AUTHOR COLLOQUIUM	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------	--

Scope:	2018-2	Offerings:
---------------	--------	-------------------

This elective course provides in-depth study of a single author's life and work. The featured author will vary depending on instructor expertise and preference as well as department need. The course allows cadets to gain an insight into the life and work of important authors deeper than the necessarily limited exposure within a survey or genre course affords. The course invites cadets to explore the relationships between biography and creative output, to understand individual works within the context of a writer's larger oeuvre, and to see individual authors as both agents and products of their world.

PY201	PHILOSOPHY & ETHICAL REASONING	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2016-1	Offerings:
This course helps third-class Cadets develop their capacities to think clearly and critically and to write in a logically rigorous and conceptually precise manner. The course acquaints Cadets with various viewpoints on major philosophic issues, a significant part of it is devoted to developing Cadets' ethical reasoning ability. The study of ethical theory provides the foundation for this ability as well as the foundation for their Academy's character development efforts. The course also includes a substantial block on the ethical application of military power through the study of the Just War Tradition.		2018-1 2018-2 2018-3 2019-1 2019-2 2019-3 2020-1 2020-2 2020-3

Prerequisite(s):	EN102	
Disqualifier(s):	PY251	
PY251	ADVANCED PHILOSOPHY AND ETHICS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2016-1	Offerings:
This course is an advanced introduction to philosophy and ethics. It helps third-class Cadets develop their capacities to think clearly and critically and to write in a logically rigorous and conceptually precise manner. The course acquaints Cadets with various viewpoints on major philosophic issues, and a significant part of the course is devoted to developing Cadets' ethical reasoning ability. The study of ethical theory provides the foundation for this ability as well as the foundation for the Academy's character development efforts. The course also includes a substantial block on the ethical application of military power through the study of the Just War Tradition.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons:	40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min

Disqualifier(s):	PY201

PY300	PHILOSOPHICAL METHODS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	------------------------------	--

Scope:	2017-1	Offerings:
This course provides cadets the methodological tools required to analyze and understand the important moments and topics in philosophy, developing the philosophical language necessary for success within the philosophy curriculum. Through the study of philosophy within the western tradition, cadets will learn about major developments in logic, metaphysics, epistemology, and ethics, among other areas. This background provides the foundational knowledge required of a philosophy major.		2018-1 2019-1 2020-1

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: A few essays of moderate length.

Corequisite(s): PY201

Disqualifier(s): PY333

PY305	LOGICAL REASONING	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--------------------------	--

Scope:	2017-2	Offerings:
This course blends two areas of study that are often kept separate in university courses on logic: informal logic and formal (or symbolic) logic. Informal logic's emphasis is on natural language arguments relatively simple in structure, on rules of valid inference as codified in what is called traditional logic, and on the identification of mistakes in reasoning that make arguments logically weak though possibly persuasive (fallacies). Formal logic builds a symbolic representation of sentences and arguments, describes rigorous tests for determining whether symbolized arguments are valid, and provides the means to assess arguments of far greater complexity than the rules of traditional logic are able to manage.		2018-2 2019-2 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: A few essays of moderate length.

Corequisite(s): PY201

Disqualifier(s): PY359

PY310	REALITY AND KNOWLEDGE	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	------------------------------	--

Scope:	2018-1	Offerings:
This course will address the perennial questions concerning the nature of reality (metaphysics) and what we can know about it (epistemology). How do we acquire knowledge of the physical world, the nonphysical world? Are there noncorporeal entities (souls, deities, angels)? If so, what can we claim to know about them? How are belief and knowledge related? A systematic and comprehensive approach to these problems and others will entail reading works by Plato, Aristotle, Descartes, Locke, Leibniz, Hume, and Kant, as well as more recent metaphysicians and epistemologists.		2018-1 2020-1

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: A few essays of moderate length.

Corequisite(s): PY201

Disqualifier(s): PY383

PY320	ETHICS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------	--

Scope:	2019-2	Offerings:
---------------	--------	-------------------

This course offers a systematic examination and comparison of standard Ethical doctrines as well as an analysis of some of the fundamental concepts and assumptions belonging to the nature of ethical thinking itself (Meta-ethics). The ethical doctrines to be studied include those associated with renowned philosophers such as Aristotle (virtue theory), Kant (deontology), and Mill (utilitarianism). The focus will be not only on original texts which advance the doctrines but also on criticisms and defenses of them by contemporary philosophers. The texts of Meta-ethics to be studied belong to the analytic tradition of Philosophy and concern the meaning and status of normative language in general. PY320 provides a worthwhile background Cadets may apply in any course in applied Ethics, such as PY325 Military Ethics and PY326 Cyber Ethics. It will also prove useful to Cadets in other academic majors, particularly in Political Theory, Law, and History.

2019-2 2021-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: None

Prerequisite(s): PY201

PY325	MILITARY ETHICS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	------------------------	--

Scope: 2019-1

Offerings:

The fundamental values and principles of the warrior ethos can be traced back to ancient Greece and Rome. These values provide the moral boundaries of the military profession and distinguish members of this profession from other individuals and groups who employ violence to achieve their ends. Cadets in this course will examine the moral principles that define the profession of arms, both in terms of when the use of force is permissible (or even obligatory) to achieve political objectives, and what, if any, limits ought to govern how that force is used.

2019-1 2021-1

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: A few essays of moderate length.

Disqualifier(s): PY365

PY326	CYBER ETHICS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------	--

Scope: 2017-1

Offerings:

This multi-disciplinary course will examine the current ethical, social and legal issues related to cyberspace, with a particular focus on: (1) the regulation or regulability of cyberspace; (2) the inherent tensions between traditional government surveillance and public safety efforts and the growing necessity for strong cyber security practices; (3) the ethical concerns surrounding government secrecy; (4) privacy and anonymization in cyberspace; and (5) cyber weapons and cyberwar.

2018-1 2019-1 2020-1

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: None

Prerequisite(s): PY201

PY329	TOPICS IN ETHICS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-------------------------	--

Scope: 2018-2

Offerings:

This course provides cadets an opportunity for reading and analysis in depth of some of the seminal philosophical works in ethics. Taught in seminar format, the course challenges first-class and second-class cadets to take responsibility for discussion and analysis and for drawing connections between ideas as they occur throughout history and across cultures. The cadets will gain a deeper understanding of the human condition and of the complex world of values.

2018-2 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: None

PY330	POLITICAL PHILOSOPHY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-----------------------------	--

Scope: 2019-1

Offerings:

Examining the major theories and problems in the history of political philosophy from Plato to Rawls and emphasizing contemporary theory, this course includes such topics as liberty, equality, political authority, the obligation to obey the State, civil disobedience, anarchism, liberalism, conservatism, democracy, meritocracy, affirmative action, and global politics.

2019-1 2021-1

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

PY345**PHILOSOPHY OF RELIGION**

3.0 Credit Hours
(BS=0.0,ET=0.0,MA=0.0)

Scope: 2018-1

Offerings:

This course examines the nature of religion and its truth claims from the perspective of philosophical analysis. It examines such perennial questions as: is there a God? What are the arguments for and against the existence of a Supreme Being? How can a good God permit Evil? Is there life after death? Is it rational to believe in God or does faith stand above or against reason? What is the relationship of religion to ethics? Is the Good good because God commands it, or does God command the Good because it is good?

2018-1 2020-1

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: A few essays of moderate length.

Corequisite(s): PY201

Disqualifier(s): PY381

PY350**PHILOSOPHY OF SCIENCE**

3.0 Credit Hours
(BS=0.0,ET=0.0,MA=0.0)

Scope: 2018-2

Offerings:

Mathematics and the sciences (especially the natural sciences) have often been portrayed in the modern era as paradigmatic sources of knowledge. Nevertheless, one can still pose a number of lively and much-debated questions: what makes something a science? Is there a single "scientific method" or ideal way of discovering, confirming, or disconfirming scientific truths? Are there limitations to the knowledge the sciences can provide? Indeed, do the sciences provide knowledge? Does science make any presuppositions about the nature of the world or about what exists (ontology)? What is the nature of mathematics? Does it apply to a world of ideal objects, to rules for using symbols, or to the physical world? What kinds of things are numbers? Readings will include works by Peirce, Frege, the Vienna Circle, and Kuhn, as well as contemporary readings in the philosophy of science and mathematics and in the philosophies of physics, biology, the social sciences, and logic.

2018-2 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: A few essays of moderate length.

PY355**PHILOSOPHY OF MIND**

3.0 Credit Hours
(BS=0.0,ET=0.0,MA=0.0)

Scope: 2019-2

Offerings:

This course will jointly address major topics in the traditional philosophy of mind and questions created by recent developments in artificial intelligence: what is mind? What is the relationship of a mind to the physical world, including the brain? What is consciousness and self-consciousness? What are the definitions of mental states and processes, such as perception, desire, belief, emotion, reasoning, and action, and their relationship? Can computers be constructed to think or behave like human beings, or to have consciousness? Readings will come from classical sources, such as Descartes, as well as contemporary literature in philosophy, cognitive science, and artificial intelligence.

PY370	17TH & 18TH CENTURY PHILOSOPHY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2019-1	Offerings:
This course examines a selection of texts written by central figures in the formative centuries of modern European philosophy. Their ideas have had continuing influence on philosophers down to our present day, as well as profound influence on the development of political thought and on the scientific understanding of human beings. Two schools of thought will be covered: Rationalism and Empiricism. Associated with the first school are the continental philosophers Descartes (widely accepted as the founder of Modern Philosophy), Spinoza and Leibniz. The school of Empiricism includes the British philosophers Hobbes, Locke, Berkeley and Hume.		2019-1 2021-1

Scope:	2017-2	Offerings:

This course will introduce cadets to a representative sample major of figures and topics which have set the stage for understanding contemporary Philosophy in the so-called Analytic Tradition. Major figures include Frege, Russell, Wittgenstein, Moore, the philosophers of the Vienna Circle, and American philosophers such as Quine, Putnam, Davidson and Kripke. Topics include the ideal of a logically perfect language, meaning and reference, the nature of truth, the distinction between analytic and synthetic statements, the common sense analysis of metaphysical concepts, and the rule-centered social nature of language. As appropriate, leading figures and ideas drawn from Continental Philosophy will be introduced.

PY390	INTER-DEPARTMENT SEMINAR	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------	--

Scope: 2018-2

Offerings:

PY390 brings together a faculty member from DEP and one other department with Cadets majoring in those two departments with the aim of conducting a joint investigation of an important topic or cluster of topics, or the work of a single author, of recognized significance and shared interest. It will be taught every other year, on each occasion combining Philosophy with another discipline. Examples of second disciplines include History, Political Theory, Psychology, and Law. Examples of topics include: justice, philosophies of history, the evolution of human rights theory, the relationship between morality and law, cognition and mental phenomena, and evolving conceptions of citizenship. Examples of single author investigations include: Locke, Rousseau, Hume. The course will count as credit towards the major in both of the paired departments.

PY400	SENIOR SEMINAR IN PHILOSOPHY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-------------------------------------	--

Scope: 2019-2

Offerings:

This course provides cadets with the opportunity for advanced study in the discipline. Through the advanced study of a topic in philosophy, cadets will build on the foundation established in PY300 and throughout their academic career at West Point. They will deepen their mastery of philosophical concepts and methods and grow as scholars by applying those concepts and methods to a number of different disciplinary perspectives. Through intensive study of primary and secondary texts, this course broadens the knowledge base by bridging disciplinary approaches and setting the stage for cadets' continued educational development.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

--------------	--------------------------------------	--

Scope:	2016-1	Offerings:
---------------	--------	-------------------

This optional elective offers the cadet an opportunity for in-depth study of an advanced topic in Philosophy under the mentorship of a senior faculty advisor. The scope and topic of the course are developed in consultation with the faculty advisor and appropriately build upon academic work already completed in the regular Philosophy electives. Since such a course is beyond normal teaching duties, an agreement to serve as a faculty advisor will be at the discretion of the faculty member. Enrollment is subject to Department approval.

XH400	INTERCOLLEGIATE SEMINAR	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2017-2	Offerings:
The focus of the course is a topic such importance that it deserves a multi-disciplinary examination. Previous iterations of the course carried out with Bard College, examined the nature and cultural traditions of a Just War, and the complex nature of human intolerance. The course has included faculty and Cadets from the departments of English and Philosophy, History, Law, and Social Sciences. Intended for cows and firsties, it counts for credit towards the major in their respective departments. The course is conducted as a seminar course meeting in two-hour blocks during which the Cadets have chief responsibility for the discussion. A parallel course at the other institution engages undergraduates and faculty representing a comparably wide range of disciplines.		No Course Offerings

Department of Foreign Languages

123 Courses

LA203	ARABIC I (STANDARD)	4.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2017-1	Offerings:
In the standard course sequence, Cadets acquire a basic proficiency in speaking, listening, reading and writing skills in Arabic. Learning activities focus on situations Cadets are likely to encounter in Arabic society. Cadets are taught how to express simple ideas and basic needs, comprehend the language in everyday contexts, and read simplified texts and brief, authentic selections. In addition to speaking, listening and reading skills, Cadets learn how to write sentences, paragraphs and/or short compositions on familiar topics. Through readings and discussions, Cadets are introduced to the cultures and history of the Arabic-speaking world. Cadets acquire a command of basic Arabic vocabulary and gain a general understanding of how the language works, and they become able to apply that knowledge when learning other foreign languages.		2018-1 2019-1 2020-1
Lessons: 80 @ 55 min (5.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
LA204	ARABIC II (STANDARD)	4.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2017-2	Offerings:
Continuation of LA203.		2018-2 2019-2 2020-2
Lessons: 80 @ 55 min (5.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
Prerequisite(s):	LA203	
LA371	INTENSIVE INTERMEDIATE ARABIC	4.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2013-1	Offerings:
In the intensive intermediate course, cadets develop proficiency in those skills necessary for communicating effectively in Arabic and for pursuing upper-level courses. Cadets develop speaking skills that enable them to engage in conversations on a variety of topics with other class members and with native speakers. Cadets reinforce and expand their language skills by reading, viewing, discussing, and writing about contemporary life, current events, and other cultural and historical topics as presented in selected materials of the Arabic-speaking world. In addition, cadets gain an overview of the profession of arms in Arabic-speaking regions by reading, discussing, and writing about pertinent materials that focus on the mission and history of the military in those countries. Cadets also review the basic rules of Arabic grammar and continue to acquire a corpus of Arabic vocabulary. They will be able to use computer-assisted learning resources to strengthen and maintain their language proficiency. This course serves as a bridge to advanced elective Arabic courses.		2018-1 2019-1 2020-1
Lessons: 80 @ 55 min (5.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
Prerequisite(s):	LA204	
LA372	ARABIC FOR ORAL & WRITTEN COMM	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2017-2	Offerings:
This course addresses students' specific needs in the development of listening, speaking, reading, and writing skills in Arabic. Cadets expand their active vocabulary, gain greater command of complex grammatical structures, and develop appropriate styles of written and oral communication. Special emphasis is placed on conversational and expository speaking. Cadets increase their oral proficiency through dialogues, role play, group discussions, formal presentations, and simulations of everyday language tasks likely to be encountered in the target region. Guided writing activities develop Cadets' competence in the application of critical language structures. Listening and reading comprehension are strengthened via engagement with film, music, short stories, news reports, and other popular media. Course topics typically focus on regional culture, the military, and society.		2018-2 2019-2 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
Prerequisite(s):	LA371	
LA470	SPECIAL TOPIC IN ARABIC	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2013-1	Offerings:
This course is taught by a member of senior faculty and provides cadets an opportunity to further develop their language proficiency, regional expertise, and cultural capabilities.		No Course Offerings
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
Prerequisite(s):	LA475	
LA472	COLLOQUIAL ARABIC	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2000-2	Offerings:
This course introduces the dialect of a particular Arab country. Oral proficiency gained in this course is complementary to previously learned modern standard Arabic. The course may be taken twice for credit if two different dialects are offered. Consult department counselor.		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
Prerequisite(s):	-Or- LA475	
LA472A	ADVANCED ARABIC	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2012-2	Offerings:
This course introduces the dialect of a particular Arab country. Oral proficiency gained in this course is complementary to previously learned modern standard Arabic. The course may be taken twice for credit if two different dialects are offered. Consult department counselor. This course covers material not included in LA472 taken abroad		No Course Offerings
Lessons: 40 @ 55 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Must have already taken LA472 abroad	
Prerequisite(s):	LA475	
LA475	ARABIC RDG/WRTG THRU MEDIA	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2010-1	Offerings:
In this course cadets enhance their reading and writing skills through study and discussion of contemporary Arabic media (e.g. the Internet, television, film, radio, newspapers and magazines), as well as short literary selections. Reading strategies and textual analysis are addressed. Writing tasks develop organization, substance, and style. Graded work typically includes oral and written summaries of authentic texts and short compositions or reaction papers. The course is conducted in Arabic.		2018-1 2018-2 2019-1 2020-1
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
Prerequisite(s):	LA372	
LA476	MILITARY SPKG/RDG - ARABIC	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2010-2	Offerings:

Cadets gain an understanding of the profession of arms in the Arabic-speaking world through lectures and selected reading materials (e.g. journal articles, Internet media, training manuals, biographies, and historical documents). Course content may encompass the mission and role, training, operations, tactics, and organization of the armed forces. Oral proficiency is enhanced through in-class discussion as well as role-plays and simulations focusing on scenarios likely to be encountered while an officer is deployed in an Arabic-speaking region. Media complement instruction. Graded work may include briefings, role-plays, and simulation. The course is conducted in Arabic.

LA483	ARAB CIVILIZATION I	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	----------------------------	--

Scope: 2000-1

Offerings:

This course and the following one, LA484, constitute an integrated study of the culture, history, and geography of the Arabic-speaking world. Readings, lectures, discussions, and audio-visual materials encompass this civilization's representative artistic and intellectual accomplishments, its present-day political institutions, economy, and popular culture. In addition, the courses focus on the values and attitudes, the customs and traditions, and the social structures of Arabic people. At the same time, cadets continue to develop greater proficiency in Arabic. Graded work may include giving oral presentations, writing short essays or preparing a term paper. A majority of the work is done in Arabic.

Offerings:

This course is taught by a member of senior faculty and provides cadets an opportunity to further develop their language proficiency, regional expertise, and cultural capabilities.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: None

Prerequisite(s): LF372

LF475 **FRENCH RDG/WRTG THRU MEDIA** **3.0 Credit Hours**
(BS=0.0,ET=0.0,MA=0.0)

Scope: 2010-1

Offerings:

In this course cadets enhance their reading and writing skills through study and discussion of contemporary French media (e.g. the Internet, television, film, radio, newspapers and magazines), as well as short literary selections. Reading strategies and textual analysis are addressed. Writing tasks develop organization, substance, and style. Graded work typically includes oral and written summaries of authentic texts and short compositions or reaction papers. The course is conducted in French.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: None

Prerequisite(s): LF372

LF476	MILITARY SPKG/RDG - FRENCH	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2010-2	Offerings:
Cadets gain an understanding of the profession of arms in the French-speaking world through lectures and selected reading materials (e.g. journal articles, Internet media, training manuals, biographies, and historical documents). Course content may encompass the mission and role, training, operations, tactics, and organization of the armed forces. Oral proficiency is enhanced through in-class discussion as well as role-plays and simulations focusing on scenarios likely to be encountered while an officer is deployed in a French-speaking region. Media complement instruction. Graded work may include briefings, role-plays, and simulation. The course is conducted in French.		2018-2 2019-2 2020-2

LG203	GERMAN I (STANDARD)	4.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	----------------------------	--

Scope: 2017-1**Offerings:**

2018-1 2019-1 2020-1

In the standard course sequence, Cadets acquire a basic proficiency in speaking, listening, reading and writing skills in German. Learning activities focus on situations Cadets are likely to encounter in German society. Cadets are taught how to express simple ideas and basic needs, comprehend the language in everyday contexts, and read simplified texts and brief, authentic selections. In addition to speaking, listening and reading skills, Cadets learn how to write sentences, paragraphs and/or short compositions on familiar topics. Through readings and discussions, Cadets are introduced to the cultures and history of the German-speaking world. Cadets acquire a command of basic German vocabulary and gain a general understanding of how the language works, and they become able to apply that knowledge when learning other foreign languages.

Lessons: 80 @ 55 min (5.000 Att/wk) **Labs:** 0 @ 0 min**Special Requirements:** None

LG204	GERMAN II (STANDARD)	4.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)

LG371	INTENSIVE INTERMEDIATE GERMAN	4.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--------------------------------------	--

Scope:	2013-1	Offerings:
In the intensive intermediate course, cadets develop proficiency in those skills necessary for communicating effectively in German and for pursuing upper-level courses. Cadets develop speaking skills that enable them to engage in conversations on a variety of topics with other class members and with native speakers. Cadets reinforce and expand their language skills by reading, viewing, discussing, and writing about contemporary life, current events, and other cultural and historical topics as presented in selected materials of the German-speaking world. In addition, cadets gain an overview of the profession of arms in German-speaking regions by reading, discussing, and writing about pertinent materials that focus on the mission and history of the military in those countries. Cadets also review the basic rules of German grammar and continue to acquire a corpus of German vocabulary. They will be able to use computer-assisted learning resources to strengthen and maintain their language proficiency. This course serves as a bridge to advanced elective German courses.		2018-1 2019-1 2020-1
Lessons:	80 @ 55 min (5.000 Att/wk)	Labs: 0 @ 0 min
Special Requirements:	None

LG372	GERMAN FOR ORAL & WRITTEN COMM	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2017-2	Offerings:
This course addresses students' specific needs in the development of listening, speaking, reading, and writing skills in German. Cadets expand their active vocabulary, gain greater command of complex grammatical structures, and develop appropriate styles of written and oral communication. Special emphasis is placed on conversational and expository speaking. Cadets increase their oral proficiency through dialogues, role play, group discussions, formal presentations, and simulations of everyday language tasks likely to be encountered in the target region. Guided writing activities develop Cadets' competence in the application of critical language structures. Listening and reading comprehension are strengthened via engagement with film, music, short stories, news reports, and other popular media		2018-2 2019-2 2020-2

LN380	NATURE OF MODERN LANGUAGES	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2017-1	Offerings:
Cadets learn that human language is a rule-based and universal system. They examine languages like those taught at USMA from the perspective of linguists, teachers and Army officers. Topics include the origin of and the basis for language, the nature of grammar, language sounds, the phenomenon of meaning, and how language attains communication. Knowledge gained is frequently interdisciplinary and relevant to courses offered at USMA in psychology, communication, English and foreign or second languages. Graded work may include giving oral presentations and completing a term project or paper.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Individual oral or written reports.	
LN400	LANGUAGE IN CULTURAL CONTEXT	2.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2004-4	Offerings:
Cadets travel to selected sites where cultural and linguistic immersion is an opportunity. Cadets engage in structured activities and instruction in the target language. They visit sites of cultural and historical significance, and pursue a program of learning as approved by the Department of Foreign Languages that is similar to other IAD course experiences except for the number of credit hours awarded. LN451	ADV LANG & CULTURE IN CONTEXT	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2014-1	Offerings:

Cadets travel to and, over an extended period, reside in a linguistic and cultural community where they develop further their foreign language proficiency, cultural competence and regional capability. A structured program of experiential learning includes visits to sites of cultural, geographic, political, historical, or social significance. Participation in military training exercises, involvement in service learning, and attendance at cultural events may be part of the immersion experience. Cadets write reflective essays, keep personal/public journals, complete task-based writing assignments, deliver briefings, and produce research papers. A department instructor may conduct a site visit while cadets are abroad.

Scope: 1990-2

Offerings:

LN487 and LN488 are essentially honors or tutorial courses available only to exceptionally motivated and qualified cadets who have exhausted all other language-specific courses and who wish to pursue a special field of interest in language, linguistics or a language-related field. The minimum completion requirement is a term paper, based on individual research of a length and on a topic upon which instructor and cadet have agreed.

2018-2 2019-2 2020-2

Lessons: 17 @ 55 min (1.000 Att/wk)

Labs: 0 @ 0 min

LN490 LANGUAGE & CULTURE CAP SEM

3.0 Credit Hours
(BS=0.0,ET=0.0,MA=0.0)

Scope: 2005-2

Offerings:

In this capstone course concentrators integrate their knowledge of language and culture with other aspects of the curriculum. They attend lectures, participate in seminar discussions and complete a project of international import. Cadets develop a regionally focused topic, complete research and present findings for possible application at the joint command level. They make use of their acquired language skills while completing a course that is interdisciplinary in nature and meets academic program goals.

LP203	PORTUGUESE I (STANDARD)	4.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2017-1	Offerings:
In the standard course sequence, Cadets acquire a basic proficiency in speaking, listening, reading and writing skills in Portuguese. Learning activities focus on situations Cadets are likely to encounter in Portuguese society. Cadets are taught how to express simple ideas and basic needs, comprehend the language in everyday contexts, and read simplified texts and brief, authentic selections. In addition to speaking, listening and reading skills, Cadets learn how to write sentences, paragraphs and/or short compositions on familiar topics. Through readings and discussions, Cadets are introduced to the cultures and history of the Portuguese-speaking world. Cadets acquire a command of basic Portuguese vocabulary and gain a general understanding of how the language works, and they become able to apply that knowledge when learning other foreign languages.		2018-1 2019-1 2020-1

LP371	INTENSIVE INTERMED. PORTUGUESE	4.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2013-1	Offerings:
In the intensive intermediate course, cadets develop proficiency in those skills necessary for communicating effectively in Portuguese and for pursuing upper-level courses. Cadets develop speaking skills that enable them to engage in conversations on a variety of topics with other class members and with native speakers. Cadets reinforce and expand their language skills by reading, viewing, discussing, and writing about contemporary life, current events, and other cultural and historical topics as presented in selected materials of the Portuguese-speaking world. In addition, cadets gain an overview of the profession of arms in Portuguese-speaking regions by reading, discussing, and writing about pertinent materials that focus on the mission and history of the military in those countries. Cadets also review the basic rules of Portuguese grammar and continue to acquire a corpus of Portuguese vocabulary. They will be able to use computer-assisted learning resources to strengthen and maintain their language proficiency. This course serves as a bridge to advanced elective Portuguese courses.		2018-1 2019-1 2020-1
Lessons: 80 @ 55 min (5.000 Att/wk)	Labs: 0 @ 0 min

Disqualifier(s):	LP361 LP362	
LP372	PORTUGUESE FOR ORAL/WRIT COMM	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2017-2	Offerings:

This course addresses students' specific needs in the development of listening, speaking, reading, and writing skills in Portuguese. Cadets expand their active vocabulary, gain greater command of complex grammatical structures, and develop appropriate styles of written and oral communication. Special emphasis is placed on conversational and expository speaking. Cadets increase their oral proficiency through dialogues, role play, group discussions, formal presentations, and simulations of everyday language tasks likely to be encountered in the target region. Guided writing activities develop Cadets' competence in the application of critical language structures. Listening and reading comprehension are strengthened via engagement with film, music, short stories, news reports, and other popular media. Course topics typically focus on regional culture, the military, and society.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: None

Prerequisite(s): LP371

Special emphasis is placed on conversational and expository speaking. Cadets increase their oral proficiency through dialogues, role play, group discussions, formal presentations, and simulations of everyday language tasks likely to be encountered in the target region. Guided writing activities develop Cadets' competence in the application of critical language structures. Listening and reading comprehension are strengthened via engagement with film, music, short stories, news reports, and other popular media. Course topics typically focus on regional culture, the military, and society.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: None

Prerequisite(s): LS371

LS470	SPECIAL TOPIC IN SPANISH	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------	--

Scope:	2013-1	Offerings:
---------------	--------	-------------------

This course is taught by a member of senior faculty and provides cadets an opportunity to further develop their language proficiency, regional expertise, and cultural capabilities. No Course Offerings

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: None

Prerequisite(s): LS372

LS475	SPANISH RDG/WRTG THRU MEDIA	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	------------------------------------	--

Scope: 2010-1

Offerings:

In this course cadets enhance their reading and writing skills through study and discussion of contemporary Spanish media (e.g. the Internet, television, film, radio, newspapers and magazines), as well as short literary selections. Reading strategies and textual analysis are addressed. Writing tasks develop organization, substance, and style. Graded work typically includes oral and written summaries of authentic texts and short compositions or reaction papers. The course is conducted in Spanish.

2018-1 2019-1 2020-1

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: None

Prerequisite(s): LS372

LS476	MILITARY SPKG/RDG - SPANISH	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	------------------------------------	--

Scope: 2010-2

Offerings:

Cadets gain an understanding of the profession of arms in the Spanish-speaking world through lectures and selected reading materials (e.g. journal articles, Internet media, training manuals, biographies, and historical documents). Course content may encompass the mission and role, training, operations, tactics, and organization of the armed forces. Oral proficiency is enhanced through in-class discussion as well as role-plays and simulations focusing on scenarios likely to be encountered while an officer is deployed in a Spanish-speaking region. Media complement instruction. Graded work may include briefings, role-plays, and simulation. The course is conducted in Spanish.

2018-2 2019-2 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: None

Prerequisite(s): LS475

LS483	SPANISH CIV AND CULTURE	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--------------------------------	--

Scope: 2013-1

Offerings:

This course constitutes an integrated study of the culture, history, and geography of Spain. Readings, lectures, discussions, and audio-visual materials encompass Spain's representative artistic and intellectual accomplishments, its present-day political institutions, economy, and popular culture. In addition, the course focuses on the values and attitudes, the customs and traditions, and the social structures of the Spanish people. At the same time, cadets continue to develop greater language proficiency. Graded work may include giving oral presentations, writing short essays, or preparing a term paper. The work is done in Spanish.

2018-1 2019-1 2020-1

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: None

LS484	SPANISH AMERICAN CIV AND CULT	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--------------------------------------	--

Scope: 2013-2

Offerings:

This course constitutes an integrated study of the culture, history, and geography of the countries of Spanish America. Readings, lectures, discussions, and audio-visual materials encompass this civilization's representative artistic and intellectual accomplishments, its present-day political institutions, economies, and popular cultures. In addition, the course focuses on the values and attitudes, the customs and traditions, and the social structures of the people in Spanish America. At the same time, cadets continue to develop greater language proficiency. Graded work may include giving oral presentations, writing short essays, or preparing a term paper. The work is done in Spanish.

2018-2 2019-2 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: None

Prerequisite(s): LS475

LS485	SPANISH-AMERICAN LITERATURE	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	------------------------------------	--

Scope: 2011-1

Offerings:

In this course cadets gain basic competence in the knowledge and comprehension of representative literary works and their relationship to the Spanish-American cultural context. Selected examples of various literary genres are read and discussed, and analyzed. At the same time, cadets continue to develop greater language proficiency. Video and film presentations supplement readings, where possible. Graded work may include giving oral presentations, writing short essays, or preparing a term paper. The work is done in Spanish.

2018-1 2019-1 2020-1

LX400	4TH SEMESTER FOREIGN LANG	0.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	----------------------------------	--

Scope:	2007-1	Offerings:
Cadets may enroll in a fourth semester of foreign language in any course for which qualified.		No Course Offerings
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:		
LZ203	PERSIAN I (STANDARD)	4.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2017-1	Offerings:
In the standard course sequence, Cadets acquire a basic proficiency in speaking, listening, reading and writing skills in Persian. Learning activities focus on situations Cadets are likely to encounter in Persian society. Cadets are taught how to express simple ideas and basic needs, comprehend the language in everyday contexts, and read simplified texts and brief, authentic selections. In addition to speaking, listening and reading skills, Cadets learn how to write sentences, paragraphs and/or short compositions on familiar topics. Through readings and discussions, Cadets are introduced to the cultures and history of the Persian-speaking world. Cadets acquire a command of basic Persian vocabulary and gain a general understanding of how the language works, and they become able to apply that knowledge when learning other foreign languages.		2018-1 2019-1 2020-1
Lessons: 80 @ 55 min (5.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
LZ204	PERSIAN II (STANDARD)	4.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2017-2	Offerings:
Continuation of LZ203.		2018-2 2019-2 2020-2
Lessons: 80 @ 55 min (5.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
Prerequisite(s):	LZ203	
LZ371	INTENSIVE INTERMEDIATE PERSIAN	4.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2013-1	Offerings:
In the intensive intermediate course, cadets develop proficiency in those skills necessary for communicating effectively in Persian and for pursuing upper-level courses. Cadets develop speaking skills that enable them to engage in conversations on a variety of topics with other class members and with native speakers. Cadets reinforce and expand their language skills by reading, viewing, discussing, and writing about contemporary life, current events, and other cultural and historical topics as presented in selected materials of the Persian-speaking world. In addition, cadets gain an overview of the profession of arms in Persian-speaking regions by reading, discussing, and writing about pertinent materials that focus on the mission and history of the military in those countries. Cadets also review the basic rules of Persian grammar and continue to acquire a corpus of Persian vocabulary. They will be able to use computer-assisted learning resources to strengthen and maintain their language proficiency. This course serves as a bridge to advanced elective Persian courses.		2018-1 2019-1 2020-1
Lessons: 80 @ 55 min (5.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None

LZ372	PERSIAN FOR ORAL & WRIT COMM	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2017-2	Offerings:

<p>This course addresses students' specific needs in the development of listening, speaking, reading, and writing skills in Persian. Cadets expand their active vocabulary, gain greater command of complex grammatical structures, and develop appropriate styles of written and oral communication. Special emphasis is placed on conversational and expository speaking. Cadets increase their oral proficiency through dialogues, role play, group discussions, formal presentations, and simulations of everyday language tasks likely to be encountered in the target region. Guided writing activities develop Cadets' competence in the application of critical language structures. Listening and reading comprehension are strengthened via engagement with film, music, short stories, news reports, and other popular media. Department of Geography and Environmental Engineering

62 Courses

EV203	PHYSICAL GEOGRAPHY	3.0 Credit Hours (BS=2.5,ET=0.0,MA=0.0)
Scope:	2013-1	Offerings:
<p>This core course provides cadets with a fundamental understanding of scientific principles and processes of earth science, meteorology, climatology, geomorphology and environmental systems, as well as an introduction to cultural geography. Further, the course furnishes cadets with the technical skills - digital terrain analysis, image interpretation and spectral analysis, remote sensing, global positioning system, geographic information systems cartography - to delineate the geographic distribution of landforms, weather, climate, and culture systems; and evaluate their potential impact on military operations. Lessons are reinforced by extensive use of in- and out-of-class practical exercises, terrain walks and computer exercises to demonstrate the interrelationship between physical and human systems, and their impact on the environment. Historical vignettes are employed to demonstrate how the factors of weather, climate, terrain, soils, vegetation and culture are important, cogent and frequently decisive in military operations.</p>		No Course Offerings
Lessons:	36 @ 55 min (2.500 Att/wk)	Labs: 4 @ 55 min
Special Requirements:	None	
EV203	PHYSICAL GEOGRAPHY	3.0 Credit Hours (BS=2.5,ET=0.0,MA=0.0)
Scope:	2016-1	Offerings:
<p>This core course provides cadets with a fundamental understanding of scientific principles and processes of earth science, meteorology, climatology, geomorphology and environmental systems, as well as an introduction to cultural geography. Further, the course introduces cadets to technical skills - (terrain analysis, image interpretation and spectral analysis, remote sensing, global positioning system, geographic information systems cartography) - to delineate the geographic distribution of landforms, weather, climate, and culture systems; and evaluate their potential impact on military operations. Lessons are reinforced by use of in- and out-of-class practical exercises, terrain walks and computer exercises to demonstrate the interrelationship between physical and human processes, and their impact on the environment. Historical and contemporary vignettes are employed to demonstrate how weather, climate, terrain, soils, vegetation and culture are important, cogent and frequently decisive in military operations.</p>		2018-1 2018-2 2018-3 2019-1 2019-2 2019-3 2020-1 2020-2 2020-3

EV210	WATER	3.0 Credit Hours (BS=3.0,ET=0.0,MA=0.0)
Scope:	2017-2	Offerings:
<p>This course provides disciplinary depth in the science of oceans, estuaries, lakes, rivers, and water ecosystems through the study of physical, chemical and biological principles related to marine and freshwater biomes. Communities of marine and freshwater organisms at various ecological zones are explored, as they are affected by light, nutrients, water chemistry, and other physical and chemical properties. The impacts of humans on these water ecosystems are also evaluated. The course provides the student with a strong foundation in the science of the hydrosphere while introducing students to environmental science lab and field research methods.</p>		No Course Offerings
Lessons:	40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min
Special Requirements:	In-class labs and field trips; term project examining aspects of one of the world's aquatic ecosystems. Compensatory time provided.	
Prerequisite(s):	EV203 EV301	
EV300	ENVIRONMENTAL SCIENCE	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2009-1	Offerings:

As the introductory course to the Environmental Engineering Sequence, EV300 provides the cadet with a broad understanding of current global and local environmental issues. It specifically focuses on natural ecosystems processes, the effects of pollution on human health and how the level of risk associated with this pollution is assessed, the environmental effects of energy use, and air pollution concerns such as global climate change, acid rain, and smog. Discussions of anthropogenic influences are conducted with consideration of social, economic, technological and political impacts. Cadets learn to evaluate literature on environmental issues through readings and interactive debates. A course project applying the scientific method to evaluate a current environmental problem provides an opportunity to tie multiple course topics with an in-depth study of an issue of interest.

EV301

EV300	ENVIRONMENTAL SCIENCE	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	------------------------------	--

Scope: 2018-1**Offerings:**

As the introductory course to the Environmental Engineering Sequence, EV300 provides a broad understanding of current global and local environmental issues. It specifically focuses on natural ecosystems processes, the effects of pollution on human health, assessing the level of risk associated with pollution, and the environmental effects of energy use, air pollution, global climate change, acid rain, and smog. Discussions of anthropogenic influences on the environment also consider social, economic, technological and political impacts. Cadets learn to evaluate environmental issues through current events and interactive debates. A course project requires cadets to apply the scientific method to evaluate a current environmental problem and provides an opportunity to integrate multiple course topics with an in-depth study of an issue of interest.

EV301

EV301	ENV SCIENCE FOR ENGR & SCIEN	3.0 Credit Hours (BS=1.0,ET=2.0,MA=0.0)
--------------	---	--

Scope: 2017-1**Offerings:**

This course is similar to EV300 except that the context of discussion in EV301 is appropriate for cadets who have elected to major in science or engineering. EV301 provides the cadet with a broad understanding of current global and local environmental issues. It specifically focuses on natural ecosystems processes, the effects of pollution on human health and how the level of risk associated with this pollution is assessed, the environmental effects of energy use, and air pollution concerns such as global climate change, acid rain, and smog. Discussions of anthropogenic influences are conducted with consideration of social, economic, technological and political impacts. Cadets learn to evaluate literature on environmental issues through readings and interactive debates. A course project applying the scientific method to evaluate a current environmental problem provides an opportunity to tie multiple course topics with an in-depth study of an issue of interest.

EV301	ENV SCIENCE FOR ENGR & SCIEN	3.0 Credit Hours (BS=1.0,ET=2.0,MA=0.0)
--------------	---	--

Scope: 2017-2**Offerings:**

EV301 provides the cadet with a deep understanding of current global and local environmental issues. It specifically focuses on natural ecosystem processes, the effects of pollution on human health, assessing the level of human health risk associated with pollution, and the strain on natural resources that stem from population growth. Discussions of anthropogenic influences consider social, economic, technological, and political impacts. Cadets evaluate environmental issues through review of scientific literature, current events, and interactive debates. A course project requires cadets to conduct an in-depth study by applying the scientific method to evaluate a current environmental problem of interest. The project results in a foundation of engineering science that facilitates follow-on engineering design.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: Design and conduct an environmental study, one field trip, in-class labs.

Corequisite(s): EV203

Disqualifier(s): EV300

EV303	FOUNDATIONS IN GEOGRAPHY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------	--

Scope: 1998-1 **Offerings:**

This course presents the basic concepts, theories and methods of inquiry in the discipline of geography as foundation for advanced study in Human/Regional Geography; Environmental Geography; or Geospatial Information Science. The course includes models and concepts from the many sub-disciplinary (systematic) areas of geography to include cultural, historical, economic, urban, political and military geography. The application of concepts to real-world issues is emphasized. Research skills and techniques used by professional geographers are presented. Cadets use these approaches to spatially analyze and map the distribution of human and environmental phenomena. Several short papers will be assigned.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: Requires Department Head approval for all cadets not selecting a FOS/MAJ in the Department of Geography & Environmental Engineering.

EV310	AQUATIC SCIENCE	3.0 Credit Hours (BS=3.0,ET=0.0,MA=0.0)
--------------	------------------------	--

Scope: 2017-2 **Offerings:**

This course provides disciplinary depth in the science of oceans, estuaries, lakes, rivers, and water ecosystems through the study of physical, chemical and biological principles related to marine and freshwater biomes. Communities of marine and freshwater organisms at various ecological zones are explored, as they are affected by light, nutrients, water chemistry, and other physical and chemical properties. The impacts of humans on these water ecosystems are also evaluated. The course provides the student with a strong foundation in the science of the hydrosphere while introducing students to environmental science lab and field research methods.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: In-class labs and field trips; term project examining aspects of one of the world's aquatic ecosystems. Compensatory time provided.

