## CH365 CHEMICAL ENGINEERING THERMODYNAMICS

Lesson 18: Temperature Dependence of Heat of Formation

**Read:** Section 4.6, pp. 153-156

**Problems:** 4.22, 4.28, 4.71, 4.83.

## **Objectives:**

- 1. Extend calculations of heats of reaction to nonstandard temperatures.
- 2. Be able to apply the equations for IDCPH and MDCPH to chemical reactions.
- 3. Read and be able to follow the derivation of the integrated forms (IDCPH and MDCPH).

**Notes:**
