MEMORANDUM THRU COL Corey M. James, Professor USMA and Department Head,
Chemical and Biological Science and Engineering, West Point, NY 10996

FOR RECORD

SUBJECT: Chemical Engineering Majors Selection Criterion, Class Year 2029 and beyond

1. Due to the growing cadet interest in the chemical engineering major and due to faculty resourcing constraints for teaching 2 sections of each major course, the chemical engineering program will be limiting the major selection acceptances to 30 cadets. For example, this continued growth in the major resulted in the largest graduating class of chemical engineers to date with 32 cadets graduating and commissioning in the Class of 2025.

2. During the major selection process, the Program Director and the Deputy Program Director will assess acceptance of cadets into the Chemical Engineering Major (CEN2) through the following criterion in the order:

a. Academic Program Score (APSC) with emphasis placed on Science and STEM Depth Courses

b. Validations and Performance in General Chemistry (CH101 and/or CH102)

c. Validations and Performance in Mathematics (MA204 and/or MA205)

d. Validations and Performance in Physics (PH201 and/or PH202)

3. The point of contact for this document is the undersigned at
enoch.nagelli@westpoint.edu or 845-938-3904.