Prerequisite(s): EV203 EV301

EV350	ENVIRONMENTAL ENGR TECHNOLOGIES	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--	--

Scope: 2017-1 **Offerings:**

This course builds on environmental issues introduced in EV300 and further explores environmental engineering from a unit process and materials balance approach. Analyzing water (transport, quality, drinking water treatment, and wastewater treatment); air (transport, quality, and pollutant minimization); and pollutant management (solid and hazardous wastes), the cadet is exposed to the breadth of the environmental discipline. A laboratory experience is integral to the course. In the laboratory, physical, chemical, and biological quality are discussed and measured. An introductory environmental engineering design project on river water quality is developed within the semester.

Lessons: 36 @ 55 min (2.500 Att/wk) **Labs:** 6 @ 120 min

Special Requirements: One design project.

EV365	GEOGRAPHY OF GLOBAL CULTURES	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2006-1	Offerings:
<p>This course provides the geographic foundation for study in interdisciplinary and management academic areas. Contemporary regions of the world political map serve as the framework within which geographic concepts and analytical techniques are applied. Each cadet will develop an awareness of the diversity and distribution of people on the earth, human organization and exploitation of territory, and interactions among culture groups. Particular emphasis is placed on social institutions, their impact on economic development, and the subsequent identification and analysis of developed, emerging, and underdeveloped states.</p>		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2

EV367	GEOGRAPHIC RESEARCH METHODS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2018-1	Offerings:
<p>This course introduces academic geographic inquiry and the methods, techniques, and ethical considerations needed to effectively design, plan, and conduct geographic research. The course starts with why research is important and the ethics of doing research, which includes an introduction to the institutional review board process. Cadets will then learn how to conduct and write a literature review and develop research questions. Finally, quantitative, qualitative and spatial methods will be introduced. This course is designed to be an applied introduction to geographical research techniques.</p>		2018-1 2019-1 2020-1

EV371	GEOGRAPHY OF RUSSIA	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	1983-1	Offerings:
<p>This course examines the political, economic, and cultural geography of Russia and its adjacent neighbors; the Baltic states, east central European region, transcaucasus, and central Asia. Topics covered include: the commonwealth of independent states; ecocide in the former soviet union; disposition of the former soviet military; and ethnic rivalries. The objective of the course is to provide the student with an understanding of the recent past of the traditional soviet system in order to understand, as well as geographically evaluate, Russia's and the other former republics' situation today.</p>		2019-1 2020-1

EV373	GEOGRAPHY OF LATIN AMERICA	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	1983-1	Offerings:
This course studies the physical and cultural landscape of Latin America, giving special treatment to the diversity and cultural identity of the region. Topics covered include an historical geography of the region, including pre-columbian civilizations, Iberian, African, and European influences; the geography of transportation networks, agriculture, urbanization, and population. National boundaries, major landforms and climatic conditions are discussed to describe their effect on civilization. This course also investigates the historical relationship between the United States and Latin America and covers recent U.S. military interventions in the region.		2018-1 2019-1 2020-1
Lessons:	40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min

Disqualifier(s):	EV373A	
EV375	GEOGRAPHY OF AFRICA	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2012-1	Offerings:
This course examines the cultural and natural diversity of African landscapes, with an emphasis on development, population issues, disease, and the origin, dispersal, spatial organization, and interaction of important cultural groups. Africa's physical landscapes will also be introduced as the palette upon which Africa's complex human mosaic has developed. Students will explore, from a geographic perspective, why Africa has seemingly been plagued with problems of economic development, health, and political instability.		2018-1 2019-1 2020-1
Lessons:	40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min
Special Requirements:	One written research report with brief oral presentation. One field trip is possible.	
Prerequisite(s):	EV365	
Disqualifier(s):	EV374	
EV376	GEOGRAPHY OF THE MIDDLE EAST	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2012-2	Offerings:
This course examines the cultural and natural diversity of Southwest Asian landscapes. The realm's cultures and ethnicities are studied in a geographic context, with an emphasis on the origin, dispersal, spatial organization, and interaction of important cultural groups. Among issues examined are the distribution and strategic significance of critical mineral and energy resources, population and resource disparities, cultural conflict, and economic development. Students will learn how geographic issues impact the prospects for peace and stability in the region.		2018-2 2019-2 2020-2
Lessons:	40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min
Special Requirements:	One written research report with brief oral presentation. One field trip is possible.	
Prerequisite(s):	EV365	
Disqualifier(s):	EV374	
EV377	REMOTE SENSING	3.0 Credit Hours (BS=1.0,ET=2.0,MA=0.0)
Scope:	2011-1	Offerings:
Remote Sensing is learning about something without touching it--the most obvious example being the use of satellites to study the Earth. EV377, a techniques course applicable to both the humanities and engineering, studies how and what types of information can be carried by the electromagnetic spectrum. Students enjoy a wide range of practical exercises which introduce them to several remote sensing systems to include conventional and color infrared photography, multispectral scanners, satellite imagery, thermal infrared, and radar. The capstone exercise offers each student the opportunity to perform real-time automated image classification using satellite data on his/her own micro-computer. The course focus is on applying remotely sensed data to solve current problems.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2

EV378	CARTOGRAPHY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--------------------	--

Scope: 2013-1

Offerings:

Cartography teaches the principles of cartographic communication and enables the student to apply map design principles along with computer mapping techniques to solve contemporary problems in geography, economics, international relations, and applied sciences. Cadets will study the basic cartographic design process and use mapping and analysis software in the geographic sciences laboratory to produce topographic and thematic maps. A final course design project presents the opportunity for the cadets to demonstrate their ability to synthesize sound mapping principles.

2018-1 2019-1 2020-1

EV379	PHOTOGRAMMETRY	3.0 Credit Hours (BS=3.0,ET=0.0,MA=0.0)
--------------	-----------------------	--

Scope: 2013-2

Offerings:

Photogrammetry, the art and science of making accurate measurements on photographs, is an important and fundamental discipline concerned with civilian and military mapping. Students, applying simple geometric principles to the photograph, determine object identity, size, spatial relationship, and position. An abundance of practical exercises, involving the use of sophisticated equipment, provide the opportunity to apply the fundamentals while arriving at solutions to real-world problems. An interesting field trip to a local mapping organization vividly displays how all these techniques may be blended to produce maps in the commercial business world.

2018-2 2019-2 2020-2

EV380	SURVEYING	3.5 Credit Hours (BS=0.5,ET=3.0,MA=0.0)
--------------	------------------	--

Scope: 2005-1

Offerings:

A framework for understanding and applying practical surveying methods is developed. Consideration of error theory and the concepts of precision of and accuracy yields understanding of the probabilistic nature of measurements. The principles of differential leveling, taping, electronic distance measurement and angular measurement are studied and applied using state-of-the-art surveying equipment and software tools. Plane surveys are principally explored, although the fundamentals of geodetic surveys are also presented. Traverse, triangulation, trilateration, level networks and the proper adjustment of related measurements are examined. Control survey, land survey, topographic survey, horizontal and vertical curve design, computer-aided mapping and GIS applications are included. Extensive use of laboratory periods permits application of surveying fundamentals, methods and planning skills to actual field situations. The principles of the global positioning system are explored and applications in the Army and surveying are applied in the final lab exercise.

2018-1 2019-1 2020-1

Lessons: 21 @ 55 min (2.500 Att/wk) **Labs:** 19 @ 120 min

EV384 GEOGRAPHY OF NORTH AMERICA
3.0 Credit Hours
(BS=0.0,ET=0.0,MA=0.0)

Scope: 2004-1

Offerings:

This course provides a regional geography of North America, with balanced coverage of the human and physical geography of the United States and Canada. Lectures are appropriately supplemented with movies, slides, and maps to facilitate understanding of important themes that are prevalent in various subregions. Emphasis is placed on cultural patterns and contemporary environmental issues.

2018-1 2019-1 2020-1

EV385 INTRO TO ENVIRON ENGR
3.5 Credit Hours
(BS=0.0,ET=3.5,MA=0.0)

Scope: 2012-2

Offerings:

This course introduces cadets to the study of environmental engineering from a unit process and a materials balance approach. The focus is design-oriented problem solving to protect human health and the health of ecosystems using fundamental physical, chemical, and biological processes. Through the study of contaminant removal from water and air to integrated management techniques for solid/hazardous wastes, the cadet is exposed to the breadth of the discipline. In the laboratory, the science behind physical, chemical, and biological processes are applied to the engineering discipline. A military oriented design problem allows application of engineered solutions to topical water and air quality issues.

(BS=0.0,ET=0.0,MA=0.0)**Scope:**

2004-2

Offerings:

2018-2 2019-2 2020-2

The course examines European cultural landscapes, focusing on the environmental and cultural diversity exhibited among the states of modern Europe. Nationalism and the territorial imperative, long recognized as major forces in Europe, are studied from a geographic perspective to include patterns and processes of both regional continuity and change. Emphasis is given to the rapidly developing urbanization and mutual interdependence among countries of Western Europe. West and East European agricultural/industrial resource bases and developmental strategies are compared and contrasted. Specific topics are tailored to current issues and include regional conflict, economic development and trade, and problems of energy and the environment. This course concludes with a study of contemporary European extraregional spatial relationships with other major world culture regions.

Offerings:

2018-2 2019-2 2020-2

This course introduces meteorological processes, systems, and patterns with emphasis on spatial distributions. The course begins with a comprehensive look at the structure of the atmosphere to include the energy budget, heat transfer mechanisms, as well as an examination of daily and seasonal patterns of temperature. A thorough look at atmospheric moisture and stability precedes a study of cloud and precipitation processes followed by a study of the atmosphere in motion, namely air pressure, governing forces, winds, small and local-scale wind systems and the general circulation of the planet. Specific phenomena are then examined, including mid-latitude cyclones, thunderstorms/lightning, tornadoes, severe thunderstorms, hurricanes, air pollution, and a brief look at climate and climate change. The end of the course focuses on the art and science of weather forecasting and its applicability to military operations. In-class labs.

EV203X

EV388A	PHYSICAL GEOLOGY	3.5 Credit Hours (BS=2.0,ET=1.5,MA=0.0)
Scope:	2010-1	Offerings:
<p>This course primarily emphasizes learning to identify minerals and rocks and then applying this knowledge to analyze the significant geologic processes that act on and within the earth. These processes include plate tectonics, rock mechanics, geologic mapping, ground and surface water, and elements of mining and petroleum engineering. Field trips are conducted to illustrate how local geology has influenced development and construction in the Hudson Valley. The course is capstoned by an open-ended engineering problem which requires the creative application of geology to design a practical solution to a stated need. Cadets use a geologic exploration simulation to convert given resources optimally including safety and cost factors.</p>		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 12 @ 55 min

Prerequisite(s):	EV203	
Disqualifier(s):	EV399A	
EV388B	GEOMORPHOLOGY	3.0 Credit Hours (BS=3.0,ET=0.0,MA=0.0)
Scope:	2013-2	Offerings:
<p>This course studies the processes that create landforms on the surface of the earth and their regional and global distributions. The course focuses on processes and their inter-relationships with geologic structure, soils and climate. Processes emphasized include glaciers, streams, downslope motion caused by gravity, groundwater, coastlines, and eolian landscapes. Each student prepares a final report synthesizing these processes and how they relate to real-world applications.</p>		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min

Prerequisite(s):	EV203 -Or- EV203X	
EV389B	CLIMATOLOGY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2017-1	Offerings:
<p>Climatology investigates the earth's atmospheric phenomena, giving special attention to the dynamic physical processes which produce weather and result in distinctive climates across the planet. A primary focus of the course is to examine how the climate system can impact humans, including an examination of human health, agriculture, and military operations. A similar emphasis is placed on ways in which humans can alter the climate through urbanization, pollution, and increasing greenhouse gas concentrations. Climate change policy and mitigation are also explored through scientific readings, and as differing viewpoints are presented, lively discussion and debate are encouraged. Numerous case studies are offered throughout the course, allowing students to apply climate data and information to problem solving in real-world situations.</p>		2018-1 2019-1 2020-1
Lessons: 34 @ 55 min (2.500 Att/wk)	Labs: 6 @ 55 min

Prerequisite(s):	EV203	
EV390B	URBAN GEOGRAPHY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2004-2	Offerings:
<p>This course examines the location, function, structure, growth and interaction of urban areas. Spatial techniques are used to explore the internal attributes of cities, as well as their connectivity to other places. While the primary focus is on urbanization in the United States, primate cities abroad are often used for comparative purposes. Emphasis is placed on contemporary urban problems, particularly environmental issues and social disparities.</p>		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	One oral report.	

EV391_		0.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	1983-2	Offerings:
The course offers the cadet a variety of topics in land use planning from a geographic perspective. The topics customarily differ each semester and focus on the spatial aspects of land use planning. See EV391A and EV391B.		No Course Offerings
Lessons:	0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min
Special Requirements:	None	
EV391A	LAND USE PLAN & MGT	3.0 Credit Hours (BS=0.0,ET=0.5,MA=0.0)
Scope:	2012-1	Offerings:
An introduction to land use planning and management with focus on the land-law interfaces between the physical, cultural, and legal realms. The course surveys the policies and legislative basis for land use controls at the local, federal and regional levels to include national parks and forests, agricultural lands, rangelands, and military training areas. Natural resource management issues and strategies are explored. The importance of geographic concepts is emphasized in the conduct of applied case studies addressing land use conflicts and environmental strategies.		2018-1 2019-1 2020-1
Lessons:	40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min

EV391B	NATURAL HAZARDS AND RISK	3.0 Credit Hours (BS=3.0,ET=0.0,MA=0.0)
Scope:	2017-2	Offerings:
This course focuses on natural phenomena that pose hazards to people. The cause, nature, and occurrence frequency of natural hazards such as flooding, earthquakes, hurricanes, and volcanic activity will be examined. Emphasis will also be placed on how people perceive and respond to these hazards. Land use policies and practices in these hazard areas will also receive attention. Students participate in map based laboratory exercises and have the opportunity to write a short paper advising a government official how to mitigate local geohazards.		2018-2 2019-2 2020-2
Lessons:	37 @ 55 min (2.500 Att/wk)	Labs: 3 @ 55 min

EV396	ENVIRONMENTAL BIOLOGICAL SYS	3.5 Credit Hours (BS=1.0,ET=2.5,MA=0.0)
Scope:	2008-2	Offerings:

This course will examine biology from a practical environmental engineering and environmental science perspective. The foci of the course are applied public health, microbiology and microbial energetics. Specific topics include the biological health issues associated with drinking water, microbial aspects of industrial and domestic waste treatment and protection or restoration of natural water bodies from environmental contaminants. Students are also introduced to medical geography and the spatial biological health issues associated with a deployment. Laboratory exercises are used to introduce the student to water quality analyses and practices commonly used in the fields of environmental engineering and the environmental sciences.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 12 @ 55 min

EV397	AIR POLLUTION ENGINEERING	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	----------------------------------	--

Scope: 2008-2

Offerings:

This course employs a design approach to air pollution control. It begins by defining air pollution problems, to include pollutant types, sources, legislation, and effects on both local and global scales. The course then examines the design of various means of controlling particulate and gaseous air pollution from both mobile and stationary sources. Finally, students study the link between meteorology and air pollution, as well as pollutant dispersion modeling in the atmosphere. The culminating course project involves a numerical approach to dispersion modeling that incorporates modeling and solution optimization.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: Field Trip(s).

Prerequisite(s): EV203

EV398	GEOG INFORMATION SYSTEMS	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	---------------------------------	--

Scope: 1997-2

Offerings:

Geographic information systems are hardware/software systems that permit the input, storage, retrieval, manipulation, analysis, and display of geocoded data. Used by environmentalists, engineers, land-use planners, architects, managers of large land holdings, and the military, these highly-intricate "decision support" systems assist managers in answering important "what if" questions. Using digitizers and microcomputers students will build a geocoded database and solve "real-world" problems.

Lessons: 33 @ 55 min (2.500 Att/wk) **Labs:** 7 @ 55 min

Special Requirements: Short oral reports, one database design; compensatory time provided.

Prerequisite(s): EV203
-Or-
EV203X

EV399A	GEOLOGY FIELD COURSE	3.0 Credit Hours (BS=3.0,ET=0.0,MA=0.0)
---------------	-----------------------------	--

Scope: 2013-4

Offerings:

The geology field course is a summer Individual Advanced Development Program normally run in early June. It is taught in a hands-on manner in various geologically appropriate settings throughout the United States. Geologic concepts are presented outdoors in the field where cadets can actively observe them. The course provides the cadet with knowledge of and appreciation for the science of geology as well as practical experience in field observations and an intimate look at how geology affects human civilization.

Lessons: 0 @ 0 min (0.000 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: TDY travel to the course location in the western USA; excursions to remote field locations; one graded geologic mapping exercise.

Prerequisite(s): EV203

Disqualifier(s): EV388A

EV400	ENVIRONMENTAL ENGINEERING SEM	1.0 Credit Hours (BS=0.0,ET=1.0,MA=0.0)
Scope:	2009-2	Offerings:
This seminar will meet once each week and will include all first class cadets majoring in environmental engineering. The seminar topics will address a variety of fundamental engineering science, design, and professional practice topics including engineering ethics, economics, and licensing. Periodically, guest lecturers from the military, industrial, and academic communities will provide their prospective on these topics.		2018-2 2019-2 2020-2
Lessons: 13 @ 55 min (1.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
Corequisite(s):	EV490	
EV401	PHYS & CHEM TREATMENT	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
Scope:	2008-2	Offerings:
This course takes a process approach to environmental engineering using engineering science and design of drinking water treatment systems as the primary foci. Building upon concepts gained in environmental chemistry, cadets study physical and chemical processes used in environmental engineering. Discussion includes the theories behind these processes and the design procedures involved in their application. Cadets develop comprehensive concept design of drinking water treatment processes. While the focus of the course is drinking water treatment, the processes developed are also applicable to wastewater treatment, groundwater remediation, air pollution control, and the treatment of solid and hazardous wastes.		2018-2 2019-2 2020-2

EV450	ENV ENG FOR COMMUNITY DEVELOP	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2014-1	Offerings:

This course is the capstone experience for a three-course environmental engineering sequence. It balances engineered solutions to technologic problems with economic, socio-cultural, and political considerations evaluated during a decision-making process. With a focus on water and sanitation challenges in the developing world, students assess various technologies and their ability to meet community needs. The course highlights the engineering design process to develop appropriate solutions and introduces decision modeling with consideration of social, political, and economic factors. A semester-long term project leverages real world case studies to provide cadet teams an opportunity to apply knowledge and creatively design sustainable solutions to ill-defined problems. Students must make logical assumptions throughout the project, present and evaluate solution designs, and prepare a formal written report defending their selected course of action.

No Course Offerings

Lessons: 40 @ 55 min (2.500 Att/wk)**Labs:** 0 @ 0 min**Special Requirements:**

Must be a First Class cadet. Each cadet will complete a paper and oral presentation on a contemporary water resources project.

EV477	ADVANCED REMOTE SENSING	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	--------------------------------	--

Scope: 2002-1

Offerings:

This course examines advanced remote sensing theory and digital image processing techniques suitable for the processing of remotely sensed data. Emphasis is on the processing and analysis of state-of-the-art high spatial and spectral resolution data gathered by airborne and satellite sensors. Topics covered include geometric and radiometric image rectification, registration and resampling techniques, image enhancements, data merging, image segmentation, and automated feature extraction. A wide range of practical exercises and in-class laboratory assignments provides hands-on experience with a variety of remotely sensed imagery ranging from multi-spectral to hyper-spectral data. The course culminates with a capstone term project that allows cadets to apply digital image processing skills to a scientific problem.

2018-2 2019-2 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: In-class labs; term project. Compensatory time provided.

Prerequisite(s): EV203 EV377
-Or-
EV203X EV377

EV478	MILITARY GEOSPATIAL OPERATIONS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------------	--

Scope: 2013-2

Offerings:

This course is designed to teach the most current state of geospatial operations in the military. It is built to provide the student an improved understanding of the cornerstone to the digital force - the "common operational picture" or COP. This course is divided into five major blocks of instruction: (1) a linked discussion of geospatial operations' development, organizations and data systems; (2) the geographic information system (GIS) as a military tool - system input, management, data analysis and production outputs; (3) Army geospatial operations in the garrison environment; (4) Army geospatial operations in combat environments; and (5) geospatial operations for joint/coalition forces. The course includes several relevant practical exercises and laboratories, a field trip, guest lectures and one panel discussion. Due to the currency of the material discussed a secret security clearance is required for all participants.

2018-2 2019-2 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: None

EV203X

EV480	HONORS SEMINAR IN GEOGRAPHY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	------------------------------------	--

Scope: 2007-1

Offerings:

This course will examine major research initiatives in the discipline and delineate their data requirements. The primary objective of this course is to identify and outline the senior thesis, which is the culminating event for the Honors Program. Hence, cadets participating in this course will explore research methods and data sources used by geographers, conduct a critical analysis of seminal literature in the field, define a research problem, identify and evaluate data sources, and assemble a research proposal. The final product of this course will be a written research proposal that will define the senior thesis (written during EV489B). The cadet will make a formal presentation of this proposal to senior geography faculty. The course is conducted in a seminar and one-and-one format. Lessons and labs are established by consultation between the cadet and faculty advisor.

2018-1 2019-1 2020-1

Lessons: 0 @ 0 min (0.000 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: Senior Thesis or as determined by the faculty advisor.

Prerequisite(s): EV203
-Or-
EV203X

EV481	WATER RESOURCES PLAN & DESIGN	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	--	--

Scope: 2014-1

Offerings:

The course is concerned with effective use of water as a manageable natural resource. It begins with instruction on the tools required by water resource managers to make sound decisions in their field. The course assesses current needs for water and the structural (engineered) and non-structural approaches available to meet these needs. Elements of engineering design and the design process are introduced. The bulk of the course is concerned with assessment of the impacts of various water resources development activities on the economic, socio-cultural and ecological sectors of the environment. Methods for conducting tradeoff analyses among the engineered and environmental aspects of projects are developed and applied in a term project. The course makes use of case studies of current water resource projects. Visiting speakers represent the views of the Federal government and concerned public interest groups.

2018-1 2018-2 2019-2
2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: Written and oral research reports on a contemporary water resources project.
Standing as First Class cadet.

EV482	MILITARY GEOGRAPHY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------	--

Scope: 2003-1

Offerings:

History is replete with examples of the impact of terrain, weather and climate on military operations at all scales. National strategies are influenced heavily by geographic realities of relative location, spatial interaction, population dynamics and resource distribution. This course emphasizes the development of a geographic method for systematic analysis of the battlefield that is appropriate for platoon leader and corps commander alike. Students evaluate the elements of national power and examine their geostrategic influences, past and present. The role of the environment in shaping today's Army and its missions is discussed. Jungle, cold region, alpine, riverine, desert, temperate and urban operational environments are examined for their effect on military planning and execution. Finally, cadets review case studies of the impact of these diverse environments on military operations at the tactical level.

2018-2 2019-2 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: One oral presentation and one written research project.

Prerequisite(s): EV203
-Or-
EV203X

EV483	COLLOQUIUM IN GEOGRAPHY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--------------------------------	--

Scope: 1981-1

Offerings:

The colloquium is a directed readings course using small group discussions of important literature, methodological traditions, and contemporary research trends in the field of geography. Dependent on instructor preference and individual student interest, in-depth readings will be pursued in one or more of the following areas of geographic study: cultural, political, regional or military geography. Compensatory time is given to permit extra readings.

2019-1 2020-1

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: A research proposal and its oral presentation.

Prerequisite(s): EV203 EV365
-Or-
EV203X EV365

EV485	SPEC TOPICS-GEOG & ENVRNMNT	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--	--

Scope: 1999-1

Offerings:

This course explores an advanced topic in Human and Regional Geography, Environmental Geography, Environmental Science, Environmental Engineering, or Geospatial Information Science. Specific subject matter will vary with the expertise of the visiting professor or senior faculty member conducting the course.

2018-2 2019-2 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: As specified by the professor.

Prerequisite(s):	EV203 -Or- EV203X	
EV486	ENVIRONMENT AND DEVELOPMENT	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2015-2	Offerings:
Whereas physical geographers focus on the earth's surface and atmosphere, and human geographers concentrate on the spatial aspect of human activities, environmental geographers are interested in both how people adapt to specific environments and how they alter those environments through human activities. To understand these interactions and their implications, environmental geographers must fully appreciate natural processes and landform development within and on the surface of the Earth, as well as the implications of human intervention in the natural system.		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
Prerequisite(s):	EV203 EV365 -Or- EV203X EV365	
EV487	ENVIRONMENTAL SECURITY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2017-2	Offerings:
This interdisciplinary seminar uses Environmental Security in a case study approach to analyze how environmental issues affect U.S. National Security. Cadets explore environmental security topics such as water, natural resource shortages, energy use and dependency, and global climate change using an interdisciplinary approach from social, political, economic, and scientific-technological perspectives. The course culminates in a student team analysis of a developing country relating environmental security issues to U.S. National Security interests. The final project includes a formal brief and written paper.		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Standing as a first class cadet required for enrollment.	
EV488	SOLID & HAZ WASTE TREAT & REMD	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
Scope:	2017-2	Offerings:
This course examines the treatment, storage and disposal of solid and hazardous wastes. Both regulatory requirements and evolving technology associated with solving modern solid waste disposal problems are discussed. Design of remediation processes for cleanup of contaminated waste sites are presented. Students design and conduct experiments to assess the efficiency of a hazardous waste treatment process or solve a problem associated with a variety of hazardous waste treatment technologies.		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 7 @ 120 min	
Special Requirements:	Design of a laboratory experiment.	
Prerequisite(s):	EV402	
EV489A	ADVANCED INDIVIDUAL STUDY I	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2007-1	Offerings:
The course is an individually supervised research and study program designed to provide cadets with the opportunity to pursue advanced topics within their discipline. The cadet prepares a research and study proposal setting forth the objectives, scope, and anticipated accomplishments of his/her efforts for the semester. If required for a specific degree, the proposal will include a justification for engineering science or design credit. Once approved, the proposal serves as a basis for the cadet's research and study program. Progress in research reports and observations by the faculty advisor form the basis for grades. The program for each cadet will culminate in one of two outcomes: 1) a discipline-appropriate written product (e.g., senior thesis or design project) with oral defense; or 2) enrollment in EV489B for the completion of the research and study program during the second academic term. Lessons and labs are established by consultation between the cadet and faculty advisor.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Senior Thesis or as determined by faculty advisor. Project dependent BS, ES, ED credit.	

EV489B	ADVANCED INDIVIDUAL STUDY II	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2008-2	Offerings:
<p>The course is an individually supervised research and study program designed to provide cadets with the opportunity to pursue advanced topics within their discipline. The cadet uses a research and study proposal setting forth the objectives, scope, and anticipated accomplishments of his/her efforts for the semester. If required for a specific degree, the proposal will include a justification for engineering science or design credit. The proposal serves as a basis for the cadet's research and study program. Progress in research reports and observations by the faculty advisor form the basis for grades. Prerequisite(s):	EV480 -Or- EV489A	
EV490	ADV ENVIRON ENG DESIGN	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
Scope:	2013-2	Offerings:
<p>This is the final design course for the major in environmental engineering. Cadets experience the complete design experience including defining the project scope, identifying design constraints, comparing alternatives, development of plans and specifications, engineering economics, and project management. The course centers on a senior design project that requires the integration of concepts developed in previous courses. Working in teams, cadets examine projects through the feasibility and concept design phases to evolve and develop concepts that are not only technically feasible, but economically, socially, and politically acceptable. The evaluation of alternatives employs trade-off analysis and the use of multi-attribute decision models. The final product includes a formal oral briefing and written design specifications. In addition to project management, course lectures cover topical coverage of fundamental engineering topics relevant to the problems under study.</p>		2018-2
Lessons: 40 @ 55 min (0.000 Att/wk)	Labs: 12 @ 55 min	
Special Requirements:	One design problem. Standing as a first class cadet is required for enrollment.	
Prerequisite(s):	EV301 -Or- EV385	
EV490	ENVIRON ENG DESIGN	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2019-1	Offerings:
<p>This is the first in a sequence of two courses that comprise the environmental engineering integrative experience. In this senior engineering design course, teams of cadets apply the engineering design process to develop alternative solutions to complex, open-ended environmental engineering problems. In addition, cadets are introduced to techniques, skills, and modern engineering tools required for the engineering design process. The course culminates with a decision brief and report in which teams present a conceptual (35%) design for their recommended solution alternative, as well as their analysis of the engineering, social, economic, and environmental criteria that led them to recommend this course of action. The approved design alternative will be completed the following semester in EV491 Advanced Environmental Engineering Design.</p>		2019-1 2020-1
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Standing as a first class cadet.	
Prerequisite(s):	EV481	
EV491	ADV ENVIRON ENG DESIGN	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2019-2	Offerings:
<p>This is the second in a sequence of two courses that comprise the environmental engineering integrative experience. In this senior engineering design course, teams of cadets refine and finalize the conceptual designs they produced at the end of EV490 to solve a complex, open-ended environmental engineering problem. Ensuring that the complete design meets specified engineering, social, environmental, and economic criteria, they present the results both orally and in a written report. This course also introduces cadets to the engineering profession, to include engineering ethics and an emphasis on continued study to earn professional certifications.</p>		2019-2 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: One design problem. Standing as a first class cadet is required for enrollment.

Prerequisite(s): EV490

EV498	ADV GEOGRAPHIC INFORMATION SYS	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	---------------------------------------	--

Scope: 2005-1

Offerings:

This course examines the analytical methods used in Geographic Information systems (GIS) and provides cadets with a clear understanding of the theoretical/conceptual aspects of algorithms found in GIS software. Lectures focus on the underlying mathematical basis for widely used spatial analytical techniques. Among the topics covered are neighborhood operations, map transformation, spatial interpolation, terrain analysis, network analysis, spatial overlay, fuzzy sets, neural networks, and expert systems. In-class practical exercises and laboratory assignments compliment the lectures by providing hands-on experience with a variety of advanced analytical techniques. The course culminates with a capstone term project that allows cadets to identify a scientific problem, formulate a hypothesis, use GIS to solve the problem, and then present the results of their analysis.

2018-1 2019-1 2020-1

Lessons: 30 @ 55 min (2.500 Att/wk) **Labs:** 10 @ 55 min

Special Requirements: Term project. Compensatory time provided.

XS391	PRIN & APPL OF ENV CHEM	3.0 Credit Hours (BS=0.5,ET=2.5,MA=0.0)
--------------	------------------------------------	--

Scope: 2011-1

Offerings:

This course examines chemical interactions of pollutants in air, soil, and water systems. The focus of the course is problem solving with the following topic coverage: approximately 80% applied aquatic chemistry, 15% environmental organic chemistry, and 5% applied analytical chemistry. Specific topics include the chemistry applied in drinking water production and the chemical aspects of industrial and hazardous waste treatment. The fate of heavy metals and organic contaminants in soil and aqueous systems is also discussed.

2018-2 2019-2 2020-2

85 Courses

HI105	HISTORY OF THE UNITED STATES	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2017-1	Offerings:
HI105, History of the United States, addresses the social, political, economic, foreign relations, and sectional of the nation from its colonial roots through the end of the 20th century. The course consists of three blocks of instruction, each followed by a major examination. Although this course is complete in itself, it complements HI108, Regional Studies in World History, by providing cadets an understanding of their own culture as a basis for studying foreign cultures. The course also develops methods of historical research and analysis, critical thinking, lucid writing, and effective participation in classroom discussion.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2

HI108	REGIONAL STUDIES IN WORLD HIST	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2017-2	Offerings:
HI108, Regional Studies in World History, is a detailed study of the development and critical events in the history of one of six regions: Africa (stem identifier A), East Asia (E), Latin America (L), the Middle East (M), Russia (R), or Europe (U). The focus on one region enables cadets to develop a deeper understanding of a different culture and unfamiliar ideas and concepts. The course also develops methods of historical research and analysis, critical thinking, lucid writing, and effective participation in classroom discussion. HI108 combines with either HI105 or HI155 to form the plebe history sequence of the Core Academic Program.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2

Scope:	2013-1	Offerings:
This course encompasses the same chronological period and thematic coverage as HI108, but it does so through monographic and periodical literature and a greater emphasis on classroom discussion. These courses assume some familiarity with history and consequently place special emphasis on historical analysis and criticism. Moreover, students acquire a broader understanding of history and the historian's methods.		No Course Offerings
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Several critical analyses of historical literature in the first term and a research paper of 1500 words in the second; compensatory time provided.

HI158A	ADV REG ST WORLD HIST - AFRICA	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2017-1	Offerings:
HI158X, Advanced Regional Studies in World History, is a detailed study of the development and critical events in the history of one of six regions, each with its own letter designation. As the stems are all a part of one course, cadets may not take multiple stems as electives. The focus on one region enables cadets to develop a deeper understanding of a different culture and unfamiliar ideas and concepts. The course also develops methods of historical research and analysis, critical thinking, lucid writing, and effective participation in classroom discussion. HI158A combines with HI105 or HI155 to form the plebe history sequence of the Core Academic Program. The Africa stem (identifier A) challenges cadets to study how social, political, economic, technological, and military factors have influenced international and multicultural relations and how these relations have influenced the development of specific societies, polities, cultures, economies, technologies, military systems, and gender roles throughout Africa. The course is for cadets who have demonstrated advanced proficiency in history courses.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2

HI337	CHINA-C. KINGDOM TO COMM RULE	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--------------------------------------	--

Scope: 2008-1

Offerings:

This course traces the history of China from ancient times to the present. It briefly introduces the emergence of a distinct Chinese civilization, in thought, culture, and political structure. It then considers how China was transformed by the introduction of Buddhism and the experience of cosmopolitan empire under the Tang. Next it examines how China fared in the multi-state system that endured from 960 to the Mongol conquest, and then as the Late Imperial state under the Ming and 'foreign' Manchu rule. It considers the search for 'new China' in the Republican, Warlord, and Nationalist periods following the collapse of the Late Imperial state. It shows why Mao came to represent a new utopian vision and how that vision tragically failed. Finally, the course explores how the search for 'new China' and historical legitimacy continues today both on the mainland and in Taiwan.

HI338	WARFARE IN AGE OF REVOLUTIONS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--------------------------------------	--

Scope:	2008-2	Offerings:
---------------	--------	-------------------

This course examines the theory and practice of warfare in Europe during the Age of Revolutions, roughly considered to be 1750 to 1814. Political revolutions such as the American and French Revolutions, along with other revolutions such as the Agricultural and the Industrial, and the intellectual ferment spawned by the Age of Enlightenment, all resulted in significant changes in the conduct of warfare. This course will examine those events, with particular focus on their relevance to the art of warfare. Themes include changes in military organization, doctrine, technology, and the accompanying social, political, and economic factors that influenced the armies of the day. The course will also cover the wars and campaigns that took place during this timeframe, including the American and French Revolutions and the wars of Napoleon.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

HI339	THE MODERN MIDDLE EAST	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-------------------------------	--

Scope:	2009-1	Offerings:
---------------	--------	-------------------

This course enables cadets to explore the social, political, economic, and military interactions in the formation of the Modern Middle East. The first block examines the decline of the Gunpowder Empires and the subsequent penetration of European colonialism into the Islamic world (India, North Africa, Egypt, and the Levant), with emphasis on the factors that led to military decline of the Turkic world and the relative economic and military advantages of the European powers. During this block, students will discuss the Middle East's modernizing and reform efforts that European colonialism helped to catalyze, to include democratization, constitutions, capitalism, and industrialization. The second block covers the events that follow the World Wars and subsequent decolonization of the Middle East against the backdrop of the Cold War. Cadets will closely examine the Arab-Israeli conflict, the rise of Arab Nationalism and the tension between military revolutionary dictatorship and attempts at constitutional monarchy and republics. The final phase will begin with the Iranian revolution of 1979 and the Soviet invasion of Afghanistan. It will consider the rise of political Islam as a

revolutionary ideology and the post-Cold War challenges leading to current wars and insurrections.

--------------	-------------------------------	--

Scope:	2008-2	Offerings:
---------------	--------	-------------------

This course concentrates on the on the 'age of exploration' and its impact on the Early Modern World, 1453-1715. It provides students interested in the history of Early Modern Europe, the Atlantic world, the history of Africa and colonial Latin America a general understanding of the ideologies and institutions that enabled Europe to colonize parts of Africa and the Americas during this important period in world history. Specific topics include: medieval precedents of early modern imperialism; theories of monarchy and empire; ideologies of conquest and colonization; the continuity of Native cultures and beliefs; the relevance of race and slavery in understanding European influence in Africa and the Americas; and the creation of an Atlantic economy.

HI342	THE BRITISH ISLES SINCE 1688	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-------------------------------------	--

Scope:	2009-2	Offerings:
---------------	--------	-------------------

This course examines the rise and fall of one of the greatest empires of modern history. How did a tiny, insular nation become the world's most formidable imperialistic power and then, in the afterglow of high Victorian achievement, evolve into a post-industrial welfare state? In answering this question students will have the opportunity to deal with the great military, social, economic, and political issues that shaped modern Europe. Key events and themes include the Glorious Revolution, the Seven Years' War, the loss of the American colonies, the impact of the French Revolution and Industrial Revolution, the rise of democracy, the triumph of socialism, the age of total war, and the transition to the Cold War.

HI343	MODERN GERMANY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-----------------------	--

Scope:	2008-2	Offerings:
---------------	--------	-------------------

This course is a survey of the German lands from the dawn of the modern era through contemporary times. The course will combine social, political, economic, and cultural history in examining crucial themes and developments related to the German-speaking regions. Cadets will consider German nation and state formation; social, demographic, and economic transformation; imperialism, war and ideological change; the transformation of male and female roles; and trends in high and popular culture. The course will include a significant segment on twentieth-century Germany and the role the German state played in determining the course of world history, whether as the Nazi state that unleashed the Holocaust or as the West German Cold War bulwark. German history has much to teach us, and has led to enormous debates about the nature of the modern era.

HI344	MODERN DIPLOMACY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-------------------------	--

Scope:	2009-2	Offerings:
---------------	--------	-------------------

The course focuses on the major diplomatic developments in Europe from 1814 through the end of the Cold War in 1991. It traces the emergence of the European state system after the Treaty of Westphalia and the impact of the revolution in France on European diplomatic relations. It examines the diplomatic system established at the Congress of Vienna through the crises and conflicts of the mid-19th century. The course also examines the various factors that led to the First World War, the developments of the interwar period, the origins and conduct of the Second World War, and the origins of the Cold War. The final lessons will explore Europe's role in the Cold War, the rise of international organizations, trans-national diplomacy, the end of the Cold War, and recent modifications to Europe's role in world affairs.

HI345	MODERN AFRICA	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	----------------------	--

Scope:	2008-1	Offerings:
---------------	--------	-------------------

This course takes a thematic approach to African history, describing the forces which led to the partitioning of the continent, the practices of European colonialism/imperialism, the emergence of independent African states, and political, economic, and social developments in contemporary Africa. The goal of the course is to focus on critical events, relationships, and themes on the continent that continue to effect current events.

HI346	MODERN SOUTH ASIA	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--------------------------	--

Scope: 2008-2 **Offerings:**

This course enables cadets to explore the social, political, economic, religious, and cultural history of modern South Asia. The course will examine the foundation of Indian religious and cultural traditions, and the related social, political, and economic developments in early India. It then examines the late Mughal Empire, the domination of India by the British, the struggles for independence, and the partition of South Asia into India, Pakistan, and Bangladesh in the contemporary era.

HI347	ASIAN WARFARE AND POLITICS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-----------------------------------	--

Scope: 2009-1 **Offerings:**

This course explores the interaction between warfare and political systems in East Asia. It begins with the transition from military monarchy to bureaucratic empire in the Warring States Period. It then maps the rise of nomadic confederations in the Inner Asian steppe and their strategic interaction with the Han state. It traces how the collapse of the Han state led to military turmoil in East Asia, the rise of hybrid states, a new cosmopolitan empire, and then a multi-state system. It considers how in Japan, the importation of the bureaucratic state led first to centralization and then to the rise of the samurai and a feudal structure. Next, the course examines the development of a new form of nomadic confederation under the Mongols, and how Mongol warfare led to a more centralized state in China, and turmoil and a federalist system in Japan. In the modern period, the course considers how the challenge of Western military force led to political turmoil and the rise of the Communists in China, but in Japan led to the building of the Imperial Army, noted for its competence and for its atrocities. The course concludes with reflection on how the experience of war in East Asia continues to affect the region's politics and political structures.

HI348	MODERN LATIN AMERICA	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-----------------------------	--

Scope: 2009-1 **Offerings:**

This course surveys the cultural, economic, political, and social evolution of Latin America from the era of independence to the present. The course begins with a brief examination of Pre-Colombian and colonial events and structures. Students will study the economic development of modern Latin America and its influence on social, political, and military change. Case studies of national histories, such as Mexico, Cuba, Brazil, Argentina, and other countries help to illuminate the broad themes that underlie modern Latin American history. The course will examine Latin American relations with the United States and other nations of the world.

