Notes:

1. Military development (MD) courses are not in Table 5-1 because they are zero-credit courses, but they are included here because they appear in the transcript. These are military grades given by the tactical officers based on observations and behaviors and are not formal courses.
2. The total credit hours in this sheet match AMS. The 9.0 credit hour difference between AMS and this sheet is due to validations (see note at the bottom of the back side of the transcript).