HI349	THE MIDDLE EAST TO 1798	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--------------------------------	--

Scope: 2008-1

Offerings:

This course enables cadets to explore the social, political, economic, and military interactions in the development of the Islamic world before European colonization. The first block examines the growth of the Islamic world from the advent of Muhammad and through the early phases of military conquest, with emphasis on the why Islam was appealing in its formative era, how the religion was structured, and what factors allowed for its political, economic and military success. The second block covers the subsequent evolution of the Caliphal empires, emphasizing the changing nature of political authority and legitimacy, the evolution of political institutions, and the challenges to Caliphal hegemony. The third block will examine the arrival of the Steppe peoples into the Middle East (Mamluks, Seljuk Turks, Mongols), and how new political, social and military structures were introduced, eventually shaping the development of the late Turkic Gunpowder Empires: the Ottomans of Europe and the Near East, the Safavids of Iran and Central Asia, and the Mughals of India. Cadets will assess what created the military strength of these empires and what led to their decline.

HI355	WARFARE-AGE OF INDUSTRIALIZTN	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--------------------------------------	--

Scope:	2009-2	Offerings:
This course examines the history of warfare around the globe from the Congress of Vienna through World War I and its aftermath. It combines the study of military campaigns with the political, economic, social, and cultural factors shaping military developments. It explores the impact of changing technology on the conduct of war, the development of nationalism, wars between nation-states, and wars for national freedom. This course contains several themes particularly useful to any modern soldier. Among them are the nature and intensity of national wars and the effect of changing technology on society and the conduct of war.		2019-2 2021-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

HI356	WAR AT SEA AND IN THE AIR	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	----------------------------------	--

Scope:	2009-2	Offerings:
This course examines war at sea from the early days of galley warfare through the ages of sail, steam power, all-steel navies, nuclear power and missiles. War in the air is examined from the early days of balloons and lighter-than-air ships through missile age. Course themes include the evolution of military organizations, technology, strategy, leadership and the accompanying social, political, and economic factors that influenced the navies and air forces of the day. The course will also cover selected wars and campaigns in which naval and air power played an important role.		2019-2 2021-2

HI357	WARFARE SINCE 1945	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------	--

Scope:	2008-1	Offerings:
The nature of warfare has changed dramatically since 1945. During the Cold War, American policies of containment and collective security collided with attempts at communist expansion. The threat of nuclear war led to an era of limited war, including revolutionary war, wars of national liberation, and civil wars. Cadets will examine the strategic conditions and political considerations influencing the use of force in all types of warfare. They will gain an appreciation for the experiences of soldiers and leaders in combat while analyzing military strategy and exploring the connection between war and society.		2018-1 2019-1 2020-1 2021-1

HI358	STRATEGY, POLICY & GENERALSHIP	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---	--

Scope: 2008-1

Offerings:

This course examines how political and military leaders develop and execute policy and strategy. The course begins with an examination of the rise of military professionalism and the creation of military staffs in the nineteenth century. It explores how political and military leaders integrate not only military power, but also diplomatic, economic, technological, social, and political resources to achieve a nation's goals. In particular, the course examines the often contentious issues of civil-military relations, joint and coalition warfare, and organizational and doctrinal change. Cadets study the strategic challenges faced by senior civilians and military leaders, thus allowing them to analyze warfare within a broader political-military context.

HI359	ERA OF THE SECOND WORLD WAR	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	------------------------------------	--

Scope: 2008-1

Offerings:

This course examines the Interwar Years, 1919-1939, and the Second World War from a global perspective while using a thematic approach to compare the different experiences of each of the major belligerents. Whether covering the Versailles Treaty, the rise of Adolf Hitler, the US Army during the Great Depression, home fronts, or the Holocaust, the cadets in the course will examine the social, political, cultural, and economic factors that contributed to how belligerents waged war, and, in turn, how war affected each of these factors across the globe. The course covers how and why the belligerents planned and executed particular strategies and operations in the European, Pacific, and China-Burma-India theaters to achieve their coalition and national goals. Finally, this course examines the interrelationship of sea, air, and land forces, and the complexities of providing logistical support to joint and combined operations on an unprecedented scale.

HI361	MEDIEVAL EUROPE	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	------------------------	--

Scope: 2009-2

Offerings:

The millennium between the "fall" of the Roman Empire and the Voyages of Discovery--the Middle Ages--has often been characterized as brutish and inferior. Yet, this tough, fascinating society offered immeasurable potential for growth and adaptation. The personages and events of the European medieval world spawned many of the ideas and institutions of modernity. Topics for study will include the barbarian invasions, Byzantine Empire, Carolingian Europe, feudalism, medieval technology, Christian Church, medieval warfare, Crusades, rise of universities, crises of the 14th century, growth of monarchical power, and economic and social change.

HI362	POLITICS/SOC-EARLY MOD EURO	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	------------------------------------	--

Scope: 1990-1

Offerings:

After tracing the legacy of the middle ages, this course concentrates on the development of the modern nation state in Europe, 1453-1648. Specific topics include the renaissance, humanism, the reformation, the age of religious wars, and the contrast between the growth of absolutist and constitutional governments. The latter portion of the course concentrates on the political, social, economic, diplomatic, and military trends that shaped modern Europe.

HI364	MODERN WESTERN EUROPE	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	------------------------------	--

Scope: 2008-2

Offerings:

This course is an introduction to European history from 1789 to the present. The course considers how and why Europe -- a small, relatively poor, and politically fragmented place -- became the engine of globalization and an important civilization in its own right. Our approach is broadly cultural, using politics, economics, society, religion, and other arenas to understand the events and people of Modern Western Europe. Chief topics: French Revolution, liberalism and the industrial revolution, socialism and the rise of labor, modern colonialism, world wars, communism and capitalism, decolonization, Cold War, and the European Union.

HI365	THE ANCIENT WORLD	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--------------------------	--

Scope: 2009-2

Offerings:

This course examines the political development, cultural ideas, and fundamental institutions of the ancient societies that form the basis of Western civilization. The course will focus on civic values that established standards regarding the role of the individual within the community, and how concepts of virtue, duty, and service evolved over time in response to internal and external challenges. It explores in detail significant historical questions such as how Athenian democracy contributed to, and was dramatically affected by, the Peloponnesian Wars, and why the Romans' victory in the Punic Wars planted the seeds for the ultimate demise of the Republic and the transition to the Empire. HI365 also serves as an introduction to historical methods of analyzing primary sources. Cadets will read extensively from histories written by ancient Greek and Roman authors and form their own interpretations of the events the writers cover, their historical methods, and their reliability.

HI367	IMPERIAL AND SOVIET RUSSIA	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-----------------------------------	--

Scope:	2009-1	Offerings:
---------------	--------	-------------------

This course examines the political, social, and cultural history of Russia as it emerged from the Mongol era up to the present day. It explores the development of the Tsarist political and social systems, the emergence of literary, artistic, and revolutionary movements, and the development of Russia's position in European politics from the time of Peter I through WWI. It also covers the rise of the Soviet Union, the leadership's attempts to implement communist ideology and responses to that attempt, Russia's relationship with various national and ethnic groups, and the emergence of the Soviet Union as a superpower. The course concludes with the collapse of the Soviet Union and the emergence of new states in the 1990s.

HI368	MOD CENTRAL & E. EUR,1896-1989	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---	--

Scope:	2008-1	Offerings:
---------------	--------	-------------------

Between 1896 and 1989, Central and Eastern Europe experienced two world wars, at least three major revolutions, and radical industrial and environmental dislocations. The region witnessed everything from the birth of its modern culture to the creation of new post-World War I nation-states, to the Holocaust, to massive forced population shifts, to the creation of the communist Eastern Bloc, to the popular overthrow of Communism in 1989. Radical regimes on the right and left brought incredible change, quashed hopes, and produced both progress and suffering of unprecedented proportion. This course will examine life in late-19th and 20th century Habsburg Europe and its successor states of Poland, Hungary, Czechoslovakia, and Yugoslavia. It will do so comparatively, highlighting themes of nation-creation, everyday life, social transition, war, revolution, and ethnic cleansing.

HI369	AMERICAN FRONTIERS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------	--

Scope:	2007-2	Offerings:
---------------	--------	-------------------

HI 369 enables cadets to explore the social, political, economic, and military interactions between many diverse cultures in North America during the period of European and U.S. expansion since 1500. The course does this by examining the history of Native America and the "American" West, which included much of colonial British North America, and much of the American South through the 1830s, along with Spanish, French, and other European frontiers in North America. The course integrates Native American, Latino, and economic history in the study of migration, cultural contact, and "international" relations on the frontiers of North America. The course also explores change and diversity in cultural perspectives by examining myths of the West from a range of ethnic and other viewpoints. The course is an elective in the American History stem of the history program, but can be taken for credit in the International stem as well.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

HI370	ANCIENT & MEDIEVAL WARFARE	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	1999-1	Offerings:
<p>This course focuses on warfare from the dawn of recorded history through the fourteenth century. Thus, it will provide cadets with opportunities to study the campaigns of Alexander, the military methods of the Romans, the military aspects of feudalism, the Scottish war of independence, and other topics which are not covered in the core military courses. Although the course includes in-depth analyses of certain battles and campaigns, it places more emphasis on "war and society" issues such as the relationship between military participation and social standing in human societies, the connections between armies and governments, and the impact of economic, technological and social change on military structures. Also, HI370 will shift some emphasis away from the operational level of war to the analysis of the strategic and tactical levels of war, and away from use of secondary sources to use of primary materials.</p>		2018-2 2020-2

HI375	HISTORY OF CHINA	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	1975-1	Offerings:

This course begins with the emergence of distinct Chinese civilization and the rich legacies of early and dynastic China. It will then trace the history of the imperial period from the creation of the state, through the rise of different dynasties, barbarian invasion, and Mongol occupation, until the height of imperial power under the rule of the foreign Manchus. It will move to consider why China had such difficulty with its Western contacts in the 19th century and why China has experienced such turmoil in the 20th century. The course concludes by examining Mao's rise to power and the tragic events that followed. The emergence of Taiwan as a separate regional power is also discussed.

HI376	EARLY MODERN WARFARE	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-----------------------------	--

Scope:	2009-2	Offerings:
---------------	--------	-------------------

This course examines the history of warfare in Europe from the Renaissance through the campaigns of Frederick the Great. It combines the study of military campaigns with that of the political, economic, social, and cultural factors shaping military developments. It explores the so-called "Military Revolution" of the sixteenth and seventeenth centuries with particular emphasis on the relationships between military developments and state building, the rise of absolutism in France and the Wars of Louis XIV, and the rise of Prussia and the Wars of Frederick the Great. Study of the so-called "age of limited war" sets the stage for future study of the American Revolution and the Wars of the French Revolutions and Napoleon. This course contains several themes particularly useful to the modern soldier. Among them are the nature, intensity, and complexity of wars of religion.

HI379	HISTORY OF LATIN AMERICA	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------	--

Scope:	1978-1	Offerings:
---------------	--------	-------------------

This course surveys the political, economic, and social evolution of Latin America by tracing its history from Pre-Colombian times through the 20th century. Beginning with an exploration of the three races that blend to create a unique Latin American culture, the course surveys the wide scope of Latin American history that has created Latin America, as we know it today. Specific attention is paid to the period of Spanish and Portuguese conquest and colonization, Latin America's fight for independence, and the subsequent struggle to build sovereign, modernized nations in the 19th century. This course ends by looking at the social revolutions and guerrilla insurgencies of the 20th century, and Latin America's attempt to overcome its historical problems of political instability, economic underdevelopment, and social stratification.

HI381	HISTORY OF IRREGULAR WARFARE	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-------------------------------------	--

Scope:	2011-1	Offerings:
---------------	--------	-------------------

The course examines unconventional warfare from a historical perspective, particularly conflicts involving opponents with a significant disparity in their conventional military capabilities. Through several case studies, the course explores why belligerents succeed or fail in unconventional warfare and how ideology, technology, and social, political, and economic factors help determine the outcome of wars between regular and irregular forces. Covering a broad period of history, selected case studies include wars of conquest or colonization, revolutionary wars, and peacekeeping or constabulary operations.

HI385	WAR & ITS THEORISTS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--------------------------------	--

Scope: 1978-1

Offerings:

Along with great commanders in history, there have been men who theorized about the nature and conduct of war, the relationship between politics and strategy, and the impact of warfare upon society. The course examines the contributions of selected theorists (Clausewitz, Sun Tzu, Jomini, Mahan, Fuller, Liddell Hart, Brodie, etc.). The student reads the theorists' major writings, analyzes their principal ideas, and studies their influence on military affairs. This will help the student reach his or her own conclusions about fundamental questions concerning the conduct and fundamental nature of war, such as the relative strength of offense vs. defense, or of material vs. morale factors.

HI390	EARLY NATIONAL AMERICA	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-------------------------------	--

Scope: 2001-2

Offerings:

Although the Constitution outlined the form of federal government in the United States, it left unanswered many questions concerning how that government should function. This course examines how, between 1790 and 1848, evolving political thought, economic development, changing social conditions, and sectionalism influenced successive generations' debates about the role of government in American life.

2019-2 2021-2

HI391	WORLD RELIGIONS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	------------------------	--

Scope: 2008-1

Offerings:

This course analyses the emergence, development and present cultural expression of the major religions of the world, emphasizing their 19th and 20th century experience. It also examines the development of religion in the ancient world and in pre-literate and non-technical societies. Cadets study the world's religions as molded by and as molders of the social, political and economic forces unique to particular cultures. Special attention is paid to the role of each religion in the formulation and adaptation of public and foreign policy.

HI395	HIST OF CIVIL WAR AMERICA	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	----------------------------------	--

Scope: 1999-2

Offerings:

This course focuses on the causes and consequences of the American Civil War. Cadets will analyze the road to war, the war itself, and Reconstruction to place the entire period in its broader historical context. The course covers the ante-bellum South and North, focusing on the peculiar effect of slavery on society. Cadets will examine the home fronts to see the populace's reaction to war as both the Union and the Confederacy engage in conflict. In approaching Reconstruction, students will focus on the political, economic, and racial policies that were implemented to rebuild the nation.

HI396	MAKING OF MODERN AMERICA	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------	--

Scope: 1990-1

Offerings:

Between 1877 and 1945 the United States fought three major wars, experienced dramatic economic growth, suffered the Great Depression, underwent significant social change, and emerged as the premier world power. This course analyzes these and related issues, emphasizing how and why the United States developed during the last quarter of the 19th century and the first half of the 20th century, and stressing the promises and problems that accompanied the making of modern America.

2018-1 2020-1

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements:	A 1500-word research paper or critical analysis of a monograph; compensatory time provided.	
Prerequisite(s):	HI104 -Or- HI108 -Or- HI154 -Or- HI158	
HI397	COLD WAR AMERICA	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	1993-1	Offerings:
This course examines the history of the United States from the end of World War II through the Reagan presidency. It assesses the political, social, and economic institutions of America in the dynamic context of relations with the Soviet Union. While the course deals primarily with domestic America, cadets will gain an appreciation for the close relationship between events at home and abroad.		2019-1 2021-1
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	A 1500-word research paper; compensatory time provided.

HI399	HISTORY STAFF RIDE	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2015-7	Offerings:
History Staff Ride analyzes various campaigns and battles focusing on enhancing cadet understanding of the relationship between the strategic, operational and tactical levels of war and gaining a heightened appreciation for the importance of leadership on the battlefield. Cadets begin with classroom preparation and intense study prior to the staff ride, and through travel, experience the battlefields first-hand. They gain a historical understanding of the campaigns, and by walking the terrain, develop the ability to analyze complex battlefield problems and conditions. The ability to plan, prepare and execute a staff ride, with a focus on cadet led presentations and discussions, will also be evaluated. In addition, cadets participate in a number of cultural activities during travel.		2018-7 2019-7 2020-7 2021-7

HI460**SENIOR FACULTY COURSE****3.0 Credit Hours**
(BS=0.0,ET=0.0,MA=0.0)**Scope:**

2013-1

Offerings:

This course is taught by a senior member in the Department of History in a field of that historian's expertise. The course offers students the opportunity to study under the guidance of a historian in topics not normally offered by the Department of History. This course will include an exploration of the way in which history has been written; including examining the changing interpretations, traditions, methods, and frameworks of historians.

HI463	RACE, ETHNICITY, NATION	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2013-2	Offerings:
<p>We use the words ethnicity, race, and nation constantly, but what do these terms really mean? Why are people willing to kill or persecute each other in the name of these ideas? The course will allow cadets to investigate the development of the concepts of ethnicity, race, and nation. They will examine modern conditions such as the Enlightenment, science, the growth of the state, Social Darwinism, and imperialism, and study why these conditions gave rise to diverse but overlapping methods of creating boundaries and defining difference. Although the main focus of the course will be on Europe, the application of these ideas in a variety of global settings - on other continents - will be considered throughout the course. This course will include an exploration of the way in which history has been written; including examining the changing interpretations, traditions, methods, and frameworks of historians.</p> <p>Lessons: 40 @ 55 min (2.500 Att/wk) Labs: 0 @ 0 min</p> <p>Special Requirements: A 1500-word research paper.</p> <p>Prerequisite(s): HI104 -Or- HI108 -Or- HI154 -Or- HI158</p>		2019-2 2021-2

HI499	SENIOR THESIS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	1984-1	Offerings:
The course provides cadets selecting the major in history with an opportunity to enhance their skills in historical research and analysis. For this reason the course serves as excellent preparation for graduate study in history and related disciplines. Based upon their background and research interests cadets are organized into small thesis-writing seminars. Under the supervision of a seminar advisor, each cadet defines a topic, develops a research plan, accomplishes research, and drafts a thesis. The seminar meets occasionally to discuss issues in historiography and methodology, review progress in research, and critique draft papers. At the end of the semester cadets present their findings and defend their theses before a committee of faculty and fellow students.		2018-2 2019-2 2020-2 2021-2
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	A research paper of 3500 words; compensatory time provided. Presentation and defense of thesis before a committee of faculty.

XH405	THE HOLOCAUST AND ITS LEGACY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2014-2	Offerings:
This is a multi-disciplinary course administered through the Center for Holocaust and Genocide Studies. The Holocaust and its aftermath make enormous demands on us not just emotionally, but intellectually, requiring that we consider it from historical, military, psychological, philosophical, political, scientific, representational and legal perspectives. HX405 is a multi-disciplinary response to these challenges. The course will explore the causes, course, and consequences of the Holocaust, examining the processes that led to the Nazi genocide against the Jews, with a particular focus on the role of the military. It will examine the Holocaust from a variety of perspectives (perpetrators, victims, bystanders, resisters and rescuers), and consider the moral and ethical choices made by members of each group. The course will require an in-depth understanding of German and European history, and it will impart an appreciation for the cultures and mentalities of the interwar and wartime era. The course will utilize primary sources, films, documentaries, testimonies, and propaganda. It will conclude with consideration of the political and legal responses to the Holocaust in the later 1940s, and the later incorporation of the Holocaust into the global public consciousness.		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	A research paper of 1500 words. Compensatory time provided.	
XH415	GENOCIDE AND ETHNIC CLEANSING	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2014-1	Offerings:
This is a multi-disciplinary course administered through the Center for Holocaust and Genocide Studies. It is a multi-disciplinary attempt to understand the dynamics which produce mass atrocity. Cadets will learn of the causes, course, and consequences of selected genocides, examining the processes that led to genocide, with a particular focus on the roles played by militaries. The course opens with the intellectual theories about the phenomena of ethnic cleansing and genocide. It will then move to the analysis of how ethnic cleansing and genocide are tied to conflict and militaries. Drawing from a variety of scholarly disciplines and methodologies, cadets will investigate the moral, legal, historical, and diplomatic problems these terms pose. For the remainder of the course, cadets will examine more directly the case studies of specific incidences of ethnic cleansing and genocide. These case studies will vary year-to-year, but they will include at least two examples of ethnic cleansing or genocide on the American frontier, in German Southwest Africa, the Ottoman Empire, the Soviet Union, Rwanda, Cambodia, Yugoslavia, China and in Europe. Cadets will study primary sources, films, documentaries, testimonies, and propaganda. All iterations of the course will consider the development of Western mass politics and the emergence of racial nationalism and new imperialism in late 19th century Europe.		2018-1 2019-1 2021-1
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	

Special Requirements: A research paper of 1500 words. Compensatory time provided.

ZH315	MODERN REGIONAL HISTORY	3.0 Credit Hours
		(BS=0.0,ET=0.0,MA=0.0)

Scope:	2010-1	Offerings:
<p>For Cadets attending foreign military academies or other academic institutions. Cadets will attend classroom instruction and produce a historical research paper to be presented upon return to USMA. Instruction may be in English or foreign language. This class serves as the equivalent to a foreign course covering modern historical developments of the area/region where the cadet is studying. This course covers broad historical processes and developments of the region over a long period of time. The course effectively encompasses a recognized historical era, for example "Modern", "Early Modern", or "Ancient".</p>		<p>2018-1 2018-2 2019-1 2019-2 2020-1 2020-2</p>

Department of Law

19 Courses

LW199	CIVIL RIGHTS STAFF RIDE	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2015-7	Offerings:
Diversity is of critical importance to our nation and our Army. This course uses the law and history in an interdisciplinary study of the Civil Rights Movement in the United States to gain appreciation for and understanding of diversity. The course includes a week in the classroom and a two-week staff ride (which will count as an AIAD).		No Course Offerings
Lessons: 40 @ 55 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	One written partial review, four researched written/oral presentations during the staff ride and a final thought paper. Permission of instructor required for enrollment.	
LW310	INTRO TO LEGAL METHOD	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2012-1	Offerings:
This course provides an introduction to the study of jurisprudence and, thereby, an intellectual foundation for legal studies. Jurisprudence explores the theory and philosophy of law, its relations to morality, and its limits. The intent of the course is to provide cadets a platform on which to examine the nature of law, legal reasoning, and legal institutions. Topics covered include positivism and natural law theory, theories of criminal justice, concepts of liberty, responsibility, and human rights. Cadets also will learn the fundamentals of legal research and writing.		2018-1 2018-2 2019-1 2020-1
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
LW399	INDIV ADV DEVELOPMENT IN LAW	1.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	1990-4	Offerings:
The Academic Individual Advanced Development (AIAD) program is designed to introduce cadets to the practice of law in the military. The course consists of a three-week internship in one of a variety of legal offices. Possible internships include clerkships with the Army Court of Criminal Appeals, the U.S. Court of Military Appeals, the U.S. Supreme Court, the Department of Defense, and the Department of the Army agencies. Cadets may also intern in Staff Judge Advocate or Trial Defense Offices at military installations worldwide.		2018-7 2019-7 2020-7
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Grades are determined based on a journal of daily activities, the quality of the work actually performed during the internship, and a briefing which is presented to the department faculty upon the cadet's return.	
LW403	CONSTITUTIONAL/MILITARY LAW	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2017-1	Offerings:
This course studies the United States Constitution and Military Law. Cadets will acquire information and skills in order to recognize and resolve constitutional and legal problems. The course provides analytical models for dealing with problems regarding societal and military order. Finally, the course seeks to enable the cadet to make an intelligent commitment to the values and preferences embodied in the Constitution and our system of military and civilian law. Examples from military law are used to model fundamental principles examined in the course. Significant court decisions are explored to support the course goals. Specific substantive areas include: separation of powers, judicial review, war powers, the law of armed conflict, equal protection, privacy, individual rights, searches and inspections, military justice processes, and military criminal law.		2018-1 2018-2 2018-4 2019-1 2019-2 2019-4 2020-1 2020-2 2021-1 2021-2

Prerequisite(s):	SS202 -Or- SS252	

LW410	COMPARATIVE LEGAL SYSTEMS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2005-1	Offerings:
<p>This course uses a comparative approach to study the three major legal systems of the world: the English common law system, the civil law system (and its branches) of continental Europe, and the Islamic legal system. These three systems are the foundation for the laws and legal systems of most of the world today, including Latin America, Africa, the Middle East and east Asia. Similarities and differences between these systems and the American legal system are explored. Social, political, and economic factors which distinguish these systems and more recently have begun to integrate them are covered. Emphasis is placed on the sources of law, the procedures for resolving legal disputes, and basic principles of civil and criminal justice.</p>		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons:	40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min
Special Requirements:	None	
LW461	CIVIL RIGHTS AND THE LAW	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2018-1	Offerings:
<p>Equal protection is an important aspect of the rule of law, and underlies the American approach to justice. This course uses case law to explore the struggle for civil rights in the United States by those discriminated against based on race, religion, national origin, gender, and sexual orientation. The course will focus on legal decisions that empowered change and the movement toward equality, as well as an understanding of the importance of diversity.</p>		2018-1 2019-1 2020-1
Lessons:	40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min
Special Requirements:	None	
LW462	CYBER LAW	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2018-1	Offerings:
<p>Cyberspace has become an emerging area for legal regulation and military operations. This domain poses challenges and legal issues that impact criminal law, constitutional law, and international law. This course approaches cyber law from multiple perspectives including both international and domestic regulations. Specifically, the course will focus on international and customary law aspects of cyber operations along with U.S. law pertaining to cyberspace.</p>		2018-1 2019-2 2020-2
Lessons:	40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min
Special Requirements:	None	
LW472	CRIMINAL LAW	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2006-1	Offerings:
<p>This course will examine the legal, social, religious, cultural, and political motivations that justice systems use to characterize certain actions as "criminal." The course will revolve around the traditional reasons for criminal law, namely blameworthiness and punishment, and also examine how institutions use criminal law to serve their narrow interests. This course will introduce theories surrounding criminal law and illustrate how cadets may apply law immediately in their roles as officers. The course will examine federal and state criminal codes and also the Uniform Code of Military Justice. From a legal perspective based on the U.S. Constitution and other criminal codes, some of the topics covered include the death penalty, insanity, corporate crime, conspiracy, murder, necessity, and self-defense.</p>		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons:	40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min
Special Requirements:	None	
LW473	ENVIRONMENTAL LAW	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2013-2	Offerings:
<p>Environmental law has become an integral part of the legal system in the United States today. This course provides an introduction to environmental issues and the framework of the major federal environmental statutes (the National Environmental Policy Act, Clean Water Act, Clean Air Act, Endangered Species Act, etc.), and how the law works in practice. The course also covers environmental issues in the military and the growing subject of International Environmental Law. This course provides a solid understanding of the legislative, administrative and judicial system of environmental law today.</p>		2018-2 2019-2 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: Four written partial reviews and a TEE. Two homework assignments.

LW474	LAW OF ARMED CONFLICT	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	------------------------------	--

Scope: 2011-1

Offerings:

This course is designed to develop in each student an understanding of basic law of armed conflict (LOAC), with an emphasis on issues that might arise on the battlefield at a tactical level. The ethical and historical background of LOAC will be examined, including Geneva Conventions and protocols, and how LOAC is enforced on international and national levels, to include prosecution under the Uniform Code of Military Justice. Illustrative examples will include the Nuremberg Tribunal, My Lai, and the Gulf War. The emphasis is on the LOAC responsibilities of the junior officer.

2018-1 2018-2 2019-1
2019-2 2020-1 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: Two research papers of moderate length (approximately five pages each) may be required. Topics will be determined in consultation with the instructor.

LW475	ADV CONSTITUTIONAL LAW SEM	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-----------------------------------	--

Scope: 1980-1

Offerings:

This seminar course covers a broad range of traditional and contemporary constitutional law topics. In addition to studying U.S. Supreme Court cases in particular areas of constitutional law, cadets are given an opportunity to study the historical foundations of the U.S. Constitution and underlying theories and principles of constitutionalism. The seminar format demands active participation in classroom debate, role playing, and critical thinking about complex issues of law and policy. As part of the seminar curriculum, each cadet will assume the role of a Supreme Court Justice. In this role, the cadet will study a real case pending before the Supreme Court and will write an abbreviated opinion reflecting the cadet's decision based on principled reasoning. The seminar typically travels to the Supreme Court to hear argument in the studied case as part of the opinion writing exercise.

2018-1 2018-2 2019-1
2019-2 2020-1 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: Preparation of a Supreme Court "opinion" (10, double spaced, typewritten pages).

Prerequisite(s): LW403

LW476	ADVANCED LAW OF ARMED CONFLICT	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------------	--

Scope: 2018-2

Offerings:

The modern battlefield has had a significant impact on the Law of Armed Conflict in a variety of ways. This course builds on the lessons from LW474 and explores complex issues in modern conflict like Human Rights, Drone Warfare, Civilians on the Battlefield, and War Crimes. The lessons in this course will challenge the cadets to think critically and creatively about the application of the law on the modern battlefield.

2018-2 2019-2 2020-2

Lessons: 0 @ 0 min (0.000 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: None

Prerequisite(s): LW474

LW481	INTERNATIONAL LAW	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--------------------------	--

Scope: 2012-1

Offerings:

The field of international law is one of the most dynamic areas of the law, and its principles are often applied in addressing the complex security problems facing our nation. This course will familiarize cadets with the body of rules and expectations which govern the rights and obligations of states and international organizations, during both times of peace and conflict. In particular, this course will emphasize the aspects of international law that are relevant to the operational and tactical problems that officers will confront as they deploy overseas. This course will integrate some themes from other courses in the Department of Law and reinforce some fundamental principles officers will confront as they seek to understand the relationship between law, diplomacy, and military operations.

2018-1 2018-2 2019-1
2019-2 2020-1 2020-2

Lessons: 40 @ 55 min (0.000 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: None

LW482	NATIONAL SECURITY LAW	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	1980-2	Offerings:
This seminar examines the legal framework for national security decisions. Cadets will analyze the delicate balance of liberty and security that must exist to preserve a democratic society. Particular areas include: constitutional separation of powers and shared responsibility for national security; the legality and scope of war and other uses of armed force short of war; access to and protection of sensitive information; intelligence collection and clandestine activities; the role of the media, responses to terrorism and international organized crime; and the formulation of national security policy and law.		2018-1 2019-1 2020-1
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
LW488	BUSINESS LAW	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	1978-1	Offerings:
This course introduces cadets to the basics of business and commercial law. Contractual principles under the common law and Uniform Commercial Code are emphasized. Current legal issues in the following areas are explored: consumer protection; real, personal, and intellectual property law; antitrust law; and employment discrimination. Included is a survey of the basic principles of government contracting law. Additionally, cadets engage in business negotiations exercises. This course employs both case study and problem-solving methods of instruction.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
LW490	SPECIAL TOPICS IN THE LAW	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	1999-2	Offerings:
An in-depth seminar course concentrating on a single area of the law. The course is conducted by the Department's Visiting Professor or a Law faculty member when the visiting professor is unavailable.		2018-1 2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	One or more essays, as determined by the course instructor.	
LW495	JURISPRUDENCE AND LEGAL THEORY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2012-1	Offerings:
This is the capstone course for both the American Legal Studies and International and Comparative Legal Studies Majors. The course is an advanced seminar in legal philosophy as applied to contemporary domestic and international legal issues. It analyzes these issues using the perspectives of jurisprudence (the ideas and reasoning of jurists) and legal theory (using insight from disciplines such as science, economics, and political theory to address legal problems). It explores theoretical and practical approaches to identifying, developing, and preserving the rule of law. The course integrates legal coursework throughout the Academy curriculum and the Cadet's respective legal studies major.		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Three written partial reviews and a final paper which analyzes a contemporary legal problem using the analytical tools of jurisprudence and legal theory.	
Prerequisite(s):	LW310 LW403	
LW498	THESIS I: PROPOSAL & RESEARCH	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2005-1	Offerings:

The purpose of the Senior Thesis is to provide cadets with the opportunity to create a project that is academically, professionally, and personally meaningful to them and that reflects their thinking and abilities as developed at West Point and in the Department of Law. Through the scholarly project that results from this course, cadets will be expected to show how they and their work have progressed and that their work is of professional quality. Cadets will choose a faculty advisor with whom they will work over two semesters. In collaboration with the faculty advisor, cadets will explore their chosen areas of law with a goal of producing a project, usually a thirty page paper that is of professional quality. This paper will be completed during LW499. Cadets will meet individually with their advisors on a regular basis to discuss the law, progress on the thesis, and developmental issues.

2018-1 2019-1 2020-1

Lessons: @ min (0.000 Att/wk)**Labs:** 0 @ 0 min**Special Requirements:**

Cadets will not be required to attend classes, but may be required to individually attend a small number of conferences with their advisors and will be expected to submit written progress reports to the advisors.

Prerequisite(s):

LW310 LW403

LW499**THESIS II: PAPER & DEFENSE**
3.0 Credit Hours
(BS=0.0,ET=0.0,MA=0.0)
Scope:

2005-2

Offerings:

This course continues the work on the thesis commenced in LW498. At the end of the course, cadets will submit their theses to the Department of Law and orally defend their theses before a faculty committee.

2018-1 2018-2 2019-2
2020-2**Lessons:** @ min (0.000 Att/wk)**Labs:** 0 @ 0 min**Special Requirements:**

MA100	PRECALCULUS MATHEMATICS	3.5 Credit Hours (BS=0.0,ET=0.0,MA=3.5)
Scope:	2016-1	Offerings:
This course prepares cadets with background deficiencies in algebra and trigonometry for the core mathematics program. The course develops fundamental skills in algebra, trigonometry, and functions, through an introduction to mathematical modeling and problem solving. Since this course does not count toward graduation requirements; cadets enrolled in MA100 will forfeit an elective opportunity.		2018-1 2019-1 2020-1
Lessons: 41 @ 55 min (2.500 Att/wk)	Labs: 17 @ 55 min	
Special Requirements:	None	
MA103	MATH MODELING/INTRO CALCULUS	4.5 Credit Hours (BS=0.0,ET=0.0,MA=4.5)
Scope:	2016-1	Offerings:
MA103 is the first course of the mathematics core curriculum. It emphasizes applied mathematics through modeling. Students develop effective strategies to solve complex and often ill-defined problems. The course exercises a wide array of mathematical concepts while nurturing creativity, critical thinking, and learning through activities performed in disciplinary and interdisciplinary settings. The course introduces calculus using continuous and discrete mathematics while analyzing dynamic change in applied problems. Students employ a variety of technological tools to enhance the ability to visualize concepts, to explore ideas through experimentation and iteration, to complete complex and time-consuming computations, and to develop numerical, graphical, and analytical solutions that enhance understanding.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2

MA104	CALCULUS I	4.5 Credit Hours (BS=0.0,ET=0.0,MA=4.5)
Scope:	2016-1	Offerings:

This is the second semester of the mathematics core curriculum. It provides a foundation for the continued study of mathematics and for the subsequent study of the physical sciences, the social sciences, and engineering. MA104 covers topics in single variable differential and integral calculus, parametric equations, 3-dimensional geometry, and vectors. Throughout the course, mathematical models motivate the study of topics such as optimization, accumulation, change in one variable, motion in space, and other topics from the natural, social, and decision sciences. An understanding of course material is enhanced through the use of computer algebra systems.

--------------	-----------------------------------	--

Scope:	2016-1	Offerings: 2018-1 2019-1 2020-1
---------------	--------	---

This is the first course of a two-semester advanced mathematics sequence for selected cadets who have validated single variable calculus and demonstrated strength in the mathematical sciences. It is designed to provide a foundation for the continued study of mathematics, sciences, and engineering. This course emphasizes the interaction between mathematics and the physical sciences through modeling with differential equations. Topics may include a study of first order differential equations, first order difference equations, second order linear equations, systems of first order linear and non-linear equations, numerical methods, and non-linear equations and stability. An understanding of course material is enhanced through the use of a computer algebra system.

---------------	--------	--

This course provides a foundation for the continued study of mathematics and for the subsequent study of the physical sciences, social sciences, and engineering. MA205 covers topics in multivariable differential and integral calculus, differential equations, and infinite series representations of functions. Throughout the course mathematical models motivate the study of topics such as optimization, accumulation, change in several variables, differential equations, and other topics from the natural, social, and decision sciences. An understanding of course material is enhanced through the use of computer algebra systems.

MA206	PROBABILITY & STATISTICS	3.0 Credit Hours (BS=0.0,ET=0.5,MA=2.5)
--------------	-------------------------------------	--

Scope: 2017-1

Offerings:

This is the final course in the mathematics core curriculum. The course develops cadet ability to structure their reasoning under conditions of uncertainty and presents fundamental probability and statistical concepts that support the USMA core curriculum. Coverage includes data analysis, probabilistic models, independence, simulation, random variables and their distributions, hypothesis testing, confidence intervals, and linear regression. The course also introduces engineering applications of probability and statistics techniques. Applied problems motivate concepts, and technology enhances understanding, problem solving, and communication.

MA206X	ADV PROBABILITY & STATISTICS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=3.0)
---------------	---	--

Scope: 2017-2

Offerings:

This is a temporary pilot course that fulfills the final course requirements in the mathematics core curriculum. The course develops cadet ability to structure their reasoning under conditions of uncertainty and presents fundamental probability and statistical concepts that support the USMA core curriculum. Coverage includes data analysis, probabilistic models, independence, simulation, random variables (including jointly distributed random variables) and their distributions, hypothesis testing, confidence intervals, linear regression and analysis of categorical data. Emphasis will be on model based approaches and significant time will be spent on selecting an appropriate model and assessing its validity. Applied problems motivate concepts, and technology enhances understanding, problem solving, and communication.

MA363	VECTOR CALCULUS AND ODE	3.0 Credit Hours (BS=0.0,ET=0.0,MA=3.0)
--------------	--------------------------------	--

Scope: 2013-2

Offerings:

This course continues the study of vector calculus from MA205 through the remainder of the vector differential operations, line and surface integrals, and the vector integral theorems of Green, Gauss, and Stokes. The focus then turns to series solutions of ordinary differential equations and solving systems of ordinary differential equations. Emphasis is placed upon analyzing a variety of practical applications that give rise to ordinary differential equations. Numerical methods of solution are also studied.

2018-2 2019-2 2020-2

MA364	ENGINEERING MATHEMATICS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=3.0)
--------------	--------------------------------	--

Scope: 2015-1

Offerings:

This course provides additional mathematical techniques and deepens the understanding of concepts in mathematics to support continued study in science and engineering. Emphasis is placed upon using mathematics to gain insight into natural and man-made phenomena that give rise to problems in differential equations and vector calculus. Calculus topics focus on three-dimensional space curves, vector fields and operations, divergence and curl, and line and surface integrals. Analytic and numerical solutions to differential equations and systems of differential equations are found using a variety of techniques. Linear algebra topics include solutions to homogeneous and non-homogeneous systems of equations. An introduction to classical partial differential equations is also included.

MA364X	ADV MATH FOR ENGRS/SCIENTISTS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=3.0)
---------------	--------------------------------------	--

Scope: 2017-1

Offerings:

This is a temporary pilot course designed for the advanced mathematics student that has completed courses in differential equations and vector calculus (those that have completed MA153 and MA255) and will study ME, EE, NE, Physics or Interdisciplinary Science. MA364X was created due to the approximately 75% overlap in the MA364 and MA153/MA255 curriculums (topics in differential equations and vector calculus); MA364X begins where the advanced mathematics program ends. The advanced engineering course offering includes topics in linear algebra, complex variables, Fourier series, partial differential equations, and computational mathematics. (Note that there is a 25% overlap in the MA364 and MA364X curriculums. The topics in both courses include complex variables, Fourier series, and partial differential equations.)

MA366	APPLIED ENGINEERING MATH	3.0 Credit Hours (BS=0.0,ET=1.0,MA=2.0)
--------------	---------------------------------	--

Scope: 2013-2

Offerings:

This course provides additional mathematical techniques and deepens the understanding of concepts in mathematics beyond the core math program to support continued study in environmental and chemical engineering. Emphasis is placed upon using mathematics that supports fundamental engineering principles to gain insight into natural and man-made phenomena that give rise to problems in differential equations and vector calculus. Calculus study focuses on vector fields, differential operators, and the vector integral theorems. Solutions via Fourier series, separation of variables, and numerical methods to differential equations that appear in environmental and chemical engineering are then studied.

Emphasis is placed upon using mathematics that supports fundamental engineering principles to gain insight into natural and man-made phenomena that give rise to problems in differential equations and vector calculus. Calculus study focuses on vector fields, differential operators, and the vector integral theorems. Solutions via Fourier series, separation of variables, and numerical methods to differential equations that appear in environmental and chemical engineering are then studied.

MA367	MATH FOR THE SOCIAL SCIENCES	3.0 Credit Hours (BS=0.0,ET=0.0,MA=3.0)
--------------	-------------------------------------	--

Scope: 2017-1

MA367 is a required course for those majoring in economics and is available to any who would like to develop their understanding of the mathematical tools applied to common methods of inquiry in several of the social sciences including, but not limited to, psychology and political science. The course develops student ability to use and develop mathematical models to quantify the relationship between variables, actors, and outcomes. The course helps formalize and quantify the properties of these relationships. The course continues to develop math skills introduced in the core math program, and it introduces more advanced math topics that serve as fundamental skills required for modeling in upper level microeconomics, macroeconomics, and econometrics courses. Specific topics include multivariable optimization, including linear and nonlinear programming, differential equations, stochastic modeling, and an introduction to dynamic programming. This course is designed to demonstrate the relevance of mathematics to the modern practice of analysis in the social sciences and to help prepare future Army leaders to use sound logic and relevant evidence to make convincing arguments.

MA371	LINEAR ALGEBRA	3.0 Credit Hours (BS=0.0,ET=0.0,MA=3.0)
--------------	-----------------------	--

Scope: 2013-1

This course emphasizes both the computational and theoretical aspects of linear algebra one encounters in many subjects ranging from economics to engineering. The course covers solutions of linear systems of equations and the algebra of matrices. The foundational aspects of vector spaces and linear transformations to include linear dependence and independence, subspaces, bases and dimension, inner products, and orthonormalization are developed. This is rounded out with a detailed investigation of eigenvalues and eigenvectors as they relate to diagonalization, quadratic equations, and systems of differential equations. The Invertible Matrix Theorem is explored as the conceptual/theoretical thread of the course. A computer algebra system is used to explore concepts and compute solutions to problems. Applications of the course material are included in the form of special problems to illustrate its wide scope.

MA372	INTRODUCTION TO DISCRETE MATH	3.0 Credit Hours (BS=0.0,ET=0.0,MA=3.0)
--------------	--------------------------------------	--

Scope: 2013-1

The purpose of this course is to introduce topics in Discrete Mathematics, providing a foundation for further study and application. The topics covered are useful to both the applied mathematician and the computer scientist. They include propositional logic, elements of set theory, combinatorics, relations, functions, partitions, methods of proof, induction and recursion, digraphs, trees, finite state machines, and algebraic systems. Specific applications to computer science are presented.

MA376	APPLIED STATISTICS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=3.0)
--------------	---------------------------	--

Scope:	2013-1	Offerings:
This course builds on the foundations presented in the core probability and statistics course to provide a broad introduction to some of the most common models and techniques in applied statistics. The mathematical basis for each of the models and techniques is presented with particular emphasis on the development of the required test statistics and their distributions. Topics covered include hypothesis testing, analysis of variance, categorical data analysis, regression analysis, and nonparametric methods.		2018-1 2019-1 2020-1
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	One (or more) special problem(s).	
Prerequisite(s):	MA206	
Disqualifier(s):	SE375	
MA381	NONLINEAR OPTIMIZATION	3.0 Credit Hours (BS=0.0,ET=0.0,MA=3.0)
Scope:	2013-1	Offerings:
This course provides an undergraduate presentation of nonlinear topics in mathematical programming that builds on multivariable Calculus II. The emphasis of this course is on developing a conceptual understanding of the fundamental topics introduced. These topics include general convexity, convex functions, derivative-based multivariable search techniques, minima and maxima of convex functions, gradients, hessian matrices, Lagrange Multipliers, Fritz-John and Kuhn-Tucker optimality conditions, and constrained and unconstrained optimization. Computer software is used to explore and expose various key ideas throughout the course.		2018-1 2019-1 2020-1
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min

MA383	FOUNDATIONS OF MATH	3.0 Credit Hours (BS=0.0,ET=0.0,MA=3.0)
Scope:	2013-1	Offerings:
This course introduces the student to the methods and language of upper division mathematics. It presents formal set theory, and introduces the student to the methods of formulating and writing mathematical proofs. Finally, it provides the student a rigorous introduction to the theory of relations, functions, and infinite sets.		2018-1 2019-1 2020-1

MA385	CHAOS AND FRACTALS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=3.0)
Scope:	2013-2	Offerings:
This course introduces topics in fractal geometry and chaotic dynamical systems, providing a foundation for applications and further study. The topics from fractal geometry include the military applications of image analysis and data storage. The chaotic dynamical systems studied in the course are one-, two-, and three-dimensional, nonlinear, discrete and continuous dynamical systems. Topics include the logistics equation, the Henon attractor, the Lorenz equations, bifurcation theory, Julia sets, and the Mandelbrot set. These topics have applications in many fields of science, and examples from biology, meteorology, engineering, and the social sciences are studied. The course integrates concepts introduced in the core mathematics courses.		2018-2 2019-2 2020-2

MA386	INTRO TO NUMERICAL ANALYSIS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=3.0)
Scope:	2013-1	Offerings:
<p>This course develops an understanding of the methods for solving mathematical problems using a digital computer. Algorithms leading to solution of mathematical problems will be examined for consistency, stability, and convergence. After a brief review of calculus theory, a study of error analysis and computer arithmetic will provide the framework for the study of the following topics: solutions of equations of one variable, solutions of linear and nonlinear systems of equations, the use of polynomials to approximate discrete data, curve fitting, numerical integration and differentiation, and the approximation of continuous functions. Special problems will incorporate computer graphics and the use of mathematical software libraries to produce numerical solutions of applied problems.</p>		2018-1 2019-1 2020-1

MA387	MATHEMATICAL ANALYSIS I	3.0 Credit Hours (BS=0.0,ET=0.0,MA=3.0)
Scope:	2013-2	Offerings:
<p>A one semester course providing a rigorous introduction to the calculus of a single variable. The course is designed to introduce the student to the foundations of the calculus necessary for advanced undergraduate and graduate studies in applied mathematics and engineering. Course coverage includes a treatment of the structure of the real number system, sequences, continuous functions, and differentiation.</p>		2018-2 2019-2 2020-2

Special Requirements:	None	
MA389	INDIV STUDY IN MATHEMATICS	2.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2017-1	Offerings:
<p>This course is intended for individually supervised research and study, in order to familiarize cadets with techniques used in advanced scientific study. The primary purpose is to prepare students for independent research in mathematics with the essential skills required. With the approval of the Head of the Department, the cadet chooses a research project of interest and is supervised by a faculty member conducting the research.</p>		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2

Lessons: 0 @ 0 min (0.000 Att/wk)**Labs:** 0 @ 0 min**Special Requirements:**

Cadets must complete either an individual written research report or present an oral report to members of the department faculty at the end of the semester.

MA391	MATHEMATICAL MODELING	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	------------------------------	--

Scope:

2003-1

Offerings:

This course is designed to give cadets the opportunity to develop skills in model construction and model analysis while addressing interesting scenarios with practical applications from a wide variety of fields. This course serves as the entry point for both the Mathematical Sciences major and the Operations Research major. The course addresses the complex process of translating real-world events into mathematical language, solving the resulting mathematical model (iterating as necessary), and interpreting the results in terms of real world issues. Topics include model development from data, regression, general curve fitting strategies, and deterministic and stochastic model development. Interdisciplinary projects based on actual modeling scenarios are used to integrate the various topics into a coherent theme.

MA394	FUNDAMENTALS/NETWORK SCIENCE	3.0 Credit Hours (BS=0.0,ET=0.0,MA=3.0)
--------------	-------------------------------------	--

Scope:

2015-1

Offerings:

MA394 exposes cadets to the basic concepts of networks and gives them an opportunity to apply techniques learned in the course to real-world problems. Students will develop skills and problem-solving strategies for modeling complex networks associated with physical, informational, and social phenomena. Software packages are used as decision support tools to investigate application problems and augment understanding of the course material.

MA396	NUM METH SOLUTIONS DIFF EQNS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=3.0)
--------------	-------------------------------------	--

Scope:

2013-2

Offerings:

The focus of this course is to find numerical solutions of differential equations that result when modeling physical phenomena. The numerical solution of both initial value problems and boundary-value problems that arise with ordinary differential equations are covered. Techniques for solving partial differential equations are introduced. Software packages (Mathematica, Maple, Matlab, etc.) have proved to be very useful tools for many numerical techniques and are used to augment an understanding of course material.

MA461	GRAPH THEORY AND NETWORKS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=3.0)
--------------	----------------------------------	--

Scope:	2013-1	Offerings:
This course introduces the student to the techniques, algorithms, and structures used in graph theory and network flows in order to solve real world discrete optimization problems. Basic definitions relating to graphs and digraphs, together with a large number of examples and applications are provided. Cadets learn to implement new graph theory techniques in their area of study. Emphasis is on modeling, algorithms, and optimization.		2018-1 2019-1 2020-1
Lessons: 40 @ 55 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Two special problems.	
Prerequisite(s):	MA206	
MA462	COMBINATORICS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=3.0)
Scope:	2013-2	Offerings:
This course introduces the basic techniques and modes of combinatorial problem-solving important to the field of computer science and mathematical sciences such as operations research. Applications of combinatorics are also related to fields such as genetics, organic chemistry, electrical engineering and political science. Combinatorial enumeration and logical structure are stressed. Applications and examples provide the structure of progression through topics which include counting methods, generating functions, recurrence relations, and enumeration techniques.		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Completion of the mathematics core curriculum required for enrollment.	
Prerequisite(s):	MA206	
MA464	APPLIED ALGEBRA W/ CRYPTOLOGY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=3.0)
Scope:	2013-2	Offerings:
We study the underlying algebra of computer science structures as well as sets, set functions, Boolean algebra, finite state machines, groups, and modular arithmetic. We introduce and study mathematical aspects of cryptology with an emphasis on cryptanalysis of encryption ciphers. We study early paper-and-pencil systems through current computer algorithms for encryption. We employ algebraic principles in both design and analysis of encryption systems, be it matrix, linear feedback shift register sequence, or linear congruential random number generator sequence efforts. Further, we investigate the mathematics of breaking machine ciphers and of designing modern public-key crypto systems.		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
Prerequisite(s):	MA206	
MA466	ABSTRACT ALGEBRA	3.0 Credit Hours (BS=0.0,ET=0.0,MA=3.0)
Scope:	2013-2	Offerings:
This is an introductory course in modern algebra for cadets who plan to do graduate work in mathematics or theoretical work in the physical sciences or engineering. The emphasis of the course is on group theory, considering such topics as cyclic and abelian groups, normal sub-groups and factor groups, series of groups, and solvable groups. Selected applications are interspersed with the material on group theory. The course concludes with an introduction to rings and fields. One special problem is provided to allow the student to do independent research in an area of the student's interest.		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	One special problem.	
Prerequisite(s):	MA206	
MA476	MATHEMATICAL STATISTICS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=3.0)
Scope:	2013-2	Offerings:

<p>This course builds on the foundation presented in the core probability and statistics course to provide a mathematical presentation of the important topics in mathematical statistics. The course begins with a review of probability concepts from the core course, adding additional topics such as transformations of random variables and moment generating functions. To provide the mathematical basis for much of statistical practice, certain limit theorems and sampling distributions are proven. The central focus of the course is distribution theory, to include the theory of estimation and the theory of hypothesis testing.</p> <p>Lessons: 40 @ 55 min (2.500 Att/wk) Labs: 0 @ 0 min</p> <p>Special Requirements: One (or more) special problem(s).</p> <p>Prerequisite(s): MA206</p>		2018-2 2019-2 2020-2
MA481	LINEAR OPTIMIZATION	3.0 Credit Hours (BS=0.0,ET=1.0,MA=2.0)
Scope:	2014-2	Offerings:
<p>This course emphasizes the applications of optimal solutions to linear algebraic systems using the simplex method of linear programming. This includes an in-depth development of the simplex method, the theory of duality, an analysis of the dual problem, convex hull concepts, integer programming, sensitivity analysis and the revised simplex procedure. Additional computational techniques that are applicable to specific mathematical models such as the transportation problem, assignment problem and network problems are also studied. Problems illustrating applications are emphasized throughout the course. Use of existing computer software to solve problems is also emphasized.</p> <p>Lessons: 40 @ 55 min (2.500 Att/wk) Labs: 0 @ 0 min</p> <p>Special Requirements: Several special problems.</p> <p>Prerequisite(s): MA371</p>		2018-2 2019-2 2020-2
MA484	PARTIAL DIFF EQUATIONS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=3.0)
Scope:	2013-1	Offerings:
<p>The course is devoted to the solution of the classical partial differential equations of mathematical physics and most engineering fields. For example, these equations describe such diverse phenomena as the flow of heat in a metal plate, the gravitational field of the solar system, the vibration of a structural beam, and the energy levels of the hydrogen atom. The subject matter has application in many fields and should be of interest to mathematics, science, and engineering concentrators. Specific topics covered are the heat, wave, and potential equations, Fourier series, series solutions to ordinary differential equations, special functions, and boundary value problems.</p> <p>Lessons: 40 @ 55 min (2.500 Att/wk) Labs: 0 @ 0 min</p> <p>Special Requirements: One special problem.</p> <p>Prerequisite(s): MA205 -Or- MA205X -Or- MA255</p>		2018-1 2019-1 2020-1
MA485	APPLIED COMPLEX VARIABLES	3.0 Credit Hours (BS=0.0,ET=0.0,MA=3.0)
Scope:	2013-2	Offerings:
<p>This course presents a logical development of complex variable theory sufficient for the development and solution of a number of interesting and practical problems. Residue theory is developed and applied to problems in integration and in the solution of partial differential equations via transform techniques. Conformal mapping theory is used to solve partial differential equations for which the solution is a harmonic function satisfying prescribed boundary conditions. These classical Dirichlet-Neumann problems model phenomena arising in the study of electrostatic potential, equilibrium thermodynamics, incompressible fluids, elasticity, and other areas of continuum mechanics.</p> <p>Lessons: 40 @ 55 min (2.500 Att/wk) Labs: 0 @ 0 min</p> <p>Special Requirements: One special problem.</p> <p>Prerequisite(s): MA205 -Or- MA255</p>		2018-2 2019-2 2020-2
MA487	MATHEMATICAL ANALYSIS II	3.0 Credit Hours (BS=0.0,ET=0.0,MA=3.0)

Scope:	2013-1	Offerings:
Continuation of MA387. Course coverage includes Riemann and Stieltjes integration, infinite series, sequences and series of functions, uniform convergence, and power series.		2018-1 2019-1 2020-1
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min

MA491	RESEARCH SEMNR-APPLD MATH	3.0 Credit Hours (BS=0.0,ET=0.0,MA=3.0)

Scope:	2013-1	Offerings:
The student integrates the mathematical concepts and techniques learned in previous courses with the principles developed throughout the whole USMA Curriculum to solve a current problem of interest to the individual, to the Academy, or to agencies in the Department of the Army. Cadets may select problems from a list of suitable projects provided by the Department of Mathematical Sciences. Cadets choose a faculty advisor who has an interest and background in the problem. Cadets may work individually or in small teams, depending on the nature of the research. Regular workshop sessions will be held. Cadets will be given an opportunity to present their research at the Service Academies Student Mathematics Conference and/or other undergraduate conferences. Research reports will be reviewed, edited, and compiled into the USMA Transactions on Cadet Mathematical Research.		2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 17 @ 55 min (1.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Weekly meetings @ 55 min; one research paper (80 hours).	
MA493A	OPNL CALC AND TRANSFORMS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=3.0)
Scope:	2013-1	Offerings:
This course is the logical extension and synthesis of MA484 and MA485. It employs the integral calculus of complex functions and the theory of residues to investigate solutions to a number of partial differential equations arising from electrostatics, thermostatics, elasticity, gravitation, and other fields of continuum mechanics. The Poisson-Integral Formula is applied to the solution of boundary-value problems. Fourier and Laplace transforms are studied in detail and are used to develop general techniques for the solution of many ordinary, partial, and integral equations which result from the above applications.		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Several special projects.

Special Requirements:	None	
Prerequisite(s):	MA487	
MA498	SR THESIS I: RSCRCH & PROPOSAL	3.0 Credit Hours (BS=0.0,ET=0.0,MA=3.0)
Scope:	2013-1	Offerings:
The purpose of the Senior Thesis is to provide cadets with an unique opportunity to create a scholarly product that is academically, professionally, and personally meaningful to them and that reflects their thinking and abilities as developed at West Point and in the Department of Mathematical Sciences. Cadets will choose a faculty advisor with whom they will collaborate over two semesters. Cadets will meet on a regular basis with their advisor to discuss mathematics, progress on their research and thesis, and developmental issues. The objectives of the research are: (1) to synthesize and cohere the cadet's studies; (2) to apply methodological skills of research design, conceptual reasoning, analysis, and research gained to a selected area of substantive interest; (3) to extend the cadet's in-depth study of the selected area of interest beyond the level obtained in the Mathematical Sciences Major; (4) to design and conduct focused research beyond the constrained opportunities in elective courses; and (5) to develop cadet skills in conceptual reasoning, critical analysis, and effective writing.		2018-1 2019-1 2020-1
Lessons: 17 @ 55 min (1.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Weekly meeting @ 55 min; one research proposal and presentation.	
MA499	SR THESIS II: PAPER & DEFENSE	3.0 Credit Hours (BS=0.0,ET=0.0,MA=3.0)
Scope:	2013-2	Offerings:
This course continues the work on the thesis commenced in MA 498. At the end of the course, cadets will submit a written thesis to the Department of Mathematical Sciences. In addition, cadets will defend that thesis before a faculty committee. Cadets will be given an opportunity to present their research at the Service Academies Student Mathematics Conference and/or other undergraduate conferences. Theses will be reviewed, edited, and compiled into the USMA Transactions on Cadet Mathematical Research.		2018-2 2019-2 2020-2
Lessons: 17 @ 55 min (1.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Weekly meetings @ 55 min; one research paper and defense.	

Department of Military Instruction

23 Courses

DS320	LANDPOWER	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2015-2	Offerings:
<p>This course is a study in Landpower through the levels of war, culminating in an examination of contemporary Landpower issues facing the United States. It is an introductory course in Defense & Strategic Studies and covers foundational topics in the field, such as strategic theory, tactics, operational art and contemporary Landpower challenges. The course methodology introduces students to theory, principles and doctrinal concepts with which students will analyze historical cases and improve their intuition through Clausewitzian Critical Analysis. The course will also introduce a model for strategic problem solving, providing the students an ability to analyze and propose solutions to contemporary Landpower challenges that affect warfighting down to the tactical level. Students will apply course concepts through traditional coursework, such as papers and presentations, but also in combat simulations that develop a practical appreciation for the inherent difficulty in translating theory into practice. Finally, the course aims to develop research, writing and critical thinking skills within the field.</p>		
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	2018-1 2019-1 2020-1
Special Requirements:	None	
DS345	MILITARY INNOVATION	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2014-1	Offerings:
<p>This interdisciplinary course examines the subject of military innovation from a theoretical, strategic, historical, and policy oriented perspective. DS 345 addresses several key questions: Why do militaries innovate? How does this process of innovation occur? Why do attempts at military innovation succeed or fail? To answer these questions, this course introduces the innovation concept and ties innovation to the levels of war. It provides the historical narrative to military innovation, while emphasizing the contemporary operating environment by exploring the possibility of a recent Revolution in Military Affairs through emerging technologies and the international security environment.</p>		
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Special Requirements:	An analytical paper and class presentation on a cadet-selected recent or future operational concept.	
Disqualifier(s):	MS345	
DS350	PERSUASIVE COMMUNICATIONS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2017-1	Offerings:
<p>DS350 is a communication course grounded in application of sound communication techniques relevant to the tactical and strategic levels of war as well as communication techniques applicable for the proper delivery and reception of messages in a professional organization.</p>		
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Special Requirements:	Four graded presentations (2 X Informative, 1 X Persuasive, 1 X research paper presentation.) One trip section to NYC to Fox News/CNN.	
Disqualifier(s):	MS350	
DS360	SP OPNS/LOW-INTENSITY CONFLICT	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2012-1	Offerings:
<p>This course is divided into two sub-courses. The first sub-course examines the class of military operations commonly referred to as low intensity conflict (LIC). It explores the nature and dynamics of LIC with particular attention to the differences between LIC and conventional, mid to high intensity conflict. Specifically, cadets will examine insurgency and counterinsurgency, international terrorism, and peace operations and strategy and tactics appropriate for each. The second sub-course examines Special Operations Forces (SOF). This sub-course explores the unique methods of special operators and the close relationship between SOF and LIC. Cadets will examine how U.S. SOF are organized; how special operations in general succeed; and why SOF are particularly well suited to LIC. Several subject matter expert guest speakers are integrated into the instruction throughout the course.</p>		
		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: Research paper and oral presentations.

Disqualifier(s): MS360

DS370	STRATEGY AND POLICY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	----------------------------	--

Scope:	2017-2	Offerings:
---------------	--------	-------------------

This course introduces cadets to foundational concepts within national policy, strategic theory and military strategy. Cadets analyze case studies and apply major theoretical concepts in strategy and policy through individual critical thinking, group collaboration and oral and written communication. Graduates will be able to understand, analyze and effectively communicate the relation of tactical action to national policy.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: None

Disqualifier(s): DS470

DS385	SUSTAINING THE FORCE	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-----------------------------	--

Scope:	2012-1	Offerings:
---------------	--------	-------------------

This course introduces cadets to the principles of logistics and the critical factors that affect sustaining military operations. The first block focuses on the principles of logistics and characteristics of logistical support, identifying the fundamentals of logistical planning of both tactical missions and expeditionary operations. The second block focuses on sustaining combat operations at the tactical level of war, applying the principles of logistics to military operations from the perspective of both mounted and dismounted junior leaders. The third block of instruction focuses on case studies, examining operations in which logistics led to success or failure on the battlefield. Cadets will leave the class with an understanding of the fundamentals of logistical planning, and an understanding of the challenges of sustaining units in combat. Students will be equipped to conduct doctrinal analysis of the logistical planning and execution of past military operations, and identify the aspects of sustainment that contributed to victory or defeat.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: None

Disqualifier(s): MS385

DS399	STRATEGIC STUDIES INTERNSHIP	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-------------------------------------	--

Scope:	2015-0	Offerings:
---------------	--------	-------------------

The Academic Individual Advanced Development (AIAD) program is designed to give cadets practical experience in their field of study and to reflect on their experiences by completing specified requirements. Current AIADs that cadets may potentially execute for credit include the WWI Staff Ride, Joint Staff (J-5), US Army South (G-2) and the Combined Joint Task Force, Horn of Africa, though AIAD availability will vary by year. Instructors, students and host agencies will develop a specific academic plan, which will require curricular review, prior to executing the AIAD. Students will normally complete specially assigned readings, a daily reflective journal based on their practical experiences, and write a term paper that benefits the host organization or expands on the trip's purpose. The assigned instructor will provide weekly feedback on student submissions.

Lessons: 0 @ 0 min (0.000 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: Program Director approval

DS455	COMPARATIVE DEFENSE POLICY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-----------------------------------	--

Scope:	2017-1	Offerings:
---------------	--------	-------------------

This course's objective is to analyze the defense policies of various countries and the outcomes of those defense policies, to include national security objectives, national military objectives, military doctrine, force structure, and military capabilities. Countries studied will include actual and potential coalition partners and potential adversaries. Cadets will examine the political, economic, and social influences on each military establishment. Cultural influences on the development and implementation of the defense policies for countries studied will be examined, including the effects each country's culture has on the missions, structure, roles, and capabilities of the military. Cadets will develop their own framework of analysis to critically analyze the defense policies and cultures of other countries, and will be able to clearly articulate that analysis through written and oral means. Guest speakers include liaison officers and Foreign Area

Officers to provide insight into the specific military establishments of those countries studied.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: A comparative study with a 2500-word paper and a class presentation; compensatory time provided.

Prerequisite(s): SS307
-Or-
SS357

DS460	INSURGENCY & COUNTERINSURGENCY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---	--

Scope: 2017-1

Offerings:

Why do men rebel and how do states react? DS460 examines the nexus between social movements, revolutions and insurgencies and introduces cadets to how this is applicable to national security and policy. Cadets will apply theoretical frameworks to analyze insurgencies from the individual, community and state level and understand applicable counterinsurgent strategies. Cadets do this through historic case study analysis, group collaborative projects, and both oral and written communication. Graduates will be able to analyze internal conflict and understand how this applies to national security policy.

2018-1 2018-2 2019-1
2019-2 2020-1 2020-2

DS470	MILITARY STRATEGY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--------------------------	--

Scope: 2015-1

Offerings:

Military Strategy provides an overview of the fundamentals of military strategy, strategic theory, and the history of military strategy through an Integrative Experience that prepares cadets to evaluate strategic decision-making by considering the relevant political, social, economic and technological context. By the end of the course, each graduate will be able to understand, analyze and effectively communicate both the relation of tactical action to American national policy and the use that is made of force in the international system because as commissioned officers they will directly contribute to the nation's strategic performance in war. In order to achieve that goal, DS470 cadets will actively learn, apply and analyze case studies utilizing major theoretical and historical concepts in military strategy through individual critical thinking and creativity, group collaboration and peer instruction, and oral and written communication.

DS485	SEA AND AIR POWER	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--------------------------	--

Scope: 2017-1

Offerings:

This course provides both a historical and theoretical foundation for understanding Sea and Air Power and its role in national security, national defense, and military strategy. The historical and theoretical foundations provide the lexicon and general understanding of Sea and Air Power theory. With this understanding, cadets can apply the theory to understand its role in policy and strategy; whereby cadets can assess current policies and strategies and make assessments regarding Air and Sea Power in crisis, conflict and other political and military situations.

2018-1 2019-1 2020-1

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Prerequisite(s): DS385

DS489	ADV IND STUD-DEF/STRAT STUDIES	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------------	--

Scope: 2013-1

Offerings:

The course provides an environment that is conducive to independent effort in a subject area of special interest to the cadet. Original research or specialized study can be accomplished in any of the many fields within Defense and Strategic Studies. The course is conducted in three phases. First, the cadet and the individual advisor from the Defense and Strategic Studies faculty will reach agreement on a subject area for research. Research methods will be studied under the direction of the faculty member. Research may involve field trips and personal interviews with experts in the area of study. In the second phase, the cadet will engage in independent research and prepare a draft analytical paper or report detailing the findings. During this period, frequent consultation with the faculty advisor occurs regarding the progress in the project. In the third phase, the cadet will present and define the findings before a faculty committee.

Lessons: 0 @ 0 min (0.000 Att/wk)

Labs: 0 @ 0 min

Special Requirements: One paper or report of variable length; oral defense.

Disqualifier(s): MS489

DS490	SPECIAL TOPICS: STRAT STUDIES	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--------------------------------------	--

Scope: 2015-1

Offerings:

The Special Topics Course provides cadets an opportunity for reading and analysis in depth within a topic area of special interest and timely relevance to Defense and Strategic Studies. The course director will determine the approach dependant on the topic and enrollment. Courses will normally develop the cadet's understanding of the topic through study of theory, history, doctrine, and historical and contemporary case studies. A generous portion of the course will normally address modern complex problems related to the topic area and assignments will emphasize analytical writing. Topics will vary by semester. A past Special Topics Course was "Sea and Air Power."

DS495	RESEARCH METHODS STRAT STUDIES	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------------	--

Scope: 2015-1

Offerings:

This is a research methods course designed to support the interdisciplinary nature of the research-based courses in the Defense & Strategic Studies Program, DS496 Strategic Studies Thesis and DS498 Strategic Studies Capstone. In this course, students will learn different research methodologies for the strategic studies field and develop effective writing skills in a seminar format. Partway through the semester students will choose an interdisciplinary research topic related to the Defense & Strategic Studies field. The topic, approved by the Course Director, will either be as part of a student-selected thesis for DS496 or an assigned client-based project for DS497. Thesis students must also select faculty members from across the institution to serve as their thesis advisors as part of DS495. Student assignments include practical exercises, a research proposal, a literature review and a draft research methodology.

DS496	STRATEGIC STUDIES THESIS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------	--

Scope: 2015-2

Offerings:

Strategic Studies Thesis is an integrative course in strategy designed to provide Defense & Strategic Studies majors with practical experience in addressing real, complex and ambiguous strategic issues. Students will write and defend an interdisciplinary thesis that in some way relates to the military instrument of power. Thesis cadets will continue the work they began with their faculty advisors in DS495 Research Methods in Strategic Studies by revising their literature review and research methodology, then complete data collection, data analysis, thesis writing and ultimately conduct an oral defense of their thesis before an interdisciplinary faculty board. Finally, students will prepare for and participate in the Gettysburg Staff Ride, which is a culminating intellectual experience that ties together the broad array of interdisciplinary subjects within the program and promotes life-long learning about the profession at arms.

DS497	STRATEGIC STUDIES CAPSTONE	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-----------------------------------	--

Scope:	2015-2	Offerings:
This is an experiential learning course in military strategy designed to provide Defense & Strategic Studies majors with practical experience in solving real, complex and ambiguous strategic problems. Students will work in small groups to solve such a problem for an external client organization focusing on the use of the military instrument of power. Student groups will determine stakeholder needs, define the client's problem and conduct appropriate research to develop a viable solution or set of recommendations. Groups will meet regularly with their client, complete a final written report and provide a formal presentation with an oral defense to the faculty. Alternatively, select students may work with an interdisciplinary team from another academic department's capstone course to contribute analysis from the strategic studies perspective to the group's project. Finally, students will prepare for and participate in the Gettysburg Staff Ride, which is a culminating intellectual experience that ties together the broad array of interdisciplinary subjects within the program and promotes life-long learning about the profession at arms. ML100	INTRO TO WARFIGHTING LAB	0.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2016-0	Offerings:
ML100 Introduction to Warfighting Laboratory is a three to four week program of instruction for Third Class cadets at the United States Military Academy. ML100 is offered during the summer term as part of Cadet Field Training (CFT I and CFT II). ML100 expands on the knowledge gained in the classroom by providing hands on application of concepts and lessons from MS100 in a tactical field environment. Cadets perform select BOLC-A tasks in order to further develop the military and tactical knowledge necessary for future field training and lays the foundation for subsequent Military Science courses. The purpose of ML100 is to develop, train, test, and validate specific BOLC-A tasks; ICW CFT it prepares Third Class cadets to assume duties as NCOs in the Corps of Cadets; instill the warrior ethos in each cadet; and inspire each cadet to professional excellence through physically- and mentally-demanding training.		2018-0 2019-0 2020-0

ML300	CLDT LAB	0.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2016-0	Offerings:
Cadets are enrolled in ML300 during their second or first class summer. This course trains, mentors, and assesses basic leadership skills focusing on Troop Leading Procedures (TLPs), effective communication, and tactical decision making in order to develop competent and confident small unit leaders capable of operating in an uncertain and rapidly changing environment. In a series of tactical scenarios that reflect the Decisive Action Training Environment, cadets experience a minimum of two assessed leadership positions which provides the cadet with a common experience to further enhance his/her leadership ability to solve difficult tactical problems.		2018-0 2019-0 2020-0
Lessons:	0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min

Special Requirements: None

MS100	INTRODUCTION TO WARFIGHTING	1.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	------------------------------------	--

Scope: 2014-1

Offerings:

This course provides cadets with the foundation of military and tactical knowledge necessary for future field training and development in subsequent military science courses. Cadets will gain a solid foundation built on basic Army concepts such as Shoot, Move, and Communicate. Cadets will also learn fundamental Army unit organizations, capabilities and missions, and develop an understanding of the roles of NCOs and Officers. Cadets who have successfully completed MS100, will understand their role as Soldiers and will be well prepared as they transition from follower to leader during the next chapter of their military education, Cadet Field Training.

MS200	FUNDAMENTALS OF SMALL UNIT OPS	1.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------------	--

Scope: 2016-1

Offerings:

This course introduces cadets to the small unit leader's role in the Army by developing the foundational tactical knowledge, critical thinking and problem-solving skills necessary for adaptive leaders in current and future operational environments. Fundamentals of Army Operations builds upon the knowledge, competencies and experience cadets gain in MS100 and summer training. It explores Army leadership, troop leading procedures, and small-unit operations in order to develop and hone decision-making skills. Throughout the course, cadets demonstrate their knowledge through a series of tactical decision exercises, and oral and written assessments. Cadets who successfully complete MS200 possess fundamental tactical planning and decision-making skills that prepare them for more challenging training in the field and in future military science courses.

MS300	PLATOON OPERATIONS	1.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------	--

Scope: 2016-1

Offerings:

This course builds upon foundational tactical planning and decision-making skills taught during MS200. MS300 further develops the cadet's knowledge of doctrinal tactical principles and general professional knowledge, using Troop Leading Procedures (TLPs) as a framework for planning and preparation. Cadets are challenged to apply tactical knowledge, competencies, and decision-making to solve complex situations that require critical thinking and creative problem-solving skills. Instruction in the fundamentals of small unit operations emphasizes both offensive and defensive tactics. Additionally, cadets are expected to demonstrate an increased understanding of the TLPs and mental agility through nearly daily execution of tactical decision-making exercises. In addition to tactics, cadets continue their general instruction in the various Army systems, procedures and functions that are important aspects of officership. Finally, cadets examine the small unit leader's role in ensuring that the moral and ethical decision making process is integrated into all operations.

MX400	OFFICERSHIP	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--------------------	--

Scope: 2014-1

Offerings:

MX 400 is a capstone course that challenges cadets to reflect upon, integrate, and synthesize their experiences in the six Cadet Leader Development System domains as they commence the transformation to commissioned officership. Cadets will achieve a thorough intellectual understanding of the four clusters of expert knowledge of the military professional--military-technical, moral-ethical, political-cultural, and human development. Successful completion of this course will enable each cadet to achieve competence and confidence in a new self-identity in the four facets of the role of a commissioned officer--a Soldier, a leader of character, a servant of the Nation, and a member of the profession of arms. Each graduate will be capable of executing the fundamental practices of the military professional--the repetitive exercise of discretionary judgment in decision making and taking actions that fulfill the moral and legal responsibilities of commissioned officers. Upon graduation, each new 2LT will be fully prepared for the immediate challenges of junior officership and capable of a lifetime of professional growth as an officer in the United States Army.

KN355	FUNCTIONAL ANATOMY	3.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2013-1	Offerings:
<p>A knowledge of basic and applied anatomy is essential to the study of human beings engaged in motor performance. An individual who understands the anatomical bases that underlie human movement and who can systematically analyze movement and determine interventions is more likely to improve technique and reduce the risk of injury. Therefore, this course is designed to introduce the structures of human anatomy and explain how these structures are involved in human movement. In support of class room instruction cadets will be introduced to basic laboratory techniques and collection, analysis and interpretation of data demonstrating anatomical and mechanical function of muscles, joints, and limbs. On successful completion of the course, cadets should be able to identify and understand the anatomical structures essential for human movement and apply their anatomical knowledge to human movement problems in athletic, educational, clinical, and/or work settings.</p>		2018-1 2019-1 2020-1

KN455	PSYCHOLOGY OF EXERCISE	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2011-1	Offerings:
<p>This course comprehensively examines theory and research related to exercise psychology, and introduces sport psychology as an associated discipline. The course is designed to provide a broad overview of exercise psychology and increase understanding of how psychological factors influence adherence and performance in exercise and sport. Additionally, the course addresses associated topics including addictive and unhealthy behaviors, burnout and overtraining, aggression in sport, and character development through sport.</p>		2018-1 2019-1 2020-1
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	

Special Requirements:	None	
KN460	EXERCISE PHYSIOLOGY	3.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2011-1	Offerings:
<p>This course is designed to apply the principles of chemistry, physics, anatomy, and physiology towards an understanding of the impact of work on the human body. Study will include both mechanical and physiological response to acute bouts of work and functional adaptation to repeated bouts of work. In support of class room instruction students will be introduced to basic laboratory techniques and collection, analysis and interpretation of physiological data. In addition, material will be presented that will emphasize the influence of age, disease-states, or the environment on the physiological response as a clue to physiological mechanisms and significance.</p>		2018-1 2019-1 2020-1
Lessons:	40 @ 55 min (2.500 Att/wk)	Labs: 8 @ 110 min
Special Requirements:	None	
Prerequisite(s):	CH387 KN355	
KN465	MOTOR CONTROL AND LEARNING	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2013-2	Offerings:
<p>This course will present the principles underlying the control and learning of motor skills. Central, neural, and sensory mechanisms that facilitate or inhibit the production, control, acquisition, retention, and transfer of motor skills will be discussed. Emphasis is given to a sound theoretical base from which to design and implement optimal learning and performance conditions. Motor control variables such as motor programs, brain systems, the spinal cord, musculoskeletal factors, and visual systems are explored. Motor learning/performance variables such as transfer, modeling, feedback, practice schedule, mental practice, memory, and attention will be discussed. The course employs lecture, a literature review on a topic of interest in the field, and research methods to understand motor behavior principles.</p>		2018-2 2019-2 2020-1 2021-1 2022-1
Lessons:	40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min

Special Requirements:	None	
KN494	RESEARCH METHODS/DATA ANALYSIS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2010-1	Offerings:
This course is designed to survey the basic types of analytical, descriptive, and experimental research methods often found in exercise science research to help cadets understand the systematic nature of problem solving. Cadets will also learn to analyze, interpret, and apply exercise science data. Cadets will survey a variety of statistical procedures: descriptive, inferential, and correlational. Emphasis will be given to analyzing and interpreting data from a research perspective.		2018-1 2019-1 2020-1
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
KN495	HONORS THESIS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2010-2	Offerings:

This course provides Kinesiology majors with an opportunity to enhance their skills in clinical research and analysis. Under the supervision of a thesis advisor, cadets will implement the research proposal developed in KN494. Cadets will meet regularly as a group with their seminar advisors to discuss issues in design, methodology, and data analysis. At the end of the semester cadets will present their findings and defend their theses before a committee of faculty and fellow students.

2018-2 2019-2 2020-2

--------------	-------------------------------	--

Scope:	2007-3	Offerings: No Course Offerings
---------------	--------	--

The purpose of this course is to physically develop cadets utilizing progressive and sequential resistance exercises and cardiorespiratory conditioning exercises that will enable them to pass the Army Physical Fitness Test and Indoor Obstacle Course Test. This course will provide cadets, who have a deficient Physical Performance Score Cumulative, an opportunity to supplement/raise their PPSC. Cadets will develop a sense of self-responsibility for their personal fitness and a lifetime commitment to maintain their physical fitness. This course will only be offered during Summer Term Academic Program.

Lessons: 0 @ 0 min (0.000 Att/wk) **Labs:** 20 @ 90 min

PE109	FUNDAMENTALS OF AQUATICS	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------	--

Scope:	2008-1	Offerings:
---------------	--------	-------------------

This course has two phases: phase one is a remedial swimming exploration curriculum designed to prepare cadets classified as non-swimmers for the survival swimming curriculum. The remedial phase is designed to help cadets acquire in-water experiences, and gradually refine the basic motor skills needed to be comfortable, safe, and effective in and around the aquatic environment. Phase two emphasizes the military applications of swimming and survival skills to include the elements of breath control, buoyancy positions, stroke assessment, and swimming endurance. Successful completion fulfills the survival swimming graduation requirement for selected cadets.

PE115	FUNDAMENTALS OF COMBATIVES	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-----------------------------------	--

Scope: 2013-1

Offerings:

This course exposes Cadets to variety of basic standing and ground skills. Cadets learn how to engage in the free movement range, clinch range, and grappling range. In the free movement range Cadets learn how to strike with their hands and defend themselves. In the Clinch range cadets learn how to close with their opponent, achieve the Clinch, then control their opponent using knees and movement. In the Grappling range Cadets learn how to move into and out of positions and apply submissions and chokes. Body mechanics, aggressiveness, and affective reactions are stressed.

PE117	MILITARY MOVEMENT	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--------------------------	--

Scope: 2011-1

Offerings:

This is a 19-lesson course designed to expose cadets to a variety of basic movement skills. The course serves as a basis for many other athletic and military activities that cadets will encounter during their time at USMA as well as in their Army career. Focus is placed on applied movement tasks for all cadets. This course takes a basic Movement Theme approach, meaning cadets are required to learn a variety of relevant skills from within the general themes of rolling, hanging, climbing, crawling, jumping, vaulting, landing, mounting, supporting and swinging. In addition, the environment (or apparatus) where a skill is performed is changed or modified to challenge the cadet and broaden the movement experience. Movement environments are designed around specific events such as tumbling, vaulting, vertical ropes, horizontal ropes, the indoor obstacle course (IOCT), horizontal bars, elephant vault, ankles to the bar (ATB), pull-ups, rock climbing, and trampoline.

PE205	ADVANCED COMBATIVE SKILLS	0.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2013-0	Offerings:
This four hour time block is designed to enhance Cadets' grappling ability. Cadets review fundamental grappling skills from the previous summer and are taught new grappling skills in positioning and submissions to further develop their ability to perform well in future Combatives classes.		2019-0 2020-0
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
PE215	FUNDAMENTALS/PERSONAL FITNESS	1.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2013-1	Offerings:
This course provides cadets with the knowledge and experience to develop a personal fitness plan that links to the Army doctrinal approach to physical readiness. Cadets will participate in a variety of active learning experiences designed to develop, monitor, maintain, and assess physical fitness for their future Army careers and lifetime of physical activity.		2018-1 2018-2 2018-3 2018-4 2019-1 2019-2 2020-1 2020-2

Disqualifier(s):	PE150	
PE220	AEROBIC FITNESS	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2013-1	Offerings:
The course provides cadets with information and experiences to create an aerobic optimal performance plan. Cadets are exposed to numerous aerobic fitness activities and participate in events focused on military applications. The principles of exercise physiology serve as the foundation for the course as students design and participate in various aerobic conditioning assessment activities.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2

Special Requirements:	None	
PE222	BADMINTON/PICKLEBALL	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2011-2	Offerings:
This is a 19 lesson course featuring nine lessons of Pickleball and ten lessons of Badminton. Pickleball is a sport played by two, three, or four people. Pickleball uses a wooden paddle and whiffleball and is very similar to tennis. The course focus is on the rules of play and basic skill development of service and service return, forehand and backhand drives, volley and half-volley, drop shot, lob, and overhead smash. Additional instruction in basic offensive/defensive strategy and tactics is provided. Badminton is a sport played by two, three, or four people on the same size court as pickleball. Badminton uses a lightweight strung racquet and shuttlecock (birdie). The course focus is also on the rules of play and basic skill development of service and service return, forehand, backhand, drop shot, lob, and overhead smash. Offensive/defensive strategy and tactics are discussed. Grading is determined by a final exam in each.		No Course Offerings
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 18 @ 50 min	
Special Requirements:	None	
PE223	BASKETBALL	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2010-1	Offerings:
This course is designed to provide cadets with the skills and knowledge necessary for playing, coaching, and officiating basketball. It is intended to assist students in developing fundamental skills for playing as well as nurturing an appreciation for basketball as a lifetime sport. A variety of offensive and defensive team strategies are taught. In addition, the leadership skills of coaching and officiating basketball will be learned. Grading for the course is based upon an officiating practical exercise, demonstrated individual skills, performance on the James Naismith Basketball Obstacle Course, instructor's assessment of each cadet's game performance and a written term end exam.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 18 @ 50 min	

Special Requirements:	None	
PE224	ADVANCED CLOSE QUARTERS COMBAT	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2011-1	Offerings:
This course is designed to educate and expose Cadets in the realm of edge weapons and impact weapons. Cadets learn realistic offensive tactics, defensive tactics, weapon movement patterns, and footwork in order to engage an enemy who has an edge weapon or impact weapon or to use an edge weapon or impact weapon on the enemy in a hostile situation. The cadets are evaluated on their functional ability to perform the skill learned in the course and also on their ability to show tactful aggression and fear management.		No Course Offerings
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 18 @ 50 min	
Special Requirements:	None	
PE226	COMBAT GRAPPLING	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2013-1	Offerings:
This course is designed to provide the cadets with realistic grappling applications and ground fighting skills to enhance their knowledge and warrior ethos to prepare them as future soldiers for unarmed combat and CQC situations. This course focuses on five different grappling positions: Mount, Guard, Side Control, Rear Mount, and scarf hold. Cadets learn how to maintain the positions, escape from the positions, submit from the positions, and strike from the positions. Cadets are evaluated in their function ability to perform skill-sets learned in class, and are also evaluated in their ability to manage their fear, keep their composure, and dominate their opponent.		2019-2 2020-2
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 19 @ 50 min	
Special Requirements:	None	
PE228	MODERN ARMY COMBATIVES L1 CERT	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2010-1	Offerings:
PE 228 is designed to certify cadets to teach U.S. Army Level I Combative Skills. Cadets develop a foundation of basic combative grappling skills and an aggressive mind set needed to engage and defeat an enemy in Close Quarters Combat (CQC). The course focuses on 15 basic grappling skills. Cadets are evaluated on their demonstration and knowledge of the required skills. Successful completion of the course qualifies the individual to conduct Skill Level I Combatives training for soldiers.		2018-1 2018-2
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 18 @ 50 min	
Special Requirements:	None	
PE230	CYCLING	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2013-1	Offerings:
Cycling as a lifetime sport, is designed to take the beginner through a progressive program of bicycle training and instruction to include: proper mounting, balance, turning, ascending, and descending individually and in a group. The course labs are hands-on and focused on learning through practical application and drills on the bike. All riders are also introduced to basic bike maintenance and required to demonstrate baseline skills in preventive maintenance checks and services (PMCS). Classroom instruction is focused on the introduction of cycling principles and as a feedback forum for the riding labs.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 18 @ 50 min

PE232	EMERGENCY WATER SAFETY	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2010-1	Offerings:

The purpose of this course is to introduce cadets who are already proficient swimmers, to first responder training in methodologies generic to Water Rescue, CPR, and Emergency First Aid. Cadets are exposed to a variety of distress and drowning scenarios, and will be able to demonstrate strategies and site specific response techniques essential to safely performing a water related assist and/or rescue. Course focus is on military application in both still water and theatre specific environments, with a special emphasis on emergency management protocol. Written evaluation, five skill-specific performance components, and successful completion of two comprehensive exit scenarios are required for successful course completion.

PE234 LIFEGUARDING

0.5 Credit Hours
(BS=0.0,ET=0.0,MA=0.0)

Scope: 2010-1

Offerings:

This course focuses on a holistic approach to the duties and responsibilities of a trained professional lifeguard and exposes cadets to key elements and strategies related to accident prevention, surveillance methodology, and performance. Additional content and activities focus on emergency response, search and rescue, and duty specific incident/accident management. Cadets who successfully complete certification requirements may obtain professional accreditation/licensure in Lifeguarding, CPR/PR, Oxygen Administration, and Automated External Defibrillation (AED). Additional accreditation/licensure may also be available in both Open Water and Water park Lifeguarding. Written evaluation, four skill-specific performance evaluations, and successful completion of three comprehensive exit scenarios are required for successful course completion.

PE236 GROUP EXERCISE LEADERSHIP

0.5 Credit Hours
(BS=0.0,ET=0.0,MA=0.0)

Scope: 2013-1

Offerings:

Using music as the controlling factor, this course is designed to give participants an opportunity to experience different modalities of exercise such as high/low impact, step, kickboxing, circuit training, spinning, yoga/pilates and water exercise in an Exercise to Music group fitness setting. Participants will be assessed on knowledge of applicable fitness principles, exercise safety, lesson construction and a team-teaching experience of one's choice.

PE238 GOLF

0.5 Credit Hours
(BS=0.0,ET=0.0,MA=0.0)

Scope: 2010-1

Offerings:

This course is designed to provide the beginner and novice golfer with the skills, knowledge, and techniques needed to play golf. The basic techniques taught are the full swing, pitching, chipping, and putting. Course grading is based upon a series of skill tests, a written examination, and a golf swing analysis.

PE242 ICE SKATING

0.5 Credit Hours
(BS=0.0,ET=0.0,MA=0.0)

Scope: 2013-1

Offerings:

This course is designed to provide cadets who have little or no previous skating experience with the basic skills necessary to safely participate as a recreational skater. The forward and backward stroke, snow plow, "T" stop, and hockey stop, as well as forward and backward crossovers are presented. Additional skills taught are turns, spins and jumps. Grading is based upon the cadet's ability to demonstrate the skills taught during the course. A compulsory skating routine is also used for evaluating student proficiency. Additionally, a short creative routine of optional figures chosen by the cadet is evaluated.

PE244	JUDO	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2010-1	Offerings:
The purpose of this course is to introduce judo as a competitive sport and the application of judo skills for self defense and combatives training. The course content will include falling skills and basic throwing, pinning, and submission skills. Judo customs, courtesies, terminology, and competitive rules will be introduced. Students will gain an entry level knowledge and understanding of the basic skills, safety concerns, and rules needed to participate in competitive Judo. Students will be graded on a demonstration of basic skills and knowledge of competitive rules and terminology.		2019-1 2019-2 2020-1 2020-2

PE246	RACQUETBALL	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2011-1	Offerings:
This course introduces the basic skill and strategy fundamentals of racquetball. Cadets learn to identify and demonstrate the basic fundamentals of: personal playing safety; rules of play; forehand and backhand stroke techniques; kill, passing, and defensive shots; serve, serve return techniques and strategies. Singles play, doubles and "cut throat" are examined. Grading is determined by performance on two skills tests (rally & ceiling shot), and a written final exam.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 18 @ 50 min	
Special Requirements:	None	
PE248	INDOOR ROCK CLIMBING	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2010-1	Offerings:
This course develops fundamental rock climbing skills, techniques and safety awareness. This course introduces basic rock climbing systems, rappelling, belaying, knots, top roping, and assorted climbing skills. Course grading is based on climbing skills, rappelling skills, knowledge of basic rock climbing systems, and the application of judgment and safety practices in various situations.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 18 @ 50 min	
Special Requirements:	None	
PE250	SCUBA	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2011-1	Offerings:
This course is designed to provide cadets with the basic skills and knowledge needed to safely participate in SCUBA diving and pursue certification as a National Association of Underwater Instructors (NAUI) Basic SCUBA Diver. Successful completion of this course leads to Confined Water Certification and the ability to enroll in Open Water training. The requirements of this course include the successful demonstration of skin and SCUBA diving skills, the ability to practice and adhere to safe diving activities, and the completion of a comprehensive, written final examination. Cadets who possess Scuba certification or are members of the Cadet Sky Diving Club are ineligible for this course.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 6 @ 50 min (0.000 Att/wk)	Labs: 12 @ 50 min	
Special Requirements:	None	

PE252	SKIING-ALPINE	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2013-2	Offerings:
This course is designed to teach beginning skiers to ski in balance and control in all terrain and snow conditions. Knowledge of skiing equipment, proper body position, stopping, gliding, edging, sliding, turning, and carving is taught. The course grade is based upon skiing performance assessments administered on the slope.		2018-2 2019-2 2020-2
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 18 @ 50 min	
Special Requirements:	None	
PE254	SKIING-CROSS COUNTRY	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2010-1	Offerings:
This course introduces cadets to the basic skills and techniques of cross-country skiing. It emphasizes skill development and the benefits of skiing as a lifetime fitness activity. Cadets are required to successfully demonstrate the diagonal stride, skating, turning, uphill techniques, and downhill techniques. Course grading is determined by instructor, peer and self-assessment of skiing ability and a written examination.		No Course Offerings
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 18 @ 50 min	
Special Requirements:	None	
PE256	SNOWBOARDING	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2010-1	Offerings:
This course is designed to provide cadets with the basic skills and knowledge needed to safely participate in snowboarding. The course focuses on teaching beginning snowboarders to ride in balance and control in various terrain and snow conditions. Knowledge of boarding equipment, as well as skills in proper stance and balance, stopping, gliding, edging, turning, carving and basic freestyle maneuvers will be covered.		2018-2 2019-2 2020-2
Lessons: 18 @ 50 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
PE258	SOCCER	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2011-1	Offerings:
This course is designed to provide cadets with the skills and knowledge necessary for playing soccer. A variety of individual skills and techniques are taught, as well as individual/team offensive and defensive strategies. The value of small sided games are used as building blocks that lead to full 11 aside matches. Grading for the course is based upon a written examination, and tournament play.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 18 @ 50 min	
Special Requirements:	None	
PE260	SPORTS PHYSIOLOGY	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2010-1	Offerings:
The objectives of this course are to introduce cadets to applied concepts of Sports Physiology, conduct personal fitness assessments in DPE's Center for Physical Development Excellence facility, and perhaps complete an independent study examining a sports physiology issue. The cadet becomes familiar with the varied aspects of Sports Physiology and is able to demonstrate baseline and advanced knowledge of 'core principles.' Critical thinking and analysis is used in all endeavors. The personal assessments conducted in the lab and the independent study approach provides cadets with insightful physiological information that can enhance their personal fitness performance.		No Course Offerings
Lessons: 18 @ 50 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
PE262	STRENGTH DEVELOPMENT	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)

Scope:	2010-1	Offerings:
This course provides cadets with the knowledge and hands-on experience for conducting a variety of resistance training exercises. Cadets develop the critical skills needed for teaching safe and proper resistance training techniques that will benefit both them and their soldiers. Cadets are assessed in the following areas: demonstrated proficiency performing multi-joint strength exercises; Olympic exercises and plyometrics. This course is designed to instill a lifetime desire for continued participation in a resistance-type training programs.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 6 @ 50 min (0.000 Att/wk)	Labs: 12 @ 50 min	
Special Requirements:	None	
PE264	TENNIS	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2013-1	Offerings:
This course is designed to develop basic tennis skills including the forehand and backhand groundstrokes, serve, and volley. Students also learn the basic rules and etiquette of tennis as well as simple singles and doubles strategies. Grading is based on skills tests, an in-class tournament, instructor stroke evaluations, and a written final examination.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 18 @ 50 min	
Special Requirements:	None	
PE266	VOLLEYBALL	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2010-1	Offerings:
This course is designed to teach cadets the fundamentals of volleyball. The individual skills taught are the underhand pass, set, serve, block, and spike. Additionally, the course covers defensive and offensive formations, the transition game, officiating techniques and United States Volleyball Association (USVA) rules. Grading is based upon skill testing on the underhand pass, set and serve, a written test, and a round robin tournament.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 18 @ 50 min	
Special Requirements:	None	
PE268	CURRENT LIFETIME ACTIVITY	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2010-1	Offerings:
The lifetime sports skills series are credit courses intended to provide cadets an opportunity to learn additional sports skills which can be incorporated into lifetime fitness goals and activities. They will further the development of neuromuscular and kinesthetic abilities through the acquisition of and participation in sport skills and can be part of the cadet personal fitness programs. Specific lifetime sport activities are selected on the basis of current trends, resources, instructor expertise, and cadet needs.		No Course Offerings
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 18 @ 50 min	
Special Requirements:	None	
PE320	SURVIVAL SWIMMING - ELEMENTARY	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2010-1	Offerings:
The Survival Swimming-Elementary course is designed to develop aquatic proficiency for cadets who swam 150 yards in 4 minutes or more on their initial entry swim classification test. The Program of Instruction (POI) is divided into two areas: basic swimming and combat/survival swimming. Emphasis in all levels is on the military applications of swimming and survival skills to include the elements of breath control, buoyancy positions, stroke assessment, and swimming endurance. Grading is primarily based on criterion-referenced scales in basic and survival swimming skills.		2018-1 2018-2 2018-3 2019-1 2019-2 2019-3 2020-1 2020-2 2020-3

Special Requirements:	None	
PE321	SURVIVAL SWIMMING - LOW	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2010-1	Offerings:

<p>The Survival Swimming-Low Intermediate course is designed to develop aquatic proficiency for cadets who swam 150 yards between 3 minutes 16 seconds and 3 minutes 59 seconds on their initial entry swim classification test. The Program of Instruction (POI) is divided into two areas: basic swimming and combat/survival swimming. Emphasis in all levels is on the military applications of swimming and survival skills to include the elements of breath control, buoyancy positions, stroke assessment, and swimming endurance. Grading is primarily based on criterion-referenced scales in basic and survival swimming skills.</p> <p>Lessons: 0 @ 0 min (0.000 Att/wk) Labs: 19 @ 50 min</p> <p>Special Requirements: None</p>		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
PE322	SURVIVAL SWIMMING - HIGH	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2010-1	Offerings:
<p>The Survival Swimming-High Intermediate course is designed to develop aquatic proficiency for cadets who swam 150 yards between 2 minutes 30 seconds and 3 minute 15 seconds on their initial entry swim classification test. The Program of Instruction (POI) is divided into two areas: basic swimming and combat/survival swimming. Emphasis in all levels is on the military applications of swimming and survival skills to include the elements of breath control, buoyancy positions, stroke assessment, and swimming endurance. Grading is primarily based on criterion-referenced scales in basic and survival swimming skills.</p> <p>Lessons: 0 @ 0 min (0.000 Att/wk) Labs: 19 @ 50 min</p> <p>Special Requirements: None</p>		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
PE323	SURVIVAL SWIMMING - ADVANCED	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2010-1	Offerings:
<p>The Survival Swimming-Advanced course is designed to develop aquatic proficiency for cadets who swam 150 yards in less than 2 minutes 30 seconds on their initial entry swim test. The Program of Instruction (POI) is divided into two areas: basic swimming and combat/survival swimming. Emphasis in all levels is on the military applications of swimming and survival skills to include the elements of breath control, buoyancy positions, stroke assessment, and swimming endurance. Grading is primarily based on criterion-referenced scales in basic and survival swimming skills.</p> <p>Lessons: 0 @ 0 min (0.000 Att/wk) Labs: 19 @ 50 min</p> <p>Special Requirements: None</p>		2019-2 2020-2
PE360	COMBAT APPLICATIONS	0.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2013-1	Offerings:
<p>This course provides cadets with a comprehensive set of basic combatives skills suited for a combat scenario. Cadets will learn to respond appropriately to aggression by utilizing proper body mechanics, skills, aggressiveness, and fear management. Two combat ranges of hand-to-hand fighting are taught: 1) Grappling range - cadets learn to fight and win on the ground and, 2) Clinch range - cadets learn to close the distance and control the fight between themselves and an attacker. Cadets will be evaluated on their ability to perform selected combative skills and their capacity to exhibit the warrior ethos and fear management.</p> <p>Lessons: 0 @ 0 min (0.000 Att/wk) Labs: 20 @ 55 min</p> <p>Special Requirements: None</p> <p>Disqualifier(s): PE460</p>		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
PE450	ARMY FITNESS DEVELOPMENT	1.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2013-1	Offerings:
<p>This course prepares future company grade officers for their roles as fitness leaders by equipping them with the knowledge to plan, implement, and assess unit physical training in a variety of conditions and by giving them opportunities to apply this knowledge.</p> <p>Lessons: 20 @ 55 min (0.000 Att/wk) Labs: 0 @ 0 min</p> <p>Special Requirements: None</p>		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2 2021-1 2021-2

PE471	ADV SP DEV/PHY IND ADV DEV	2.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-----------------------------------	--

Scope:	2010-7	Offerings:
---------------	--------	-------------------

Advanced Sport Development is an intense physical program designed for cadets with an interest in total fitness and a comprehensive scuba experience. This program consists of four subcourses: Aerobic Fitness (mountain biking, hiking, kayaking, etc.), Sports Physiology, Muscular Fitness, and SCUBA.

Lessons: 0 @ 0 min (0.000 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: None

PE472	OUTER LIMITS - MOUNTAIN LEADER	2.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------------	--

Scope:	2005-4	Offerings:
---------------	--------	-------------------

The Outer Limits – Mountain Leader course is designed to provide cadets with the basic skills and knowledge needed to safely participate in basic to advanced rock climbing. Successful completion of this course allows cadets to participate in many levels of basic to advanced levels of lead rock climbing and prepare them for future experiences in a variety of climbing adventures to include ice climbing and mountaineering co-related adventures.

Lessons: 15 @ 300 min (5.000 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: None

Department of Physics and Nuclear Engineering

48 Courses

NE300	FUNDAMENTALS OF NUCLEAR ENGR	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2014-1	Offerings:
This course provides the student with an understanding of the fundamental physical principles involved in radioactive decay, radiation interaction with matter, nuclear fission and the nuclear fuel cycle. The course covers neutron interactions with matter, fission, neutron diffusion, neutron moderation, and reactor criticality. This course is essential for the nuclear engineer and is an excellent choice for the applied scientist.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	One research paper is included.	
Corequisite(s):	PH202 -Or- PH252 -Or- PH205 -Or- PH255	
NE350	RADIOLOGICAL ENGR DESIGN	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2012-2	Offerings:
This course focuses on nuclear engineering systems including radiation protection, shielding, and the uses of radioactive sources in industrial processes. Specific topics emphasize the operation of radiation detectors, shielding principles, health effects of radiation, radiological dispersion devices, and nuclear incidents. A design project applies the concepts presented in this course to the solution of practical problems.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	One design project.	
Prerequisite(s):	NE300	
NE355	NUCLEAR REACTOR ENGINEERING	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
Scope:	2012-2	Offerings:
This course focuses on nuclear reactor systems, the release of nuclear energy in the reactor core, and its removal as heat for producing electric power. Specific topics emphasize reactor kinetics, heterogeneous reactors, control rods and shim, reactor poisons, heat transfer, and alternative energy systems. The fundamentals of transport theory and the solution to the transport equation using Monte Carlo N-Particle (MCNPX) transport code are introduced. The laboratory component includes a student-designed lab.		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 8 @ 120 min	
Special Requirements:	One paper and a student-designed lab project.	
Prerequisite(s):	NE300	
NE361	COMPUTATIONAL DESIGN IN NE	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2017-1	Offerings:
This is a required course for nuclear engineering and nuclear engineering science majors. This course consists of an introduction to radioactive decay, radiation interactions and transport, and detailed instruction in the use and application of advanced nuclear engineering computational tools culminating in the design of a nuclear engineering system. This course is designed to provide an introduction to the science and theory behind modeling nuclear phenomena along with practical exposure to industry- standard computational tools used to design reactors, radiation shields, detectors and other nuclear systems. Specific topics include: radiation interactions and the Boltzmann transport equation, theory of deterministic and Monte Carlo methods for radiation transport, radioactive decay, problem solving using deterministic and Monte Carlo computer simulations, design of nuclear engineering systems, and analysis and validation of computational results.		2018-2 2019-2 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

NE389	INDIVIDUAL STUDY IN NE	1.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-------------------------------	--

Scope: 2013-1

Offerings:

This course is an individually supervised research and study program to familiarize cadets with advanced nuclear or radiological engineering procedures and techniques. The primary purpose is to acquaint students with the essential skills required for independent research in nuclear or radiological engineering. With the approval of the Head of the Department, the cadet chooses a research project of interest and is supervised by a faculty member conducting the research.

2018-1 2018-2 2019-1
2019-2 2020-1 2020-2

Lessons: 0 @ 0 min (0.000 Att/wk)

Labs: 0 @ 0 min

Special Requirements: Cadets must complete either a written research report or present an oral report to members of the department faculty at the end of the semester.

NE400	NUCLEAR ENGINEERING SEMINAR	1.0 Credit Hours (BS=0.0,ET=1.0,MA=0.0)
--------------	------------------------------------	--

Scope: 2008-2

Offerings:

This seminar will meet once each week and will include all first class cadets majoring in nuclear engineering. The seminar topics will address the concerns of professional nuclear engineers such as engineering ethics, economics, and licensing procedures. Guest lecturers will discuss topics of current interest in the field of nuclear engineering to include DoD initiatives in the FA52 (Nuclear Combating Weapons of Mass Destruction). Much of the seminar material will be presented by guest lecturers from the military, industrial, and academic communities.

2018-2 2019-2 2020-2

Lessons: 16 @ 55 min (1.000 Att/wk)

Labs: 0 @ 0 min

Special Requirements: None

NE450	NUCLEAR WEAPONS EFFECTS	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	--------------------------------	--

Scope: 2012-2

Offerings:

This course focuses on the operation of nuclear and fusion weapons, and the effects of a nuclear weapon detonation. Specific topics emphasize blast effects, thermal radiation, initial radiation and fallout, electromagnetic pulse, biological effects of radiation, and the policy issues associated with weapons of mass destruction. Extension problems with design components apply the concepts presented in NE450 to the solution of practical problems.

2018-1 2018-2 2019-1
2019-2 2020-1 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk)

Labs: 0 @ 0 min

Special Requirements: Extension problems with design components.

Prerequisite(s): NE300

NE452	INSTRUMENTATION AND SHIELDING	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
--------------	--------------------------------------	--

Scope: 2008-1

Offerings:

2018-1 2019-1 2020-1

This course focuses on nuclear instrumentation and radiation detectors, and on biological and material radiation protection through shielding. Specific topics include a study of radiation, and radiation detection devices to include: ionization chambers, proportional counters, Geiger-Mueller counters, scintillation detectors, semiconductor diode detectors, germanium and sodium iodide gamma-ray detectors, and neutron detectors. Radiation shielding, as a force protection measure, includes the design, analysis, and confirmation of radiation shields using point kernel and removal diffusion methods. Emphasis is placed on practical application of the radiation detection instruments and the associated acquisition software.

NE474	RADIOLOGICAL SAFETY	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	----------------------------	--

Scope: 2012-2

Offerings:

2018-2 2019-2 2020-2

This course focuses on application of radiation interactions with matter, biological effects of ionizing radiation, and radiological dose assessment. Specific topics emphasize radiation transformations, kinetics and particle interactions, early and late biological effects of radiation, internal and external exposure and dose calculations, radiation safety regulations, and application of health physics principles to reduce hazards in nuclear engineering.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

NE495	ADV NUC SYSTEM DESIGN PROJ I	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
Scope:	2010-1	Offerings:
<p>This is the first course in a two-semester capstone design experience. The course provides experience in the integration of math, science, and engineering principles into a comprehensive nuclear system design project. The design project emphasizes a multidisciplinary approach to total system design providing multiple paths to a number of feasible and acceptable solutions which meet the stated performance requirements. Design teams are required to develop product specifications, generate alternatives, make practical engineering approximations, and perform appropriate analysis to support the technical feasibility of the design, make decisions leading to an optimal system design, and brief their interim results during in-process reviews (IPRs). Topics such as engineering economics and the Code of Federal Regulations are introduced. Computational codes such as MCNP and other nuclear industry codes specific to the project will be introduced.</p>		2018-1 2019-1 2020-1
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Comprehensive team design project; compensatory time provided. Permission of the Head of the Department of Physics and Nuclear Engineering required.	
NE496	ADV NUC SYSTEM DESIGN PROJ II	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2011-2	Offerings:
<p>This is the second course in a two-semester capstone design experience. The course provides experience in the integration of math, science, and engineering principles into a comprehensive nuclear system design project. The design project emphasizes a multidisciplinary approach to total system design providing multiple paths to a number of feasible and acceptable solutions which meet the stated performance requirements. Design teams are required to develop product specifications, generate alternatives, make practical engineering approximations, and perform appropriate analysis to support the technical feasibility of the design, make decisions leading to an optimal system design, and brief their interim results during in-process reviews (IPRs). During this course, the design project is completed and presented to the project sponsor.</p>		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Comprehensive team design project; compensatory time provided.	
Prerequisite(s):	NE495	
PH202	PHYSICS II	3.5 Credit Hours (BS=3.5,ET=0.0,MA=0.0)
Scope:	2007-2	Offerings:
<p>This is the second course of a two-semester, calculus-based physics sequence. It consists of a comprehensive study of electromagnetism and optics designed to promote scientific literacy and to develop the use of scientific modes of thought to solve complex problems. Topics include a detailed study of electrostatics, magnetism, circuits, geometric optics, and wave optics. An integrated laboratory program illustrates basic scientific techniques and serves to stimulate intellectual curiosity. PH205	PHYSICS I	4.0 Credit Hours (BS=4.0,ET=0.0,MA=0.0)
Scope:	2016-1	Offerings:

This required, calculus-based core physics course consists of an introduction to nuclear physics, a detailed study of classical mechanics, and an introduction to electricity and magnetism. The course is designed to promote scientific literacy and to develop the use of the scientific method to solve problems. Specific topics include: mass-energy relationship, radioactive decay, radiation attenuation, an introduction to nuclear reactors, and an introduction to nuclear weapons; a detailed study of the laws of motion to include kinematics (translational and rotational), relativity, conservation of energy, conservation of momentum, and mechanical waves; and an introduction to electrostatics and magnetism. An integrated laboratory program illustrates basic scientific techniques and serves to stimulate intellectual curiosity through discovery laboratories. The core physics program is designed to demonstrate the relevance of physics to military technology and to help prepare future Army leaders to anticipate and adapt to technological change.

PH206	PHYSICS II	4.0 Credit Hours (BS=4.0,ET=0.0,MA=0.0)
--------------	-------------------	--

Scope: 2016-1

Offerings:

This calculus-based, core physics course consists of a detailed study of rotating rigid bodies, fluid mechanics, electrostatics and magnetism, direct and alternating current circuits, electromagnetic waves, the wave and particle natures of light. The course is designed to promote scientific literacy and to develop the use of the scientific method to solve problems. An integrated laboratory program illustrates more advanced scientific techniques and serves to stimulate intellectual curiosity through discovery laboratories. This course features an introduction of new material and "depth" reinforcement of select PH205 concepts relevant to continued engineering education through a rigorous theoretical and mathematical curriculum.

PH252	ADVANCED PHYSICS II	3.5 Credit Hours (BS=3.5,ET=0.0,MA=0.0)
--------------	----------------------------	--

Scope: 2007-2

Offerings:

This is the second course of a two-semester, calculus-based advanced physics sequence for selected cadets with demonstrated strengths in mathematics and science. It consists of a comprehensive study of electromagnetism and optics designed to promote scientific literacy and to develop the use of scientific modes of thought to solve complex problems. Topics include a detailed study of electrostatics, magnetism, circuits, geometric optics, and wave optics. An integrated laboratory program illustrates basic scientific techniques and serves to stimulate intellectual curiosity. The core physics program is designed to demonstrate the relevance of physics to military technology and to help prepare future Army leaders to anticipate and adapt to technological change.

PH361	EXPERIMENTAL PHYSICS	3.5 Credit Hours (BS=3.5,ET=0.0,MA=0.0)
--------------	-----------------------------	--

Scope: 2005-1

Offerings:

This course provides instruction and experimental experiences designed to exercise the student's knowledge of classical and modern physics and to extend his or her familiarity with equipment and techniques used in a physical science laboratory. Cadets, working in groups, execute and report on experimental projects. The program of instruction includes familiarization with electronics and instrumentation, data analysis, and laboratory procedures and practices. Knowledge and skills acquired in this course are essential for subsequent laboratory work in solid state physics, nuclear physics, and optics.

PH363	MATHEMATICAL PHYSICS	3.0 Credit Hours (BS=3.0,ET=0.0,MA=0.0)
--------------	-----------------------------	--

Scope: 2006-1

Offerings:

This course introduces the physics major to the methods and foundations of mathematical physics. Topics covered include ordinary differential equations, Sturm-Liouville theory, orthogonal functions, the partial differential equations of classical and quantum physics, and integral transforms. Mathematical methods are taught in the context of physical modeling.

PH365	MODERN PHYSICS	3.0 Credit Hours (BS=2.0,ET=1.0,MA=0.0)
--------------	-----------------------	--

Scope:	2004-1	Offerings:
---------------	--------	-------------------

This course introduces special relativity and the fundamental concepts of quantum physics with application to atomic physics and nuclear physics in order to prepare cadets for advanced study of science and engineering, especially quantum mechanics, statistical physics, nuclear physics, solid state physics, laser physics, medical radiation physics, and nuclear engineering. This course will also be of interest to any cadet who wishes to gain a deeper appreciation of the natural world or of the technology of the 21st Century.

PH366	APPLIED QUANTUM PHYSICS	3.5 Credit Hours (BS=3.5,ET=0.0,MA=0.0)
--------------	--------------------------------	--

Scope:	2013-2	Offerings:
---------------	--------	-------------------

This course uses the experimental and laboratory skills developed in PH361 to explore the applications of the 20th Century developments studied in PH365. The topics covered will vary but may include molecular structure, the properties of solids including metals and semiconductors, nuclear physics, and elementary particle physics.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 8 @ 120 min

Special Requirements: None

Prerequisite(s): PH361 PH484

PH381	INTRMED CLASSICAL MECHANICS	3.0 Credit Hours (BS=3.0,ET=0.0,MA=0.0)
--------------	------------------------------------	--

Scope:	2006-2	Offerings:
---------------	--------	-------------------

This course continues the development of physical principles introduced in the core physics curriculum. Direct application of Newton's laws is used to analyze phenomena such as projectile motion with air resistance, charged particle motion, and motion in a central force field. Harmonic, driven, and damped oscillations are studied in depth, as are systems of coupled oscillators. The formalism of Lagrangian mechanics is studied in depth. The mathematical tools of classical mechanics are introduced, to include vector fields, line integrals, the calculus of variations, linear algebra, and eigenvalue equations. Cadets will be required to develop and demonstrate the ability to use a computer algebra system to solve advanced problems and plot the solutions.

PH382	INTERMEDIATE ELECTRODYNAMICS	3.0 Credit Hours (BS=3.0,ET=0.0,MA=0.0)
--------------	-------------------------------------	--

Scope: 2007-1

Offerings:

2018-1 2019-1 2020-1

This course continues the study of classical electrodynamics introduced in the introductory physics sequence by developing the differential forms of the Maxwell equations and applying them to boundary value problems in two and three dimensions. In addition, scalar and vector potentials are introduced, multipole field expansions are developed for complex sources, electromagnetic fields in dielectric and magnetic media are studied, the propagation of electromagnetic waves in conducting and nonconducting media is considered and electromagnetic radiation is introduced. The course concludes with the study of the connection between special relativity and electrodynamics. This course provides an essential foundation for courses in optics, lasers, quantum mechanics, statistical mechanics, and solid state physics.

PH384	APPLIED OPTICS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-----------------------	--

Scope: 2018-2

Offerings:

2018-2 2019-2 2020-2

This course provides intermediate development in the concepts of geometric, wave, and quantum optics. Primary coverage includes common optical devices, light transmission through optical media, diffraction, interference and polarization. Applied topics typically include: Fourier optics, holography, imaging, atmospheric effects, optical and infrared detectors, nonlinear optics, and tactical employment considerations.

Lessons: 28 @ 55 min (2.500 Att/wk) **Labs:** 6 @ 120 min

Special Requirements: None

-Or-
MA364X

PH389	INDIVIDUAL STUDY IN PHYSICS	1.5 Credit Hours (BS=1.5,ET=0.0,MA=0.0)
--------------	------------------------------------	--

Scope: 2011-2

Offerings:

2018-1 2018-2 2019-1
2019-2 2020-1 2020-2

This course is an individually supervised research and study program to familiarize cadets with advanced scientific procedures and techniques. The primary purpose is to acquaint students with the essential skills required for independent research in physics. With the approval of the Head of the Department, the cadet chooses a research project of interest and is supervised by a faculty member conducting the research.

Lessons: 0 @ 0 min (0.000 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: Cadets must complete either a written research report or present an oral report to members of the department faculty at the end of the semester.

Prerequisite(s):	PH202 -Or- PH252 -Or- PH206 -Or- PH256	
PH389A	INDIVIDUAL STUDY IN PHYSICS	1.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)

Prerequisite(s):	PH389	
PH456	SCIENCE AND POLICY	3.0 Credit Hours (BS=2.0,ET=0.0,MA=0.0)
Scope:	2005-2	Offerings:
This course challenges cadets to draw upon their core academic experience to analyze complex policy issues. The relationship and interaction between social, political, economic, and technological dimensions of these issues are explored. Emphasis is given to gaining an understanding of both the power and limitations of science and scientific thinking when confronting problems in the policy arena.		2018-1 2019-1 2020-1
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Enrollment in this course requires approval of the Head of the Department of Physics.	
PH472	SPACE AND ASTROPHYSICS	3.0 Credit Hours (BS=3.0,ET=0.0,MA=0.0)
Scope:	2012-2	Offerings:
This course is an introduction to two related-but not identical-disciplines of physics: space physics and astrophysics. Space physics is concerned with understanding the environment between the sun and the Earth's upper atmosphere. Coronal mass ejections, the solar wind, magnetospheric storms, and auroral precipitation are among the many phenomena studied in the context of space physics. Astrophysics is a study of stellar structure and evolution, galactic structure, and cosmology. Phenomena of interest include quasars, black holes, supernovas, and the cosmic microwave background radiation. The relative emphasis given to the two disciplines varies depending on the background of the instructor.		2018-2

PH477	LASERS AND OPTICS	3.5 Credit Hours (BS=3.5,ET=0.0,MA=0.0)
Scope:	2007-1	Offerings:

This course provides intermediate development in the concepts of geometric, wave, and quantum optics and their application to laser systems. Primary coverage includes common optical devices, light transmission through optical media, diffraction, interference and polarization. This course then provides a combined theoretical and experimental investigation into the realm of coherent optical radiation generation, amplification, propagation, and application. Cadets apply the basic principles of electromagnetism, optics, and modern physics to analyze specific laser systems, and experiments are performed to demonstrate properties of specific optical and laser systems. The theory of laser gain and amplification is investigated using semiclassical methods.

No Course Offerings

Prerequisite(s): PH365

Corequisite(s): PH382

PH481 STATISTICAL PHYSICS

3.0 Credit Hours
(BS=3.0,ET=0.0,MA=0.0)

Scope: 2013-2

Offerings:

This course applies basic concepts of probability and statistics to systems consisting of a large number of particles to determine measurable macroscopic quantities such as temperature, pressure, energy, and heat capacity. Emphasis is placed on the calculation of the canonical and grand canonical partition functions for various model physical systems. Particular attention is focused on three ideal gas systems: a gas consisting of massive Maxwell-Boltzmann particles, a gas consisting of massless bosons (i.e., photons), and a gas consisting of fermions.

2018-2 2019-2 2020-2

PH482 ADVANCED CLASSICAL MECHAN

3.0 Credit Hours
(BS=3.0,ET=0.0,MA=0.0)

Scope: 2007-1

Offerings:

This course continues the development of concepts introduced in PH381. Hamiltonian mechanics is explored using the calculus of variations to provide a foundation for connecting classical mechanics, quantum mechanics, and statistical mechanics. The two-body central force problem, the mechanics of rotating systems, and scattering theory are studied in depth. The mathematical techniques associated with cylindrical, spherical, and curvilinear coordinates are introduced, as are the basic principles of nonlinear dynamics and chaos. Cadets will be required to develop and demonstrate the ability to use a computer algebra system to solve advanced problems and plot the solutions.

PH484 QUANTUM MECHANICS

3.0 Credit Hours
(BS=3.0,ET=0.0,MA=0.0)

Scope: 2013-1

Offerings:

This course begins with a basic introduction to the fundamental postulates of quantum theory. These postulates are then used to develop Heisenberg's uncertainty principle and Schrodinger's equation. Solutions to Schrodinger's equation are sought, first for relatively simple systems such as square wells and harmonic oscillators, and then for the hydrogen atom. The properties of the hydrogen atom are studied in detail. The course also covers approximation methods used for physical systems with small perturbing forces acting on them.

This course is an introduction to Astrophysics and is a study of stellar structure and evolution, galactic structure, and cosmology. Phenomena of interest include quasars, black holes, supernovae and the cosmic microwave background radiation. Special emphasis will be placed on those galactic phenomena, such as Galactic Cosmic Rays (GCRs) and Anomalous Cosmic Rays (ACRs), which have an impact on our heliosphere. Supporting topics include an overview of orbital mechanics and relevant physics, observation techniques, and nuclear physics. PROVISIONAL - Full proposal in AY18

93 Courses

SS201	ECONOMICS-PRINCIPLES/PROBLEMS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2017-1	Offerings:
<p>This course presents the basic principles of economic analysis and their application to contemporary economic problems and supports the further study of economics and related disciplines in the social sciences. The course is organized into two primary branches: microeconomics, the study of the behavior of individuals, households, and firms in making decisions, in a market economy and the application of this theory to contemporary issues in both domestic and global markets; and macroeconomics, the study of the performance, structure, and behavior of the whole economy including issues of national income, output, consumption, unemployment, inflation, as well as fiscal and monetary policy. In addition, the course includes instruction on personal finance, focusing specifically on major purchase decisions (home and auto), insurance, basic investing, and investing for retirement. This instruction is intended not only to improve individual financial decision-making but also to equip Cadets with the ability to address the financial issues of their future Soldiers. Cadets develop analytical tools in order to assess the economic implications of policy decisions by military and government officials and to improve their own decision-making process.</p>		2018-1 2018-2 2018-5 2019-1 2019-2 2020-1 2020-2

Disqualifier(s):	SS251	
SS202	AMERICAN POLITICS	3.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2009-1	Offerings:
<p>This course explores the American political system - how it works, its strengths, its weaknesses, its conflicts, its controversies. The course emphasizes how our democracy makes decisions about politics & policy to balance the many competing values and demands of a free society. The course begins with the study of the constitutional foundations of American government and then examines political behavior, institutions of government, and the policy making process. The course integrates the study of civil-military relations and the broader study of political science as a discipline throughout the semester.</p>		2018-5
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 7 @ 120 min	
Special Requirements:	One political analysis paper of 2500 words; compensatory time provided.	
Disqualifier(s):	SS252	
SS202	AMERICAN POLITICS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2017-1	Offerings:
<p>This course explores the American political system - its philosophical underpinnings, the structure and behavior of formal government institutions, and the influence of informal political actors within the political construct. The course introduces the discipline of political science by exploring a broad range of literature: classics of American politics, leading political theory, and contemporary reading. Cadets will apply their knowledge of political ideas, institutions, and behavior to public policy making and demonstrate critical analysis of contemporary debates in American politics. Finally, this course provides cadets with an understanding of the professional norms and responsibilities associated with their role as military officers within the American system of government.</p>		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2

Disqualifier(s):	SS252	
SS251	ADVANCED ECONOMICS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2017-1	Offerings:

This advanced version of SS201 presents the basic principles of economic analysis with a greater focus on their application to contemporary economic problems. SS251 sections capitalize on the ability of high-performing Cadets to quickly grasp fundamental economic concepts by extending SS201 lesson objectives to more complex and ambiguous economic environments. Additionally, SS251 instructors exercise discretion in altering instructor exercises and assignments to meet the interests and abilities of their individual sections. The course is organized into two primary branches: microeconomics, the study of the behavior of individuals, households, and firms in making decisions in a market economy and the application of this theory to contemporary issues in both domestic and global markets; and macroeconomics, the study of the performance, structure, and behavior of the whole economy including issues of national income, output, consumption, unemployment, inflation, as well as fiscal and monetary policy. In addition, the course includes instruction on personal finance, focusing specifically on major purchase decisions (home and auto), insurance, basic investing, and investing for retirement. This instruction is intended not only to improve individual financial decision-making but also to equip Cadets with the ability to address the financial issues of their future Soldiers. Cadets develop analytical tools in order to assess the economic implications of policy decisions by military and government officials and to improve their own decision-making process.

SS252 ADVANCED AMERICAN POLITICS

3.0 Credit Hours
(BS=0.0,ET=0.0,MA=0.0)

Scope: 2017-1

Offerings:

This course explores the American political system, its philosophical underpinnings, the structure and behavior of formal government institutions, and the influence of informal political actors within the political construct. The course introduces the discipline of political science by exploring a broad range of literature: classics of American politics, leading political theory, and contemporary reading. Cadets will apply their knowledge of political ideas, institutions, and behavior to public policy-making and demonstrate critical analysis of contemporary debates in American politics. Cadets enrolled in SS252 are expected to conduct advanced undergraduate research that includes identifying additional readings related to policy debates for incorporation into policy-related classes, as well as a miniature literature review as part of their culminating research paper. These analytical research requirements exceed those levied on SS202 cadets. Further, SS252 cadets are exposed to additional seminal works in political science throughout the course, including classical political philosophy, primary historical documents from early American politicians and political thinkers, and contemporary works on civil-military relations. Finally, this course provides cadets with an understanding of the professional norms and responsibilities associated with their role as military officers within the American system of government. Aided through additional readings, this emphasis on civil-military relations focuses on contemporary and historical debates over the appropriate role of military involvement in policy development and the political process.

SS307 INTERNATIONAL RELATIONS

3.5 Credit Hours
(BS=0.0,ET=0.0,MA=0.0)

Scope: 2004-1

Offerings:

The objectives of this course are to provide cadets with an introduction to the fundamental concepts of international politics and the analytical tools necessary to evaluate "why states do what they do." In accomplishing these objectives, SS307 builds upon a cadet's prior academic training in history, English and philosophy, economics, and political science. Emphasizing intellectual pluralism, SS307 focuses on the value of self-consciously applying different theoretical perspectives to international events to obtain improved understanding. Cadets examine key issues such as the consequences of anarchy, the need for security, the role of power, the use of force, international trade and markets, alternative political philosophies, foreign policy making, and the influence of culture in international affairs.

SS360	POL SCI RESEARCH METHODS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------	--

Scope:	2017-1	Offerings:
This course is an introduction to research methods for political science majors. It serves two main purposes. First, this course introduces research design and the myriad methodologies employed by scholars as they engage in debates within the political science community and beyond. This course will cover many aspects of research design, but will focus primarily on the ability to ask good questions and to craft research plans to best answer those questions. Second, the course is an introduction to some of the major debates within political science. The course equips students with the tools to understand and conduct research in political science in upper-level electives.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2

SS364	GAME THEORY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--------------------	--

Scope:	2005-2	Offerings:
Game theory is designed to provide students with the tools necessary to think through the various courses of action available as they face a uncertain situations, determine market reaction to each alternative, identify the costs and benefits of each course of action and select the course of action that minimizes cost while maximizing benefits. The purpose of this course is to introduce cadets to the application of strategic thinking to tactical scenarios. This course consists of two components that are taught concurrently. The first component is the introduction of basic game theory and the second component is the application of those theories to tactical and strategic choice scenarios.		2018-1 2018-2 2019-2 2020-2

SS366	COMPARATIVE POLITICS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-----------------------------	--

Scope:	2005-1	Offerings:
The objectives of this course are to analyze the sources of stability or instability in political regimes, and to examine the conditions that promote either democracy or dictatorship. Our first task is to describe different regimes--what do we mean when we call one democratic and another authoritarian? We approach this first task by building a regime model. As we do so we seek to understand what makes political regimes stable or unstable by analyzing their effectiveness, popular legitimacy, and institutional adaptability. All regimes are challenged by change, but some remain stable in the face of change, while others are transformed. Why? And is it possible to argue that there is a "best" type of regime? Are there universally valid criteria -- across time and space -- that we can use to compare regimes? Why do regimes succeed, fail, and change? As well as being central to the discipline of political science, these questions also play an important role in world politics and the formulation of US foreign policy. Since we are both students of political science and professionals who will serve as policy executors, the study of comparative politics offers significant rewards. After building the model we take it through various regions of the world, using the comparative method, analyzing the variables which change from regime to regime in liberal democracies, communist and post-communist states, newly industrializing and less developed countries, and the Islamic world.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2

SS370	MASS MEDIA & AMER POLITICS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2014-1	Offerings:
This seminar introduces cadets to what is perhaps the single most influential private institution in the American political system, oftentimes referred to as the fourth branch or fourth estate of American government. This course examines the major concepts, theoretical frameworks, and substantive issues surrounding the study of the media as a conduit between the people and the government and as a political actor in it s own right. In particular, the roles, motivations, and effects of the constitutionally protected media on American political institutions and policymaking are extensively probed. The latter part of the course is dedicated to the study of the relationship between the military and the media, and prominent guest speakers are featured throughout the course to add context and practical application to the theories learned in class. The class includes a trip section to New York City to meet with journalists and news executives from national media outlets to round out the educational experience.		2018-2 2019-2 2020-2

SS372	POLITICS AND GOV OF CHINA	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2005-1	Offerings:

Lecture/seminar course designed to introduce the cadets to the politics and government of China. In particular, cadets will study the domestic politics of China beginning with the rise of the Chinese Communist movement. China's unique culture and the Mao years are examined as well as their impact on the past and emerging political system. Recent reforms and their implications for political, social, economic and military structures and processes will be examined as well as the tensions that have evolved. External developments such as Hong Kong's reversion to China, developments in Taiwan, changes in Central Asia, as well as China's emergence as a regional and world power will be considered. What are the different approaches to analyzing Chinese politics and government? What factors determine state legitimacy and influence internal choices? How does China's domestic situation influence its external relations?

2018-1 2019-1 2020-1

Lessons: 40 @ 55 min (2.500 Att/wk)**Labs:** 0 @ 0 min**Special Requirements:**

3,000-word study of Chinese domestic issue, with graded bibliography and outline; two group presentations; compensatory time provided.

SS373**THE AMERICAN PRESIDENCY****3.0 Credit Hours**
(BS=0.0,ET=0.0,MA=0.0)**Scope:**

2011-1

Offerings:

This seminar examines the concept of executive power and authority with particular emphasis on the institution of the presidency in the American political system. The course will analyze the constitutional origins and evolution of the presidency. We will place particular emphasis on the formal rules and informal norms that developed since the Founding and frame presidential behavior. We will analyze the various factors that influence the perpetual transformation of the institutional organization and operation of the modern executive branch. The course will examine the dynamic relationships the executive branch maintains with other branches of government, the media, the public, and other key stakeholders and how these relationships shape the development of public policy.

SS374**POL & GOV OF KOREAS & JAPAN****3.0 Credit Hours**
(BS=0.0,ET=0.0,MA=0.0)**Scope:**

2004-2

Offerings:

Seminar course designed to introduce the cadets to the politics and government in Japan and the Koreas. Students draw on an appreciation and understanding of culture, history, sociology, economic and political science foundations in studying the actors and relationships in Northeast Asia. Focusing on how ethnic, social, cultural, and economic factors determine state legitimacy and influence internal state choices, students explore the cooperation and competition between Japan, Korea and the U.S. The course incorporates an examination of US foreign policy toward Japan and Korea and explores the prospects for productive, stable relationships.

(BS=0.0,ET=0.0,MA=0.0)**Scope:**

2004-2

Offerings:

This course surveys the post-Soviet landscape. It explores the political, social, economic, and cultural terrain of Russia and the other states that emerged after the collapse of the Soviet Union in 1991. The course begins with a review of Russian and Soviet history - the foundation to understanding the dramatic implosion of the Soviet Union and the tumultuous events which followed. The course also employs theories and concepts to help the student assess why democratization and marketization have been so difficult in this part of the world. The course concludes with an examination of US foreign policy toward the region and the prospects for productive, stable ties with Russia and its neighbors.

SS376	AMERICAN POLITICAL DEVELOPMENT	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------------	--

Scope: 2015-1

Offerings:

American Political Development focuses on the causes, nature, and consequences of key transformative periods and central patterns in American political history that affect the relationship between the state, politics, and institutional development. The course explores patterns in the public policy process and examines historical processes to analyze American political institutions and policy outcomes from a political standpoint. Students focus on the degree to which ideas and institutions from the Founding period created stability in American politics and investigate the role of events, ideas, and other forces in leading to periods of change. After starting with an in-depth review of the American Founding, we will examine the major epochs of state development to understand their causes and effects on political institutions, politics, and public policy. Special emphasis will be placed on the rise of the unique American regulatory and welfare state. Lastly, we will examine how the course of American political development contributes to the features of today's political environment and what these patterns of development suggest for the future of American politics.

SS377	POLITICS & GOV OF EUROPE	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-------------------------------------	--

Scope: 2017-1

Offerings:

This course exposes cadets to the political systems and cultures of the European Union (EU) and its Member States. The driving questions of the course are: "Why do European actors (institutions, states, and individuals) behave the way they do, within Europe and internationally?" and "How has regional integration affected European political systems?" Cadets will study the historical development of the EU and explore different theoretical perspectives on regional integration. With this foundation, the course then explores the politics of individual European states and the institutions of the EU. Using social science methods, students will consider the domestic, regional, and international dimensions of Europe's foreign relations.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: Each cadet will write a research paper on a topic of their choice.

SS378	ADV INTL RELATIONS THEORY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	----------------------------------	--

Scope: 2005-1

Offerings:

This course uses the foundation provided by SS307/357 to provide cadets with an in-depth assessment of the field of international relations. The course begins by evaluating alternative theoretical perspectives, including realism, liberalism/institutionalism, and constructivism. Cadets are introduced to classic as well as contemporary works, which are examined in terms of their cultural, political, and academic context. Cadets examine topical cases pertaining to war, wealth, and state formation/transformation. Throughout the course, cadets explore the value and limitations of IR theory in framing and implementing policy.

2018-1 2018-2 2019-1
2019-2 2020-1 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

SS379	LEGISLATIVE POLITICS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-----------------------------	--

Scope: 2005-1

Offerings:

This course deals principally with the U.S. Congress but also considers other legislatures to include those of state governments. It focuses on the role of legislatures in political systems. The course addresses the development of the U.S. Congress, the behavior of legislators, the workings of committees, and the responsibilities of legislative leaders. Case studies, practical exercises, and guest lecturers are used to highlight these topics. Emphasis is also placed on the Congressional Budget Process as well as the impact of Congress on military, economic, and international issues, domestic, foreign and economic policy.

2018-2 2019-2 2020-2

SS380	MANPOWER-LABOR ECONOMICS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------	--

Scope: 2004-1

Offerings:

This course studies the nature and determinants of pay and employment. The course emphasizes the role of institutions which are significant in determining the pattern and speed of adjustment in the labor market. The traditional tools of micro and macroeconomics and econometrics are employed. Military manpower is examined as an application of the theories developed during the course.

SS381	CULTURAL/POLIT ANTHROPOLOGY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	------------------------------------	--

Scope: 2005-1

Offerings:

The overall course goal is to provide a rich and interesting introduction to the field of anthropology. Anthropology is a holistic discipline encompassing elements of political science, economics, sociology, linguistics, and psychology. Emphasizing that one's culture is a "learned" condition, students explore the concept of cultural relativism and gain an appreciation for the diversity of human cultures and the interrelation of social, political and economic organizations. Students also examine the sub-discipline of Applied Anthropology which seeks to solve contemporary social/political problems such as ethnic conflict. A highlight of this course, students actively conduct anthropological fieldwork within the West Point community. Students develop their personal abilities to recognize their own personal biases and therefore better understand, interact and communicate with peoples from other cultural backgrounds. This is a crucial skill for future Army officers in the 21st century as recent deployment patterns have shown soldiers operating in non-traditional situations.

2018-1 2019-2 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: Fieldwork reports, including a 10-12 page final report including an annotated bibliography, conceptual paper, and fieldwork observations and conclusions; compensatory time provided for additional field research.

SS357 SS366

SS382	MICROECONOMICS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-----------------------	--

Scope: 1980-2

Offerings:

This course is a theory course in which cadets develop a thorough understanding of microeconomic modeling and models; it is a prerequisite for most downstream economics courses. The course develops a methodology that economists use to study the interaction among individual economic agents (such as consumers, firms and the government) and the allocation of scarce resources among these agents. The goal is for cadets to understand optimization, markets, and to some extent policy-making, using an integrated, theoretical model. Ultimately the consequence of a change in the market environment, in public policy or in the global economy can be assessed vis-à-vis its impact on individual economic agents.

SS383	POLITICS & GOVT-MIDDLE EAST	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--	--

Scope: 2005-2

Offerings:

The Middle East is an area of constant and significant change. This course provides an overview of the Middle East (including the Arab world, Iran, Israel and Turkey) and focuses on the historical and political dynamics, which influenced and continue to shape change in the region. Several issues will be treated in detail including: religion and state in Islam; political competition among the Arab states; the Palestinian question and the Arab-Israeli conflict; oil and the Gulf states; and the meaning of non-regional power influence in the region.

2018-2 2019-2 2020-2

SS384	POLITICS & GOVT-LATIN AMER	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------------	--

Scope: 2016-2

Offerings:

This course provides a thematic study in comparative politics, focusing in particular on Latin America and scholarly explanations for political dynamics in the region. The course presents a wide variety of scholarly treatments on the chosen theme, utilizing historical institutionalist, rational actor, and hybrid approaches. The course is divided into three blocks. Block I begins with foundational texts which tend to be more or less mono-causal and offer stark comparisons in terms of the theoretical approaches used by comparative politics. Block II explores more recent hybrid theories, which blend rational actor and historical institutionalist explanations for change and continuity. Block III concludes with texts that focus on narrative and the creation of meaning in determining Latin American political behavior. At the conclusion of this course, students are able to understand and apply comparative approaches to political behavior, have a deeper understanding of Latin American history and politics, and are familiar with the tools of social science.

2018-2 2019-2 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

SS385	HISTORY OF ECONOMICS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-----------------------------	--

Scope: 2017-1

Offerings:

This course provides cadets with the tools and knowledge for analyzing the effectiveness of different economic systems and efforts to change them. The major course objectives include an examination of the following: the historical evolution of prominent economic philosophy and theory on the functioning of capitalist and non-capitalist systems; the methods of defining and evaluating economic systems in terms of the rules and the cultural, political, legal, financial, and labor institutions that comprise an economy; the methods of institutional and cultural change and the challenges they face in the transition to a market economy; and the paths less developed countries may pursue towards economic growth and development. At the end of the course students understand how differences among nations' economic systems might result in differences in their economic outcomes and how nations might go about changing their systems.

2018-1 2019-1 2020-1

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: One critical book review (1250 words); small group in-class presentations; compensatory time provided.

Prerequisite(s): SS201
-Or-
SS251

SS386	POLITICAL THOUGHT AND IDEAS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	------------------------------------	--

Scope: 2013-1

Offerings:

This course examines the fundamental questions of Western political philosophy. In order to better understand why these problems are of vital relevance to contemporary civilization in the late modern West, students consider six themes: the nature of politics and how theorists, citizens, and statesmen have understood political things; the nature of freedom and the conditions necessary for its establishment, maintenance, preservation, and improvement; republicanism in antiquity and modernity; liberal democracy and constitutional order; the relationship between religion and politics; and, the fundamental presuppositions of traditional, modern, and contemporary social science. This course allows students to achieve critical understanding of the ancient and modern foundations of Western political thought and how these ideas have contributed to American republicanism, liberal democracy, and representative government; to clarify a range of modern political problems at home and abroad that challenge civilization; to acquire a competence reading, writing about, and discussing classic works of political philosophy, fostering life-long learning on masterpieces of human reflection; to develop cross-disciplinary capacity to study politics by (a) integrating basic chronological knowledge of what has happened in Western intellectual life, (b) understanding how to study ideas as vital components of traditional liberal education and officer development, (c) writing a Seminar Essay that synthesizes course learning, (d) making use of language study, grammar, etymology, and philology, and (e) keeping a Commonplace Book; to apply political thought to contemporary circumstances; and, to contrast Western principles with a major non-Western tradition of political thought.

No Course Offerings

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: Colloquium and seminar essays, participation in the Discussion Leader Model, and Commonplace Book.

-Or-
SS252

SS386	POLITICAL THOUGHT	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--------------------------	--

Scope: 2017-2

Offerings:

This course introduces students to the fundamental questions of political life, as expressed in classic works of political philosophy. The course presents the history of political thought as a series of debates over the meaning of justice, man's place in nature, and the human good. Students explore three main approaches to these questions - ancient, medieval, and modern - and they compare and contrast Western ways of wrestling with fundamental questions to others that have arisen outside the West. The course culminates in a consideration of the place of the American regime in the history of political thought.

SS387	PUBLIC FINANCE	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-----------------------	--

Scope: 2016-2

Offerings:

This course is an applied microeconomics course focusing on theoretical models to answer real world policy issues in the public sector. In particular, this course examines issues in public expenditures, social insurance, social welfare, redistribution, taxation, and public choice. Using economic models, this course helps students sharpen their analytical skills to solve complex governance challenges. Cadets should gain a better understanding of unique challenges that governments face when providing services while trying to balance economic efficiency with social equity.

SS388	MACROECONOMICS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-----------------------	--

Scope: 2011-1

Offerings:

This course is dedicated to the study of aggregate economic activity. The course examines the determinants of long run growth, and then addresses short run economic fluctuations. The course uses various models, including the Solow Growth Model, the IS-IM model, and the Aggregate Demand - Aggregate Supply model. The microeconomic foundations for macroeconomics are discussed, and current macroeconomic policy issues are debated. These issues are discussed within the context of both open and closed economies.

No Course Offerings

SS390	BEHAVIORAL ECONOMICS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-----------------------------	--

Scope:	2017-2	Offerings:
---------------	--------	-------------------

This course will cover how insights from psychology and behavioral economics relate to the foundational economic model of rational choice. This course will cover four main topic areas. First, the course will examine how individual preferences tend to deviate from a rational choice model. Second, the course will explore how cognitive limitations alter individual choice. Third, the course will look at how social preferences and social influence impact decisions. Fourth and finally, this course will investigate how public policy interacts with individual behavioral tendencies.

SS391	FINANCE FOR ARMY LEADERS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------	--

Scope:	2004-2	Offerings:
---------------	--------	-------------------

This course examines analytical and practical approaches to financial management with emphasis on effective financial counseling, personal decision-making, and ethical issues in personal finance. The course begins with an overview of financial planning and introduces personal accounting, net worth calculation, cash budgeting, insurance, investment, and taxes. These principles are subsequently applied in evaluating major purchases, real estate, securities, and financial options. The financial institutions section investigates the major sources of financial instruments which an investor might purchase, and determines the nature and purpose behind the issue of such securities as well as diversification and performance measures requiring familiarity with applied regression analysis (Excel). The final sections relate to estate planning and culminate in the development and presentation in a counseling option of the cadet's ability to evaluate life's major purchases, select financial securities, counsel subordinates, and choose between financial options.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: The group projects require analysis and application of concepts learned in previous economics and political science courses (SS360/SS368 are required).

Prerequisite(s): SS360
-Or-
SS368

SS392	POLITICS-RACE,GENDER,SEXUALITY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------------	--

Scope:	2017-2	Offerings:
---------------	--------	-------------------

This seminar is an introduction to the concepts of race, gender, and sexuality in the American political system. It will focus on the fundamental institutions and processes involved in our system of government, with a focus on the concepts of civil rights and liberties as they pertain to the overarching topics of discussion. Emphasis will be placed on the inherent inequalities found within the structures, rules, and processes of the American political system. The class will also move outside the borders of the United States to consider some of these same concepts in other countries to provide a comparison of how states deal with majority-minority relations and inequalities in their governmental systems. The class will consider how the contemporary issues that relate to race, gender, and sexuality apply to the Army and how they impact the Army officer.

SS394	FINANCIAL STATEMENT ANALYSIS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-------------------------------------	--

Scope: 2015-1

Offerings:

This course is an organizational leader's introduction to the world of business and finance, focusing on financial accounting and financial statement analysis, essential topics for cadets concentrating in economics, engineering management, and general management. Cadets study the accounting model in detail, spanning analysis and recording of business transactions to the production of the financial statements, and learn to apply economic reasoning in performing financial ratio analysis of the underlying business enterprise. The course culminates with a capstone project involving financial statement analysis of a major U.S. corporation in relation to one of its principal competitors that enables cadets to apply the subject matter as users of financial statements in a real-world context. This course is the first of a two-course financial economics sequence which culminates with SS494 - Principles of Finance.

SS399	SOCSCI INTERNSHIP/PRACTCAL EXP	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------------	--

Scope: 2005-4

Offerings:

The Academic Individual Advanced Development (AIAD) program is designed to give cadets practical experience in their field of study and to reflect on their experiences by completing specified academic requirements. Recent internships involve participation in the American, European and Russian (AMEURU) program hosted by the University of Maastricht, the Tri-Service Global Spectrum trip to Vietnam, study at the German Marshall Center, the American Institute on Political and Economic Systems (AIPES) in the Czech Republic, the International Institute for Political and Economic Studies (IIPES) in Greece, and the International Studies Program (ISP) in Eastern Europe. Scope, depth and material covered will meet the requirement of a 3-credit hour course in Social Sciences. Grades are determined based on preparatory briefings and essays, a journal of daily activities, the quality of the work performed during the internship, and a final paper, briefing, or exam that incorporates their experience with a topic from their field of study, due upon return.

No Course Offerings

Lessons: 0 @ 0 min (0.000 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: Admission to the course requires an interview with the AIAD coordinator.

SS457	ADV STUDIES IN GRAND STRATEGY	3.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--------------------------------------	--

Scope: 2014-1

Offerings:

This seminar aims to examine the theory and practice of grand strategy. It does so in historical, theoretical, and contemporary practice context and from a variety of analytical perspectives. In this course, we generally define grand strategy as the calculated relation of means to large ends. We focus on how parts relate to the whole in whatever an individual, a corporation, a nation, or a collective of nation-states might be seeking to accomplish. The strategists and their strategies we consider range over some two and a half millennia. Some of them represent the "best" thinking and writing on this subject; others exemplify success and failure in the implementation of grand strategy. From a careful examination of them, we will endeavor to extract a set of principles for the making of grand strategy that will be useful in any future leadership role in which we may be called upon to connect desired ends with available means.

2018-2 2019-2 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: None

SS458	TOPICS IN GRAND STRATEGY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------	--

Scope: 2017-1

Offerings:

SS458 Applied Topics in Grand Strategy is the second of a two-part sequence designed to build on the course material covered in SS457. The course will cover applied regional topics in the study of grand strategy in a contemporary and/or historical context to illustrate key theoretical concepts. Scope, depth and material covered will meet the requirement of a 3-hour credit course in the Grand Strategy Program. Grades are determined based on presentations, essays and other writing exercises, class participation, and a final exam, essay, and/or briefing.

2019-1 2020-1 2021-1

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements:	None	
Prerequisite(s):	SS457	
SS461	INDUSTRIAL ORGANIZATION	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2017-2	Offerings:
Industrial Organization studies the decision making of the firm in a variety of market structures, with particular emphasis on markets in which firms possess some market power. Many of the restrictive assumptions imposed in models of perfect competition are relaxed. The course explores the strategic decision making of firms regarding: market entry and exit, choice of plant size/capacity, the decision to be a multi-product firm, product versioning, and vertical integration. Game-theoretic models are introduced and applied to firm decisions regarding entry, pricing, advertising, and responses to government regulation. The role of imperfect and asymmetric information in firm interactions, from bargaining games to strategic entry deterrence to uses of warranties and prices as a signal of quality, is stressed throughout. Finally, the course analyzes government regulation of markets, including information provision, product regulation, and antitrust policy.		2018-1 2019-1 2020-1
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
Prerequisite(s):	SS368 SS382	
SS462	ECON OF STABILIZATION & GROWTH	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2015-1	Offerings:
This course aims to introduce the fundamental concepts in economic growth, to explain and discuss the theories of economic growth, to understand the sources of economic growth, to assess the difference in growth and wealth among countries and to increase student interest in economic growth theory. It is a course designed for economics majors with an explicit purpose of familiarizing future officers with the basic theory of economic growth and development and applying these theories to post-conflict environments. The course achieves immediate relevance by examining the role of the military in economic development and understanding how economic development can help them be more effective members of the military profession. The course is designed as a seminar with the expectation of adequate preparation and spirited class discussion.		2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
SS463	INVESTMENTS THEORY & APPL	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2017-2	Offerings:
This course will draw upon the theory and methods of microeconomics and applied econometrics to investigate how individual and institutional investors optimize investment portfolios to maximize risk-adjusted returns. The course is organized into five blocks: (i) financial markets and institutions; (ii) optimal asset allocation with uncertain returns; (iii) modern portfolio theory, which explores asset pricing and market efficiency; (iv) security valuation; and (v) portfolio management - how individual and institutional investors manage investment portfolios to maximize risk-adjusted returns and achieve efficient diversification, given preferences for risk.		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
Prerequisite(s):	SS368 SS382	
SS464	HOMELAND SECURITY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2006-1	Offerings:
The purpose of SS464 is to address the complex challenges of homeland security through an interdisciplinary approach. The goal of this course is to provide future leaders with a thorough understanding of the homeland security policy area. This course explores how the evolving nature of the terrorist threat, particularly catastrophic terrorism, poses unprecedented and complex challenges to how America provides for its security. The course examines how homeland security policy intersects with other domestic and foreign policy issues, how our federalist system of government affects homeland security, and how moral, ethical, and civil liberties concerns complicate the development of effective homeland security policies. By analyzing the threat and developing an understanding of the unique policy problems and tools of homeland security, the course enables students to critically assess national efforts in such areas as border security, domestic counterterrorism policy, critical infrastructure protection, and emergency preparedness and response.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2

Students will learn about the major policy and institutional reforms underway in the homeland security policy area, examine whether these changes are improving or will improve U.S. security policy, and develop their own views on the direction of national homeland security policy. The course will enable students to think critically about how the United States' overseas efforts to combat terrorism, preempt emerging threats, and counter the proliferation of weapons of mass destruction relate to domestic homeland security efforts. By the end of the course, students will gain a solid intellectual foundation to think critically and creatively about America's efforts to prevent terrorist attacks within the United States, reduce our vulnerability to terrorist attack, and minimize the damage and recover from attacks that may occur.

Lessons: 20 @ 110 min (1.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: Admission to the course will be capped with priority given to Terrorism Studies Minor students.

Prerequisite(s): SS307

SS465	TERRORISM: NEW CHALLENGES	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	----------------------------------	--

Scope: 2010-1

Offerings:

The purpose of SS465, is to address the challenges of terrorism in the current and future global security environment through an interdisciplinary approach. Specifically, this course examines the unique challenge terrorism poses to liberal democratic states, policy makers and to military professionals. By analyzing the different perspectives of terrorism, given a variety of political and strategic contexts, students better understand terrorist motivations, strategies, means and ends. Finally, the course explores how a liberal democratic state can best fight terrorism in this new threat environment.

SS466	ADVANCED TERRORISM STUDIES	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-----------------------------------	--

Scope: 2008-1

Offerings:

The Advanced Terrorism Studies course represents a unique opportunity for students to conduct in-depth and integrated study on the most pressing past, present and future terrorist challenges to the United States and its interests. The objectives of this course are: (1) to synthesize and apply the cadet's studies across core, area, and elective course work to the thematic issue of terrorism; (2) to apply methodological skills of research design, conceptual reasoning, analysis, and research gained to terrorism; (3) to extend the cadet's in-depth study of the selected area of interest beyond the level obtained in course work with regards to terrorism; (4) to design and conduct focused research; and (5) to develop cadet skills in conceptual reasoning, critical analysis, and effective writing.

No Course Offerings

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: Ten 2-3 page analyses of current events; one 20-page research paper; significant class participation.

SS474

SS468	POLITICAL PARTICIPATION	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--------------------------------	--

Scope: 2004-2

Offerings:

This course provides a broad understanding of the dynamics of political participation. The goals of this course are two-fold. First, it comprehensively examines both individual and group participation, as well as the many ways in which participation manifests itself in the democratic process, namely in the form of electoral (voting, campaigning) and non-electoral behavior ("civicness", group action, etc). As such, this course will include topics in public opinion, the electoral process, and voting behavior. Second, the approach is both empirical - and theoretical. This course examines results of electoral behavior (primarily U.S. national and state elections), complemented with competing theoretical approaches which serve to explain and better understand this behavior.

2019-1 2020-1

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

SS469	ECONOMETRICS II	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	------------------------	--

Scope: 2005-2

Offerings:

This course is designed to teach students advanced concepts in estimation and statistical inference. Building upon the material covered in SS368, students will learn how to test for failure of the data to meet the assumptions of the basic regression model and how to allow for these departures from the standard assumptions during estimation. Among the topics covered will be Generalized Least Squares, Time Series, Instrumental Variables, and Simultaneous Equations estimation. Application of the techniques to the estimation of economic models using actual economic data is an integral part of the instruction. The course makes substantial use of statistical software packages.

2018-1 2019-1 2020-1

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

SS470	MONEY AND BANKING	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--------------------------	--

Scope: 2004-1

Offerings:

SS470 is a senior level economics course whose primary purpose is to provide depth in the student's background and understanding of macroeconomics and international economics. The focus of the course is on the financial sector of the economy, which provides the means to transfer savings from firms, households, and governments to investors who want to purchase new capital goods. The course begins by discussing the various types of financial institutions and examines the importance of financial intermediation. The course then identifies how to measure the risks faced by financial institutions and how to manage these same risks.

2018-1 2018-2 2019-1
2020-1

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: The final eight lessons of the course comprise an extended computer banking simulation, allowing cadets to apply the theories from previous lessons.

Prerequisite(s): SS388

SS472	THE AM STATE & THE SOLDIER	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------------	--

Scope: 2011-2

Offerings:

This seminar explores the unique role of the soldier within our democratic republic. We begin by situating the profession of arms within the Executive branch as an agent to its direct principal, the Legislative branch. We proceed by examining the similarities and differences between the military and other agents of the administrative state. We explore the military's role in providing professional expertise in the policy process and examine current trends that threaten to undermine this advisory position. Using a historical framework, we will examine the evolution of civil-military relations in times of war, peace, and perpetual conflict. We will place particular emphasis on the theories and norms of civil-military relations in a post-9/11 world including navigating the tensions inherent to the dual role of the soldier as war fighter and state builder..

2018-2 2019-2 2020-2

-Or-
SS252**SS473****AMERICAN FOREIGN POLICY****3.0 Credit Hours**
(BS=0.0,ET=0.0,MA=0.0)**Scope:**

2008-1

Offerings:

This course examines the development, implementation, and consequences of American foreign policy. It analyzes the actors who make American foreign policy, concentrating both on government sources such as the president, Congress, and the foreign policy bureaucracy, as well as external sources such as public opinion, interest groups, and the media. The course examines key events in U.S. foreign policy history through the lens of 'policy choice.' What choices did U.S. foreign policy makers confront? What policy did they choose to implement and why? What were the consequences of that policy? Utilizing the lessons from these historical case studies, the course then examines the current challenges and dilemmas that confront the United States. Some of these include U.S. relations with China, Russia, and the European Union, energy politics, the Arab-Israeli crisis, weapons of mass destruction and rogue states, terrorism, democracy promotion, and the global response to US foreign policy. In exploring each of these current challenges and dilemmas, this course attempts to understand the policies and strategies the U.S. utilizes to secure its interests and achieve its objectives.

2018-1 2018-2 2019-1
2019-2 2020-1 2020-2**Lessons:** 40 @ 55 min (2.500 Att/wk)**Labs:** 0 @ 0 min**Special Requirements:**

3,500-word case study of American foreign policy, with graded bibliography and outline; compensatory time provided.

Prerequisite(s):SS307
-Or-
SS357**SS475****DEMOCRATIZATION****3.0 Credit Hours**
(BS=0.0,ET=0.0,MA=0.0)**Scope:**

2006-1

Offerings:

This course explores the fundamental political concepts of democracy and democratization. The assigned readings examine the normative and practical underpinnings of democracy, as well as the specific causes – and potential reversals -- of the "Third Wave" of democratization that has spread throughout the world over the past three decades. The course also debates effective American policy choices for newly emergent democracies that often suffer from instability and inequality. SS475 places particular emphasis on the states of Eastern Europe and the former Soviet Union, and on the problem of constructing a new post-Soviet security architecture in a context of democratization. The course also applies democratization concepts to the Middle East with case studies in Iraq and Afghanistan.

SS357 SS366**SS476****CONFLICT AND NEGOTIATION****3.0 Credit Hours**
(BS=0.0,ET=0.0,MA=0.0)**Scope:**

2017-2

Offerings:

This course provides a broad overview of the nature of global conflict in the 21st century and investigates conflict prevention, conflict intervention and management, and post-settlement operations. The course also provides students an introduction to the field of conflict resolution and inter-cultural communication, and is centered around hands-on skills-building with individual and team negotiation practical exercises which allow students to develop individual mediation and negotiation skills. In addition to graded role-play simulations, requirements include a WPR, and a final conflict analysis paper and presentation in which the students investigate an international conflict and critique and/or develop a strategy for managing the conflict utilizing the theory, methodology and tools discussed in class.

SS477	ECONOMICS OF NATIONAL SECURITY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------------	--

Scope: 2017-1 **Offerings:**

This is a capstone course for the economics major that is designed to integrate microeconomics, macroeconomics, and econometrics. Coursework and classroom discussion require students to apply theoretical concepts and models from the major's toolbox courses, electives, and the core curriculum to policy issues inherent to the provision of national security. The course prepares students to address the broader economic challenges of national security and provides them with a baseline understanding of the economic underpinnings and ramifications of defense policy. Students use relevant databases, econometrics, and the skills they have learned as economics majors to prepare and present term research papers that analyze major defense and public policy decisions.

SS478	DIST PROF OF SECURITY STUD SEM	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------------	--

Scope: 2008-1 **Offerings:**

This course is taught by a visiting scholar with a distinguished record of academic achievement and professional service in the national security arena. The seminar focuses on topical issues that reflect the professor's area of expertise. Dr. Kori Schake, a former Director of Defense Strategy and Requirements for the National Security Council and presently a distinguished fellow at the Hoover Institution, serves as our current visiting scholar. In the seminar, students take part in detailed discussions, deliver presentations, conduct research, and prepare analytical papers. Students also benefit from guest speakers who share their experiences and expertise with the seminar. Previous Distinguished Professors include General (Retired) Barry R. McCaffrey, former Director of the White House Office of National Drug Control Policy; General (Retired) John Galvin, former commander of SACEUR and noted author; Professor Richard Shultz, Director of International Security Studies at the Fletcher School of Law and Diplomacy; Professor Linda Brady, Director of the School of International Affairs at Georgia Institute of Technology; and Admiral (Retired) Stansfield Turner, former President of the Naval War College and Director of the Central Intelligence Agency.

SS479	INTERNATIONAL ORGANIZATION	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-----------------------------------	--

Scope: 2017-2 **Offerings:**

International Relations scholars often emphasize "anarchy" as an ordering principle of the international system. Yet "organization" - the arrangement of actors and power in international affairs, as well as the existence of formal organizations like the United Nations, the World Trade Organization, and NATO - is an elemental feature of world politics. This course examines this crucial area of IR theory and practice. The course introduces conceptual approaches to the study and historical development of international organization and global governance and alternative theories to describe, explain, or predict events or developments in this field. It examines the system-level, domestic sources and consequences of international organization and introduces leading formal organizations in the international system. The course also assesses the impact and relevance of international organization as an issue of concern to Army officers and national security professionals.

SS480	ADV AM POLITICS, POLICY, STRAT	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------------	--

Scope: 2008-1

Offerings:

This course examines the major concepts, theoretical frameworks, and substantive dilemmas of the public policymaking process. The aim of this course is to arm students with a myriad of tools to understand, evaluate, and contextualize specific political problems in the public policy arena. SS480 is the capstone course for American Politics majors in the Social Sciences Department. Students will be expected to integrate the concepts of not only "Sosh" basic, toolbox, and elective courses, but knowledge acquired from other courses from other disciplines as well. Public policy spans the disciplines of politics, economics, sociology, philosophy, and psychology, as policymakers wrestle with developing and implementing value-laden decisions in a world of scarcity and uncertainty. As such, the student of public policy must use a variety of social science tools - and increasingly, physical science tools as well as to dissect policy problems, develop viable and feasible alternatives, and fashion methods of adoption and implementation. Consequently, this course is designed to build upon the student's conceptual and analytical base in the quest to establish and refine a systematic approach to public policy analysis, formulation, adoption, and implementation.

--------------	--------------------------------------	--

Scope: 2013-2

Offerings:

This seminar is a survey of the politics that shape America's policy decisions over war and peace. We study the domestic influences of foreign policy and the international political dynamics that shape why and how America intervenes. It is an examination of American Grand Strategy using theoretical, historical, and practical perspectives. Drawing from various literatures, we examine and evaluate the choices our nation makes in defense policy decisions. We address questions concerning military innovation and adaptation, change and transition in the armed services, defense resources, and capacities of actors in the defense policy arena. Using the lens of "grand strategy," we examine how defense policy decisions are influenced by a broad and complex array of political and economic factors and how these decisions shape future domestic and foreign policy environments.

Lessons: 40 @ 55 min (1.250 Att/wk) **Labs:** 0 @ 0 min

--------------	----------------------------------	--

Scope:	2004-1	Offerings:
		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2

The International Politics capstone seminar provides an overview of U.S. national security policy and examines the military, political, and economic factors that influence its formulation. It establishes a conceptual framework for exploring how national interests are translated into national security policy and force structure. The course addresses three central issues: (1) the appropriate ends of national security policy, (2) the means by which we should pursue those ends, and (3) matching means with ends. Since many factors impact on strategic decisions, the course includes discussion of international, domestic, and organizational influences on national security policy. Theoretical readings combine with case studies of past and current U.S. strategic choices to illuminate critical points. The course closes by applying the lens of strategy to conduct an analysis of current proposals to revamp the structure of the Army.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: Policy paper; Book Review, and one or more formal oral presentations.

Prerequisite(s): SS307
-Or-
SS357

SS484	INTERNATIONAL ECONOMICS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	--------------------------------	--

Scope:	2005-2	Offerings:
		2018-2 2019-2 2020-2

This course integrates economic principles taken in SS382 and SS388. International Economics promotes understanding of the economic causes and effects of international trade, examines the justifications for and effectiveness of a variety of trade policies, explains and critiques the international flow of money, and explores the impact of these topics upon individual firms in the marketplace. The course's methodology rests on theoretical concepts and models such as profit maximization, market equilibrium, preference maximization, and macroeconomic equilibrium. The course is divided into four blocks. The first three blocks investigate the theory of international trade in goods and comparative advantage, the practice of international trade and international political economy, and the workings of international monetary markets. The final block compels cadets to apply their estimates of the international macroeconomic environment to choices made by national governments.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: One in-class case study and one analytical paper (1500 words); compensatory time provided.

Prerequisite(s): SS382 SS388

SS485	GOV & POLITICS SUB-SAHARAN AFR	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---	--

Scope: 2016-2

Offerings:

2018-2 2019-2 2020-2

This is a discussion-based seminar course designed to survey the origins and dimensions of contemporary issues within the post-colonial, sub-Saharan African state. The concepts of democracy, institutionalization, political economy, war, and peace remain a complex landscape for many African states. Focusing on theoretical work and case studies, cadets will examine sub-Saharan Africa's historical experiences, its economic heritage, and the international context in which it is embedded. At the same time, cadets will explore how Africans have shaped their own political and economic situations. Using social science methods, cadets will gain an understanding of how context shapes political behavior, in general, and how historical and political forces have influenced African politics, in particular.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: One group case study and oral presentation; compensatory time given.

Offerings:

2018-1 2018-2 2019-1
2019-2 2020-1 2020-2

This Comparative Politics capstone seminar examines the special historical, domestic, and external security issues that non-Western states face, and then examines how such issues influence these states' formulation of their national security policies. Students explore how non-Western state regimes might use limited diplomatic, information, military, and economic means to achieve their regime goals. Students apply newly learned or previously learned IR or CP theories to analyze a non-Western state's national security strategy, and then attempt to anticipate what such states might do under current domestic and international conditions.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: One oral group presentation, one individual 3000 word research paper, and a shorter preliminary paper; compensatory time provided.

Offerings:

2018-2 2019-2 2020-2

This course develops, integrates, and applies the theoretical insights of political science and economics to contemporary issues of international trade, finance, and security. The theoretical concepts introduced in the first block build upon the ideas introduced in SS307, International Relations, SS202, American Politics, and SS201, Economics. The theory developed in the first block will be used to analyze and evaluate important historical and contemporary questions of international political economy. Specific issues areas explored include international monetary relations, regional economic integration (NAFTA, EC), Third World debt and development, protectionism, and the link between security and economics.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: One analytic paper of 2500 words based on selected readings.

Prerequisite(s): SS307
-Or-
SS357

SS489	ADV INDIV STUDY IN SOC SCI	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-----------------------------------	--

Scope:	2006-1	Offerings:
<p>The course provides an environment that is conducive to independent effort in a subject area of special interest to the cadet. Original research or specialized study can be accomplished in the fields of economics, political science, international affairs, and comparative politics. The course is conducted in three phases. First, the cadet and the individual tutor from the social sciences faculty will reach agreement on a subject area for research. Research methods will be studied under the direction of the faculty member. Research may involve field trips and personal interviews with experts in the area of study. In the second phase, the cadet will engage in independent research and prepare a draft analytical paper or report detailing the findings. During this period, frequent consultation with the faculty advisor occurs regarding the progress in the project. In the third phase, the cadet will present and defend the findings before a faculty committee. This course encompasses both individual projects and those writing a senior thesis.</p>		2018-1 2018-2 2019-1 2020-1
Lessons:	0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min

Scope:	2011-2	Offerings:
This course provides cadets an opportunity for reading and analysis in depth in a topic area of special interest and timely relevance to their concentration. The course employs the seminar approach in which a senior faculty member meets with small groups to discuss assigned readings, and cadets present their own analyses to the group. Course directors develop topics and determine the semesters in which they will be offered. Department Academic Counselors then forward course offerings and descriptions to Social Science majors and those majoring in areas related to the senior studies topic. Topics will vary by year but recent senior studies include: Politics of Race, Gender, Sexuality and Politics, Studies in Grand Strategy, State and Local Politics, and Judicial Politics.		2018-2 2019-2 2020-2
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	One research paper (minimum length of twenty typed, double-spaced pages).	
Prerequisite(s):	SS360 SS386	
SS494	PRINCIPLES OF FINANCE	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2015-1	Offerings:
This course applies economic principles to the financial decisions that businesses make every day, and to the capital markets in which households and firms interact. The course covers topics including project analysis using net present value techniques, risk and return of assets and projects, efficient capital markets, corporate capital structure and dividend policy, and valuation of assets. Cadets will learn methods to analyze individual projects as well as business enterprises as a whole. As the U. S. Military continues to privatize many functions, knowledge of techniques used by corporations is becoming essential for our future Army leaders. This course is the second of a two-course financial economics sequence for which SS394 ? Financial Statement Analysis is a prerequisite, except for cadets with permission of the instructor.		2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Financial analysis.	
Prerequisite(s):	SS201 SS394 -Or- SS251 SS394	
SS495	SENIOR STUDIES - COMP POLITICS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2005-1	Offerings:
This course provides cadets an opportunity for reading and analysis in depth in a topic area of special interest and timely relevance to their concentration. The course employs the seminar approach in which a senior faculty member meets with small groups to discuss assigned readings, and cadets present their own analyses to the group. Course directors develop topics and determine the semesters in which they will be offered. Department Academic Counselors then forward course offerings and descriptions to Social Science majors and those majoring in areas related to the senior studies topic. Topics will vary by year but recent senior studies include: Homeland Security, Advanced Terrorism, and Environmental Economics.		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	These will vary by topic. Typically three analytical papers or projects of 3000-4500 words based on selected readings; class attendance adjusted to provide research time.	
Prerequisite(s):	SS307 -Or- SS357	
SS497	ISSUES IN MICROECONOMIC THEORY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2011-2	Offerings:
This course provides cadets an opportunity for reading and analysis in depth in a topic area of special interest and timely relevance to their concentration. The course employs the seminar approach in which a senior faculty member meets with small groups to discuss assigned readings, and cadets present their own analyses to the group. Course directors develop topics and determine the semesters in which they will be offered. Department Academic Counselors then forward course offerings and descriptions to Social Science majors and those majoring in areas related to the senior studies topic. Topics will vary by year but recent senior studies include: Homeland Security, Advanced Terrorism, and Environmental Economics.		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	

Special Requirements:	These will vary by topic. Typically three analytical papers or projects of 3000-4500 words based on selected readings; class attendance adjusted to provide research time.	
Prerequisite(s):	SS360 -Or- SS368	
SS498	SENIOR THESIS: SOCIAL SCIENCES	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2013-2	Offerings:
This course is taken in the spring term of the senior year and comprises the second and final phase of the Senior Thesis in Economics, International Relations, Comparative Politics, or American Politics. Cadets enrolled in SS498 normally will complete their major's integrative experience course (SS477 or SS492 for Economics, SS483 for International Relations, SS486 for Comparative Politics, or SS481 for American Politics) in the fall semester of their senior year, where they will complete a prospectus, literature review, annotated bibliography, outlines, and initial draft of their senior thesis. In SS498, students will continue work on an independent study basis with their thesis advisor and committee, conducting further research and updating drafts to produce a final written thesis product generally ranging from 30-50 pages in length. Students defend their thesis before a committee in the last two weeks of classes.		2018-2 2019-2 2020-2
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Cadets must receive approval from their major's Program Director in order to enroll in SS498.	
XH397	GRAND STRATEGY FIELD STUDY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2014-7	Offerings:
The Grand Strategy Field Study AIAD experience is designed to give cadets practical experience in this field of study and to reflect on their experiences by completing specified academic requirements. Scope, depth and material covered will meet the requirement of a 3-credit hour course in the Grand Strategy Program. Grades are determined based on preparatory briefings and essays, a journal of daily activities, the quality of the work performed during the internship, and a final paper, briefing, or exam that incorporates their experience with a topic from their field of study, due upon return.		2018-7 2019-7 2020-7
Lessons: 0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
XH407	ADVANCED CRITICAL THOUGHT	1.5 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2014-1	Offerings:
The purpose of XH407 Advanced Critical Thought is to build upon the foundation of critical thought established in XH497 Critical Thought. Cadets apply the concepts developed in XH497 to contemporary issues facing the United States Army, Department of Defense, Nation, and wider world. Cadets continue to refine their understanding of their place in the society and develop skills to convey this sense of self to others, both verbally and in writing. Cadets will continue to be advised by both Department of Social Sciences faculty and academic advisors in their home departments.		2018-1 2019-1 2020-1
Lessons: 10 @ 110 min (1.250 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Admission to the course requires an interview and the approval of the department head.	
Prerequisite(s):	XH497	
XH467	WINNING THE PEACE	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2014-2	Offerings:
This course aims to help create "soldier statesmen" at the Company Grade level for the US Army. Subject matter experts from across the staff and faculty of the US Military Academy, US governmental agencies, and other international actors, discuss situations deployed leaders will likely face in the future, including counterinsurgency, cultural awareness, interagency dynamics, military-to-military engagement and exchange, governance and economics, and legal, moral, and ethical considerations, among others. This course helps future officers develop the basic knowledge and skills needed to become strategically adept in a complex and evolving strategic landscape. We also spend two nights and three days in a multi-ethnic US city interacting with Egyptian Copts, Muslims, Hindus, and various Christian denominations to more fully understand how groups with different beliefs can live and work together. This course is open to any interested sophomore, junior, or senior.		2018-2 2019-2 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	

Special Requirements:	Three analysis papers; reflective and mentor journal, corresponding with recent graduates; group research and analysis project for the multi-ethnic city trip.	
Prerequisite(s):	SS307 -Or- SS357	
XH497	CRITICAL THOUGHT	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2003-1	Offerings: 2018-2 2019-2 2020-2
<p>The purpose of XH497, Critical Thought is to improve cadets' ability to evaluate complex issues involving ethical judgements and choice among scarce resources, reach reasoned positions on these issues, and effectively argue their positions verbally and in writing. The process of pursuing this goal will make cadets better officers, scholars, and citizens. The course will employ several methods to assist in this pursuit. First, it will achieve breadth by focusing on current issues from a variety of fields, examining the "hard choices" that confront society, government, military leaders, and individual citizens. Among the disciplines from which the course will draw are Philosophy, Law, Political Science, Economics, Physics, Biology, and English. Each cadet will also be assigned an individual mentor from among the faculty of the Departments of Social Sciences, History, Law, or English. Requirements include a briefing on a current issue in the cadet's major field, a book review, and a personal statement summarizing academic and other goals.</p>		
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	Admission to the course requires an interview and the approval of the department head.	
Prerequisite(s):	SS307 -Or- SS357	
ZH337	REGIONAL POLITICAL SYSTEMS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2010-2	Offerings: No Course Offerings
<p>For cadets attending foreign military academies and academic institutions. Instruction may be in English or a foreign language. Cadets will attend classes and produce papers and other academic work as required by the course instructor and the institution's academic requirements. This class serves as the equivalent to a foreign course covering the politics, societies, and structures of states in different regions of the world. The course also covers the study of the relationship between the state and society in these regions. Regions include but are not limited to the Middle East, East Asia, Southwest Asia, Central Asia, North Africa, South Africa, Latin America, South America, and Europe.</p>		
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
ZH347	INT'L ORGNZTNS & INSTITUTIONS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2010-2	Offerings: No Course Offerings
<p>For cadets attending foreign military academies and academic institutions. Instruction may be in English or a foreign language. Cadets will attend classes and produce papers and other academic work as required by the course instructor and the institution's academic requirements. This class serves as the equivalent to a foreign course about international regimes, international institutions, and / or international organizations and the structure, role, and relevance of these actors in the international system. In addition, course content may include material about the relationship between international organizations and institutions and states. International organizations and institutions studied may include but are not limited to the United Nations, NATO, the European Union, International Economic Organizations, the International Criminal Court, and the Kyoto Protocol / other Climate Change Institutions.</p>		
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
ZH367	TOPICS IN MICROECONOMICS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2011-1	Offerings:

For cadets attending foreign military academies and academic institutions. Instruction may be in English or in a foreign language. Cadets will attend classes and produce papers and other academic work as required by the course instructor and the institution's academic requirements. This class serves as the equivalent to a foreign course about topics covered in the study of microeconomics. Topics include, but are not limited to, history of economic thought, manpower and labor economics, public and social policy issues, energy and natural resource issues, gender, law, and applied microeconomic issues.		2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
ZH377	TOPICS IN MACROECONOMICS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2011-1	Offerings:
For cadets attending foreign military academies and academic institutions. Instruction may be in English or in a foreign language. Cadets will attend classes and produce papers and other academic work as required by the course instructor and the institution's academic requirements. This class serves as the equivalent to a foreign course about topics covered in the study of macroeconomics. Topics include but are not limited to international trade, foreign exchange, the international monetary system, global capital markets, and globalization.		2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
ZH407	TOPICS/AMERICAN FOREIGN POLICY	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2010-2	Offerings:
For cadets attending foreign military academies and academic institutions. Instruction may be in English or a foreign language. Cadets will attend classes and produce papers and other academic work as required by the course instructor and the institution's academic requirements. This class serves as the equivalent to a foreign course covering the development, implementation, and consequences of American foreign policy. It analyzes the actors who make American foreign policy, concentrating both on government sources such as the President, Congress, and the foreign policy bureaucracy, as well as external sources such as public opinion, interest groups, and the media. Topics include - but are not limited to - U.S. relations with China, Russia, and the European Union, energy politics, the Arab-Israeli crisis, weapons of mass destruction and rogue states, terrorism, democracy promotion, and the global response to US foreign policy. In exploring each of these current challenges and dilemmas, this course attempts to understand the policies and strategies the U.S. utilizes to secure its interests and achieve its objectives.		No Course Offerings
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
ZH427	TOPICS IN COMPARATIVE POLITICS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2010-2	Offerings:
For cadets attending foreign military academies and academic institutions. Instruction may be in English or a foreign language. Cadets will attend classes and produce papers and other academic work as required by the course instructor and the institution's academic requirements. This class serves as the equivalent to a foreign course covering the history and development of state social structures, political cultures, and systems and structures of government. Topics include but are not limited to democratization, regional anthropology, and conflict resolution.		No Course Offerings
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
ZH447	TOPICS: INTERNATIONAL POLITICS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2010-2	Offerings:
For cadets attending foreign military academies and academic institutions. Instruction may be in English or in a foreign language. Cadets will attend classes and produce papers and other academic work as required by the course instructor and the institution's academic requirements. This class serves as the equivalent to a foreign course about topics covered in the study of international relations. Topics include but are not limited to international security studies, international political economy, economic development, and the history of the development of modern international relations and the international system.		No Course Offerings
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	

Special Requirements: None

ZH467	TOPICS-INTERNATIONAL ECONOMICS	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	---------------------------------------	--

Scope: 2011-1

Offerings:

For cadets attending foreign military academies and academic institutions. Instruction may be in English or a foreign language. Cadets will attend classes and produce papers and other academic work as required by the course instructor and the institution's academic requirements. This class serves as the equivalent to a foreign course about international economic systems, international institutions, and / or international organizations and the structure, role, and relevance of these actors in the global economic system. In addition, course content may include material about the relationship between international organizations and institutions and states. International organizations and institutions studied may include but are not limited to the United Nations, World Bank, International Monetary Fund, the European Union, World Trade Organization, the Bretton Woods system and International Financial Organizations. Topics include but are not limited to international political economy, economic development, regional economics, and the history of the modern international economic system.

Department of Systems Engineering

35 Courses

EM381	ENGINEERING ECONOMY	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2017-1	Offerings:
<p>This course prepares cadets to consider the economic dimension in the evaluation of engineering alternatives; a consideration vital to the Systems Decision Process, engineering management, systems acquisition and many other application areas. While emphasis is on the analytical consideration of money and its impact on the areas above, the course also incorporates professional ethics in the engineering economic analysis process. The course is taught in four lesson blocks. The Time Value of Money (TVM) block includes the quantitative methods for economic analysis of engineering alternatives by introducing cost concepts, interest concepts, the cash flow diagram and developing interest formulas. The Analysis Methods block develops techniques for project evaluation and comparison and ways to account for risk and uncertainty. The After Tax Cash Flow block incorporates the real-world effect of taxes, depreciation and inflation into the analysis methods. The Capital Budgeting block completes a comprehensive introduction to engineering economy by introducing the concept of economic service life and project financing. A one lesson introduction to personal finance is included to demonstrate how many of the concepts used in the business world can also be applied for personal planning. Course concepts are applied using Excel in both graded and ungraded labs. Cadets will spend several lessons in a computer lab environment.</p>		2018-1 2018-2 2018-5 2019-1 2019-2 2020-1 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	
Special Requirements:	None	
EM384	ANYL METH FOR ENGR MANAGEMENT	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2009-1	Offerings:
<p>EM384 focuses on the application of deterministic and probabilistic models used by analysts to make engineering and management decisions. Cadets learn to apply various modeling techniques to represent and solve real-world organizational problems in the military and industry. Topics include: linear and integer programming, network modeling, decision making under uncertainty, queuing, and simulation modeling. Cadets apply concepts and tools using Microsoft Excel within a computer lab environment. The techniques taught in this course have been applied to an increasingly wide variety of complex problems in business, government, military, health care, and education. Ethical responsibilities in describing the results of analyses to decision makers are integrated throughout the course. Cadets develop communication skills through two written reports and make innovative use of spreadsheets to develop and analyze models. Cadets are tested on the application of course concepts from the four blocks of instruction during two graded labs, two out-of-classroom projects, two problem sets, and two in-class WPRs. Cadets will spend several lessons in a computer lab environment.</p>		2018-1 2019-1 2020-1

EM400	PROFESSIONAL ENGINEERING SEMIN	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2019-2	Offerings:
<p>This seminar consists of a series of lessons on topics that are within the Industrial Engineering Fundamentals of Engineering Examination. Additionally, the course will include an Information Technology/Cyber exercise. It will include all First Class cadets majoring in Engineering Management. Topics will address the concerns of professional systems engineers, such as engineering ethics, continuing education, engineering economy, social and safety considerations, and professional registration. In addition, the course will include new topics not covered in their course work that is on the Industrial Engineering Fundamentals of Engineering Exam including ergonomics, design of industrial experiments, system design, manufacturing, and material handling. (CONDITIONAL APPROVAL in AY16 - Full review in AY18)</p>		2019-2 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min	

Special Requirements:	None	
EM402	ENGINEERING MANAGEMENT DSN I	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
Scope:	2009-1	Offerings:
This is the first course in a two-semester capstone design for EM majors. EM402 integrates the principles, concepts and models explored in previous core and engineering topic courses. The course applies the principles of systems design, engineering management, and/or reengineering to a real-world system. Cadets work under the supervision of a faculty mentor to address a problem presented by a real-world client, providing them an integrative experience for their education in engineering design.		2018-1
Lessons: 34 @ 55 min (2.500 Att/wk)	Labs: 6 @ 110 min	
Special Requirements:	None	
Prerequisite(s):	EM381 EM384 SE301

EM411	PROJECT MANAGEMENT	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
Scope:	2009-1	Offerings:
<p>This course develops skills required to lead an organization to the achievement of their objectives through the proper application of the management of planning, implementing and controlling the organization activities, personnel and resources. The course focuses on the Implementation phase of the Systems Decision Process (SDP). Topics include project selection, roles and responsibilities of the project manager, planning the project, budgeting the project, scheduling the project, allocating resources to the project, monitoring and controlling the project, evaluating and terminating the project, risk assessment and management, organizational structure and human resources. Case studies illustrate problems and how to solve them. Course assignments are designed to help students learn and apply project management techniques taught in the course. The class design project will provide students with the opportunity to integrate project management software, Microsoft Project, into the preparation of an Engineering Management Project Plan. Cadets spend several lessons in a computer lab environment.</p>		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2

EM420	PRODUCTION OPERATIONS MGMT	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2009-1	Offerings:
<p>This course deals with the quantitative aspects of design and analysis of production operations management. Emphasis is on identification, analysis, and solution implementation of production problems using applied quantitative techniques within each of the four phases of the Systems Decision Process (SDP). Practical exercises reinforce the problem-solving techniques necessary for today's successful military and civilian engineering managers and systems engineers. Specific methods and techniques taught and applied are operations strategy, product design and selection, supply chain management, total quality management, forecasting, capacity planning, facility location, facility layout, work system design, inventory management, material requirements planning, and scheduling. This course is required for those pursuing the Engineering Management major, the Systems Engineering major, and the Systems Management major. Cadets will spend two to four lessons in a computer lab environment.</p>		2018-1 2018-2 2018-5 2019-1 2019-2 2019-5 2020-1 2020-2 2020-5

EM481	SYSTEMS SIMULATION	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2012-1	Offerings:
<p>Cadets learn and explore discrete event simulation techniques and tools used to analyze and improve complex systems. Applications include operations, transportation, manufacturing and logistics systems. Topics include functional modeling with functional flow diagrams and IDEF0 models, simulation theory, the modeling process, input data analysis, generation and testing of random numbers, verification and validation of simulation models, experimental design, output analysis, and application using simulation software. The course concepts provide cadets the tools to evaluate military and civilian systems. Emphasis is placed on using simulation in the Systems Decision Process (SDP). Cadets demonstrate proficiency and develop communication skills through design projects and briefings. Cadets spend several lessons in a computer lab environment.</p>		2018-1 2018-2
Lessons:	25 @ 55 min (2.500 Att/wk)	Labs: 15 @ 120 min

Prerequisite(s):	MA206	
Disqualifier(s):	SE481	
EM481	SYSTEMS SIMULATION	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
Scope:	2019-1	Offerings:

Cadets learn and explore discrete event simulation techniques and tools used to analyze and improve complex systems. Applications include operations, transportation, manufacturing and logistics systems. Topics include functional modeling with functional flow diagrams and IDEF0 models, simulation theory, the modeling process, input data analysis, generation and testing of random numbers, verification and validation of simulation models, experimental design, output analysis, and application using simulation software. The course concepts provide cadets the tools to evaluate military and civilian systems. Emphasis is placed on using simulation in the Systems Decision Process (SDP). Cadets demonstrate proficiency and develop communication skills through design projects and briefings. Cadets spend several lessons in a computer lab environment. (CONDITIONAL APPROVAL AY16 - Full proposal AY18)		2019-1 2019-2 2020-1 2020-2
Lessons: 22 @ 55 min (2.500 Att/wk)	Labs: 11 @ 120 min	
Special Requirements:	In-process reviews and two design problems; compensatory time provided.	
Prerequisite(s):	MA206	
Disqualifier(s):	SE481	
EM482	SUPPLY CHAIN ENG & INFO MGMT	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2013-1	Offerings:
This course teaches cadets the strategic importance of supply chain design, planning, operation, business processes, and information management systems. Cadets will become familiar with engineering a supply chain network---from conducting inventory management to establishing proper sourcing and transportation strategies to understanding capacity and facility locations to constructing the proper information technology framework needed to be successful. Cadets will develop the ability to evaluate how information flows can be a substitute for the stock of physical resources. Additionally, cadets will understand why such information systems succeed or fail through the explanation of concepts, insights, practical tools and the information technology that supports decision making. This course will focus on understanding the key drivers of a supply chain such as inventory, facilities, transportation, sourcing, pricing, and information. Cadets will learn the three types of information technology, how to mitigate risks of information technology and strategies for implementing process enabling information technology. Cadets will also learn to assess the impact of strategic alliances and globalization on supply chain strategies and best practices, to include smart pricing, customer value, and new product and supply chain design.		2018-1 2019-2 2020-2

Disqualifier(s):	SM482	
SE300	INTRO TO SYSTEMS ENGINEERING	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2017-2	Offerings:
SE300 serves as the "roadmap" course for all cadets taking the three-course Systems Engineering sequence. This course presents the methodological framework and techniques for designing, implementing, managing and reengineering large-scale systems or processes. Cadets learn engineering design and engineering management processes and gain an appreciation for the future environments and systems life-cycles. Cadets analyze case studies and complete practice problems to illustrate mastery of course topics. Cadets also use spreadsheet software for modeling and analyzing design alternatives. Cadets will spend eight to twelve lessons in a computer lab environment.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min

Disqualifier(s):	SE301	
SE301	FNDTN ENGIN DSGN & SYS MGMT	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2016-2	Offerings:
SE301 serves as the "roadmap" course for all cadets taking the Engineering Management, Systems Engineering, or Systems and Decision Sciences majors. This course presents the methodological framework and techniques for designing, implementing, managing and reengineering complex systems or processes. Cadets learn engineering design and engineering management processes and gain an appreciation for future environments and system life-cycles. Cadets analyze case studies and complete practice problems to illustrate mastery of course topics. Cadets also use spreadsheet software for modeling and analyzing design alternatives. SE301 introduces a Systems Decision Process while incorporating material from courses in the USMA core curriculum and also previews the modeling and decision making tools that cadets will learn in follow-on Department of Systems Engineering courses. The course is designed to allow Cadets the opportunity to learn engineering design and engineering management processes on an individual level		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2

so that each Cadet will have the experience necessary to succeed in future Systems Engineering courses. Cadets will spend eight to twelve lessons in a computer lab environment.

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Corequisite(s): MA206

Disqualifier(s): SE300

SE302	FUNDAMENTALS OF SYSTEMS ENG	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	------------------------------------	--

Scope: 2016-1

Offerings:

SE302 focuses on preparing students to effectively model, analyze, and understand complex, interdisciplinary, and ill-defined problems as systems in an effort to design and implement effective solutions. The course covers principles and methods for Requirements Management, Functional Analysis, and technical System Architecture from industry and DoD including IDEF modeling, the Unified Modeling Language, and the Department of Defense Architectural Framework (DoDAF). The course will also include a review of Model-based Systems Engineering (MBSE) methodologies. The techniques taught in this course have been applied to an increasingly wide variety of complex, ill-defined problems in business, government, military, health care, and national capacity development. Ethical responsibilities in describing the results of analyses to decision makers are integrated throughout the course. Cadets develop communication skills through two written reports and make innovative use of modeling packages to develop and analyze systems. A course project will challenge cadets to apply their modeling and analysis skills to a real world complex, ill-defined problem in political, military, economic, social, cultural, and informational contexts. Cadets will spend eight to twelve lessons in a computer lab environment.

2018-2 2019-1 2019-2

SE350	SYSTEMS MODELING AND DESIGN	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	------------------------------------	--

Scope: 2017-2

Offerings:

SE350 is the second foundation course of a three-course sequence for non-engineering cadets. It focuses on the application of deterministic and stochastic models to help cadets analyze and understand different alternatives. Cadets learn to apply various modeling techniques that represent and solve real-world problems in the military, government, and industry. SE350 utilizes traditional classroom setting and computer labs, applying the fundamental principles and assumptions of analytical models. Cadets practice uses of spreadsheets to develop and analyze models. A key goal is for cadets to communicate their analysis and recommendations to a decision maker. Ethical responsibilities in describing the results of analyses to decision-makers are integrated throughout the course. Cadets are expected to apply their knowledge of course material in several computer lab exercises throughout the course.

SE370	COMPUTER AIDED SYSTEMS ENG	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	-----------------------------------	--

Scope: 2017-2

Offerings:

Cadets learn how to use information and technology in support of systems decision-making. They learn the basics of data collection and storage through a database design exercise. They learn how to manipulate data in spreadsheets to support decisions. The course introduces cadets to 2-dimensional and 3-dimensional virtual design and visualization. They also get an introduction to geospatial data analysis and display in support of military operations. Cadets learn how to effectively use technology while interacting with decision-makers. Communication skills are developed through both written and oral projects and development of interactive graphical presentations. Cadets will spend most lessons in a computer lab environment.

2018-2 2019-2 2020-2

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: Two design projects.

SE375	STATISTICS FOR ENGINEERS	3.0 Credit Hours (BS=0.0,ET=2.0,MA=1.0)
Scope:	2014-1	Offerings:
<p>This course is an integral part of the Systems Engineering major that emphasizes both the statistical analyses of data and a statistical methodology important to systems analysis and design. The over-arching course goal is to develop cadets into critical consumers and providers of statistical information as it relates to the techniques, activities, and modeling applications that typify systems engineering concerns.. The course builds on the core probability and statistics course and introduces statistics applications fundamental to the design and analysis of simulations and engineering systems. Specific topics include point and interval estimation, parametric and non-parametric tests of hypotheses, analysis of variance, linear regression, and survey design of experiments, specifically analysis of power and determination of sample size. The course emphasizes the importance of knowing and understanding the assumptions associated with the use of inferential statistics as well as the usefulness of statistical software packages. The basic principles learned in this course will facilitate data analysis in support of Army acquisition and system redesign decision-making. Ethical implications in the analysis and presentation of experimental results, as well as interactions with decision makers, are addressed.</p>		2018-1 2018-2 2019-1 2019-2 2019-5 2020-1 2020-2 2020-5

SE385	DECISION ANALYSIS	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2013-2	Offerings:
<p>The course presents basic techniques of decision-making concentrating on both theoretical and modeling aspects. This course develops innovative systems engineers who can integrate the art and science of decision making for single and multiple objective environments to support the Decision Making phase of the Systems Decision Process (SDP). The focus of the course is modeling problem structure, uncertainty, risk and preference in the context of decision-making. Topics include influence diagrams, decision trees, sensitivity analysis, assessing subjective probability, value of information, risk and uncertainty. Cadets will also use value focused thinking to support decisions in multiple objective and resource allocation environments. A series of several computer laboratory exercises provides a key bridge between the mathematical theory and the application of skills to open-ended decision problems. Communication skills are developed with both written reports and oral presentations.</p>		2018-2 2019-2 2020-2

SE387	DETERMINISTIC MODELS	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2009-1	Offerings:
<p>This course is the first of a two-course sequence that emphasizes modeling and analysis of real-world systems. This course focuses on modeling techniques without consideration of uncertainty or probabilistic effects. The course introduces the deterministic modeling process and many of the classical deterministic models used by systems engineers, operations researchers, and management professionals to identify and analyze alternatives as part of the Systems Decision Process (SDP). Emphasis is placed on creative application of the modeling process to include formulation, solution methods, analysis of results, and interpretation. Topics include deterministic life cycle cost modeling, linear programming, sensitivity analysis, networks, transportation models, dynamic programming and integer programming. Cadets will spend several lessons in a computer lab environment.</p>		2018-1 2019-1 2020-1

SE388	STOCHASTIC MODELS	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2009-2	Offerings:
<p>This course is the second of a two-course sequence that emphasizes modeling and analysis of real-world systems. Continuing from the modeling process introduced in SE387, this course introduces the stochastic modeling process and many of the classical stochastic models used by systems engineers, operations researchers and management professionals to capture and describe quantitative effects of uncertainty on decision-making as part of the Systems Decision Process (SDP). Topics include stochastic life cycle cost modeling, conditional probability models, basic inference chains, Markov Chains, Poisson Processes, birth and death processes, counting processes, queuing systems, and simulation. This course prepares cadets for the modeling required in follow-on courses, including SE481, EM484, SE485 and SE402/403. Cadets will spend several lessons in a computer lab environment.</p>		2018-2 2019-2 2020-2

SE400	PROFESSIONAL ENGINEERING SEMIN	1.0 Credit Hours (BS=0.0,ET=1.0,MA=0.0)
Scope:	2009-2	Offerings:
<p>This seminar course for SE and EM majors meets once a week to address the concerns of professional engineers such as engineering ethics and licensing procedures. The seminar also includes presentations by guest lecturers from the military, DoD industrial base, and academic communities.</p>		2018-2
Lessons:	13 @ 55 min (1.000 Att/wk)	Labs: 0 @ 0 min
Special Requirements:	None	
SE400	PROFESSIONAL ENGINEERING SEMIN	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2019-2	Offerings:
<p>This seminar consists of a series of lessons on topics that are within the Industrial Engineering Fundamentals of Engineering Examination. Additionally, the course will incorporate an Information Technology/Cyber exercise. It will include all First Class cadets majoring in systems engineering. Topics will address the concerns of professional systems engineers, such as engineering ethics, continuing education, engineering economy, social and safety considerations, and professional registration. In addition, the course will include new topics not covered in their course work that is on the Industrial Engineering Fundamentals of Engineering Exam including facility design, industrial economics, ergonomics, management, manufacturing, material handling, production planning and scheduling, and quality control. (CONDITIONAL APPROVAL in AY16 - Full review in AY18)</p>		2019-2 2020-2

SE450	APPLIED SYS DSGN/DECISN MAKING	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
Scope:	2017-2	Offerings:
This course is the third course of the three-course systems engineering sequence. The course serves as the culminating systems engineering experience for non-engineering cadets and integrates the principles, concepts, and models explored in previous courses. Cadets apply the Systems Decision Process to devise technological problem solutions that are effective and adaptable. Cadets work in groups to complete a culminating engineering design experience involving the solution of an incompletely defined problem with no single correct answer. Cadets must consider the economic, political, social and ethical constraints of the system and use creativity to generate potential design alternatives. Cadet groups will use models to analyze the alternative solutions and make a recommendation based on economic analysis and system performance. The course requires assessment of the recommended solution and a written plan for implementation.		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons: 40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min

Prerequisite(s):	SE350	

SE485	COMBAT MODELING	3.5 Credit Hours (BS=0.0,ET=3.5,MA=0.0)
Scope:	2018-1	Offerings:
<p>This course explores the theoretical and practical issues in combat modeling and simulation - the study of combat systems, tactics, and the battlefield environment in conflicts between opposing forces. The course focuses on models and algorithms used in state-of-the-art combat simulations, and techniques for analyzing their effects. Major topics of investigation include functional analysis to support modeling using functional flow diagrams and/or IDEF0 models, combat attrition models, search and detection methods, terrain representation, and measures of effectiveness. Cadets learn to manipulate 3D visual and system characteristic databases to build and test virtual prototypes of new combat system designs. Application of design of experiments and statistical analysis methods assist cadets in assessing the effectiveness of weapons systems, doctrine, and tactics on the future battlefield. The cadet can apply the concepts learned in this course to evaluate potential new Army combat systems, force structures, or doctrinal changes. The techniques taught in this course are a significant part of the Systems Decision Process (SDP) as they encourage creative and independent thought that applies mathematical, physical, and computer sciences to solve future technological problems. Ethical implications in the development and use of combat models also are discussed.</p>		2018-1 2019-1 2020-1
Lessons:	28 @ 55 min (2.500 Att/wk)	Labs: 10 @ 120 min
Special Requirements:	Course projects will require significant (about 18 hours) of out of class time.	
Prerequisite(s):	EM384 -Or- MA376 -Or- SE375	
SE489	AD IND STY IN SYS ENG/ENG MGMT	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2008-1	Offerings:
<p>This is a tutorial course in which an individual cadet or a group of cadets study in depth an advanced topic in systems engineering or engineering management under the direct mentorship of a faculty advisor. The scope of the course is tailored to the desires of the cadet(s) in consultation with a faculty advisor. Cadets will coordinate with a faculty mentor who has an interest and background in the research area and who will assist in scoping and developing course content. Communication skills are developed and assessed through both written reports and oral presentations.</p>		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2
Lessons:	0 @ 0 min (0.000 Att/wk)	Labs: 0 @ 0 min
Special Requirements:	As determined by faculty advisor.	
SE490	AD TOPICS IN SYS ENG/ENG MGMT	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2008-2	Offerings:
<p>This course provides in-depth study of a special topic or topics in systems engineering or engineering management not offered elsewhere in the USMA curriculum. This course is intended to broaden a cadet's or group of cadets' exposure to the systems engineering or engineering management discipline. The Department of Systems Engineering visiting professor or senior faculty member assigned to the course is responsible for developing the course topic or topics and advertising the course to prospective cadets.</p>		2019-1 2019-2 2020-1 2020-2
Lessons:	40 @ 55 min (2.500 Att/wk)	Labs: 0 @ 0 min
Special Requirements:	To be announced.	
SE491	RSRCH PROJ IN SYS ENG/ENG MGMT	3.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
Scope:	2008-1	Offerings:
<p>The cadet, or cadet team, integrates the concepts and techniques learned in previous Systems Engineering or Engineering Management courses to solve a current problem of interest to the Academy, the Department of the Army, or other agencies in the Department of Defense. Subject to approval from the course and program directors, cadets may select project topics which are follow-on research from their summer AIAD experience, a topic of interest to them, or one that is compatible with on-going research within the Department of Systems Engineering and/or the Operations Research Center of Excellence. Cadets will coordinate with a faculty mentor who has an interest and background in the research area and who will assist in scoping the project and directing the research effort. Cadets may work individually or in small teams, depending on the nature of the research. The course will culminate with a student presentation and a written report.</p>		2018-1 2018-2 2019-1 2019-2 2020-1 2020-2

SE492	IND ADV DEVELOPMENT COURSE	1.0 Credit Hours (BS=0.0,ET=0.0,MA=0.0)
--------------	-----------------------------------	--

Scope: 2001-4

Offerings:

This course offers the opportunity for cadets to receive academic credit for study and/or work completed during the Academic Individual Advanced Development (AIAD) program. The content of the course and the nature of academic credit will be determined by the Head of Department in consultation with the cadet and the summer host agency. Communication skills are developed with both written reports and oral presentations.

No Course Offerings

Special Requirements: To be announced.

SM484	SYSTEM DYNAMICS SIMULATION	3.0 Credit Hours (BS=0.0,ET=3.0,MA=0.0)
--------------	-----------------------------------	--

Scope: 2012-1

Offerings:

This course is a simulation elective for the Systems Engineering, Engineering Management, Operations Research, and Systems Management majors. Simulation modeling can be used to study the effects of changes to existing systems or processes, or evaluate the performance of new systems prior to their implementation. The techniques taught in this course are a significant part of the Systems Decision Process (SDP) as they introduce the concept of dynamic systems thinking and analysis. By their nature, large scale systems are dynamic. These systems involve complex cause and effect relationships that form feedback loops between the variables of interest. These systems produce outcomes that are not always intuitive. The cadets use the properties of dynamic systems and analytical techniques to design continuous models of complex systems or processes, implement these models, and perform an analysis of the results. Topics include applications of System Dynamics, client/modeler relationships, problem articulation, functional modeling through causal loop diagrams and stock and flow diagrams, modeling and simulation in a PC-based continuous event simulation package, policy design, policy testing, and policy implementation. These concepts and principles are applied to military and civilian applications such as physical systems, human decision processes, population, and economic/business processes. Cadets develop communication skills by presenting their design results in both written reports and oral presentations. The course also addresses ethical implications in the development and application of dynamic models as well as interactions with decision makers. Cadets will spend several lessons in a computer lab environment.

2018-1

Lessons: 40 @ 55 min (2.500 Att/wk) **Labs:** 0 @ 0 min

Special Requirements: Course design project.

PART IV: FIELD TABLES

Department of Behavioral Sciences and Leadership

2020 Engineering Psychology Major Curriculum

Code	Short Description	Description	Transcript Description	Req Crse Cnt	Opt Crse Cnt
EPS1	Engineering Psychology	Engineering Psychology Major	Engineering Psychology	10	3

2020 Engineering Psychology Major Tracks

Subject Area	Description
Required Courses	Choose 9 of 9
MA376	APPLIED STATISTICS
PL386	EXPERIMENTAL PSYCHOLOGY
PL390	BIOLOGICAL PSYCHOLOGY
PL391	SENSATION/PERCEPTN/PSYCPHYS
PL392	COGNITIVE PSYCHOLOGY
PL394	ANTHROPOMETRICS & BIOMECHANICS
PL475	HUMAN-COMPUTER INTERACTION
PL485	HUMAN FACTORS ENGINEERING
PL488E	COLLOQUIUM-BSL-ENGIN PSYCH
AND	
Complementary Support Courses	
For a study in depth choose three complementary support courses within any of the following focus areas. For a broadening study, choose any three complementary support courses from across the focus areas. You are limited to one complementary support course from within the Department of Behavioral Sciences and Leadership, so as to ensure you meet the academic intent of complementary support. That is to experience the field of engineering psychology from the perspective of professionals outside your field with whom you will work with as part of a multidisciplinary design team.	
Quantitative Modeling	Choose 3 of 5
MA391	MATHEMATICAL MODELING
MA394	FUNDAMENTALS/NETWORK SCIENCE
MA476	MATHEMATICAL STATISTICS
PH206	PHYSICS II
PY350	PHILOSOPHY OF SCIENCE
OR	
Physiological Status	Choose 3 of 6
CH383 and CH384 are Pre-med only	
CH383	ORGANIC CHEMISTRY I
CH384	ORGANIC CHEMISTRY II
CH387	HUMAN PHYSIOLOGY
KN355	FUNCTIONAL ANATOMY
KN365	NUTRITION FOR PERFORMANCE
KN455	PSYCHOLOGY OF EXERCISE
OR	
Workspace/Environment	Choose 3 of 5
CS473	COMPUTER GRAPHICS
DS360	SP OPNS/LOW-INTENSITY CONFLICT
IT383	USER INTERFACE DEVELOPMENT
KN360	BIOMECHANICS OF HUMAN MOVEMENT

SE485	COMBAT MODELING
OR	
Physical Stature/Signal Processing	Choose 3 of 5
CH460	HUMAN ANATOMY
KN355	FUNCTIONAL ANATOMY
KN465	MOTOR CONTROL AND LEARNING
PY355	PHILOSOPHY OF MIND
SE385	DECISION ANALYSIS
OR	
Health Hazards	Choose 3 of 3
EV300	ENVIRONMENTAL SCIENCE
EV396	ENVIRONMENTAL BIOLOGICAL SYS
NE474	RADIOLOGICAL SAFETY
OR	
Team Dynamics	Choose 3 of 4
Cadets choosing this track may only select one BS&L course. They must select two courses from other tracks and outside the BS&L department to satisfy the remaining two CSC course requirement.	
MG379	LEADING TEAMS
MG390	NEGOTIATION FOR LEADERS
PL383	EXPERIMENTAL SOCIAL PSYCHOLOGY
PL396	SNA FOR PUBLIC POLICY
OR	
Language	Choose 3 of 3
Cadets can choose any 3-course language sequence for which they qualify.	
LA371	INTENSIVE INTERMEDIATE ARABIC
LA475	ARABIC RDG/WRTG THRU MEDIA
LA476	MILITARY SPKG/RDG - ARABIC
AND	
Integrative Experience for the Major	Choose 1 of 1
PL490	ENGINEERING PSYCHOLOGY
AND	
Science Depth	
Cadets in this major may take any approved choice to satisfy the Science Depth requirement.	
CH102	GENERAL CHEMISTRY II
CH275	BIOLOGY
PH206	PHYSICS II
PH256	ADVANCED PHYSICS II
STEM Depth	
Cadets in this major must take CY305/355 to satisfy the STEM Depth requirement.	
CY305	CYBER FOUNDATIONS
CY355	CYBER FOUNDATIONS - COMPUTING
AND	
Curriculum Requirements	
This section describes how cadets in this major satisfy various curriculum requirements.	
IT/CYBER Requirements	
Cadets in this major will satisfy the IT/CYBER requirement by successfully completing the IT/CYBER content in the core curriculum and CY305/355.	
CY305	CYBER FOUNDATIONS
CY355	CYBER FOUNDATIONS - COMPUTING
Core Engineering Sequence	
Cadets in this major can choose any approved three-course Core Engineering Sequence.	

Writing-in-the-Major

Cadets in this major will satisfy the Writing Across the Disciplines requirement by successfully completing the writing requirements in the core curriculum and PL386 and PL490.

PL386

EXPERIMENTAL PSYCHOLOGY

PL490

ENGINEERING PSYCHOLOGY

2020 Engineering Psychology Major w/ Honors Curriculum

Code	Short Description	Description	Transcript Description	Req Crse Cnt	Opt Crse Cnt
EPS1H	Engineering Psychology w/ Honors	Engineering Psychology Major w/ Honors	Engineering Psychology w/ Honors	2	0

2020 Engineering Psychology Major w/ Honors Tracks

Subject Area	Description
Complete any one of the following two-course tracks.	
Engineering Psychology Research	Choose 2 of 2
PL497	SEMINAR IN BEHAVIORAL SCI
PL498	ADV STUDY-BEHAVIOR SCI
OR	
Choose 2 courses from a focus area in the major for a study in depth of an aspect of Engineering Psychology. The 2 courses are recommended to come from a focus area. Notwithstanding, the 2 courses can be decided in consultation with an academic counselor to meet specific intellectual interests within the field of Engineering Psychology.	
AND	
Complete the requirements of the major as shown above, attain a minimum APSC of 3.0 in the core curriculum and 3.5 in the major.	

2020 Management Major: Business Management Curriculum

Code	Short Description	Description	Transcript Description	Req Crse Cnt	Opt Crse Cnt
MGB0	Management: Business Management	Management Major: Business Management	Management	8	5

2020 Management Major: Business Management Tracks

Subject Area	Description
Required Courses	Choose 6 of 6

MG380	MARKETING
MG381	INTRODUCTION TO MANAGEMENT
MG382	HUMAN RESOURCE MANAGEMENT
MG395	FUNDAMENTALS OF ACCOUNTING
MG410	MANAGERIAL FINANCE
MG472	INTERNATIONAL MANAGEMENT

AND**Business Management Concentration**

Cadets choosing the Business Management Concentration must take these courses.

Additional Required Courses Choose 1 of 1

MG420	OPERATIONS MANAGEMENT
-------	-----------------------

AND

Additional Electives Choose 2 of 4

MG462 will be added to this list once approved.

MG379	LEADING TEAMS
MG390	NEGOTIATION FOR LEADERS
PL479	LEADING ORGNZS THRU CHANGE

AND**Complementary Support Courses**

Cadets who select the Business Management Concentration must choose 3 CSC courses from this list of 24 (one from each group).

Systems/Analytics Group Choose 1 of 5

EM381	ENGINEERING ECONOMY
EM411	PROJECT MANAGEMENT
EM420	PRODUCTION OPERATIONS MGMT
EM482	SUPPLY CHAIN ENG & INFO MGMT
SE385	DECISION ANALYSIS

AND

Social/Behavioral Group Choose 1 of 10

In order to graduate with honors PL361 must be taken.

EV365	GEOGRAPHY OF GLOBAL CULTURES
PL361	RESEARCH METHODS I
PL371	INTRODUCTORY SOCIOLOGY
PL383	EXPERIMENTAL SOCIAL PSYCHOLOGY
PL384	SOCIOLOGICAL THEORY
PL392	COGNITIVE PSYCHOLOGY
PL398	LEADERSHIP THEORY & DEVEL
PY329	TOPICS IN ETHICS
PY365	ETHICS-MILITARY PROFESSION
SS381	CULTURAL/POLIT ANTHROPOLOGY

AND

Economics Group Choose 1 of 9

DS370	STRATEGY AND POLICY
LW488	BUSINESS LAW
MA367	MATH FOR THE SOCIAL SCIENCES
SS368	ECONOMETRICS I
SS382	MICROECONOMICS
SS388	MACROECONOMICS
SS394	FINANCIAL STATEMENT ANALYSIS
SS470	MONEY AND BANKING
SS494	PRINCIPLES OF FINANCE

AND

Integrative Experience for the Major Choose 1 of 1

MG421	STRATEGIC MANAGEMENT
-------	----------------------

AND**Science Depth**

Cadets in this major may take any approved choice to satisfy the Science Depth requirement.

CH102	GENERAL CHEMISTRY II
CH275	BIOLOGY
PH206	PHYSICS II
PH256	ADVANCED PHYSICS II

STEM Depth

Cadets in this major must take CY305/355 to satisfy the STEM Depth requirement.

CY305	CYBER FOUNDATIONS
CY355	CYBER FOUNDATIONS - COMPUTING

AND**Curriculum Requirements**

This section describes how cadets in this major satisfy various curriculum requirements.

IT/CYBER Requirements

Cadets in this major will satisfy the IT/CYBER requirement by successfully completing the IT/CYBER content in the core curriculum and CY305/355.

CY305	CYBER FOUNDATIONS
CY355	CYBER FOUNDATIONS - COMPUTING

Core Engineering Sequence

Cadets in this major can choose any approved three-course Core Engineering Sequence.

Writing-in-the-Major

Cadets in this major will satisfy the Writing Across the Disciplines requirement by successfully completing the writing requirements in the core curriculum and several courses in the management major including MG472.

MG472	INTERNATIONAL MANAGEMENT
-------	--------------------------

2020 Management Major: Business Management Remarks For Management: Business we chose "Management, Industrial" as the DA Code

2020 Management Major w/ Honors Curriculum

Code	Short Description	Description	Transcript Description	Req Crse Cnt	Opt Crse Cnt
MGB0H	Management w/ Honors	Management Major w/ Honors	Management w/ Honors	2	0

2020 Management Major w/ Honors Tracks

Subject Area	Description
Required Courses	Choose 2 of 2
PL497	SEMINAR IN BEHAVIORAL SCI
PL498	ADV STUDY-BEHAVIOR SCI
AND	

Complete the requirements for the major as shown above, attain a minimum APSC of 3.0 in the core curriculum and 3.5 in the major.

2020 Management Major: Public Administration Curriculum

Code	Short Description	Description	Transcript Description	Req Crse Cnt	Opt Crse Cnt
MGPO	Management: Public Administration	Management Major: Public Administration	Management	7	6

2020 Management Major: Public Administration Tracks

Subject Area	Description
Required Courses	Choose 6 of 6
MG380	MARKETING
MG381	INTRODUCTION TO MANAGEMENT
MG382	HUMAN RESOURCE MANAGEMENT
MG395	FUNDAMENTALS OF ACCOUNTING
MG410	MANAGERIAL FINANCE
MG472	INTERNATIONAL MANAGEMENT
AND	
Public Administration Concentration	
Cadets choosing the Public Administration Concentration must take three of the following courses.	
Additional Electives	Choose 3 of 5
MG462 will be added to this list once approved.	
MG379	LEADING TEAMS
MG390	NEGOTIATION FOR LEADERS
MG420	OPERATIONS MANAGEMENT
PL479	LEADING ORGNZS THRU CHANGE
AND	
Complementary Support Courses	
Cadets who select the Public Administration Concentration must choose 3 CSC courses from this list of 21 (one from each group).	
Politics Group	Choose 1 of 7
LW488	BUSINESS LAW
SS360	POL SCI RESEARCH METHODS
SS370	MASS MEDIA & AMER POLITICS
SS379	LEGISLATIVE POLITICS
SS386	POLITICAL THOUGHT
SS464	HOMELAND SECURITY
SS472	THE AM STATE & THE SOLDIER
AND	
Economics Group	Choose 1 of 7
EM381	ENGINEERING ECONOMY
EV391A	LAND USE PLAN & MGT
MA367	MATH FOR THE SOCIAL SCIENCES
SS380	MANPOWER-LABOR ECONOMICS
SS387	PUBLIC FINANCE
SS470	MONEY AND BANKING
SS477	ECONOMICS OF NATIONAL SECURITY

AND	
Social/Behavioral Group	Choose 1 of 7
PL361	RESEARCH METHODS I
PL363	QUALITATIVE RESEARCH METHODS
PL371	INTRODUCTORY SOCIOLOGY
PL377	SOCIAL INEQUALITY
PL383	EXPERIMENTAL SOCIAL PSYCHOLOGY
PL393	CRIMINOLOGY-CRIM JUST SYSTM
PL476	EDUCATIONAL PSYCHOLOGY
AND	
Integrative Experience for the Major	
	Choose 1 of 1
MG421	STRATEGIC MANAGEMENT
AND	
Science Depth	
Cadets in this major may take any approved choice to satisfy the Science Depth requirement.	
CH102	GENERAL CHEMISTRY II
CH275	BIOLOGY
PH206	PHYSICS II
PH256	ADVANCED PHYSICS II
STEM Depth	
Cadets in this major must take CY305/355 to satisfy the STEM Depth requirement.	
CY305	CYBER FOUNDATIONS
CY355	CYBER FOUNDATIONS - COMPUTING
AND	
Curriculum Requirements	
This section describes how cadets in this major satisfy various curriculum requirements.	
IT/CYBER Requirements	
Cadets in this major will satisfy the IT/CYBER requirement by successfully completing the IT/CYBER content in the core curriculum and CY305/355.	
CY305	CYBER FOUNDATIONS
CY355	CYBER FOUNDATIONS - COMPUTING
Core Engineering Sequence	
Cadets in this major can choose any approved three-course Core Engineering Sequence.	
Writing-in-the-Major	
Cadets in this major will satisfy the Writing Across the Disciplines requirement by successfully completing the writing requirements in the core curriculum and several courses in the management major including MG472.	
MG472	INTERNATIONAL MANAGEMENT

2020 Management Major: Public Administration Remarks For the Management Major: Public Administration Concentration, we used the DA Code, "Management, General".

2020 Management Major w/ Honors Curriculum

CVN1H	Civil Engineering w/ Honors	Civil Engineering Major w/ Honors	Civil Engineering w/ Honors	0	1

2020 Civil Engineering Major w/ Honors Tracks

Subject Area	Description
--------------	-------------

Coursework Requirements

Complete 42 total academic courses, which requires one additional course than the requirements for the major as shown above. The additional course can be selected from the Math and Basic Science Electives, the Civil Engineering Electives, or as approved by the Civil Engineering Program Director.

AND**Requirements for Graduation**

To graduate with Individual Honors a cadet must submit an individual paper or report which can be any of the following:

(1) A project report for an individual CE489 Advanced Study Project.

(2) An individual paper written for a regional or national student paper competition.

(3) An individual paper, suitable for publication or presentation at a professional conference, drawn from one of the following sources:

..... A CE489 Advanced Study Project.

..... A Senior Design Project.

..... An engineering-related Academic Individual Advanced Development (AIAD) assignment.

..... An experience relevant to the cadet's program of study and approved by the associated Program Director.

Cadets desiring to aspire to Individual Honors will coordinate with their Department Academic Counselor to develop a plan no later than the end of second class year for completing the individual paper or report. The Department Academic Counselor will certify the completion of the significant individual paper component of the Academic Honors Program.

AND

Grade Requirements

Complete the requirements of the major as shown above, and attain an APSC of at least 3.0 in the core curriculum and an APSC of at least 3.5 in the major.

MA466	ABSTRACT ALGEBRA
MA476	MATHEMATICAL STATISTICS

AND**Integrative Experience for the Major**

Choose 2 of 2

XE401	INTEGRATIVE SYSTEM DESIGN I
XE402	INTEGRATIVE SYSTEM DESIGN II

AND**Science Depth**

Cadets in this major may take any of the approved options to satisfy the Science Depth requirement.

CH102	GENERAL CHEMISTRY II
CH275	BIOLOGY
PH206	PHYSICS II
PH256	ADVANCED PHYSICS II

STEM Depth

Cadets in this major will satisfy the STEM Depth requirement by taking CY305/355.

CY305	CYBER FOUNDATIONS
CY355	CYBER FOUNDATIONS - COMPUTING

AND**Curriculum Requirements**

This section describes how cadets in this major satisfy various curriculum requirements.

IT/CYBER Requirement

Cadets in this major will satisfy the IT/CYBER requirement by successfully completing the IT/CYBER content in the core curriculum and CY305/355.

CY305	CYBER FOUNDATIONS
CY355	CYBER FOUNDATIONS - COMPUTING

Core Engineering Sequence

Cadets in this major will satisfy the core engineering requirement as an ABET accredited engineering major.

Writing-in-the-Major

Cadets in this major will satisfy the Writing Across the Disciplines requirement by successfully completing the writing requirements in the core curriculum and CS400.

CS489A	ADV IND STUDY COMPUTER SCI
CS490	COMPUTR SCI SUMMER RESEARCH
EE487	EMBEDDED SYSTEMS DEVELOPMENT
XE492	DISRUPTIVE INNOVATIONS
AND	
Research Requirement	
Consists of both a written document and an oral presentation of a depth and quality suitable for submission to a professional conference.	
The research will normally be accomplished as an extension of a project begun in the CS Honors Elective. The research must reflect individual effort, although it may build on an existing group project (especially the context of XE401/402).	
Neither the project/research work nor the resulting paper and presentation need be completed during the same semester they are begun, but must be complete by the end of the TEE period of semester 8.	
The project/research must be conducted under the supervision/mentorship of a member of the faculty, normally the instructor of the corresponding course. The final written document and oral presentation must be approved by both the research mentor and the Computer Science Program Director.	
AND	
Grade Requirements	
Complete the requirements of the major as shown above, attain an APSC of at least 3.0 in the core curriculum and an APSC of at least 3.5 in the major.

CYB1N	Cyber Security Minor	Cyber Security Minor	Cyber Security Minor	0	5

2020 Cyber Security Minor Tracks

Subject Area	Description
--------------	-------------

Cyber Foundations Course Track

A total of three courses in the overall program of study must be unique to the minor. You must take both courses in the Technical Track. Wherever possible, these courses may be double-counted, such as for cadets pursuing the Cyber Three-Course Engineering Sequence, or EECS, Math, and Systems majors. You must also take at least one course from the Non-Technical Track. Other courses from the Non-Technical Track may be taken as Cyber Application Electives.

Technical Track

Choose 2 of 2

CY350

NETWORK ENGR & MGT

CY450

CYBER SECURITY ENGINEERING

AND

Non-Technical Track

Choose 1 of 3

IT460

CYBER POLICY, STRATEGY & OPNS

LW462

CYBER LAW

PY326

CYBER ETHICS

AND

Cyber Application Electives

Choose 2 of 35

You must select two courses as electives, focusing on areas where cyber is applied to specific domains or learning about thought processes/tools from other disciplines that can be relevant to cyber security. Cyber requires a balance of both technical and non-technical knowledge and skills, as well as application. Cadets may achieve this in any way practical.

2020 Electrical Engineering Major w/ Honors Tracks

Subject Area Description

Required Course

Choose an additional elective from one of the 16 EECS electives listed above.

AND

Participate in either an undergraduate research experience or report on their engineering design experience.

Research-focused programs will typically include enrollment in the Advanced Individual Study in Electrical Engineering, EE489, EE489A, EE490, or XE492 the grade for which will be based on a research paper suitable for submission to a conference.

The engineering design experience can result from participation in the Integrative System Design I and II series. The requirement for the engineering paper will be in addition to the XE401-XE402 coursework.

AND

Grade Requirements

Cadets must complete the requirements of the major as shown above, attain an APSC of at least 3.0 in the core curriculum and an APSC of at least 3.5 in the major.

PY395	SPECIAL TOPICS IN PHILOSOPHY
PY495	INDEPENDENT STUDY: PHILOSOPHY
XH400	INTERCOLLEGIATE SEMINAR
AND	
Complementary Support Courses	
Cadets chose a track and then pick three courses from the track. Cadets may pick outside of their chosen track with Program Director approval.	
History Track	Choose 3 of 7
HI337	CHINA-C. KINGDOM TO COMM RULE
HI339	THE MODERN MIDDLE EAST
HI345	MODERN AFRICA
HI346	MODERN SOUTH ASIA
HI347	ASIAN WARFARE AND POLITICS
HI364	MODERN WESTERN EUROPE
HI367	IMPERIAL AND SOVIET RUSSIA
OR	
Law Track	Choose 3 of 6
HI344	MODERN DIPLOMACY
HI385	WAR & ITS THEORISTS
LW410	COMPARATIVE LEGAL SYSTEMS
LW461	CIVIL RIGHTS AND THE LAW
LW462	CYBER LAW
LW472	CRIMINAL LAW
OR	
Psychology Track	Choose 3 of 6
HI461	TOPICS IN GENDER HISTORY
PL376	PERSONALITY & AB PSYCH
PL377	SOCIAL INEQUALITY
PL384	SOCIOLOGICAL THEORY
PL392	COGNITIVE PSYCHOLOGY
PL393	CRIMINOLOGY-CRIM JUST SYSTM
OR	
Literature Track	Choose 3 of 26

Cadets who select this track may also choose other courses from the English Major's catalogue.

EN300	LITERARY METHODOLOGIES
LG485	SURVEY OF GERMAN LIT I
LG486	SURVEY OF GERMAN LIT II
LG492	20TH & 21ST CENTURY GERMANY
LN380	NATURE OF MODERN LANGUAGES

OR

Strategic Studies Track

Choose 3 of 6

DS455	COMPARATIVE DEFENSE POLICY
DS460	INSURGENCY & COUNTERINSURGENCY
EV487	ENVIRONMENTAL SECURITY
HI351	ADV HISTORY OF MILITARY ART
SS465	TERRORISM: NEW CHALLENGES
XH467	WINNING THE PEACE

OR

Politics Track

Choose 3 of 6

HI347	ASIAN WARFARE AND POLITICS
SS366	COMPARATIVE POLITICS
SS386	POLITICAL THOUGHT
SS465	TERRORISM: NEW CHALLENGES
XH415	GENOCIDE AND ETHNIC CLEANSING
XH467	WINNING THE PEACE

OR

Cultural Studies Track

Choose 3 of 13

Cadets who select this track may also choose courses from D/GENE's list of regional geography courses.

EV371	GEOGRAPHY OF RUSSIA
HI391	WORLD RELIGIONS
HI463	RACE, ETHNICITY, NATION
LG483	GERMAN CIVILIZATION I
LG484	GERMAN CIVILIZATION II
SS381	CULTURAL/POLIT ANTHROPOLOGY
XH405	THE HOLOCAUST AND ITS LEGACY

AND

Integrative Experience for the Major

Choose 1 of 1

PY400	SENIOR SEMINAR IN PHILOSOPHY
-------	------------------------------

AND

Science Depth

Cadets in this major may take any approved choice to satisfy the Science Depth requirement.

CH102	GENERAL CHEMISTRY II
CH275	BIOLOGY
PH206	PHYSICS II
PH256	ADVANCED PHYSICS II

STEM Depth

Cadets in this major must take CY305/355 to satisfy the STEM Depth requirement.

CY305	CYBER FOUNDATIONS
CY355	CYBER FOUNDATIONS - COMPUTING

AND

Curriculum Requirements

This section describes how cadets in this major satisfy various curriculum requirements.

IT/CYBER Requirements

Cadets in this major will satisfy the IT/CYBER requirement by successfully completing the IT/CYBER content in the core curriculum and CY305/355.

CY305	CYBER FOUNDATIONS
-------	-------------------

CY355 CYBER FOUNDATIONS - COMPUTING

Core Engineering Sequence

Cadets in this major can choose any approved three-course Core Engineering Sequence.

Writing-in-the-Major

Cadets in this major will satisfy the Writing Across the Disciplines requirement by successfully completing the writing requirements in the core curriculum and several courses in the philosophy major including PY300 and PY400.

PY300 PHILOSOPHICAL METHODS

2020 Regional Studies Minor - East Asia Tracks

Subject Area	Description
	The course of instruction for the Regional Studies Minor will consist of five courses that form a coherent, interdisciplinary study of a geographical region. Three of the courses must be in a foreign language at the 300 or 400 level. The other two courses must be regional or comparative electives. For any Single or Dual Foreign Language majors choosing this minor, exceptions can be made to the language requirement if all possible language courses for the Cadets' chosen region have been completed as part of the major. Cadets who choose the Foreign Area Studies: East Asia (FSA1) major are not allowed to choose this minor.
Language Courses	
	Take three courses at the 300-level (or higher) in the following language. Any courses taken to fulfill the requirements for this minor are eligible for double-counting practices, including any that are taken to fulfill core, major or minor curricular components. Three courses must be unique to this minor.

2020 Regional Studies Minor - Middle East Curriculum

Code	Short Description	Description	Transcript Description	Req Crse Cnt	Opt Crse Cnt
RSM0N	Regional Studies Minor - Middle East	Regional Studies Minor - Middle East	Regional Studies Minor - Middle East	0	5

2020 Regional Studies Minor - Middle East Tracks

Subject Area Description

The course of instruction for the Regional Studies Minor will consist of five courses that form a coherent, interdisciplinary study of a geographical region. Three of the courses must be in a foreign language at the 300 or 400 level. The other two courses must be regional or comparative electives. For any Single or Dual Foreign Language majors choosing this minor, exceptions can be made to the language requirement if all possible language courses for the Cadets' chosen region have been completed as part of the major. Cadets who choose the Foreign Area Studies: Middle East (FSM1) major are not allowed to choose this minor.

Language Courses

Take three courses at the 300-level (or higher) in one of the following languages. Any courses taken to fulfill the requirements for this minor are eligible for double-counting practices, including any that are taken to fulfill core, major or minor curricular components. Three courses must be unique to this minor.

Arabic	Choose 3 of 11

Integrative Experience for the Major Choose 1 of 1

EV487	ENVIRONMENTAL SECURITY
-------	------------------------

AND**Science Depth**

Cadets in this major must take CH102 to satisfy the Science Depth requirement.

CH102	GENERAL CHEMISTRY II
-------	----------------------

STEM Depth

Cadets in this major must take CY305/355 to satisfy the STEM Depth requirement.

CY305	CYBER FOUNDATIONS
CY355	CYBER FOUNDATIONS - COMPUTING

AND**Curriculum Requirements**

This section describes how cadets in this major satisfy various curriculum requirements.

IT/CYBER Requirement

Cadets in this major will satisfy the IT/CYBER requirement by successfully completing the IT/CYBER content in the core curriculum and CY305/355.

CY305	CYBER FOUNDATIONS
CY355	CYBER FOUNDATIONS - COMPUTING

Core Engineering Sequence

Cadets in this major are directed to take the Environmental Engineering sequence to support their major.

EV301	ENV SCIENCE FOR ENGR & SCIEN
EV350	ENVIRONMNTL ENGR TECHNOLOGIES
EV450	ENV ENG FOR COMMUNITY DEVELOP

Writing-in-the-Major

Cadets in this major will satisfy the Writing Across the Disciplines requirement by successfully completing the writing requirements in the core curriculum and the writing requirements of EV301.

EV301	ENV SCIENCE FOR ENGR & SCIEN

AND**Complementary Support Courses** Choose 3 of 44

For Human-Environment Track Geographers, choosing three CSCs is a 2-step process. First, in conjunction with a DAC, a Cadet narrows his/her interest to three of the five Focus Area Categories (Physical Science, Regional, Global, Philosophy/Sociology, Mathematical/Economic). Then, a Cadet chooses one course from each of those three selected Focus Areas that are appropriate for his/her interests (see DAC for a listing of courses associated with each focus area). The exception to this rule is if a pre-requisite is needed. In that case, both the prerequisite and the desired course can be selected from the same focus area.

Complementary Support Courses	
For Human Track Geographers, choosing three CSCs is a 2-step process. First, narrow your interest to one of the twelve focus areas, such as Asia or Cultural Geography, that are listed below. Then, work with your DAC to choose three courses from that focus area that are appropriate for your interests. All pre-requisites must be completed before courses may be taken.	
Cultural Geography	Choose 3 of 33
EN300	LITERARY METHODOLOGIES
EN321	AMERICAN LITERATURE I
EN322	AMERICAN LITERATURE II
EN331	BRITISH LITERATURE I
EN332	BRITISH LITERATURE II
EN351	WORLD LITERATURE

EN352	POWER AND DIFFERENCE
EN355	CRITICISM COLLOQUIUM
EN362	FILM AND FILM THEORY
EN364	DRAMA
EN370	SHAKESPEARE
HI391	WORLD RELIGIONS
HI398	SOCIETY & CULTURE IN AMER HIST
HI462	THE HISTORY OF INNOVATION
HI463	RACE, ETHNICITY, NATION
LX300	3RD SEMESTER FOREIGN LANG
LX400	4TH SEMESTER FOREIGN LANG
MA376	APPLIED STATISTICS
PL371	INTRODUCTORY SOCIOLOGY
PY300	PHILOSOPHICAL METHODS
PY305	LOGICAL REASONING
PY325	MILITARY ETHICS
PY329	TOPICS IN ETHICS
PY330	POLITICAL PHILOSOPHY
PY345	PHILOSOPHY OF RELIGION
PY350	PHILOSOPHY OF SCIENCE
PY355	PHILOSOPHY OF MIND
PY360	ANCIENT PHILOSOPHY
PY370	17TH & 18TH CENTURY PHILOSOPHY
PY375	KANT & 19TH CENTURY PHILOSOPHY
SS381	CULTURAL/POLIT ANTHROPOLOGY
XH405	THE HOLOCAUST AND ITS LEGACY
XH415	GENOCIDE AND ETHNIC CLEANSING

OR**East, South and Southeast Asia**

Choose 3 of 22

LX300 or LX400 (or even LX200) should be any Chinese, French, or Portuguese language course for which the cadet qualifies.

DS455	COMPARATIVE DEFENSE POLICY
EN300	LITERARY METHODOLOGIES
EN351	WORLD LITERATURE
HI337	CHINA-C. KINGDOM TO COMM RULE
HI346	MODERN SOUTH ASIA
HI347	ASIAN WARFARE AND POLITICS
HI359	ERA OF THE SECOND WORLD WAR
HI391	WORLD RELIGIONS
LW410	COMPARATIVE LEGAL SYSTEMS
LW481	INTERNATIONAL LAW
LX300	3RD SEMESTER FOREIGN LANG
LX400	4TH SEMESTER FOREIGN LANG
MA376	APPLIED STATISTICS
SS366	COMPARATIVE POLITICS
SS372	POLITICS AND GOV OF CHINA
SS374	POL & GOV OF KOREAS & JAPAN
SS378	ADV INTL RELATIONS THEORY
SS381	CULTURAL/POLIT ANTHROPOLOGY
SS385	HISTORY OF ECONOMICS
SS465	TERRORISM: NEW CHALLENGES
SS486	INTERNATIONAL SECURITY SEMINAR
XH415	GENOCIDE AND ETHNIC CLEANSING

OR**Europe**

Choose 3 of 33

LX300 or LX400 (or even LX200) should be any French, German, Portuguese, Spanish, or Russian language course for which the cadet qualifies.	
DS455	COMPARATIVE DEFENSE POLICY
EN331	BRITISH LITERATURE I
EN332	BRITISH LITERATURE II
EN352	POWER AND DIFFERENCE
HI338	WARFARE IN AGE OF REVOLUTIONS
HI341	THE AGE OF EXPLORATION
HI342	THE BRITISH ISLES SINCE 1688
HI343	MODERN GERMANY
HI359	ERA OF THE SECOND WORLD WAR
HI361	MEDIEVAL EUROPE
HI362	POLITICS/SOC-EARLY MOD EURO
HI364	MODERN WESTERN EUROPE
HI365	THE ANCIENT WORLD
HI367	IMPERIAL AND SOVIET RUSSIA
HI368	MOD CENTRAL & E. EUR,1896-1989
HI370	ANCIENT & MEDIEVAL WARFARE
HI376	EARLY MODERN WARFARE
HI391	WORLD RELIGIONS
LW410	COMPARATIVE LEGAL SYSTEMS
LW481	INTERNATIONAL LAW

AND**Complementary Support Courses**

Cadets in this major will fulfill the Complementary Support Course requirement by taking a third semester in a foreign language and two additional choices.

AND**Complementary Support Course - Foreign Language**

Choose 1 of 1

LX300

3RD SEMESTER FOREIGN LANG

AND**Complementary Support Courses - Electives**

Choose 2 of 71

Depending on their particular research interests, cadets will consult with their academic counselor to choose their final two CSCs. The courses found on the following list of courses could all aid in an historian's research abilities and methodologies, but a cadet may deviate from this list as long as they can justify why using a course not found on it will aid them in their historical study. In addition, a cadet may choose to fulfill this requirement by taking two additional courses in their chosen foreign language. This includes the DFL courses on regional civilization (example: LA483 Arab Civilization I), and regional literature (example: LF485 Survey of French Literature I).

Cadets in this major must take CY305/355 to satisfy the STEM Depth requirement.

CY305	CYBER FOUNDATIONS
CY355	CYBER FOUNDATIONS - COMPUTING

AND**Curriculum Requirements**

This section describes how cadets in this major satisfy various curriculum requirements.

AND**IT/CYBER Requirement**

Cadets in this major will satisfy the IT/CYBER requirement by successfully completing the IT/CYBER content in the core curriculum and CY305/355.

CY305	CYBER FOUNDATIONS
-------	-------------------

CY355	CYBER FOUNDATIONS - COMPUTING
AND	
Core Engineering Sequence	
Cadets in this major can choose any approved three-course Core Engineering Sequence.	
AND	
Writing-in-the-Major	
Cadets in this major will satisfy the Writing Across the Disciplines requirement by successfully completing the writing requirements in the core curriculum and several history courses including HI498.	
HI498	COLLOQUIUM IN HISTORY

2020 History Major: United States w/ Thesis (Honors) Tracks

Subject Area	Description
Elective	
Take one additional elective from the History Department catalogue. For cadets in the honors program at least one of their electives must be at the 400 level (HI4XX). This 400 level elective is in addition to HI498 and HI499.	
AND	
Required Course	Choose 1 of 1
HI499	SENIOR THESIS
AND	
Grade Requirement	
Complete the requirements of the major as shown above, and attain an APSC of at least 3.0 in the core curriculum and an APSC of at least 3.5 in the major. Earn an A- in HI499.

SS465	TERRORISM: NEW CHALLENGES
XH467	WINNING THE PEACE

AND**Integration Elective**

Choose 1 of 11

All cadets minoring in network science must complete a one-semester independent study project that satisfies the four modules outlined in the minor's learning outcomes. Specifically, these modules are (1) the formulation of a research question, (2) the formulation and implementation of a research design, (3) the presentation of results from completed research, and (4) the completion of a reflection paper describing the cadet's experience in the minor. See the description of the minor for additional information on these modules. The Director of the West Point Network Science Center and Chair of Network Science will validate-in writing-the Cadet's plan to complete the four modules in accordance with the spirit of Network Science program guidance.

2020 Nuclear Engineering Major w/ Honors Tracks

Subject Area	Description
Required Course	Choose 1 of 1
NE489	ADV IND STDY NUCLEAR ENGNRG
AND	
Research/Writing Requirement	
Cadets must demonstrate excellence by writing a paper based upon the results of the NE489, an AIAD, or their integrative experience that is suitable for submission to an undergraduate level journal. Present this paper at, for example, USMA Project's Day, a PaNE colloquium, or an ANS Student Conference. The Head of the Department of Physics and Nuclear Engineering will determine whether the quality of the work completed is sufficient to merit successful completion of the honors program.	
AND	
Grade Requirement	
Attain a minimum APSC of 3.0 in the core curriculum and 3.5 in the major.

Description

Cadets enrolled in the minor must take four courses: NE300, NE355, NE452, and either NE361 or NE474 (no course substitution authorized). Two courses may be substituted for NE350, NE450, and either NE361 or NE474 at the discretion of the Head of the Department of Physics and Nuclear Engineering. Course substitutes must include significant content of basic science (physical, biological, and chemical), mathematics, or engineering science and engineering topics.

Choose 3 of 3

(no substitution)

NE300	FUNDAMENTALS OF NUCLEAR ENGR
NE355	NUCLEAR REACTOR ENGINEERING
NE452	INSTRUMENTATION AND SHIELDING

AND	
Required Space Science Related Discipline Electives	
Choose one of the following Space and Missile Defense (SMD) critical areas of interest; Space Science, Missile Defense, Directed Energy, Cyber Operations, and Policy Development from which to select your two electives for this minor. These related discipline electives are further grouped by root electives that support areas of interest that are inherent in particular majors. These groupings allow the student to synthesize and ponder how to apply these respective electives to SMD critical areas of interest as well as space exploration. Cadets choosing this minor must meet all prerequisites for the courses chosen. Cadets majoring in Space Science are not eligible for this minor.

2020 Political Science Major: American Politics w/ Thesis (Honors) Tracks

Subject Area	Description
Program Requirements	
The Political Science Honors Program, available to cadets concentrating in American Politics, Comparative Politics and International Relations, will consist of a two-course sequence, in addition to the requirements of the major, culminating in the cadet writing a thesis and defending it in front of a thesis committee.	

Cadets aspiring to graduate with a Political Science major with Honors will take an additional elective course to increase the depth of study in their major. They will then take the integrative experience (SS480, SS483 or SS486) in the fall of their Firstie year as part of a two-course thesis sequence, rather than the spring semester when cadets enrolled in the regular political science majors will normally take it. Both semesters of the integrative experience will include the same in-depth study of topics relevant to each political science major; only the analytical requirements will differ between semesters. In the spring semester, political science students will write and present an in-depth research paper that brings together theoretical perspectives acquired during their earlier studies. In the fall semester, political science honors students will complete the literature review, a full sentence outline with annotated bibliography, and introductory chapter of their theses, present their preliminary findings to their class, and finalize the selection of a three-member thesis committee.

Choose 1 of 1

Honors students will continue work on their theses in SS498 Senior Thesis in the Social Sciences, taken in the spring of the first class year when they will finish writing and defend their theses. SS498 Senior Thesis in the Social Sciences consists of independent study and weekly meetings between individual cadets and their thesis advisors. Cadets will be responsible for coordinating meetings with their advisor. Course requirements will include a 30-50 page thesis submitted NLT lesson 35, and a defense of the thesis before their entire committee during the final two weeks of classes. Upon completion of the thesis and defense, the thesis committee recommends a final grade to the thesis advisor.

SS498

SENIOR THESIS: SOCIAL SCIENCES

AND

Grade Requirements

Complete the requirements of the major as shown above, and attain an APSC of at least 3.0 in the core curriculum and an APSC of at least 3.5 in the major.

2020 Political Science Major: International Relations w/ Thesis (Honors) Tracks

Subject Area	Description
Program Requirements	
	The Political Science Honors Program, available to cadets concentrating in American Politics, Comparative Politics and International Relations, will consist of a two-course sequence, in addition to the requirements of the major, culminating in the cadet writing a thesis and defending it in front of a thesis committee.
	Cadets aspiring to graduate with a Political Science major with Honors will take an additional elective course to increase the depth of study in their major. They will then take the integrative experience (SS480, SS483 or SS486) in the fall of their Firstie year as part of a two-course thesis sequence, rather than the spring semester when cadets enrolled in the regular political science majors will normally take it. Both semesters of the integrative experience will include the same in-depth study of topics relevant to each political science major; only the analytical requirements will differ between semesters. In the spring semester, political science students will write and present an in-depth research paper that brings together theoretical perspectives acquired during their earlier studies. In the fall semester, political science honors students will complete the literature review, a full sentence outline with annotated bibliography, and introductory chapter of their theses, present their preliminary findings to their class, and finalize the selection of a three-member thesis committee.
	Choose 1 of 1
	Honors students will continue work on their theses in SS498 Senior Thesis in the Social Sciences, taken in the spring of the first class year when they will finish writing and defend their theses. SS498 Senior Thesis in the Social Sciences consists of independent study and weekly meetings between individual cadets and their thesis advisors. Cadets will be responsible for coordinating meetings with their advisor. Course requirements will include a 30-50 page thesis submitted NLT lesson 35, and a defense of the thesis before their entire committee during the final two weeks of classes. Upon completion of the thesis and defense, the thesis committee recommends a final grade to the thesis advisor.
SS498	SENIOR THESIS: SOCIAL SCIENCES
AND	
Grade Requirements	
	Complete the requirements of the major as shown above, and attain an APSC of at least 3.0 in the core curriculum and an APSC of at least 3.5 in the major.

Curriculum Requirements	

This section describes how cadets in this major satisfy various curriculum requirements.

IT/CYBER Requirements

Cadets in this major will satisfy the IT/CYBER requirement by successfully completing the IT/CYBER content in the core curriculum and CY305/355.

CY305

CYBER FOUNDATIONS

CY355

CYBER FOUNDATIONS - COMPUTING

Core Engineering Sequence

Cadets in this major satisfy the core engineering sequence requirement by being an ABET accredited engineering major.

Writing-in-the-Major

Cadets in this major will satisfy the Writing Across the Disciplines requirement by successfully completing the writing requirements in the core curriculum and several courses in the engineering management major including SE401.

2020 Engineering Management Major w/ Honors Curriculum

2020 Engineering Management Major w/ Honors Tracks

Subject Area	Description
Required Course	Choose 1 of 1
SE491	RSRCH PROJ IN SYS ENG/ENG MGMT
AND	
Individual Research Requirement	
The individual research requirement consists of a written document, suitable for presentation or publication at an undergraduate conference. The research will be affiliated with SE491. Cadets will choose a topic of interest stemming from an AIAD, capstone project or from some other 400 level course in the major. The Engineering Management Program Director will approve the research topics. Research must reflect individual effort. A faculty member will be assigned to provide supervision and mentorship throughout the research effort. Cadets will complete an abstract and a paper suitable for presentation at an undergraduate conference. The final document will be approved by both the faculty research mentor and the program director.	
AND	
Grade Requirement	
Complete the requirements of the major as shown above and attain a minimum APSC of 3.0 in the core curriculum and 3.5 in the major. (SE301, EM384, and EM411 will count as CES courses against core curriculum APSC Calculation).

Cadets in this major may choose any approved Science Depth course.

CH102	GENERAL CHEMISTRY II
CH275	BIOLOGY
PH206	PHYSICS II
PH256	ADVANCED PHYSICS II

STEM Depth

Cadets in this major must take CY305/355 to satisfy the STEM Depth requirement.

CY305	CYBER FOUNDATIONS
CY355	CYBER FOUNDATIONS - COMPUTING

AND**Curriculum Requirements**

This section describes how cadets in this major satisfy various curriculum requirements.

IT/CYBER Requirements

Cadets in this major will satisfy the IT/CYBER requirement by successfully completing the IT/CYBER content in the core curriculum and CY305/355.

CY305 CYBER FOUNDATIONS

CY355 CYBER FOUNDATIONS - COMPUTING

Core Engineering Sequence

The SDS major achieves the CES guidelines with existing courses of the major. The courses are SE301, EM384, and SE402.

EM384 ANYL METH FOR ENGR MANAGEMENT

SE301 FNDRN ENGIN DSGN & SYS MGMT

SE402 SYSTEMS DESIGN & MANAGEMENT I

Writing-in-the-Major

Cadets in this major will satisfy the Writing Across the Disciplines requirement by successfully completing the writing requirements in the core curriculum and several courses in the SDS major including SM484.

SM484 SYSTEM DYNAMICS SIMULATION

2020 Systems and Decision Sciences Major w/ Honors Curriculum

Code	Short Description	Description	Transcript Description	Req Crse Cnt	Opt Crse Cnt
SDS0H	Systems and Decision Sciences w/ Honors	Systems and Decision Sciences Major w/ Honors	Systems and Decision Sciences w/ Honors	1	1

2020 Systems and Decision Sciences Major w/ Honors Tracks**Subject Area****Description**

In addition to courses required for completion of the SDS Major, choose SE491 and one or more of any courses not already taken.

Elective Course

Take one additional 300- or 400-level elective course.

Research Course

Choose 1 of 1

SE491

RSRCH PROJ IN SYS ENG/ENG MGMT

AND

The individual research requirement consists of a written document, suitable for presentation or publication at an undergraduate conference.

The research will be affiliated with a 400 level course in the Cadet's major. Cadets will choose a topic of interest stemming from their capstone project or from some other 400 level course in the major. Program directors will approve the research topics.

Research must reflect individual effort.

A faculty member will be assigned to provide supervision and mentorship throughout the research effort.

Cadets will complete an abstract and a paper suitable for presentation at an undergraduate conference. The final document will be approved by both the faculty research mentor and the program director.

AND

Grade Requirements

Complete the requirements of the major shown above, attain an APSC of at least 3.0 in the core curriculum, and at least a 3.5 in the major.

Complementary Support Courses - Elective Tracks	
Choose one of the following elective tracks: General Engineering, Mechanical Robotic Systems, Aeronautical System, Power Energy Systems, Infrastructure Systems, Nuclear Systems, Cyber Security Systems, Digital Communication Systems, Electrical Robotic Systems, Environmental Systems, Geographic Information Systems, Software Systems Development, Artificial Intelligence, Web Application System Development, Electrical Systems, Human Factor Systems, and Student Engineering Systems Design. The elective tracks consist of 5 courses that provide depth in a chosen engineering domain discipline outside the major. Students have the flexibility to design their own Elective Track under the Student Engineering Systems Design Track as long as they fulfill the minimum required Engineering Technology credit-hours.	
Student Engineering Systems Design	Choose 5 of 5
Choose 5 courses, one of which will be either CY305 or EE301 in order to fulfill the IT/Cyber requirements. Another will be MC300. At least 2 of the remaining 3 courses must be outside the department, have an engineering domain theme, and be approved by the Program Director. The designed track must fulfill the minimum amount of Engineering Technology credit-hours.
